What's New?

What's New information is now available on the in2.steelcase.com Web site. Go to *What's New*, then *Show News by Category*, then *Incentives, Pricing, Promotions*.

► See the *Specification Guide Library: Reference Guide* for information about where to find products.

Availability

Electronic price list updated with release 158.C (U.S.) and 135.C (Canada), dated July 19, 2004.

► For a list of all trade-marks, refer to the last page of this specification guide.

For Canadian Pricing

Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by 1.38.
- Round each to the nearest dollar.
- Add base and options for total list price.

Terms and Conditions

Terms

Payment terms for Turnstone are the same as current Steelcase terms, *providing you the opportunity for additional cash discounts for prompt payments.*

Payment for Turnstone brand products can be remitted with payments for Steelcase brand products you can even use the same check!

Past due amounts are subject to 1.5% service charge per month on the unpaid balance.

Returns

Call 1.888.STEELCASE

Returned merchandise will not be accepted unless authorized by your sales service representative prior to return. Non-standard products or materials are not returnable.

Claims

For freight claim information, go to www.in2.steelcase.com, then Order Management, then Service and Warranty, then Freight Claims.

Order Changes

All orders delivered within standard lead times are considered final and cannot be changed.

Any charges for changes or cancellations are the responsibility of the dealer.

Special order products cannot be changed or canceled.

Freight Costs

All shipments to points in the 48 contiguous states will be shipped factory freight prepaid (FOB).

All shipments outside the 48 contiguous states will be shipped FOB and allowed to point of embarkation. All charges beyond the point of embarkation are collect.

Call 1.888.STEELCASE, option #2 for quotes on Expedited shipments, UPS delivery, or deliveries outside the continental U.S.

Turnstone reserves the right to select the most appropriate mode of shipment from the manufacturing point and point of embarkation.

Special shipping methods, handling, or setup will be subject to an additional charge.

Delivery/Lead Times

Select product is available to ship within 2 days. Consult your Quick Delivery Handbook S3408.

Lead times are subject to available capacity.

Most products have a standard lead time of 15 days or less delivered. However, larger orders or orders shipping to remote areas within the U.S. or Canada may be subject to additional lead times.

Please call 1.888.STEELCASE for orders in excess of 50 units.

For up-to-date lead times, consult the scheduling/delivery schedules bulletin board on www.in2.steelcase.com, then Order Management.

Assembly

Due to construction, design of the product, or delivery conditions, it is necessary to ship most Turnstone products cartoned. Turnstone products that are shipped unassembled are shipped RTA (ready to assemble) and are easy to assemble.

Turnstone products are supported with an array of informational materials, tools, and software to help you plan and install efficiently.

Product brochures and planning tools can be ordered through your Steelcase area office, by calling 1.800.784.0355, or through the Steelcase Marketing Communications Web site at www.in2.steelcase.com.

Support

Steelcase Capabilities

Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For assistance, please call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfilled Team at 1.888.STEELCASE (1.888.783.3522).

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfilled Team if you have submitted an order to Steelcase and you need to speak to your service representative about the order. Also call if you have any post-shipment quality or warranty concerns or service parts questions.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

Panel Facts

Panels are constructed with a rigid, tubular steel frame and are shipped fully assembled. Choices include **tackable acoustical**—skin on each side, covered with vertical surface fabric; **segmented**—tackable skins on one or both sides, covered with vertical surface fabric; **glass**—single pane of clear, tempered safety glass on panel centerline, surrounded by painted border; and **perforated steel**—single pane of painted, perforated steel on panel centerline, surrounded by painted border. Perforated pattern matches “large” perforated pattern on Turnstone storage.

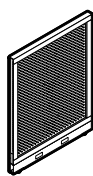

Tackable Acoustical

Segmented Panel

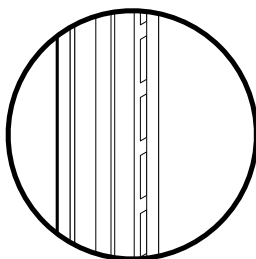

Glass

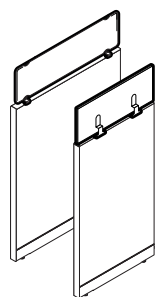

Perforated Steel

Panels are available in three heights (42"H, 54"H, and 66"H) and five widths (24"W, 30"W, 36"W, 42"W, and 48"W). Tackable acoustical panels and segmented panels are also available 60"W. Panels are 2" thick.

Vertical slots in panel accommodate hang-on components, overhead storage bins, shelves, worksurface supports, and connector brackets. Components can be mounted at 1" increments.

Fabric and translucent panel-top screens, available 12"H and 24"W, 30"W, 36"W, 42"W, 48"W, and 60"W, can be field installed over a low panel top cap to provide extra visual privacy. Translucent panel-top screens can also be field installed over a high panel top cap. Support brackets provide stability. Panel top screens can also mount off module.
▶ Page 81

Base cavity accepts a factory- or field-installed powerway. Cable routing is also possible.

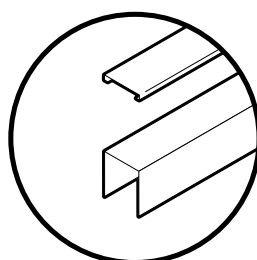

▶ See *Powerway Facts*, page 20.

Wire separator for the panel base can be ordered through Kick Service Parts to provide a separate, isolated space for routing data and telecommunication cables. It also serves as a metallic barrier between low-voltage communication wires and 120-volt electricity.

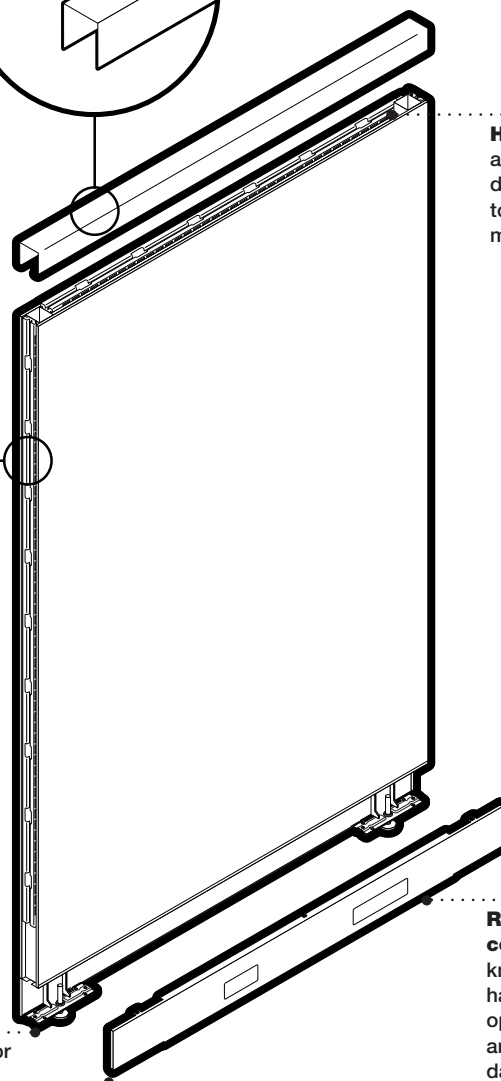

Specifying, pages 54–63

Steel top caps are available in two heights—standard low and optional high. High top cap will accommodate cable routing at the top of the panel.

Horizontal slots accommodate data duct, downspout, panel top screens, and off-module connections.

Removable base cover has receptacle knockouts. Base covers have one standard-size opening on the left and an opening for a standard- or larger-size receptacle opening on the right.

Exception: 24"W and 30"W base covers have a standard-size opening on one side of the panel opening and a larger size on the reverse side.

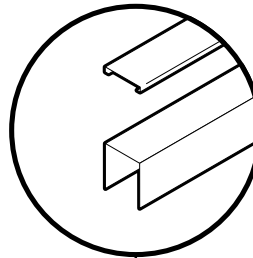

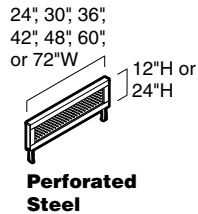

Leveling glides adjust 1½" to install panels on uneven floors.

Stacker Facts

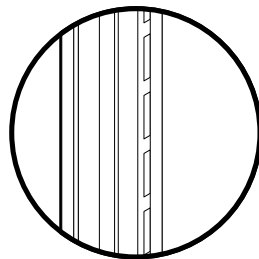

Stackers are constructed with a rigid, tubular steel frame. Choices include **tackable acoustical**—skin on each side, covered with vertical surface fabric; **glass**—single pane of clear, tempered safety glass on panel centerline, surrounded by painted border; and **perforated steel**—single pane of painted, perforated steel on panel centerline, surrounded by painted border. Perforated pattern matches “large” perforated pattern on Turnstone storage.

Specifying, page 64

Top cap and top cap aligner from base panel are used to trim the top of stacker.

Vertical slots in stackers, identical to slots in base panel, accommodate overhead storage and hang-on components, connector brackets, and utility bar. Components can be mounted at 1" increments.

Horizontal slots in stackers, identical to slots in base panels, accommodate data duct, downspout, panel top screens, and off-module panel connections.

Vertical trims for stackers must be ordered separately.

► Page 15

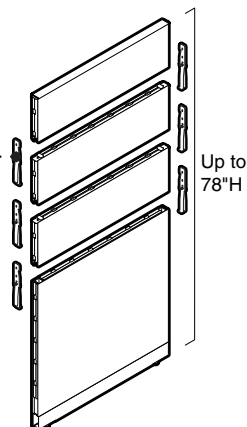

Base panels can accept one, two, or three stackers, up to a total height of 78". All stackers are load bearing, but load cannot be mounted above 66" height.

► See *Stability Rules*, page 38.

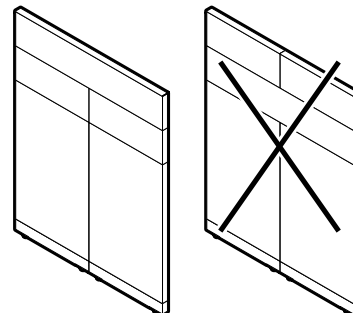

Two fork connectors are included with every stacker.

Attaching stackers to panels will not cause disruption to existing panel connections.

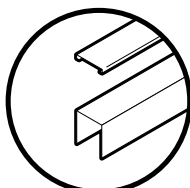

Stacker can span over an in-line connection between two base panels or two stackers. Width of stacker must equal total width of two base panels.

Two smaller stackers cannot be attached to the top of a larger stacker or panel.

Panel Frame and Insert Facts

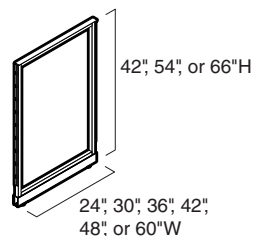

Panel frames and inserts, specified separately, are used together to divide space while achieving a more open and customized environment. Frame is identical to the frame used for tackable acoustical, segmented, glass, and perforated steel panels.

Steel top caps are available in two heights—standard low and optional high. High top cap will accommodate cable routing at the top of the panel.

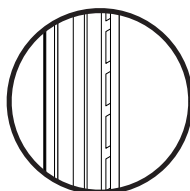

Specifying, pages 68–72

Panel frames are available in three heights and six widths. Frames are 2"D (thickness).

Horizontal slots accommodate data duct, downspout, panel top screens, and off-module panel connections.

Vertical slots in panel frame accommodate hang-on components, overhead storage bins, shelves, worksurface supports, and connector brackets. Components can be mounted at 1" increments.

Removable base cover has receptacle knockouts. Base covers have one standard-size opening on the left and an opening for a standard- or larger-size receptacle opening on the right.

Exception: 24"W and 30"W base covers have a standard-size opening on one side of the panel opening and a larger size on the reverse side.

Base cavity accepts a factory or field installed powerway. Cable routing is also possible.

Four jamb blocks, standard with each insert, are used to attach insert to panel frame.

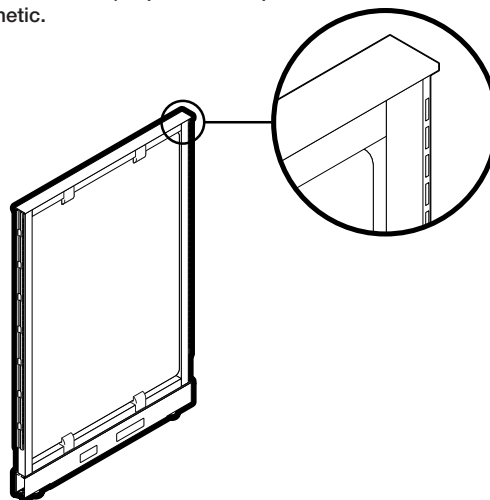

Inserts are available in several varieties—fabric, translucent, and laminate—to accommodate user needs.

Fabric insert is a single layer of woven material stretched over a steel tube frame.

Laminate insert is 1/4"-thick. It is manufactured using a low-pressure laminate process and has a decorative finish on both sides with a color-matched edge.

Translucent insert, frosted acrylic, is 1/4"-thick. **It is not available for order in Canada.**

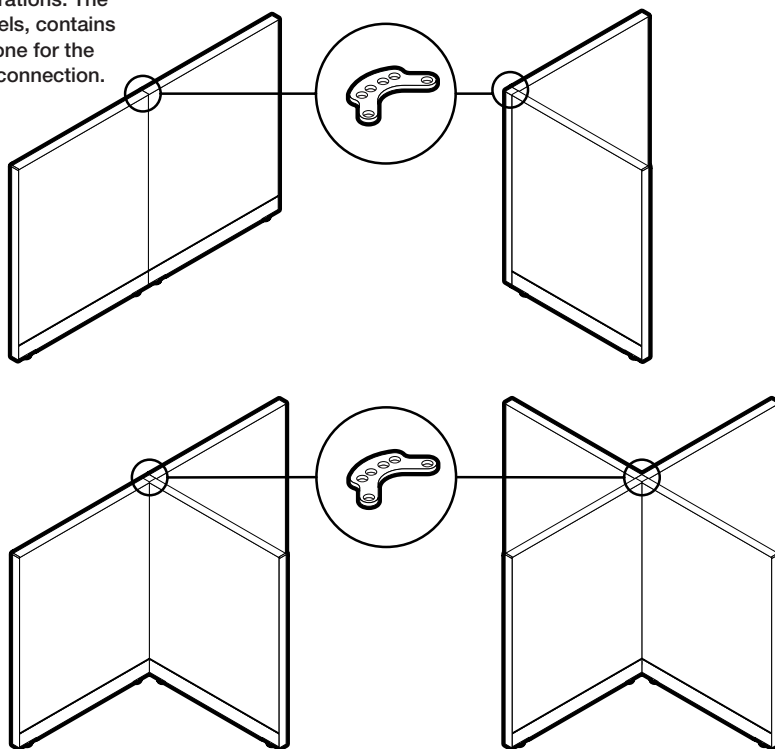

Space between insert and frame (1/2" on each side) is part of the open aesthetic.

Connector Facts

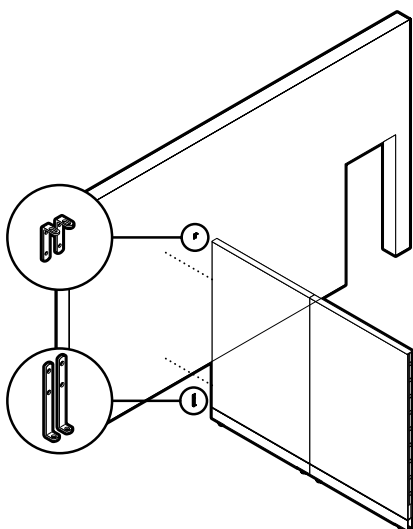

Universal connector package joins panels of the same height in a straight line or in L-, T-, or X-configurations. The package, standard with panels, contains two universal connectors—one for the top and one for the bottom connection.

