

# T1A

FORm\_trading™  
Technology Integrated Systems

## INNOVANT

### FORm\_trading T1A

#### Raising the Bar

FORm\_trading T1A is unique for its high-range electromechanical desk lifts that raise positions high enough for easy service access to CPUs and central raceway cabling. T1A is an evolved, industry-tested solution for trading environments, but it is also ideal for high tech companies, command and control centers, PACS viewing rooms and Network operation centers.

### T1A Features and Design Details

#### Proven Performance

FORm\_trading T1A enhances T1 desks with an electronic adjustable-height work surface. The lifting columns have proven invaluable to traders around the world, offering ergonomic desk-height adjustment and easy access to technology under the desk.
