

Style. Color. Longevity.

There's wood and there's our wood.

Preferred for durability, sustainability and style, Nydree Flooring is heads (and feet) above the rest. Our acrylic impregnated wood products allow you to create a hard-working, yet stylish flooring that's perfect for a variety of commercial settings.

Made from natural wood, Nydree products are impregnated with acrylic resin for a stronger, tougher floor. So unlike residential grade wood flooring, our color is not applied just to the surface of the wear layer, but throughout it. The result is a flooring so durable we've backed it with a lifetime warranty.

Since 1968, our PermaGrain and Gammapar technologies have been used to manufacture extremely durable, incredibly beautiful wood flooring products. As a testament to the quality of our products, we are proud to have some of the largest and most prominent national retail store chains, healthcare systems, corporations, universities and hotels as valued clients.

As members of the U.S. Green Building Council (USGBC), we strive to uphold the principles of green building by manufacturing products that are healthy for building occupants and the earth. Nydree Flooring is proud to be Chain of Custody certified by the Rainforest Alliance to the Forest Stewardship Council (FSC) standards (Chain of Custody Number SW-COC-001039). When you specify Nydree Flooring products, you may request that your order be FSC certified. Ordering FSC products means that most or all of the value of the wood flooring contributes to obtaining a point under the LEED Certified Wood Credit (MRc7). Ultimately it's a sound decision not only for your design, but also for the environment.

With Nydree Flooring, the possibilities are endless. Our products come in 11 wood species and more than 60 colors. Plus you can even create a custom look with unique colors, sizes, species, patterns and designs (including medallions, inserts and logos). Our custom program allows you to create a flooring that separates your space from the crowd.

Endless options, for the perfect floor.

At Nydree Flooring, our goal is to be the most innovative and forward thinking wood floor manufacturer in the world. We use the best equipment and highest quality environmentally friendly raw materials we can find to create the world's most sought after high-traffic wood flooring products.

Nydree Flooring, an engineered acrylic impregnated wood flooring, is manufactured in the United States at our facilities in Forest, Virginia, and Karthaus, Pennsylvania. Made from natural wood, Nydree products are impregnated with acrylic resin for a stronger, tougher floor that's made to last in most any commercial setting.
