GORDON

INTERIOR SPECIALTIES DIVISION

ALUMA•VAULT

Curved, freeformed or vaulted, endless design options are yours with ALUMA•VAULT ceiling systems.

ALUMA•VAULT is a 3-dimensional, ceiling that incorporates flexible panels into a curved suspension. This unique product utilizes the crisp look of extruded aluminum to create smooth runs of curved or undulating ceilings.

A variety of ALUMA•VAULT systems are available, each offering its own unique features.

Gordon offers multiple perforation and custom embossing options. Select one of our many standard designs or let's work together to create a signature design.

Several panel sizes, up to 5' x 10', can work to compliment your design.

Trim your creation with many perimeter options. Most perimeter trims can be arched or reverse-arched to follow the shape of the ceiling.

ALUMA•VAULT can also be designed to incorporate functional elements such as lighting, sprinklers and air distribution.

Finally, you can finish your ALUMA•VAULT system in your choice of colors. Custom color matching capability as well as multiple in-house paint lines offer the flexibility of endless color options. Gordon offers the skills and craftsmanship necessary to make your concept a reality. If you can dream it – we can build it.

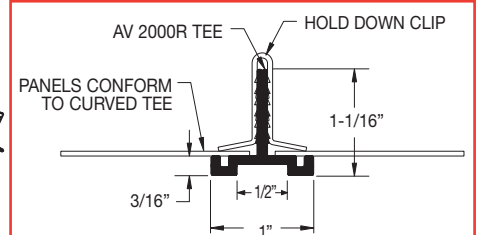

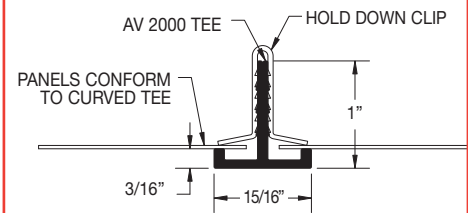

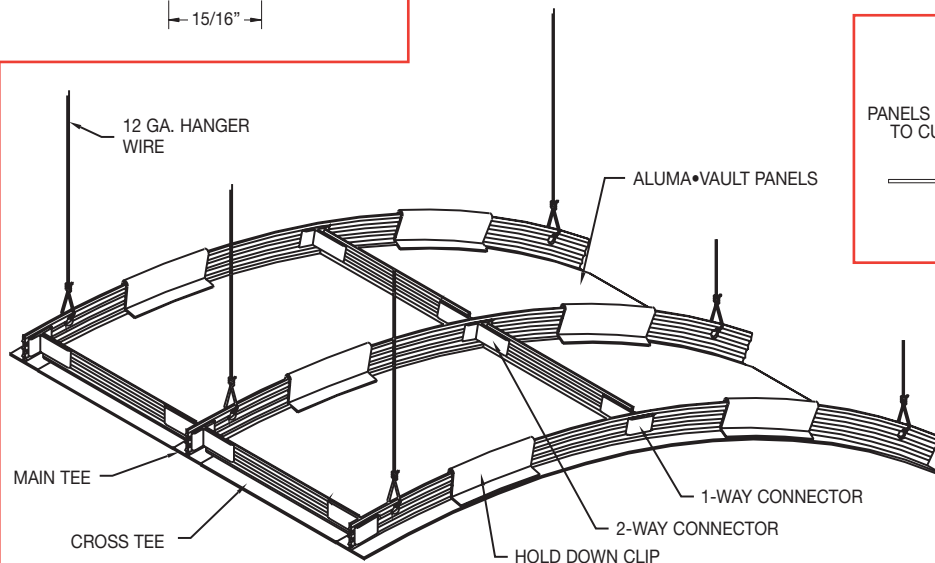

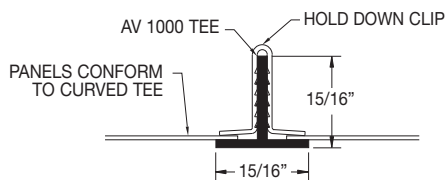

ALUMA•VAULT

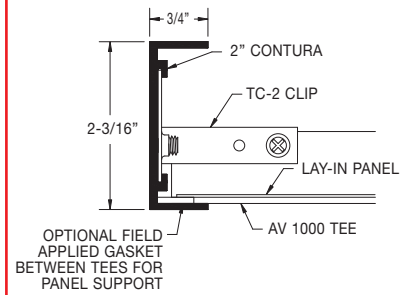

AV 1000, AV 2000 and AV 2000R use curved main tees, straight cross tees and lay-in panels. Main tees are curved to the specified radius. Flat lay-in panels conform to the shape of the tee and are secured with hold down clips.

Creative panel options including MILLENNIUM®, designer perforations and custom colors are utilized for maximum versatility as well as freedom of design.

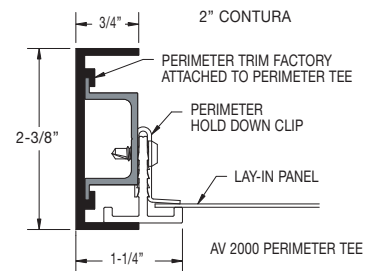

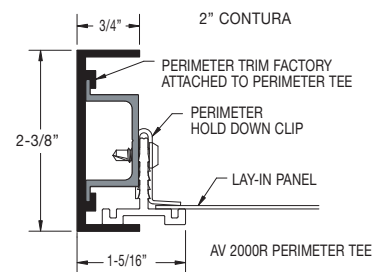

AV 1000 with 2" CONTURA Perimeter

AV 2000 with 2" CONTURA Perimeter

AV 2000R with 2" CONTURA Perimeter
