

Conference Tables

The Flexible Conference Solution

INNOVANT

Conference Tables

Aesthetics Meet Technical Capability

Our conference table solutions include personal office meeting tables, technology-rich touchdown tables, traditional conference tables and boardroom applications. The Innovant conference range features a full compliment of user accessible services and advanced IT cable management.

Features and Design Details

Tame Your Cables

We designed our conference tables around a large yet inconspicuous cable raceway to manage the most demanding cabling requirements without spilling cables to the floor or cluttering table surfaces. Access to power, data, video and USB ports is always within reach with flush-mount, pop-up and fully recessed access ports in the center of the table.
