Simple

Taking a stand shouldn't be so difficult. With cutting-edge technology, Airtouch uses an innovative mechanism to adjust far faster (17 inches in 1.2 seconds) and much easier than crank or electric units. There are no electrical components, so there are no power cords to tie you down. It adjusts perfectly with just your touch.

Healthy

Taking a stand never felt so good. You'll feel the ergonomic joys of an adjustable-height worksurface as it allows you to move throughout your day. You can personalize your workspace by matching the height of your table to your task. Studies show that people who use sit/stand worksurfaces report significantly less musculoskeletal discomfort and disorders. Now that's worth a standing ovation.

Specifications

Height range:

26" - 43" with infinite increments

Adjustment speed:

seated height to standing height in 1.2 seconds

Recommended load capacity*:

Airtouch Lite - up to 80 lbs.

Airtouch®
Airtouch is all about meeting your everyday needs. This hardworking table gives you the support and flexibility you need in order to complete those daily tasks. So no matter the workload, Airtouch can help with anything that's tossed your way.

Airtouch® Lite
With an 80-pound capacity, Airtouch Lite supports a laptop, lights and those lovely documents weighing you down. No lightweight here... Airtouch Lite is more than capable of handling the daily tasks, and then some.

Effective

Think on your feet. There's time in your day when you need to hunker down and get your work done, and yet a lot of times you need to meet with coworkers to discuss projects. In fact, our research shows that 80% of your day is spent working alone or with one other person. Surprisingly, most of these "you and I" interactions happen in your personal workspace. The good news is working as a "pair" is the key to more learning, greater efficiency and increased innovation.

Tip: Standing meetings are typically shorter than sit-down meetings. When a co-worker walks up for a quick meeting, raise your worksurface in an instant to share your screen and paperwork at a comfortable level for two. Lower the worksurface to "give them the hint."

Stand Up, Sit Down, Fight, Fight, Fight!

Please know this is only a cheer. We don't really want you to fight.

9:06 a.m.
So you're six minutes late. That's better than on-time with no coffee.

10:13 a.m.
Meet with Cassandra to walk through your presentation.

11:10 a.m.
Need a different perspective on the project. A slight adjustment.

11:44 a.m.
Check out the new pizza place around the corner. What diet?

1:00 p.m.
Time for that afternoon caffeine fix. You're in the zone.

2:14 p.m.
Stretch your legs... and your mind.

3:39 p.m.
No meetings or distractions. Time for a little email catch up.

5:11 p.m.
Eleven minutes past five o'clock? You overachiever you!