 Specifying, page 77

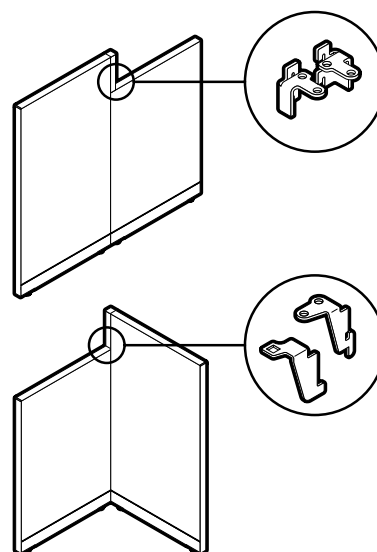

Wall start connector package is used to anchor a panel run to a perpendicular wall. Mounting screws that connect the brackets to the panel are included in each package.

Tip: Vertical-end-of-run trim is not required at the end of panel that is attached to the wall.

Change-of-height in-line and corner panel connector package is used to join panels at varying heights in a straight line or at 90° angles. Package contains left and right connectors for both in-line and corner configurations.

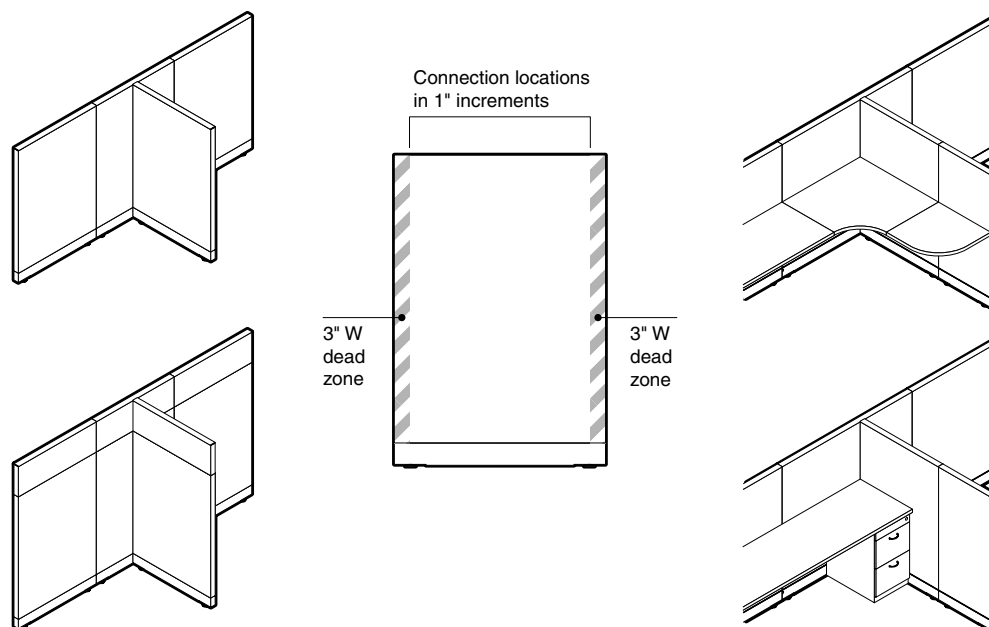

Left and right in-line connectors are required to connect panels in a straight line.

One-handed corner connector is required for connecting panels at 90°.

Off-module connectors connect all types of Kick panels of the same height. Connection locations are at 1" increments and allow the use of standard-size worksurfaces for workstation planning. Stackers can be mounted on either or both of the panels.

 Specifying, page 78

There is a "dead zone" at the last 3" of each end of the panel where an off-module connection cannot be made due to lack of horizontal mounting slots.

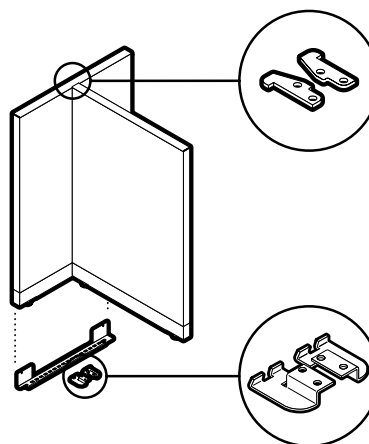

Off-Module Connector—Universal

Tip: Bottom connection requires the use of two self-drilling screws (included) through the skin of the "host" panel approximately 1/2" above the base cover.

Off-Module Connector—Panel-Width Specific

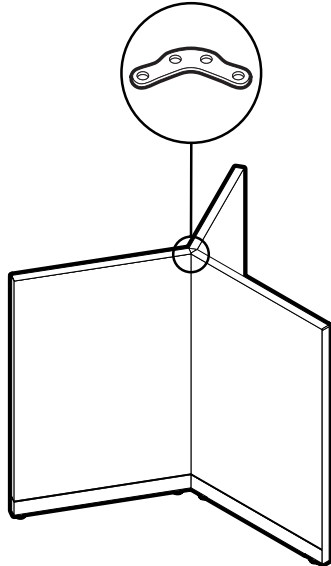

The panel width-specific off-module connector incorporates a horizontal element that connects to the base feet of the "host" panel. There is no defacing of either panel.

120° Connection Facts

To connect panels in a 120° application, a 120° panel connector is required. A two-panel connection requires one 120° connector package. A three-panel connection requires three 120° connector packages.

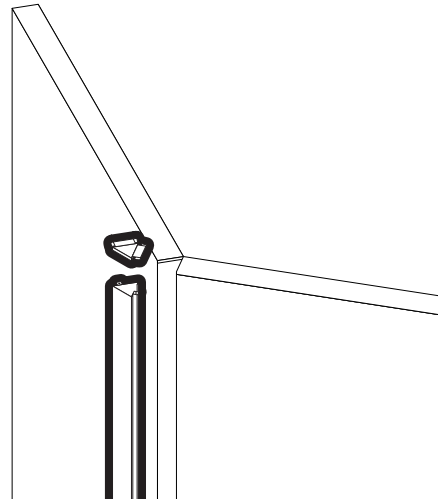

► Page 77

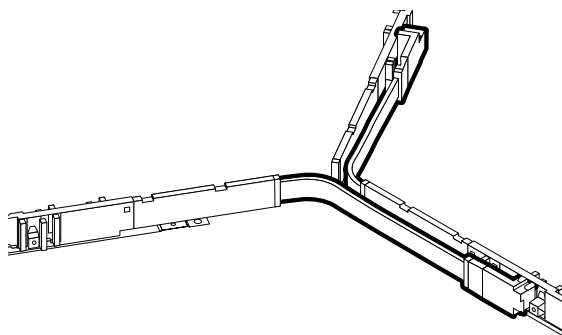

120° connectors are for the same height panels only.

120° vertical corner trim is required for all 120° connections. The same 120° vertical corner trim is used for two- and three-way connections and is available with a low end cap only. Both two- and three-way end caps are included with each 120° vertical corner trim package.

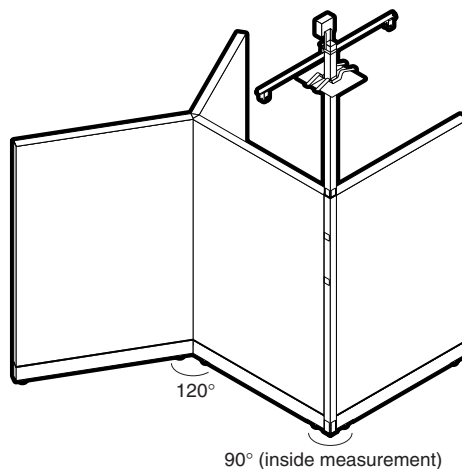

► Page 76

Power can be routed through the base of panels in a two- and three-panel, 120° connection.

2" x 2" power and cable poles can bring building power and data from the ceiling to a 120° panel application at the end of a run or 90° connection only.

120° and 90° connections can occur within the same workstation.

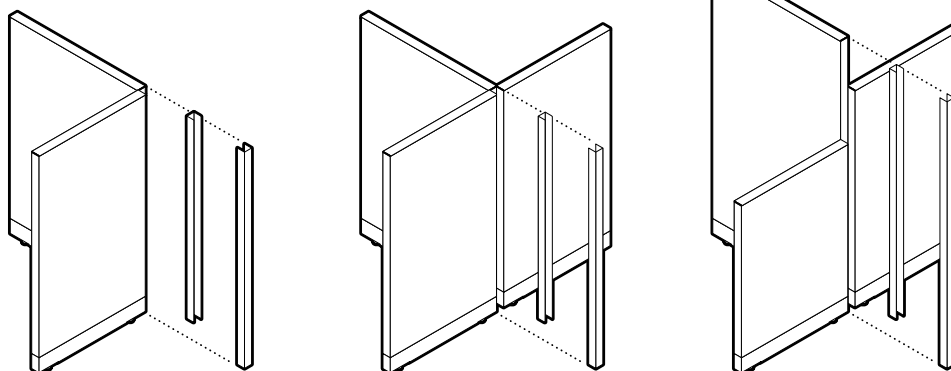

Corner Trim Facts

Specifying, pages 75–76

Vertical Corner Trim for Use with Base Panels (no stackers)

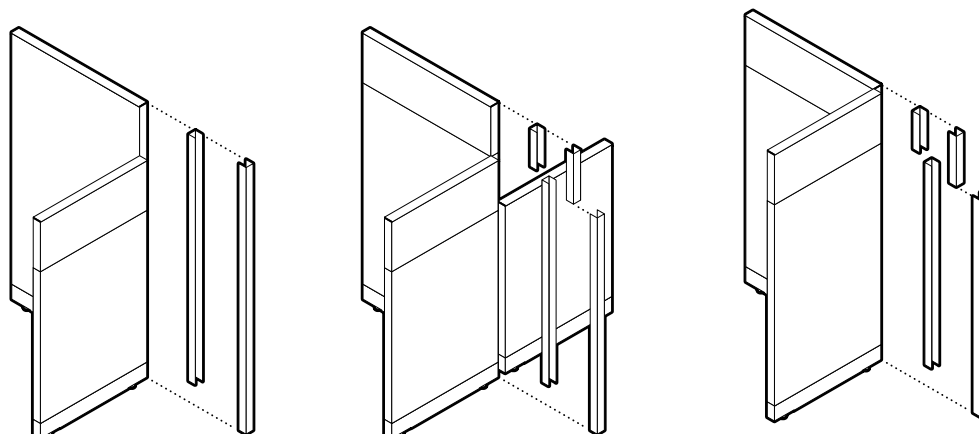

Vertical corner trim allows cables to be laid in before the cover is snapped into place and can be removed for cable access. Corner trim is required for L-, T-, and X-configurations and includes a low trim end cap. High trim end caps, available as an option, are application specific.

Always specify vertical corner trim the same height as the tallest panel.

Vertical Corner Trim for Use with Base Panels and Stackers

Vertical corner trim and corner change-of-height trim are required in combination for L-, T-, and X-configurations when stackers are used. All corner trims include a low trim end cap. High trim end caps, available as an option, are application specific.

Always specify vertical corner trim the same height as the tallest panel. Specify vertical corner change-of-height trim to cover the ends of stackers.

End-of-Run and In-Line Change-of-Height Trim Facts

 Specifying, pages 73–74

Vertical End-of-Run Trim

Vertical end-of-run trim covers the exposed end of panels and includes a low trim end cap. High trim end caps, available as an option, are application specific.

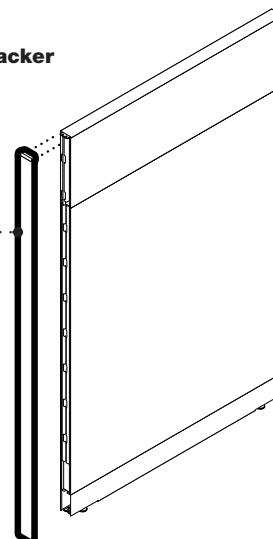

Base Panel only

Vertical end-of-run trim must match height of base panel.

Base Panel with Stacker

Vertical end-of-run trim must match combined height of base panel and stacker.

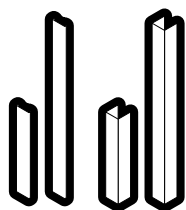

Vertical Change-of-Height Trim

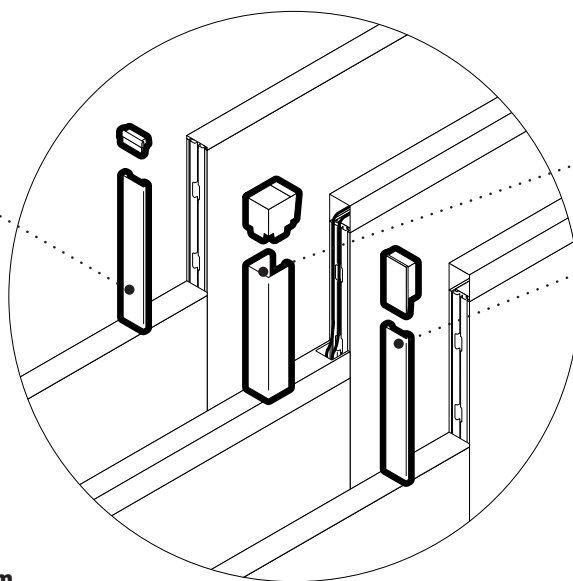

Slim profile with low end cap.

Cable routing capacity with high end cap.

Slim profile with optional high end cap.

Vertical in-line change-of-height trim is available 12"H, 24"H, and 36"H in slim profile (standard with a low trim end cap) or with cable-routing capacity (standard with a high trim end cap). Trim covers the exposed section of the taller panel when panels of different heights are joined.

