#### CARE

##### **Mesh shade . . .**

Metal mesh will naturally change over time developing a richer, deeper color. The acids and oils from your hands quicken this process. For this reason, it is important to clean your hands with soap and water, drying thoroughly, before handling your shade. Rubbing alcohol (70% isopropyl) applied with a soft nylon brush may help for spot cleaning. Wipe and dry with a clean cloth, or spots may appear from the mesh being damp. (Do not use household copper or brass cleaners, as they will permanently stain the shade.)
