"You know, it seems like every time I turn around, there's a new department around here. This month it's Information Systems Management, or maybe it's InterNetworking & Security Engineering. I swear they're just making this stuff up and I'm pulling my hair out trying to keep up. Where are these people going to sit? What kind of furniture will they need? What am I going to do?" The poor guy was headed for a nervous breakdown if she couldn't help. "Relax, I've got just what you need – The Wavelink system from Versteel. You can choose from 16 linking top shapes or 5 non-linking top shapes to create hundreds of useful configurations, add power easily with PowerLink® or Henri® and if you need to reconfigure the space, release the linking leash, unlock the casters and you're on your way." Things change. Adapt. Wavelink.

The energy in the new conference room was palpable. "I don't know about you, but I'm excited about our meeting today. This new furniture looks great. I love the wood tops, fluted wood edges and sleek shapes. I'm just glad I didn't have to put it together." She considered telling him that assembly took no time and connecting the tables with the Wavelink linking leashes was a snap. And then it occurred to her that she'd also have to explain where all that extra time went. Assemble. Wavelink.

"How do you spec furniture for a common area? None of the people who use it have anything in common. Some people use it to read the newspaper, some eat their breakfast, some study and some just sit around killing time." Surprisingly, she was quick to answer. "Wavelink has 16 different top shapes that can be combined in as many configurations, for as many uses as you can imagine. Plus, with locking casters and self leveling glides, you can move them, change them and rearrange them. Freedom. Wavelink."

"Interactive presentations and video conferencing are so cool. I don't have to get up early to fly half-way across the country, to meet with people I don't even like, only to get on a plane and fly back home." She didn't have to convince me. "Yeah, and our new Wavelink video conference setup makes client meetings a breeze. The 10° viewing angle gives everyone an unobstructed view and PowerLink makes it easy to connect for interactive presentations. You know the people on the other side of the screen are looking over and wishing they were here." Make a statement. Versteel.

"I really don't know if I can take another class. Sitting for hours, taking notes, listening to the drone of the instructor's voice, I just can't take it." She was quite surprised. "Have you even seen the new training room? Everything has been replaced with new Versteel products. Wavelink tables have been positioned in engaging arrangements, complete with Henri power and data. Everything is hot-wired for interactive learning. It's actually pretty remarkable." Make a connection. Wavelink.

corporate dining

VERSTEEL

“Would you like to go out to lunch? I’m buying!” And for the third time the response was the same. “I think I’ll eat in.” He was beginning to think he had done something wrong. “Was it something I said?” She couldn’t help but laugh. “You obviously haven’t seen the new corporate dining area. Beautiful round and square Wavelink tables from Versteel and comfy Chela guest chairs. I don’t think we’ll ever go out again. Care to join us?” Come together. Wavelink.

I need furniture that's as practical as it is beautiful. I want the space to look good, but we still have to get work done." He could tell she was a skeptic, but he had an ace up his sleeve. "Have you seen the new Breaker from Versteel? It's got a lovely shape that compliments any room and it's ergonomically designed for real life. Even better, they function well by themselves or in combination with other tables." Form plus function. Wavelink.