Low end cap

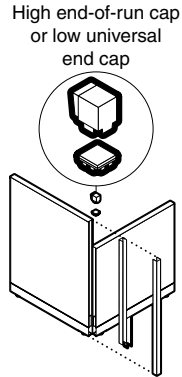

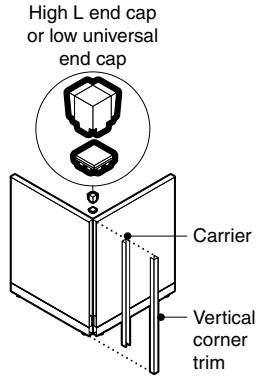

High end caps

End Cap for Use with Vertical Corner Trim

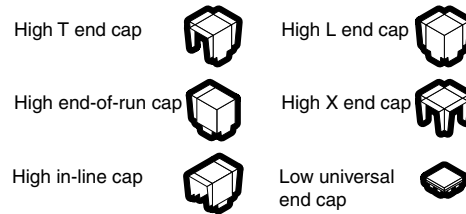

End Cap for Use with Vertical Corner Trim

 Specifying, page 75

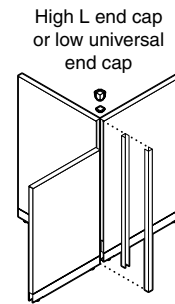

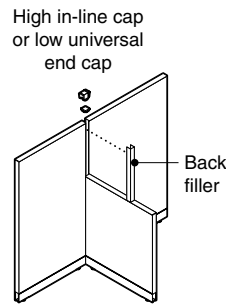

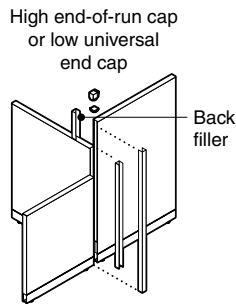

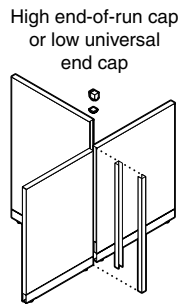

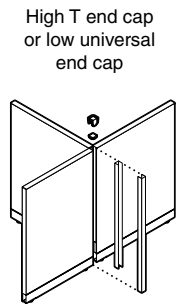

L-Configuration

End Caps

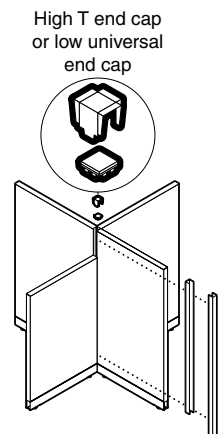

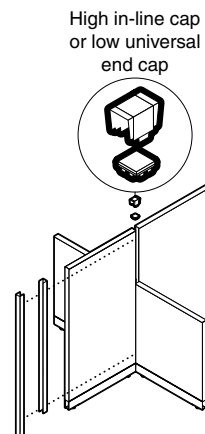

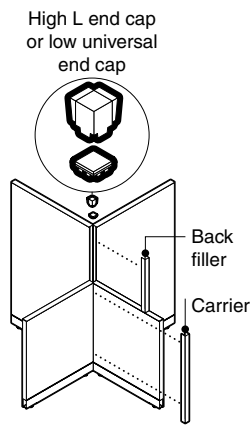

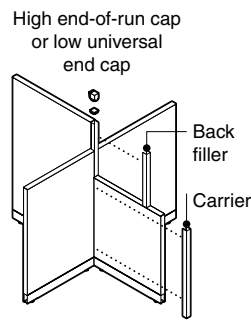

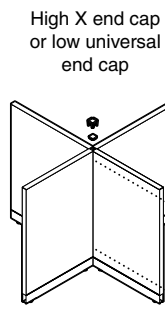

T-Configuration

Back filler required for cable routing capability and non-sequential assembly only.

Back filler required for non-sequential assembly only.

X-Configuration

In an X-configuration, carrier and vertical corner trim must be attached to one panel prior to installation of last panel.

Back filler required for cable routing capability only.

Back filler required for cable routing capability only.

Sliding Door Facts

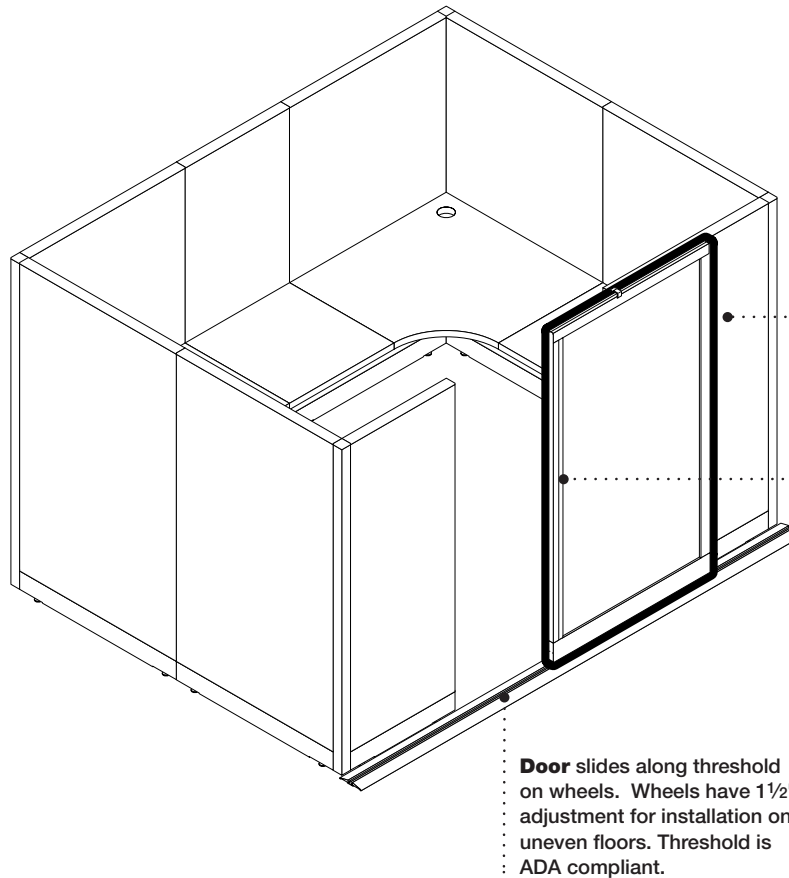

Specifying, pages 79–80

Sliding door is non-handed and can be added to workstations for additional privacy. Sliding doors are 1" thick, available 36"W and 42"W and are 66"H and 78"H.

Sliding door is not free-standing; it must mount to panels.

For Kick and Pathways Technology Wall, host panel must be same height as door. For Answer, host panel can be same height or taller than door height.

Sliding door frame and threshold are constructed from extruded aluminum and painted.

Door handle is integral and is ADA compliant.

Door slides along threshold on wheels. Wheels have 1½" adjustment for installation on uneven floors. Threshold is ADA compliant.

Sliding door can be specified with lock option.

Kick Sliding Door

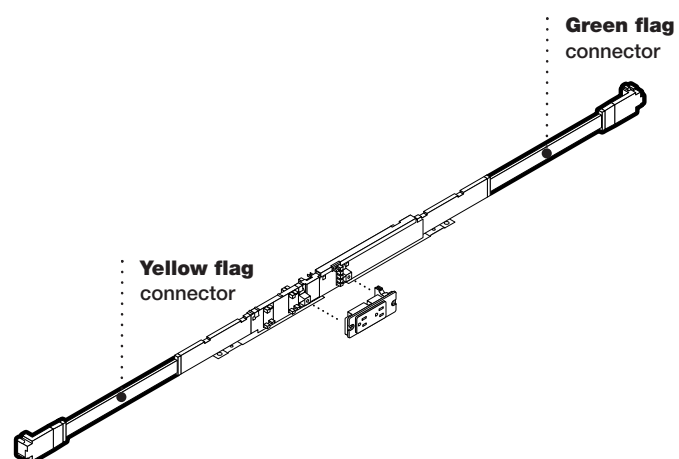

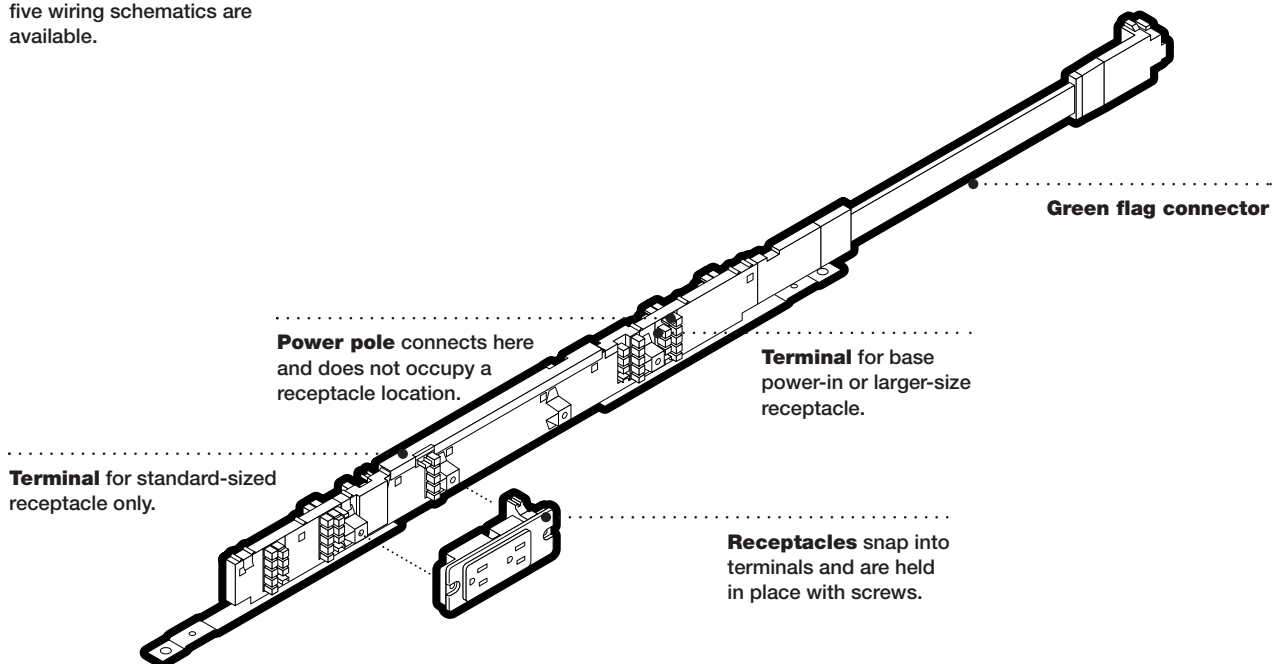

Frame is painted in 4798 Sterling. Door panel is made of ribbed, translucent plastic. Attachment hardware ships standard and attaches to Kick panel.

Universal Sliding Door

Frame is available in a variety of colors. The door panel is standard in ribbed, translucent plastic. Clear tempered glass and white laminated glass are available as options. Attachment hardware ships standard and attaches door to Kick, Answer, or Pathways Technology Wall.

Powerway Facts

Powerways that are installed in the panel base cavity allow power to be distributed wherever panels go. They are concealed when properly installed. All five wiring schematics are available.

Kick panels that are 24"W use a double whip powerway with one green end and one yellow end connector.

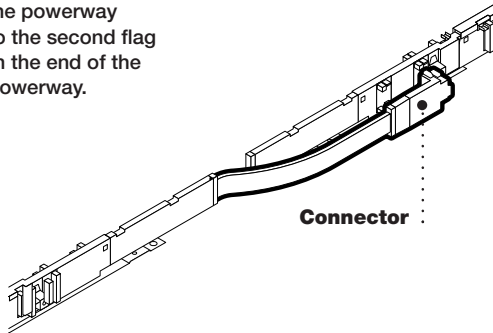

All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts.

All Steelcase electrical systems are designed in compliance with the National Electrical Code (NEC) and Canadian Electrical Code (CEC) to function as a multi-wire branch circuit. Installations should be made in accordance with the NEC or CEC provisions for multi-wire branch circuits.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of electrical equipment. Chicago, New York City, and Los Angeles have special requirements.

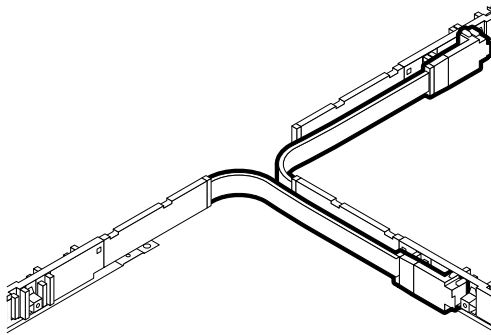

Straight connection is formed when a flag connector from one powerway attaches to the second flag terminal on the end of the adjacent powerway.

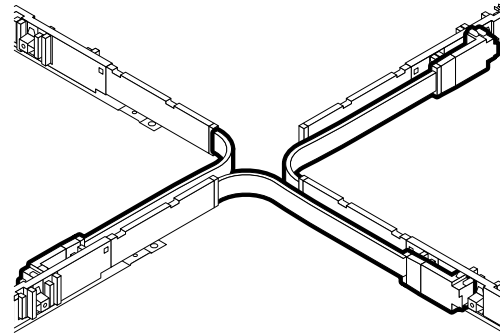

L-connection is formed when flag connector turns to left or right.

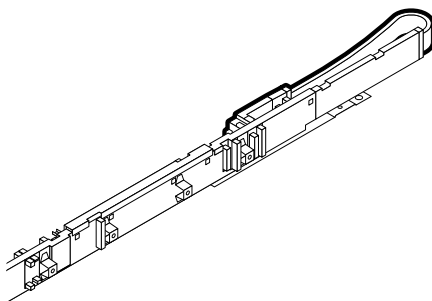

T-connection is formed by two flags that make right turns.

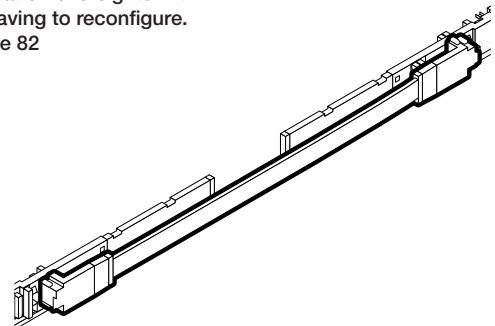

X-connection is formed by three flags that make right turns.

End-of-run is terminated by folding the last flag back and connecting it to its own power block flag terminal.

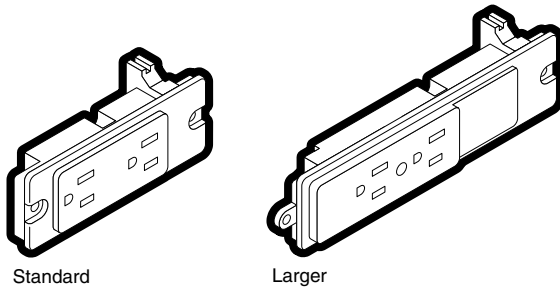

Panel-to-panel powerway connector can be used with powerways that are 30"W and wider to create a power link where no flag is available. It also can be used to correct planning and installation oversights without having to reconfigure.
► Page 82

Receptacle Facts

Receptacles are ordered separately and installed in the field in knockout opening. They plug into terminals on a powerway and are secured with screws. Receptacles are designed to link to a specific circuit.

 Specifying, page 83

Standard

Larger

All receptacles are duplex (two outlets) and are available in two sizes—standard and larger—and two versions—15-amp and 20-amp. Specific lines may be limited to and fit only in specific receptacle locations in the base.

Smaller-size openings of the base cover house only standard-size receptacle.

Larger-size opening in the base cover in 36"W through 60"W panels house larger-size duplex receptacle with two outlets. The larger opening is always in the right-hand position.

Numbers printed on the receptacles indicate the line number. Label on receptacle indicates which circuit the receptacle connects to, so the user can control which devices are on specific circuits.

With the 3-circuit separate neutral system, these designations are with letters A, B, or C as compared to 1, 2, 3, or 4 in the other systems.

Specific circuits are accessed through the powerway by installing the appropriate receptacle in the receptacle location. All five wiring schematics are available.

Standard

3-Circuit, Shared

3-Circuit, Separate Neutrals

3+D

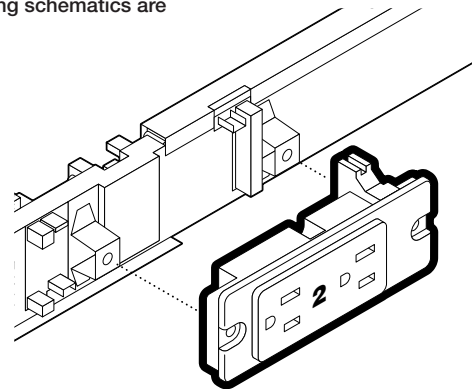

3I+1

2+2

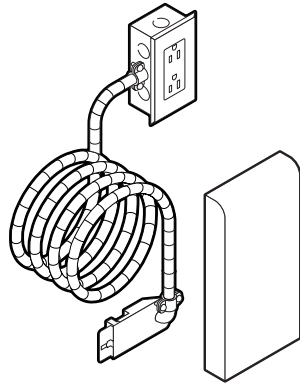

Larger

All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts.

