

*The place to meet
when on your feet.*

TABLES

DESIGN INSPIRATION

Caregiver stations are often the site of impromptu meetings in hospitals and clinics because health professionals rarely have time to sit for extended periods. For interactions like these, Nurture presents the Exchange™ table.

This stand-up table provides an inviting place for nurses and doctors to meet, consult and exchange information. The compact worksurface is ideal for quick paperwork...or just setting down a cup of coffee. The height of the table and footring around the base result in worker-supportive design that encourages a healthy posture stance.

FEATURES AND BENEFITS

SMART Our bullet table features a flat edge design, enabling the table to fit snugly against vertical surfaces, while the scallop detail provides space for plugs and cabling to pass through.

COMFORTABLE The footring provides users the opportunity to shift their weight while standing and promotes a healthier posture profile.

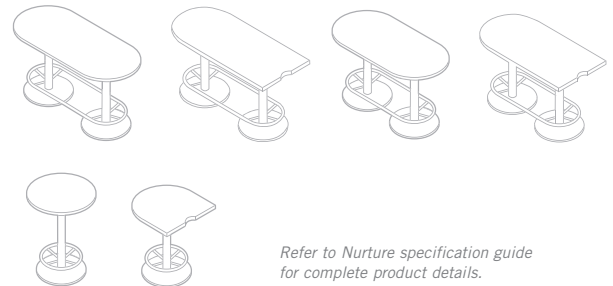

STRENGTH The footring and oversized base are constructed of steel, providing stable, heavy-duty support.

AESTHETICS Column, base and footring come standard with black powdercoat finish, but can be ordered in platinum, sterling or champagne finishes.

CHOICES Exchange tables are available in three shape options – round, oval and bullet, and two table heights – 36" service counter height and 42" transaction height.

STATEMENT OF LINE

Refer to Nurture specification guide for complete product details.
