

OPUS OVERBED TABLE

*Patient-centered. Accommodating. Adaptable.
The hardest working table you'll ever meet.*

OVERBED TABLES

DESIGN INSPIRATION

The overbed table is more than just a place for patient meals. By observing how patients, staff and family use the table for a multitude of tasks, Nurture has designed the Opus™ Overbed Table. The table can accommodate the activities of each user in a simple, but thoughtful way. The design features two top surfaces: one stationary at standing height, ready for caregivers as they walk into the patient room, the other a height adjustable patient surface featuring a non-handed concave shape and soft corner radii for patient comfort.

FEATURES AND BENEFITS

PATIENT-CENTERED Adjustable patient surface features a concave design, enabling the table to be close to the patient.

MULTI-USE Fixed-height surface provides a dedicated work area for caregivers. Complete with an open cubby to accommodate charts or other materials and optional slide-out side surfaces for additional space.

CLEANABLE Seamless thermal formed horizontal surfaces include spill-retaining edges and the main surface integrates cup holders to help keep patient drinks under control.

ACCOMMODATING Non-handed design equally supports all users.

MOBILITY Standard dual casters provide easy maneuverability.

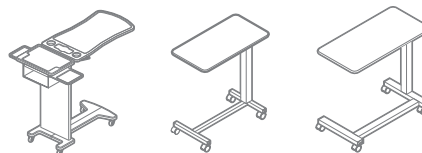

ACCESSORIES Primary vertical surface allows for easy mounting of accessories and matches Opus finishes.

DURABLE Impact resistant column bumper protects the table and other objects it may come in contact with.

LOW PROFILE The seamless thermal formed base easily slides under beds and chairs.

STATEMENT OF LINE

Refer to Nurture specification guide for complete product details and for additional overbed table models that coordinate with other casegood lines.

DIMENSIONS

Overall length: 48"	Width of fixed surface: 18"
Depth of top: 18"	Height of fixed surface: 38"