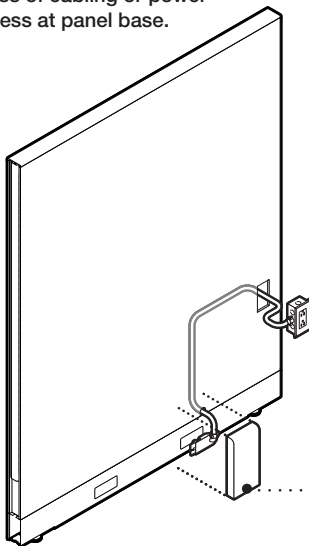

Integrated Power and Communication Facts

Power and communication components can be installed in holes cut onsite in any Kick tackable acoustical panel. Components can be accessed from one side of the panel only.

Power receptacle connects to panel powerway at any powerway receptacle access location and accesses line 1 only. Power receptacle can be specified to function with any of the five Kick powerway wiring schematics. Component complies with New York City requirements for a field-installed power unit.

Two holes must be cut into the panel surface—one for the component and one for the egress of cabling or power harness at panel base.

Shroud, included with power receptacle and communication module, conceals the egress of communication cables or power harness that exits from the bottom of the panel skin.

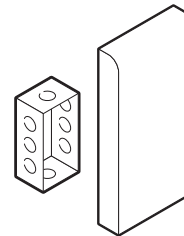

Power harness connects to panel powerway at receptacle location in base cover.

Communication cables enter base cavity underneath base trim.

Integrated Power and Communication Facts

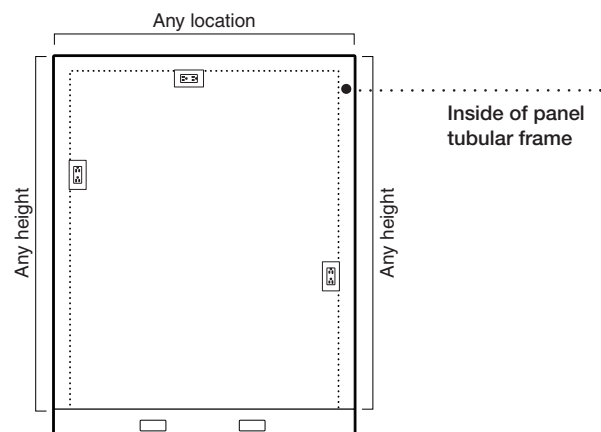

Specifying, page 84

Junction box accommodates customer-supplied voice/data jacks and trim plate. Communication module can be used for power in Chicago, where local electrical code requires that power in the panel base and the harness bringing power to worksurface height must be hardwired in the field.

Power and communication components are field-installed to the inside of the panel tubular frame at any user-specified location.

Power receptacle includes three receptacles, each with trim plate. Communication module includes communication housing. Customer must supply trim plate and voice/data jacks for communication module.

Power and Cable Pole Facts

 Specifying, page 85

Junction box, at the top of the power pole, encloses the hardwire connection to the building's electrical service.

Power poles bring building power from the ceiling to the powerways in the base cavity of panels. They can also be used to run cables into the top cap or into the panel base cavity. All five wiring schematics are available.

Trim conceals power harness and cables routed to the base of the panel.

Knockout

Flag connector attaches to either end of the powerway on 30"W to 60"W panels. Flag connector attaches to green end of the powerway on 24"W panels.

Hanger bar secures the top of the pole to the ceiling grid.

Ceiling trim plate

Cable poles provide a space to route cables from the ceiling to the high top cap or base cavity of a panel.

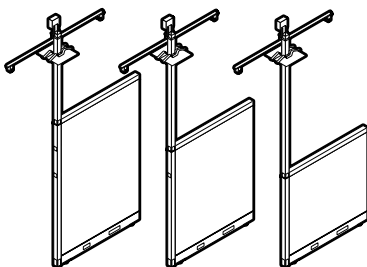

Knockouts allow data distribution in change-of-height conditions.

Retainer attaches to the end of a panel with screws that attach below the top cap. Panel remains undamaged so power and cable pole can be removed and relocated later.

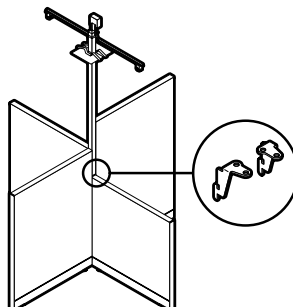

All the components in an electrical distribution network must use the same wiring schematics. Components are color coded and keyed to make it impossible to connect mismatched parts.

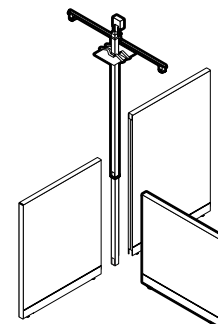

Height of the pole must correspond with the height of the panel it is attached to so that the pole will connect under the top cap. Adjacent panels can be lower. Ceiling heights up to 10'4" can be accommodated.

Power and cable pole packages ship with one left-hand and one right-hand corner change-of-height connector. A separate COH package may be required in certain X configurations. See assembly direction 93-9504745 for more information.

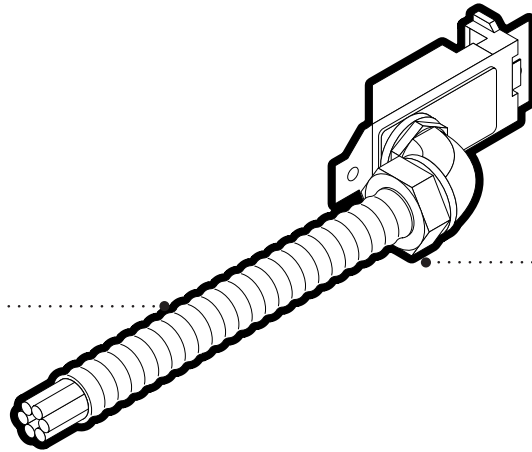

In T configurations, height of power and cable pole must correspond to the height of the center panel.

Base Power-In Facts

Base power-ins are field installed and connect the panel electrical system to the building power source. All five wiring schematics are available.

 Specifying, pages 86–87

Connector plugs into the appropriate powerway terminal.

Right-angle elbow helps position the conduit close to the panel.

Conduit is flexible and houses wires for 3 or 4 circuits. Conduit connects power-in to building's power source. Conduit leads must be hardwired to the building wiring by a qualified electrician or engineer.

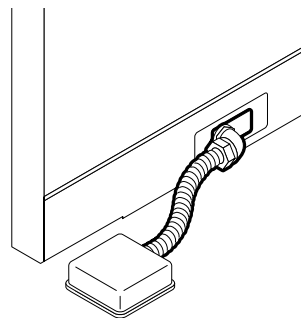

Power-ins are UL listed and CSA certified. Local electrical codes vary. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment.

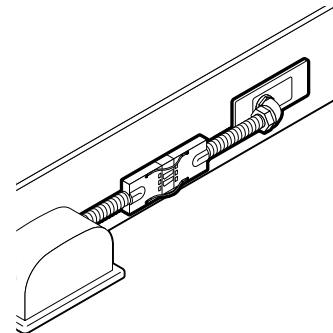

All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts. Building power source can come from the floor, wall, or column.

Power-in brings power to panel run by connecting to a designated receptacle location on either end of the powerway. Power-ins fit standard-size receptacle openings if the green end of the powerway is located behind the receptacle opening.

Breakaway base power-in is mandated for use in health care occupancies in the State of California by the Office of Statewide Health Planning and Development Organization (OSHDP).

With 50 pounds of pressure, the connection will come apart to separate live electrical current in the event of panel movement. Breakaway power-ins fit duplex- or triplex-size receptacle openings.

Tip: This product is not available in Canada.

Data Duct Facts

Data duct has capacity to hold 60 CAT 5 cables. Data duct manages data and communication cables only.

Trestle attaches to horizontal slots under top cap. Only low top caps can be used with trestle.

Downspout packages are used to route data and communication to the workstation. Downspout uses horizontal slots to secure to frame.

Clips are included to manage cables.

Utility bar is required to mount data box and power-up receptacles. Utility bar attaches to the vertical panel slots and can be mounted at 1" increments.

 Specifying, pages 88–92

Data management clips can be attached on the cable and power poles to manage cables externally.

Data duct screens (12"H and 24"H) can be used in conjunction with the data duct with trestle to add visual privacy where needed. Configurations with data ducts and trestles must include 30" minimum return panels and a minimum of one hang-on component per panel.

Data box is not equipped with communication faceplates. Customer must supply them. Data box fits standard NEMA faceplates.

Data duct with trestle can be applied only as follows:

Panel Height	Data Duct Height (above panel)	Downspout Height
42"	0"	10"
	12"	22"
	24"	34"
54"	0"	22"
	12"	34"
66"	0"	34"

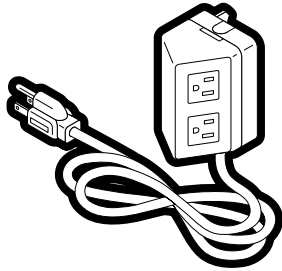

Data duct width should correspond to panel width.

Worksurface-Height Power and Communication Facts

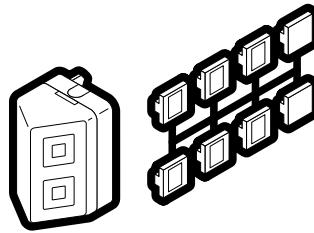

Worksurface-Height
Power and Communication
Facts

 Specifying, page 93

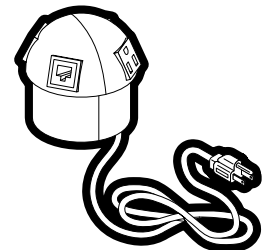

Power and communication can be accessed at or near worksurface height by using panel- or worksurface-mounted receptacles, panel- or worksurface-mounted communication modules, or worksurface-mounted power and communication sphere.

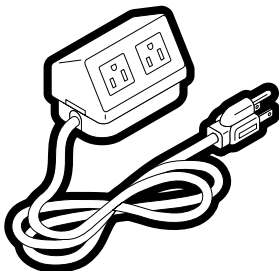

Panel-mounted receptacle

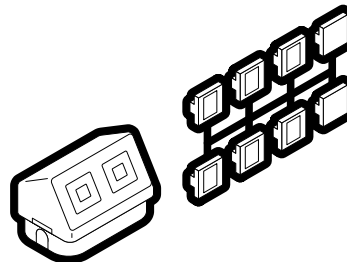

Panel-mounted communication module

Worksurface-mounted power and communication sphere

Worksurface-mounted receptacle

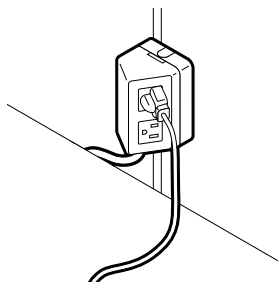

Worksurface-mounted communication module

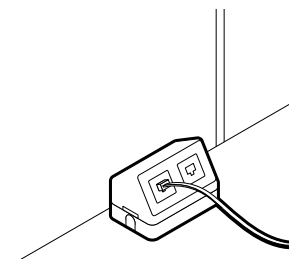

Grommet

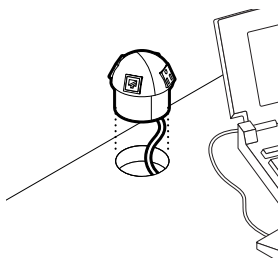

Panel- and worksurface-mounted receptacles come in packages of three. Each has a duplex receptacle, a nine-foot cord, and a three-prong plug.

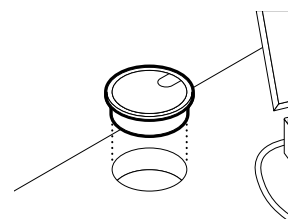

Panel- and worksurface-mounted communication modules come in packages of three. Each contains face plates to accommodate customer-supplied voice/data jacks.

Worksurface-mounted power and communication sphere contains two simplex electrical outlets, face plates to accommodate customer-supplied data jacks, a six-foot cord, and a three-prong plug.

Grommets are available in packages of 10 to finish exposed edges of field-installed openings in the worksurface for vertical cable routing. Grommets are black plastic.

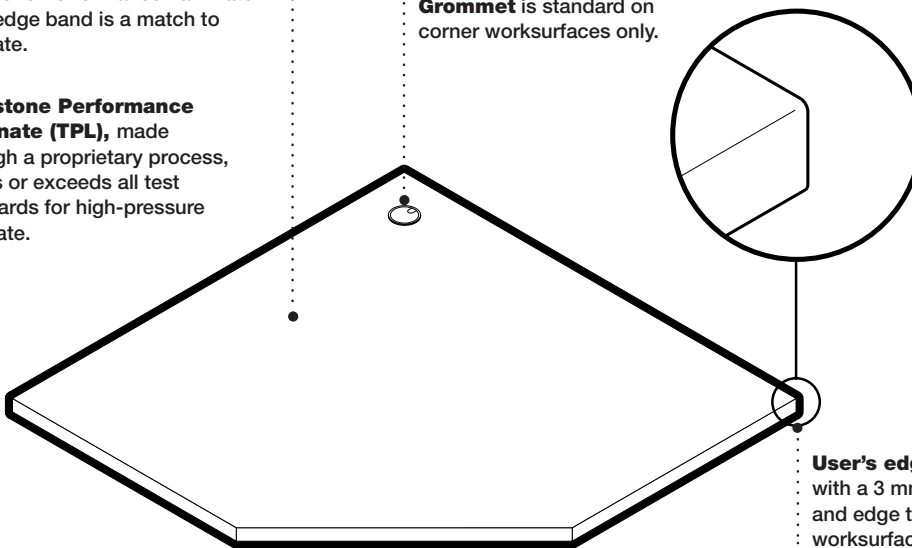

Worksurface Facts

 Specifying, pages 96–110

Worksurface has a wood core with Turnstone Performance Laminate. Vinyl edge band is a match to laminate.

Turnstone Performance Laminate (TPL), made through a proprietary process, meets or exceeds all test standards for high-pressure laminate.

Grommet is standard on corner worksurfaces only.

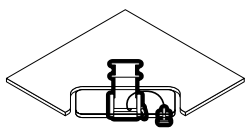

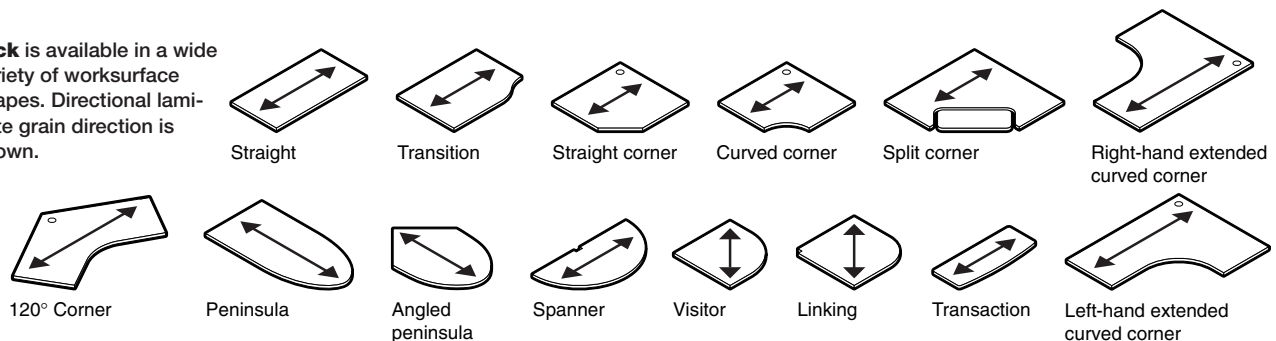

Shipping

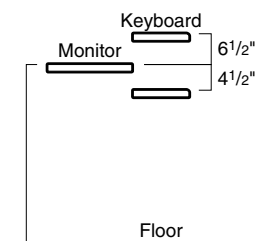

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 10–20 worksurfaces. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of nine or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible.

