Be the collection

Design: Patrick Messier **Keyword:** Nature

A new attitude, inspired by ecology, is emerging. We yearn for a return to our origins, rediscovering simple pleasures and natural beauty. The Be collection expresses that desire through shapes Nature herself could have created.

The freestanding bathtub and vessel sinks imitate a shell of exotic fruits filled with rainwater, an impression that is enhanced by a peaked seam and fluid curves. Be provides grounds for dreams that evoke memories of nutshells sailing on childhood streams.

Contemporary design infused with organic shape—simple and sinuous.

Restore, rejuvenate, relax—Be.

Bath dimensions:

All items come in WETMAR, Glossy or Mat.

Patrick Messier

Industrial designer

Born in 1974

Patrick Messier is the President of the Association of Canadian Industrial Designers. He started his career at Michel Dallaire Designers. From 1996 to 2002, he contributed to various projects involving medical equipment, aircraft interiors, furniture, electronic materials and utilitarian objects. In 1999, he founded Messier Designers and in 2002 he expanded his activities to include product development strategy and graphic communication.

Since 2003, he has participated in numerous fairs and shows in Canada and abroad – New York, Washington, Tokyo, London and Paris, among others. He was also awarded several prizes, including the Gold Award of the 2004 Toronto IDEX/Neocon for Kingsey, an innovative urban bench produced by Plastiques Cascades, and the 2006 Best of Canada for Mamma, a rocking chair whose sensuous curves conquered the international press, including the austere Wall Street Journal. It should be noted that these two creations are part of the permanent collection of Musée National des beaux-arts du Québec.

Patrick Messier's approach focuses on what he calls "controlling the pheromones of aesthetics", i.e. creating objects with an allure so powerful as to trigger an irrepressible desire to possess them.
