

Storage Overview

Steelcase

A box is a box is a box.

When is a box more than a box?

Think about it—all the boxes just in your office alone. Confidentially, we think about boxes all the time. Like how to make a box that works forever, yet recycles easily; and how to make the same box work for pilers and filers; and how boxes support past, present and future work. We're box geeks.

Seriously, WE LOVE BOXES! I mean, we essentially named our company the “steel box.” Sure, a “case” is just a fancy word for box, but it's still a box.

We're good at making boxes so you can be good at what you use them for... whatever that may be.

Laterals

Think of a lateral file like the town historian. They hold lots of archived information out of site, but ready to be recalled at a moment's notice.

pages 14-19

Cabinets and Bookcases

It's a multi-tasker in stationary form. Cabinets can store anything from files to supplies to books. They also act as a good hiding place for your daily 3:00pm chocolate fix supplies.

pages 20-27

Carts

Put your files on wheels. Carts make your files mobile, allowing for easy transport from meeting to meeting—or they can act as a wagon to give coworkers rides around the office.

pages 28-31

Towers

Whether you need a place for your coat and umbrella—or to hide your stash of favorite soda—a tower is always up to the challenge.

pages 32-35

Pedestals

The R2D2's of the storage world. Small and nimble, yet efficient for storing those active files that you need to find quickly.

pages 36-43

Bins and Shelves

They are like the office toy box. Not only do they work great for displaying personal effects or hiding your Guitar Hero accessories, they also work well for storing reference materials that you need easy access to.

Universal Storage

Manage your information with our most comprehensive and versatile storage system. Universal Storage is designed to seamlessly integrate and simplify the process of choosing compatible storage products without compromising choice. Select from a virtually endless family of sizes, interiors and aesthetic options. And it's all changeable, so your storage can evolve with you.

Versatility in planning and application

- A wide variety of case heights, widths and depths enhance planning flexibility and support efficient use of space.
- Removable tops enhance aesthetics through the use of wood, laminate or a glass insert skylight top.

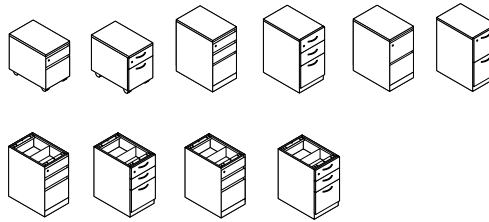

Visual choice and alignment

- Three front styles available on all product types. Fronts are interchangeable on all cases.
- Proud fronts (both steel and wood) offer four handle pull styles in four finishes. Handle pulls are a common, industry standard dimension for ease of change.
- Flush fronts feature an integral pull that is the same as the current Steelcase Series 9000 or 900 Series pull style for a clean look visual that blends with many environments.
- All product types align dimensionally across tops, bases and fronts to provide a clean, consistent visual while simplifying application and product churn.

Love is a squishy thing. Some would say love is too squishy for business. If all you have is love with no action, maybe it is. But if you combine love with science and engineering (both very precise and decidedly unsquishy) you can follow your love. You can act on it.

Love – We combine the desire to do what's right with tools that help us identify ways we can continuously improve our environmental performance.

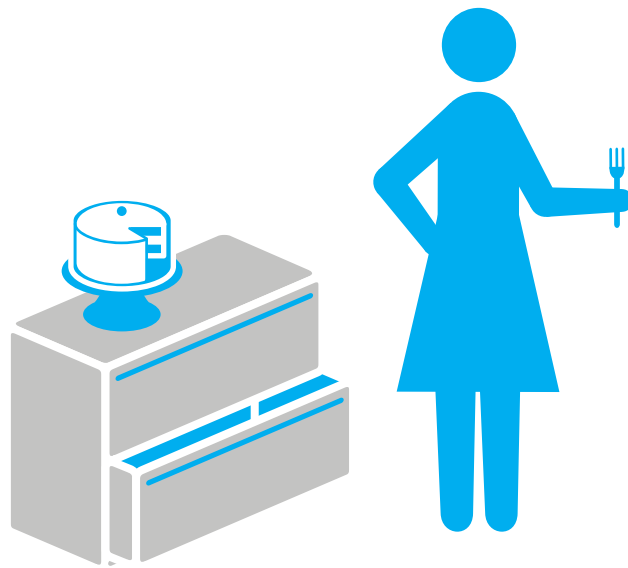

Materials Chemistry – Analysis by MBDC allows us to understand the chemical makeup of our products and production processes, and their safety to human and environmental health. It flags materials to avoid in new products and eliminate from existing products.