User's edge profile is PVC with a 3 mm radius. Back edge and edge that joins to adjacent worksurface is 1 mm.

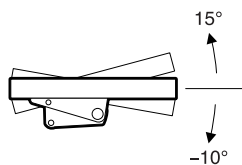

Kick is available in a wide variety of worksurface shapes. Directional laminate grain direction is shown.

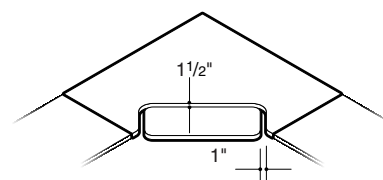

Release lever activates continuous adjustment of keyboard surface.

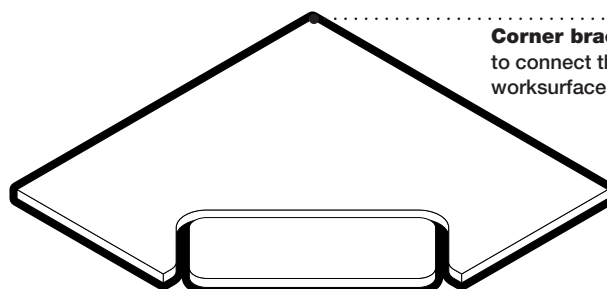

Keyboard shelf is supported by a single arm spring mechanism that allows it to adjust to positions up to 6 1/2" higher or 4 1/2" lower than the monitor worksurface.

Keyboard surface tilts with a range of 25°. Negative tilt is reduced at lower keyboard shelf heights.

One-inch space separates sides of the keyboard and monitor surfaces to prevent pinching. One and one half inch separates the back.

Corner bracket is included to connect the back corner of worksurface to panels.

Worksurface Supports Facts

Specifying, page 112

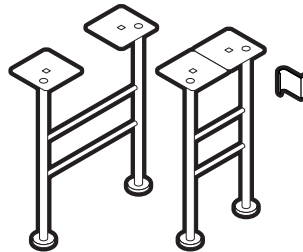

Supports are ordered separately and installed in the field. The following supports are available for use with Kick work-surfaces:

- Post leg
- H-leg
- Cantilever with tie plate
- Side support brackets
- Tie plates
- In-line support plate
- Reinforcing channel
- On-module end panel

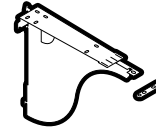

► Page 112

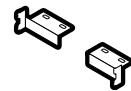

Post leg

H-leg with bracket

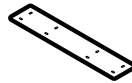

Cantilever with tie plate

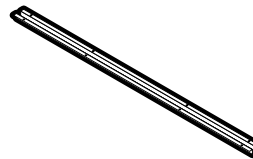

Side support brackets

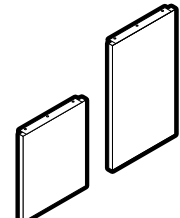

Tie plates

In-line support plate

Reinforcing channel

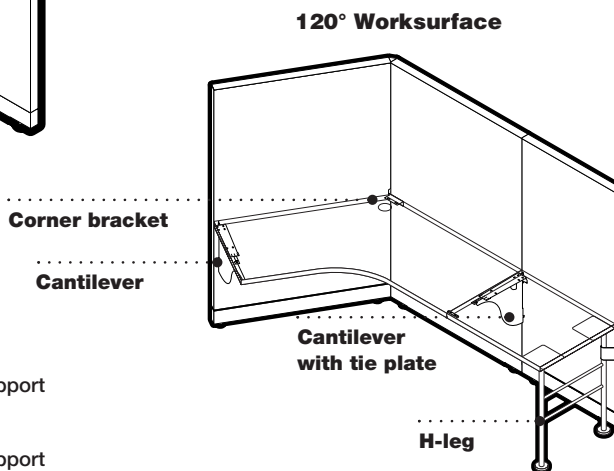

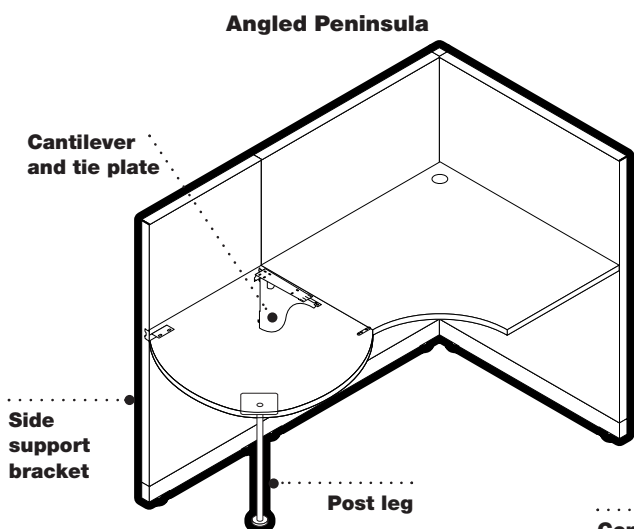

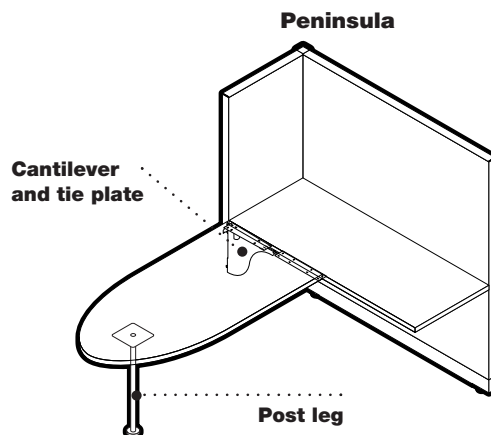

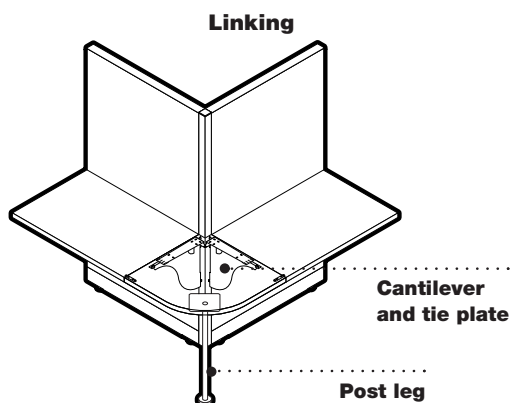

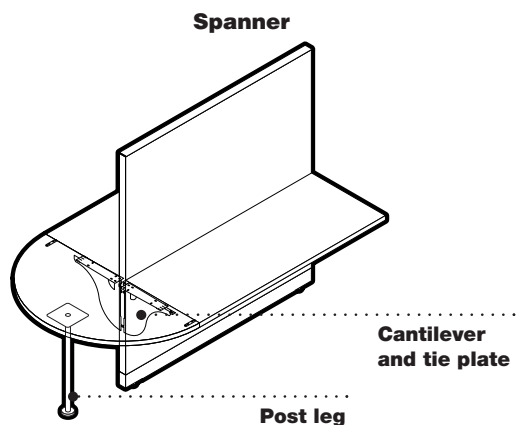

End panels—
standard height
and standing height

Cantilever with tie plate works in left-hand, right-hand, or shared applications.

Recommended Worksurface Supports

Recommended worksurface supports for some specific applications are shown below.

 Specifying, pages 96–110

If angled peninsula is used in conjunction with a straight worksurface, a cantilever or 11"W H-leg is required in place of side support bracket.

Kick H-legs:
11"W leg is intended to support the middle of a run.

20"W leg is intended to support the end of a run.

► For details, see *Stability Rules*, page 38.

Adjustable-Height Worksurface Facts

Adjustable-Height
Worksurface Facts

Crank-adjustable, adjustable-height work-surfaces support computers, keyboards, and mouse for users in task-intensive or high-churn environments. Worksurfaces will travel 1" for approximately 6.5 turns of crank handle.

Hand crank allows seated left- or right-handed users to raise or lower the monitor worksurface. Crank can be stored away when not in use.

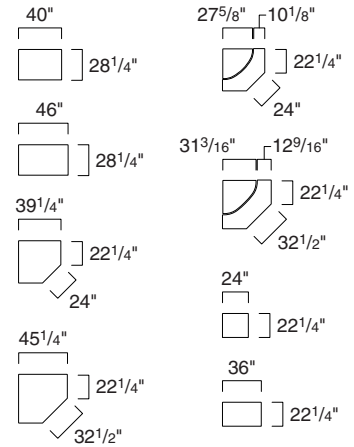

Worksurfaces have a wood core with a Turnstone performance laminate surface.

User's edge profile is PVC with a 3 mm radius. Back edge and edge that joins to adjacent worksurfaces are 1 mm and finished with vinyl (PVC). PVC edge color is an exact match to laminate.

Optional shroud cover provides an alternative aesthetic. Shroud can be specified, in any Kick paint color, feet will match.

Leveling glides adjust to install unit on uneven floors.

 Specifying, page 115–116

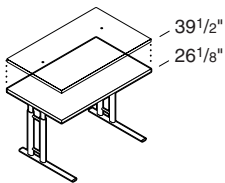

All adjustable-height work-surfaces support a total of 150 pounds. If the unit has two surfaces, the monitor surface will support up to 130 pounds and the keyboard surface will support up to 20 pounds.

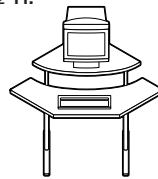

Moving worksurfaces can collide with other components. Don't install overhead storage, desk-height power, communication outlets, or desk accessories in the path of adjustable-height worksurfaces.

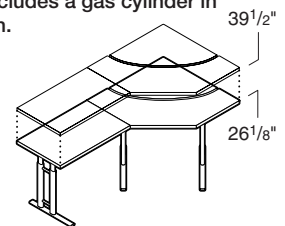

Single worksurfaces are one piece to accommodate single or multiple monitors and a keyboard. You can adjust the height of the worksurface from 26¹/₈"H to 39¹/₂"H with the crank mechanism. *Tip: Adjustable-height mechanism requires assembly and attachment to worksurface.*

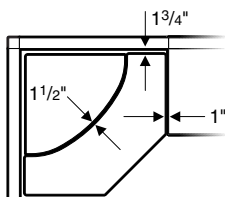

Bi-level worksurfaces are two nearly equal pieces—a monitor worksurface, which can accommodate a 21" monitor, and a large keyboard worksurface. Use the crank mechanism to adjust the height of the monitor worksurface and the height of the keyboard worksurface. These two adjustments are completely independent of each other and range from 26¹/₈"H to 39¹/₂"H.

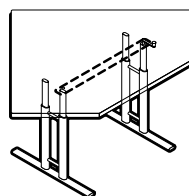

Extension link worksurfaces connect to corner worksurfaces to provide the user with additional space. An extension link worksurface attaches to a single or bi-level corner worksurface and moves up or down in tandem with the corner worksurface. Extension link worksurface includes a gas cylinder in the rear column.

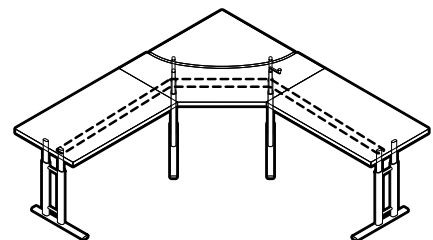

At least a 1³/₄" gap must separate backs of a worksurface and panels to accommodate cables and prevent pinching. A 1" gap separates sides and adjacent furniture. There is also a 1¹/₂" space between the keyboard and monitor surfaces on units with two surfaces.

Crank drives worm screw in leg of straight single and corner single work-surfaces to raise or lower worksurface. Chain connects to height-adjustment mechanism in adjacent leg so it moves up or down in sync with crank leg. Crank handle can be used in either leg.

Chain connects height-adjustment mechanisms on extension link worksurfaces and adjacent worksurfaces to allow user to adjust all worksurfaces simultaneously with one turn of the crank.

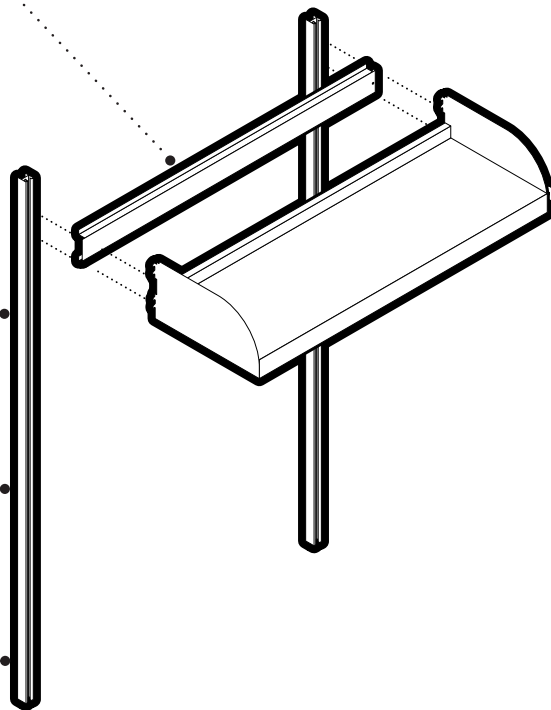

Bin and Shelf Storage Accessory Facts

Horizontal brace is available to reinforce vertical wall channels that support storage bins and shelves that are attached to walls. Width of brace must match width of shelf or storage bin. Components that are 48"W or less do not require a horizontal brace.

Wall channels are available to attach shelves and bins to walls.

Components attach at 1" increments, but screws block some slot locations.

Wall channel can be positioned on wall at the height needed.

 Specifying, page 120

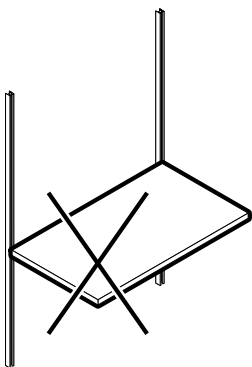

Field install on the following:

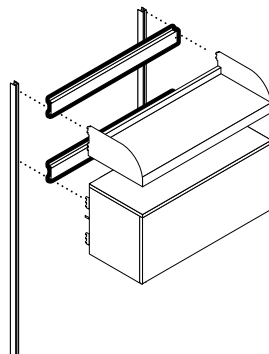

- Concrete walls: Hilti® type anchors.
- Drywall or plywood: 5/8" thick, Toggler® type 3/16" wall anchors.
- Steel and wood studs: #10 sheet metal or wood screws of appropriate length.

Anchors must be used in each screw hole location of the wall channel.

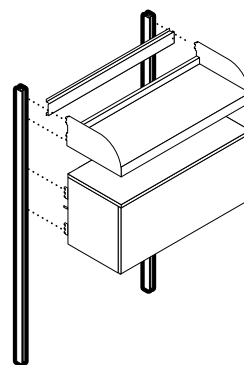

Attaching worksurfaces to wall channels is not possible.

