

*Comfort. Versatility. Durability.
And contemporary flare in every Aspekt.*

FAMILIES OF SEATING

DESIGN INSPIRATION

Comfortable, versatile and durable, the innovative Aspekt™ family of seating is designed to satisfy your seating needs – from public waiting rooms to patient rooms. The wave-shaped arms and back contours add to the sleek appearance of Aspekt, creating a unique welcoming and uncluttered environment. Beneath the contemporary appearance lies comfort that is untouchable, delivered by the active webbed seat suspension that provides long-term support.

The complete Aspekt family of seating includes a single chair, one-, two-, and three-seat tandem, bariatric, bench, easy access hip-height, and patient high-back models and coordinating free-standing and ganged tables.

FEATURES AND BENEFITS

DURABLE Oval steel frames are strong, yet lightweight, and are available in a black or silver powdercoat finish.

STYLISH Convex and concave back styles can be combined to create a unique, soothing wave-like profile.

COMFORTABLE Active webbed seat suspension delivers long-term comfort through even weight distribution.

ACCOMMODATING Arm caps overhang the legs providing an easy-to-grip edge to assist in exiting the chair.

CLEANABLE All models incorporate a generous clean out space between the seat and back for easy cleaning.

ELEGANT Solid maple arm caps are available in a range of finishes.

RENEWABLE Components are field replaceable.

CHOICES Additional options include a wall-saver model, moisture barrier, plastisol arm caps and contrasting textiles on the seat and back.

WARRANTY The Aspekt family of seating features a lifetime structural warranty.

GUEST SEATING

From a single chair to a complete configuration of tandem seating – Aspect is an excellent option for your seating needs in public areas. Convex and concave back styles can be configured in tandem units to create a unique, soothing wave-like profile. Tandem seating can be configured with or without center arms and with or without ganging tables.

BARIATRIC SEATING

Aspekt bariatric seating is a great alternative to other stand-alone bariatric chairs. With the same lightweight styling as the rest of the Aspekt family, the bariatric chair can be seamlessly integrated into any environment along with other Aspekt models. The result? A bariatric solution that provides support and a level of dignity.

BENCH SEATING

An alternative to traditional arm seating, the Aspekt bench is great for reception areas or alcoves in hallways where patients and visitors need a quick moment to sit and rest. The unique wave-like design of the Aspekt family of seating is reflected in the seat of the bench, adding an attractive aesthetic to any environment.

EASY-ACCESS HIP HEIGHT SEATING

The Aspekt easy-access hip height seating is designed to provide an easy entrance and exit for patients and partners in care who have difficulty entering and exiting standard height seating due to health issues. Aesthetically integrating with the rest of the Aspekt family, the easy access chair is ideal for waiting areas, exam rooms and patient rooms.

PATIENT SEATING

The Aspekt patient seating is an ideal solution for patient rooms and family lounges on the patient floor. The active webbed seat suspension and high-back of the Aspekt patient seating provide comfort and support for patients and visitors. An available foot rest coordinates with the patient chair to provide leg support and can easily be stored under the chair when not in use.

TABLES

The Aspekt tables integrate seamlessly with the Aspekt family of seating. The table tops feature high pressure laminate surfaces and the frames are constructed of tubular steel. The tables are available in free-standing and ganged versions in a range of shapes, sizes and finishes.

DIMENSIONS

Arm Chairs

	overall depth	overall width	overall height	seat width	seat height	arm height
Single-Seat	27"	22 ³ / ₄ "	33"	20"	18"	26"