Life Cycle Assessment (LCA) – An LCA measures the environmental impact of a product's materials, production, transport, use, and end of life. LCAs help us identify ways to improve our environmental performance at every phase of a product's life.

Recycling & Reuse – Products are designed to facilitate disassembly and maximum recyclability. When a product reaches the final phase in its life cycle, the Steelcase Environmental Partnership Program connects you with resources to recycle or reuse that product.

Storage has been no exception to following this formula. Universal Storage is built using up to 28% recycled content materials and up to 98% recyclable materials for steel products – which means you can feel good about what happens to your product at the end of its life. You may ask yourself how else is Universal Storage by Steelcase a friend to the environment? Universal Storage is Indoor Air Quality certified by Scientific Certification Systems. If you are applying for LEED certification, Universal Storage may contribute toward earning LEED points for your project. And if you're not applying for LEED certification, you still get a gold star for being a good friend to the environment.

Laterals

“lunch box”

Laterals maximize volume and accessibility. Pack in the files and they are still easy to reach. And the top is a convenient book shelf or piling place. Here’s what we found in ours: color-coded file folders, stacks of CDs and DVDs, binders from last year’s mandatory training and oh, wait! What’s this? The snack cache! Crackers, granola and Twinkies...bonus!

Features

- Proud front style - steel or wood
- Four pull styles: contemporary, jazz, bar and handle
- Drawer fronts are removable and interchangeable
- Lift-up door with fixed shelf in top openings of 65½"H supports binder storage
- Optional tops include laminate, wood security or no top
- Optional individual drawer locks

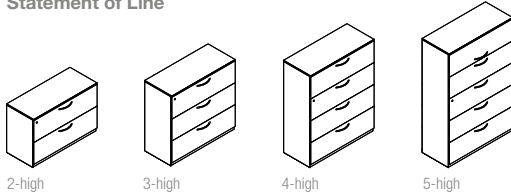

Dimensions

H: 28", 40", 52", 65½"
 W: 30", 36", 42"
 D: 18", or 24"

Cabinets and Bookcases

Cabinets get so much done in an efficient footprint. Think about it. You can hang up your jacket, stash your umbrella and still have all kinds of filing space. We found all of the usual suspects in ours...along with a sweet stash of shoes for a bit of added sass at that surprise management meeting.

Steelcase **Universal**

Towers

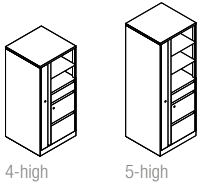

“ice box”

You won't find a more upstanding citizen for an office mate. These storage towers handle all you can throw at them. Actually, in them. Files and coats and books and pictures of last year's vacation. It's kind of like your refrigerator—it holds so much. But, be careful of what you might find hidden in the back corner!

Bins and Shelves

“toy box”

Here's the smart one of the bunch. Bins and shelves make it so simple to grab just what you need—while barely taking your eyes off your monitor or setting down the phone. Display those study triathlon pics on a shelf or hide your piles of notes behind closed doors. The Game Boy and Nerf football fit well up there, too.

Features

- Curved door available painted or wood veneer
- Standard with easy open/easy close mechanism
- Back of bin is closed
- Off-module connection available
- Upmount brackets available for use on Answer, Kick or Pathways Technology Wall panels

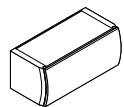

Dimensions

H: 15"

Love how you work.™

We spend a lot of time thinking about work and you. We thought we'd add a couple more to the mix: "how" and "love". Love? Yes. Love. We're passionate about helping people create spaces they love to work in.

We pay a lot of attention to how people work, it's where our insights come from... and that insight is built into everything we do.

We believe you should love where and how you work. You spend far too much time there not to. We're also committed to working very hard so that you love working with us.

Whether you design spaces, manage spaces or work in them, our goal is to make your job easier... to help you love how you work.