Horizontal brace is required for each component that is wider than 48". The brace should be positioned at the top location of each bin or shelf on the vertical wall channel. Horizontal brace is also available in 48"W to be used in applications where the strength of the wall is questionable.

Limit to two bins or shelves for each pair of wall channels.

Upmount Kit Facts

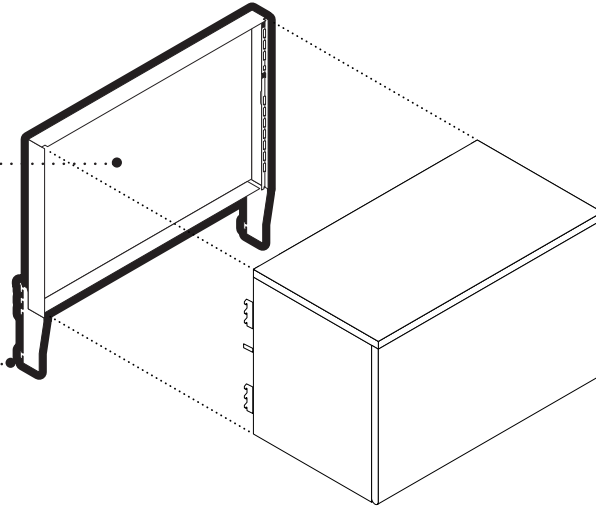

Upmount Kit Facts

Upmount kit is available in a variety of widths to upmount overhead storage bins to 42"H and 54"H panel walls. Kit also provides additional privacy.

 Specifying, page 121

Rear of upmount bin, painted steel, encloses Kick overhead storage bins.

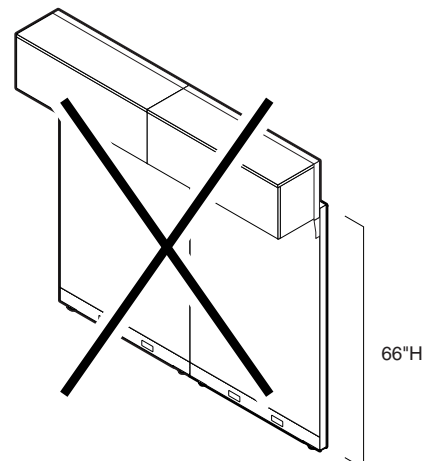

Steel support hooks on end supports insert into the slotted channel of a panel and lock into place.

Clearance between worksurface and bottom of overhead storage bin is 20⁵/₈" when upmount kit is installed in highest position on 54"H panel.

Upmount kit should not be used with 66"H panels.

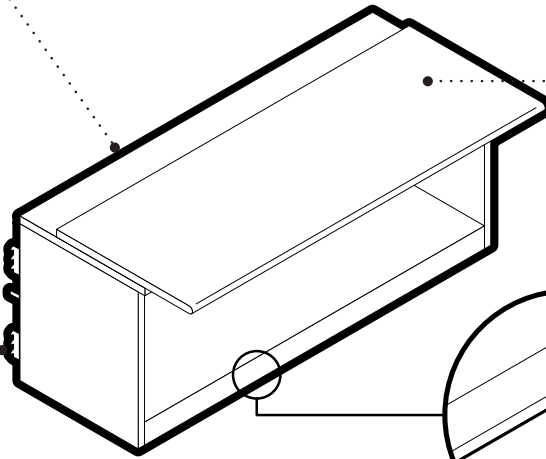

Bin and Shelf Facts

 Specifying, pages 117–119

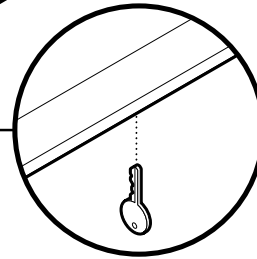

Bin and shelves are steel and ship ready to assemble. They do not require screws or fasteners. Once assembled, they can be moved without being taken apart.

Steel support hooks on end supports insert into the slotted channel of a panel, upmount kit, or wall channel and lock into place with a safety catch.

Metal overhead storage bin

Lift-up doors open and close quietly with resilient plastic bumpers. When up, the doors rest on top of the case to provide more storage space inside.

Lock(s) is standard on bins to secure the door(s). Lock is hidden underneath the door. Lock is standard keyed random. Consecutive and specific keying options are available. Master-keyed locks are also available. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site. Lock cylinders must be specified separately.

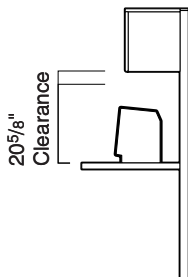

► *Lock and Keying Options*, page 588

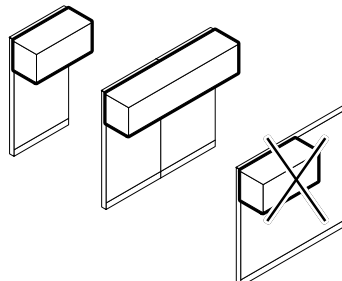

Additional support for stability may be required when shelves and overhead storage bins are attached to panels. Counterbalancing loads on opposite sides of the panels increases stability.

► See *Stability Rules*, page 38

Clearance between worksurface and bottom of overhead storage bin is 20⁵/₈" when storage unit is installed in the highest position on a 66"H panel.

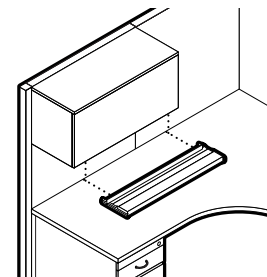

Width of overhead storage unit must match the width of the panel or panels that it is attached to.

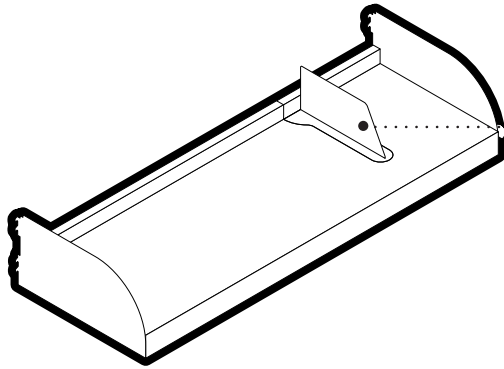

Shelf lights are available from Steelcase to recess into the bottom of Kick shelves and overhead storage bins.

► Pages 122–127

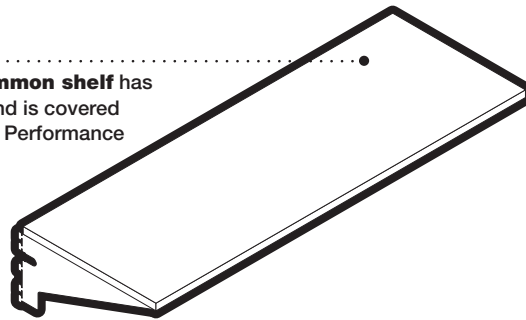

Specifying, pages 117–119

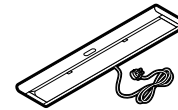

Metal half-height shelf

Adjustable divider is available as an option to subdivide shelf or overhead storage bin.

Laminate common shelf has a wood core and is covered with Turnstone Performance Laminate.

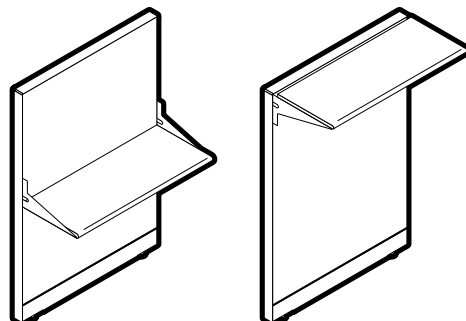

Laminate common shelf

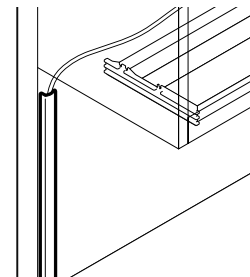

Underline task light's 3/4" profile makes it the ideal task lighting solution for wood laminate shelf. Underline task light includes the lamp, ballast, and 9' cord. Underline mounts flush to the bottom of wood laminate shelf using screws. Task light is field-installed. Spiral 9' cord option is designed to drop straight down from the fixture. This option is an aesthetic alternative to the traditional cord. Housing is 24"W and 3/4"H and is available in dark champagne, pewter, and black. For New York City, tool-free clips are required for the flush-mount applications within New York. Clips allow removal of Underline without use of a tool.

Laminate common shelf ships with steel support brackets. Support brackets hook into the vertical panel slots or wall channel and lock into place with a safety catch. Support brackets can be used in either orientation.

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage.

► Page 128

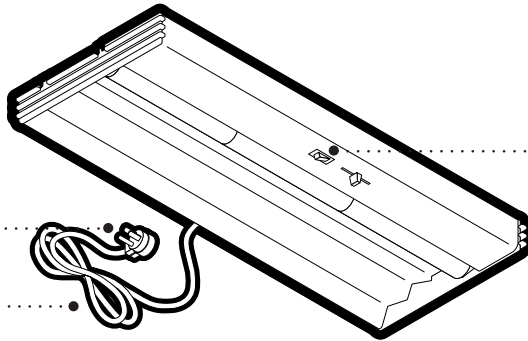

Lighting Facts

Shelf lights are available in three versions with different features, optics, and performance characteristics that match any application. Shelf light includes the lamp, ballast, and either a 9' cord with three-prong plug or daisy chain cords.

 Specifying, pages 122–128

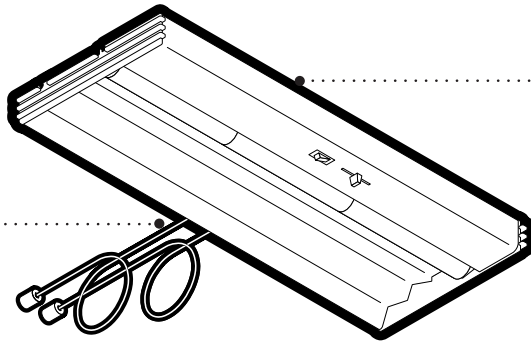

Plug is flat so it remains close to the receptacle.

9' cord with grounded plug is factory installed. Length is maximum allowed by U.S. National Electrical Code. Cord with circuit breaker is available to meet the requirements of the Chicago code.

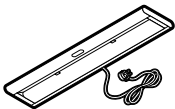

On-off switch is centered on the front edge of the shelf light.

Cord exits from the center of the back of the light.

Housing is painted black.

End cap cord managers, molded into the durable plastic end caps, allow you to route and manage excess cord.

Underline task lights 3/4" profile makes it the ideal task lighting solution for wood laminate shelf. Underline task light includes the lamp, ballast, and 9' cord. Underline mounts flush to the bottom of wood laminate shelf using screws. Task light is field-installed and pre-drilled holes are provided. Spiral 9' cord option is designed to drop straight down from the fixture. This option is an aesthetic alternative to the traditional cord. Housing is 24"W and 3/4"H and is available in dark champagne, pewter, and black. For New York City, tool-free clips are required for the flush-mount applications within New York. Clips allow removal of Underline without use of a tool.

Overhead cabinets and shelves provide a recessed area for shelf lights. They are not designed to conceal cords when daisy chaining.

Width	Lamp width	Lamp wattage	Replacement lamps
24 1/4"	21 3/8"	14 watts	F14T5\835
36 1/16"	33 2/5"	21 watts	F21T5\835
47 7/8"	45 1/5"	28 watts	F28T5\835

Plug configuration allows two shelf lights to engage adjacent outlets in one receptacle.

Energy-saving T8 lamps have triphosphor coating for balanced color and pleasing light.

Power drawn is approximately 1/2 amp.

Magnetic ballasts are available on Utility shelf lights.

Tip: Magnetic ballasts can cause interference with computer monitors. An electronic ballast is recommended for shelf lights in offices where computers are used.

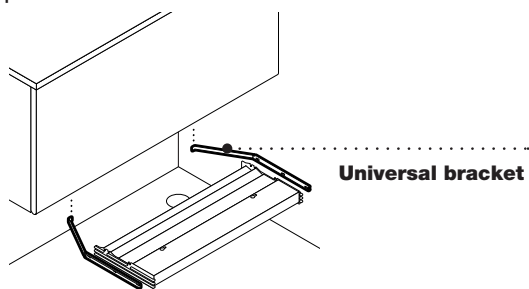

Electronic ballast that is roughly 30% more efficient than a magnetic ballast is available. Electronic ballasts eliminate fluorescent lamp flicker and computer screen interference.

Economizer electronic ballast cuts power use by 25% and emits 50% of the light output of a regular electronic ballast. It is available on Advanced and Standard shelf lights.

Electronic dimming control features **sliding switch**, which allows continuous-range dimming from 100% to 10% light output on Advanced shelf lights.

Bat-wing lens is available as an option on Utility shelf lights for applications where moderate improvement to light distribution of regular prismatic lens is required, and low cost is critical.

Universal bracket allows shelf light to be installed without tools under most metal overhead storage bins and shelves. The bracket snaps into the end caps and then shelf light snaps into place.

Wire manager conceals cords and cables that are routed vertically outside of the panels between the bottom of a shelf or overhead storage bin and a worksurface. Wire manager can also be used below the worksurface. Wire manager can be cut in the field to suit specific application. Snaps into the slot-channel of the junction.

► Page 128

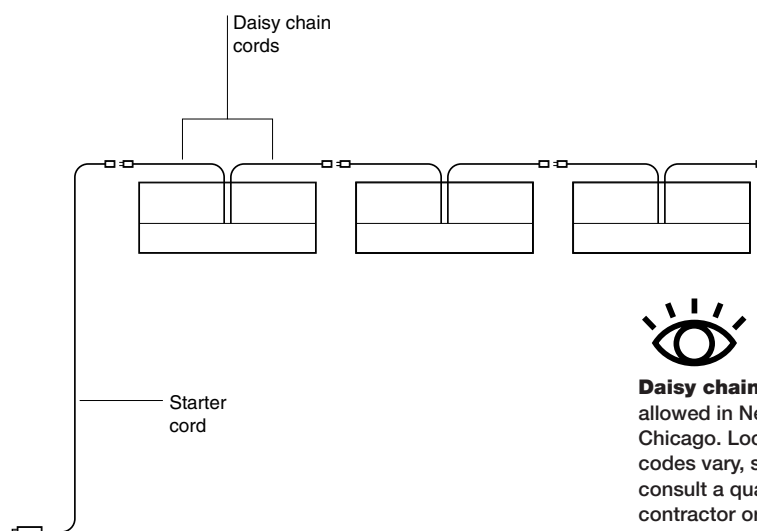

Daisy Chaining

Daisy chaining permits interconnecting up to six shelf lights from a single power outlet.

Starter cord powers first light in a daisy chain and allows you to convert any daisy chain light for independent operation.

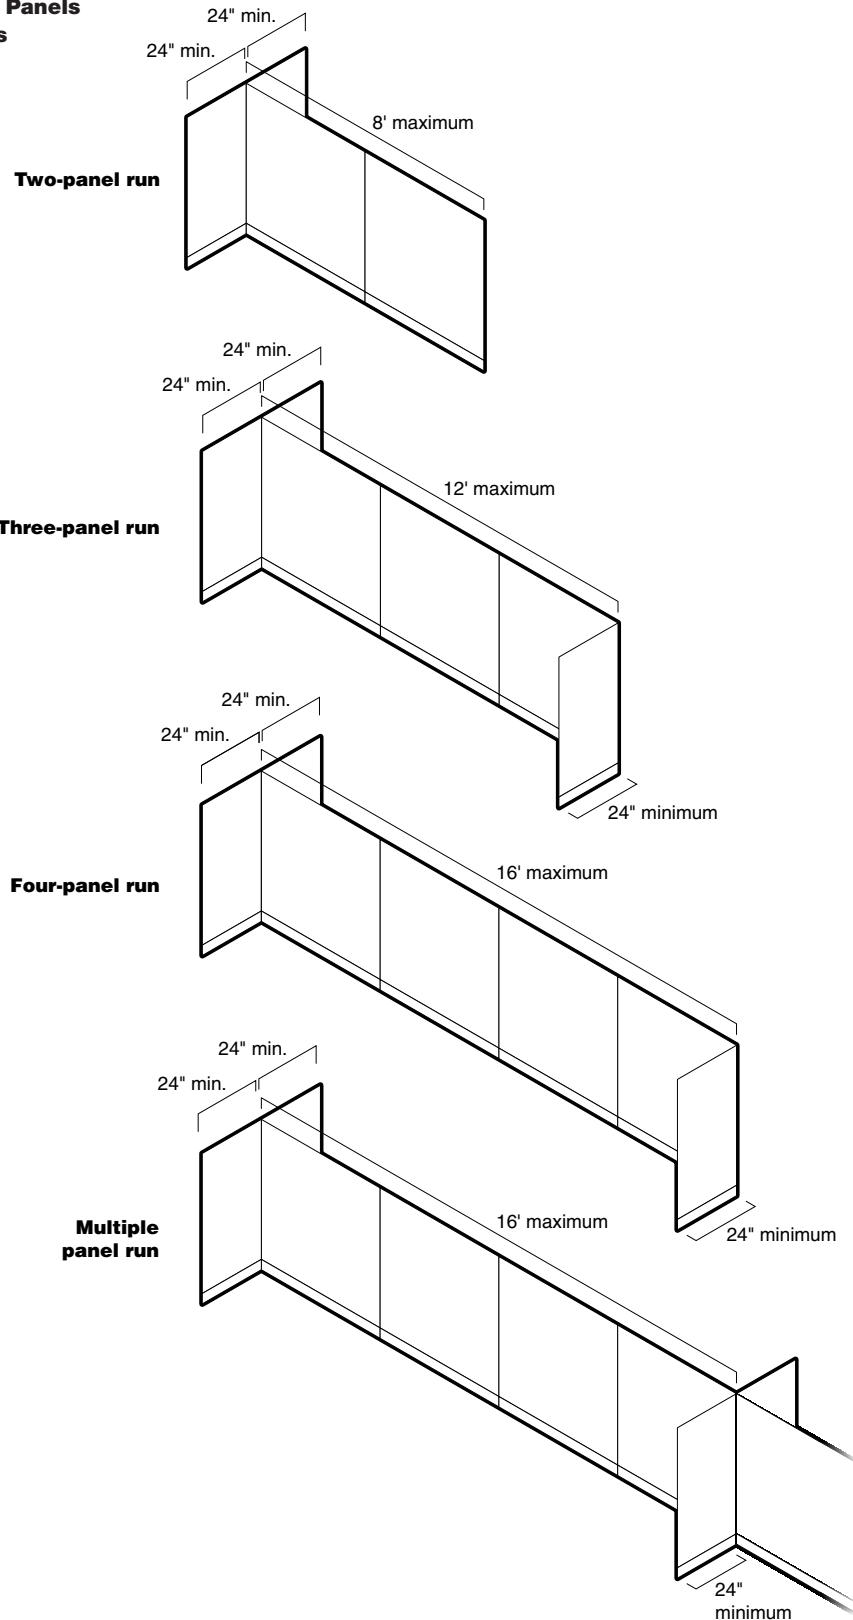

Daisy chaining shelf lights together extends power from one fixture to another within workstations to help keep receptacles clear for other uses.

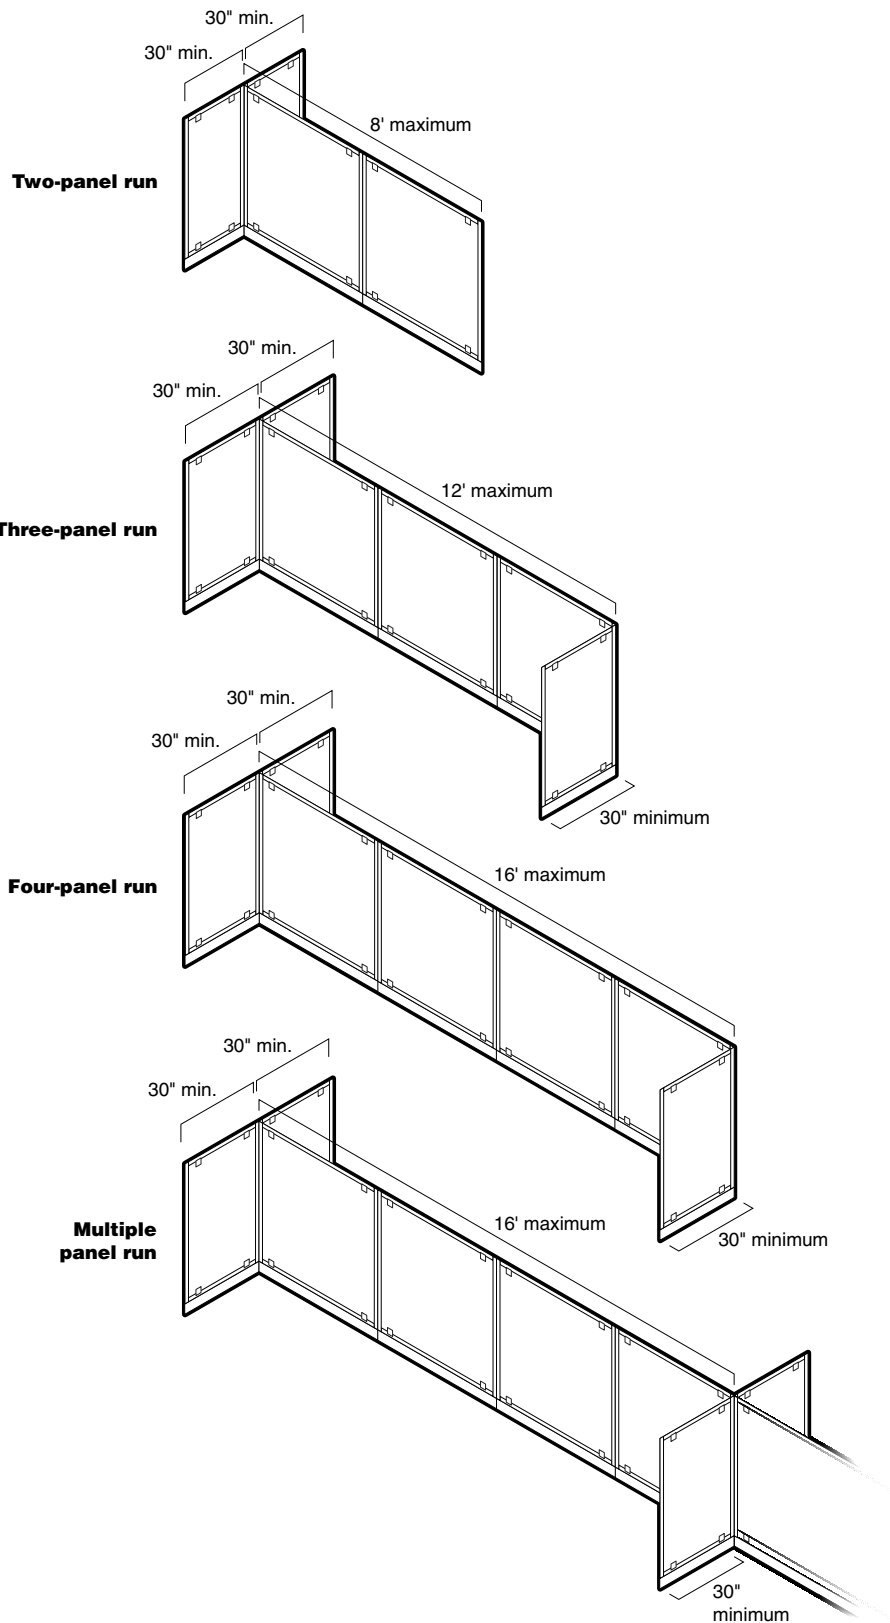

Daisy chaining is not allowed in New York City or Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

Stability Rules

Tackable Acoustical Panels without Components

Three Panel 120° Connection with 120° Worksurface and up to One Additional Component

Loads must be counterbalanced in this application.

Worksurface needs to be supported to floor or application needs to be counterbalanced.

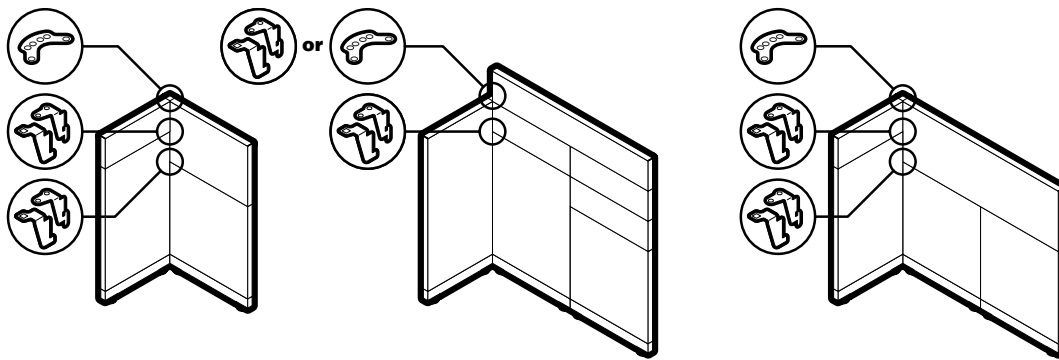

Kick System

Stability Rules, continued

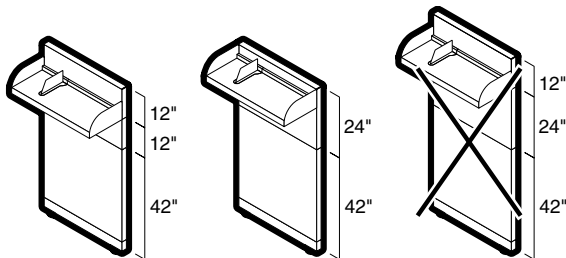

Panels and Panel Stackers

Base panels can accept one, two, or three stackers, up to a total height of 78". See below for additional rules and exceptions.

Universal or change-of-height connectors must be used at top of base panel and each stacker wherever possible to increase stability.

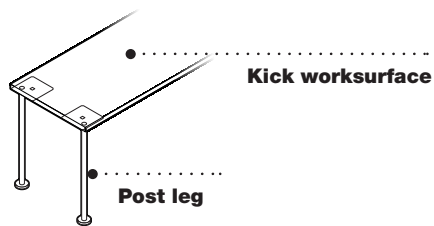

All stackers are load bearing, but load cannot be mounted above 66" height.

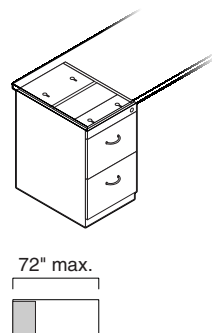

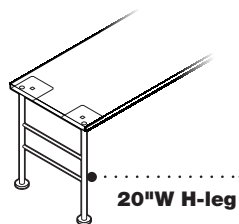

Freestanding Guidelines

The following section on **free-standing workspaces** gives some guidelines to be used with common freestanding configurations. Consult your local dealer or Steelcase representative prior to deviating from these guidelines.

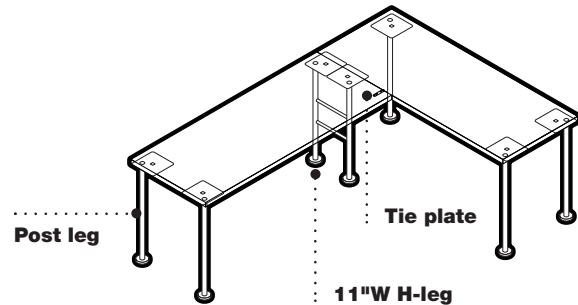

There are several ways to support the ends of a freestanding workspace:

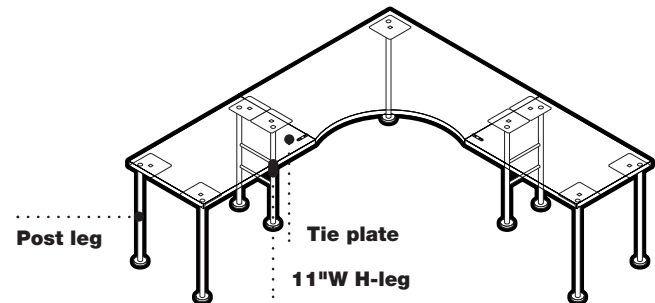

With post legs

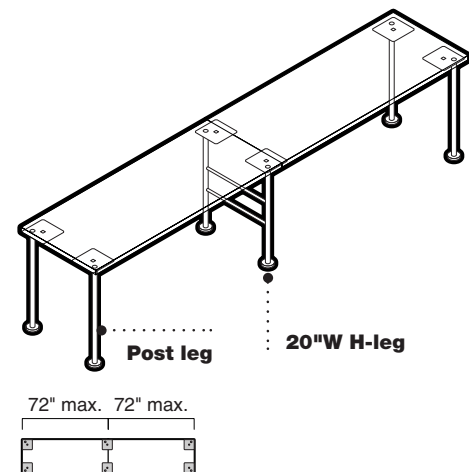

With a 22\"D or 28\"D pedestal

Combined workspaces can give each other support when joined with an 11\"W H-leg and tie plate.

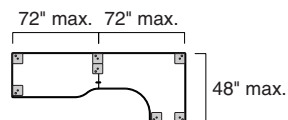

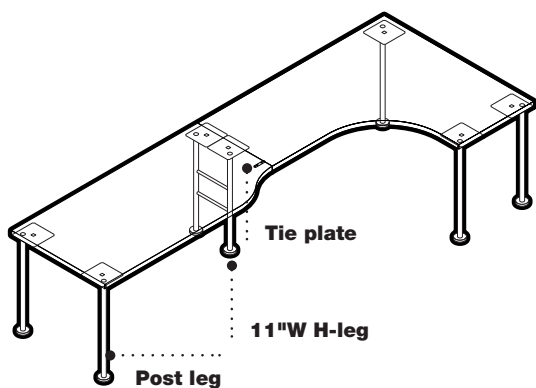

Corner workspace attached to adjacent workspaces requires 11\"W H-leg. Tie plate is recommended to align workspaces. This application only good for 48\"W corner workspaces. The 36\"W and 42\"W corner workspaces do not meet ADA requirements.

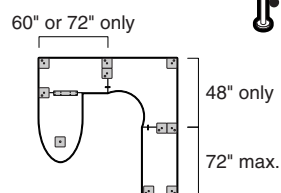

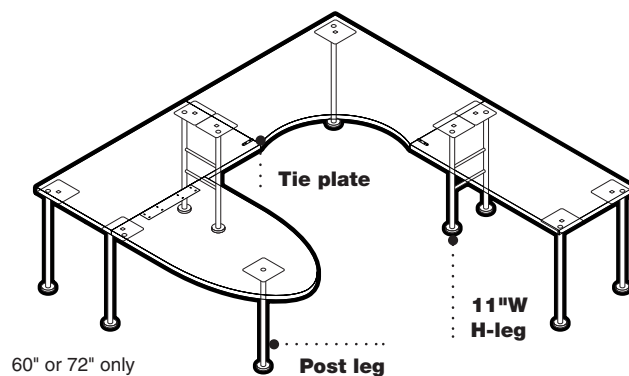

20\"W H-leg can support adjacent workspaces up to 72\"W.

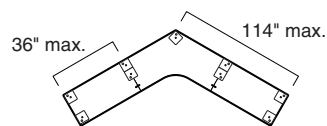

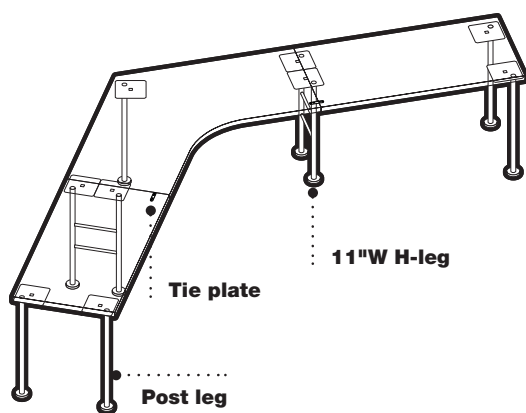

Freestanding Guidelines, continued

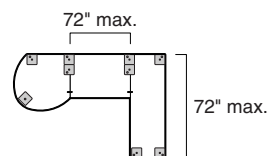

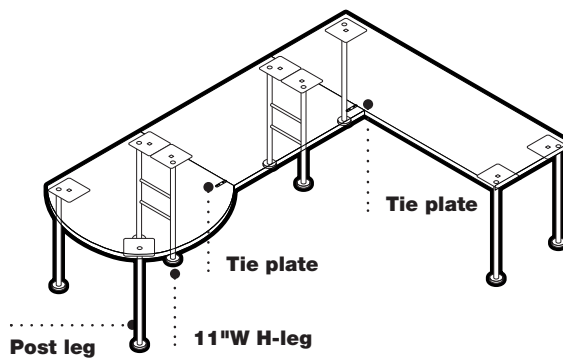

11"W H-leg can be used to support a corner worksurface and adjacent worksurfaces up to 72"W.

11"W H-leg can be used to support a corner worksurface and adjacent worksurfaces up to 72"W.

120° worksurface

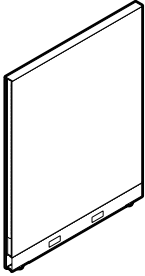

H-leg can be used to support adjacent perpendicular worksurfaces up to 72"W.

Reinforcing channel (TSATRC57) is available to add support to work-surfaces that have 60" or more of unsupported kneespace and that are heavily loaded.

Tackable Acoustical Panels

Tip: To price a panel with two fabric surface materials in different price groups, add the two fabric price group option prices together and divide by 2; then add the result to the panel base price.

Tip: Factory-included powerway for field installation option replaces need to order separate powerways.

Tip: For field-installed powerways, see Avenir Systems Furniture Specification Guide.

Tip: Remember to order end-of-run trim and vertical corner trim packages.

Tip: Details panel-mounted slatwall will not hang on a 42"H panel with worksurface. There is not enough space above the worksurface and top of panel for the bracket to engage into panel slots.

For Canadian Pricing
Multiply U.S. Price by 1.38.
► See page 1 for details.

66"H Segmented Panels

Tip: When specifying panels with multiple fabric surface materials in different price groups, all of the surface material prices are averaged.

Tip: Factory-included powerway for field installation option replaces need to order separate powerways.

Tip: For field-installed powerways, see Avenir Systems Furniture Specification Guide.

For Canadian Pricing
Multiply U.S. Price by 1.38.
► See page 1 for details.

Standard Includes		Required to Specify	
► Need help? Product details, page 8	- Panel with segmented, fabric surfaces: Kick standard fabric group A - Base covers with receptacle knockouts: paint price group 1 - Top cap (low height): paint price group 1 - Top cap aligner: black plastic - Universal connector package - Frame: 0835 Black only	1 Style number 2 Fabric color number for base skin; surface 1 3 Fabric color number for accent skin; surface 1 4 Fabric color number for base skin; surface 2 5 Fabric color number for accent skin; surface 2 6 Paint color number for top cap and base covers 7 Options, if selected (see below)	► See <i>Surface Materials</i> , page 130.

Options		U.S. Price	Required to Specify
Surface Materials	Top cap and base covers		
	• Paint price group 1	No cost	Specify paint color number.
	• Paint price group 2	+\$ 11	Specify paint color number.
	Panel surface		
	• Kick standard fabric group A	No cost	Specify fabric color number.
	• Fabric price group 1	+\$ 10	Specify fabric color number.
	• Fabric price group 2	+\$ 34	Specify fabric color number.
	• Fabric price group 3	+\$ 53	Specify fabric color number.
	• Fabric price group 4	+\$138	Specify fabric color number.
	• Fabric price group COM	+\$ 70	Specify fabric color number.
	► See <i>Understanding Customer's Own Material (COM)</i> , page 584.		
	Accent skin surface		
	• Kick standard fabric group A	No cost	Specify fabric color number.
	• Fabric price group 1	+\$ 6	Specify fabric color number.
	• Fabric price group 2	+\$ 18	Specify fabric color number.
• Fabric price group 3	+\$ 26	Specify fabric color number.	
• Fabric price group 4	+\$ 70	Specify fabric color number.	
• Fabric price group COM	+\$ 36	Specify fabric color number.	
► See <i>Understanding Customer's Own Material (COM)</i> , page 584.			
Top Cap	• High top cap with knockouts to accommodate cable routing (increases panel height by 1¾")	+\$ 25	Specify with high top cap.
Electrical	Factory-installed powerway at base		
	• 3-circuit powerway with shared neutral	+\$110	Specify with 3-circuit power; shared neutrals.
	• 3-circuit powerway with separate neutrals	+\$135	Specify with 3-circuit power; separate neutrals.
	• 4-circuit (3+D) powerway	+\$130	Specify with 4-circuit power; 3+D wiring.
	• 4-circuit (3I+1) powerway	+\$160	Specify with 4-circuit power; 3I+1 wiring.
	• 4-circuit (2+2) powerway	+\$160	Specify with 4-circuit power; 2+2 wiring.
	Factory-included powerway for field installation for use in New York City		
	• 3-circuit powerway with shared neutral	+\$110	Specify with 3-circuit power; shared neutrals; not installed.
	• 3-circuit powerway with separate neutrals	+\$135	Specify with 3-circuit power; separate neutrals; not installed.
	• 4-circuit (3+D) powerway	+\$130	Specify with 4-circuit power; 3+D wiring; not installed.
	• 4-circuit (3I+1) powerway	+\$160	Specify with 4-circuit power; 3I+1 wiring; not installed.
	• 4-circuit (2+2) powerway	+\$160	Specify with 4-circuit power; 2+2 wiring; not installed.

Perforated Steel Panels

► Need help?
Product details,
page 8

Standard Includes

- Perforated steel: paint price group 1
- Border: paint price group 1
- Base covers with receptacle knockouts: paint price group 1
- Top cap (low height): paint price group 1
- Top cap aligner: black plastic
- Universal connector package
- Frame: 0835 Black only

Required to Specify

- 1 Style number
 - 2 Paint color number for perforated steel
 - 3 Paint color number for top cap, base covers, and border
 - 4 Options, if selected (see below)
- See *Surface Materials*, page 130.

	Options	U.S. Price	Required to Specify
Surface Materials	Top cap, base covers, and border		
	• Paint price group 1	No cost	Specify paint color number.
	• Paint price group 2	+\$ 11	Specify paint color number.
	Perforated steel		
	• Paint price group 1	No cost	Specify paint color number.
	• Paint price group 2	+\$ 93	Specify paint color number.
Top Cap	• High top cap with knockouts to accommodate cable routing (increases panel height by 1¾")	+\$ 25	Specify <i>with high top cap</i> .
Electrical	Factory-installed powerway at base		
	• 3-circuit powerway with shared neutral	+\$110	Specify <i>with 3-circuit power; shared neutrals</i> .
	• 3-circuit powerway with separate neutrals	+\$135	Specify <i>with 3-circuit power; separate neutrals</i> .
	• 4-circuit (3+D) powerway	+\$130	Specify <i>with 4-circuit power; 3+D wiring</i> .
	• 4-circuit (3I+1) powerway	+\$160	Specify <i>with 4-circuit power; 3I+1 wiring</i> .
	• 4-circuit (2+2) powerway	+\$160	Specify <i>with 4-circuit power; 2+2 wiring</i> .
	Factory-included powerway for field installation for use in New York City		
	• 3-circuit powerway with shared neutral	+\$110	Specify <i>with 3-circuit power; shared neutrals; not installed</i> .

Advanced Shelf Lights

Tip: Daisy chaining is not allowed in New York City or Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

► Need help?
Product details,
page 36

Standard Includes

- Light housing with centered on-off switch: black paint
- End cap cord managers: black plastic only
- Cords:
 - 9' cord with three-prong plug at 45° angle: black vinyl only
 - One 30" and one 48" cord with modular connectors for daisy chaining: black vinyl only
- Precision optics tube around lamp
- Faceted reflector: specular (reflective) aluminum
- T8 3500K lamp
- Ballast
- Dimmer switch, if selected: black plastic only
- Universal mounting hardware package
- Daisy chain starter cord, if selected: black vinyl only (order separately)

Required to Specify

- 1 Style number
 - 2 Paint color number, if other than black
 - 3 Options, if selected (see below)
- See *Turnstone Surface Materials*, page 564.

Daisy Chain Starter Cord

1	78"	LS1FSC	\$ 41
6	78"	LS6FSC	\$246

: : : :

Tip: Magnetic ballasts can cause interference with computer monitors. An electronic ballast is recommended for shelf lights in offices where computers are used.

Tip: Remember to order a daisy chain starter cord. ► See Related Products below.

* Because lamps and ballasts for 19"W shelf lights are more expensive than those for 24"W shelf lights, use 19"W shelf lights only in applications where larger sizes will not fit.

Products on this page are Steelcase, not Turnstone. They are included here to simplify your planning. Remember that Steelcase has different pricing terms than Kick products.

Vertical Wire Manager

Tip: Wire manager can be cut in the field to the specific length needed.

Desk and Desk Shell Facts

Desks are available as shells (without storage) and in single- and double-pedestal models. Desks are shipped knocked down (ready to assemble).

Worksurface has a wood core with Turnstone Performance Laminate (TPL). Universal laminate worksurfaces and Universal wood worksurfaces without scallops are available as options.

Exception: 36"D desks and desk shells are not available with Universal laminate or Universal wood worksurfaces.

 Specifying, pages 140–145

User's edge profile is PVC with a 3 mm radius. Back and side edge is 1 mm.

Single-pedestal desks are non-handed.

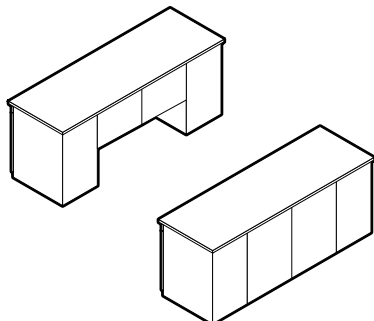

Lock, standard on desks with pedestals, controls all of the drawers. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site. Lock cylinders must be specified separately.

► **Lock and Keying Options**, page 588

Leveling glides adjust to allow installation on uneven floors.

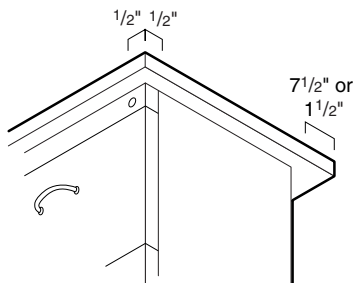

Handle pulls

Modesty panels are available partial- or full-height on desks and desk shells. Partial-height modesty panels are 12"H. Full-height modesty panels extend to the floor. Desks and desks shells can also be specified without a modesty panel.

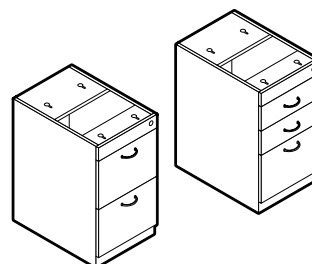

Kick worksurface overhang:
 $\frac{1}{2}$ " on front and sides
 $1\frac{1}{2}$ " on back side (24"D and 30"D desks)
 $7\frac{1}{2}$ " on back side (36"D desks)

Universal laminate and wood worksurface overhang:
 $\frac{1}{2}$ " on front and sides
 1" on back side

Pedestals are standard with two file drawers (Exception: 48"W single-pedestal desks have a box, box, file pedestal only). Box, box, file drawers are available as an option. 22"D Turnstone under-worksurface pedestals are located beneath 24"D worksurfaces. 28"D Turnstone underworksurface pedestals are located beneath 30"D worksurfaces.

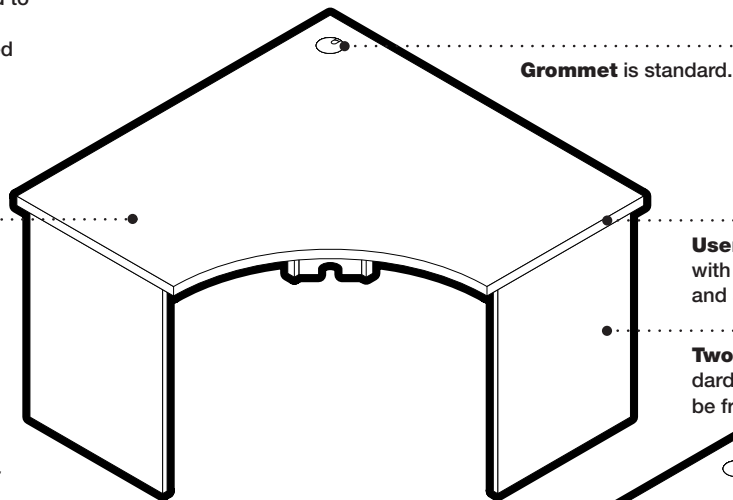

Curved Corner Desk Facts

Curved corner desks can stand alone or be attached to desks, returns, or bridges. Desks are shipped knocked down (ready to assemble).

 Specifying, page 146

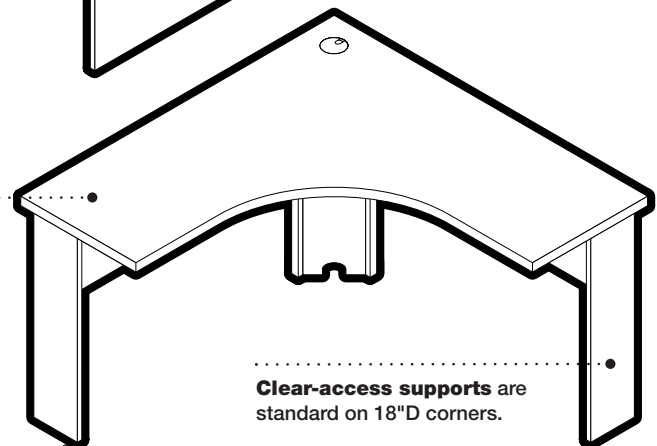

Worksurface has a wood core with Turnstone Performance Laminate (TPL). Universal laminate worksurfaces and Universal wood worksurfaces without scallops are available as options. *Exception: 18"D x 36"W corner desks are not available with Universal laminate or Universal wood worksurfaces.*

User's edge profile is PVC with a 3 mm radius. Back and side edge is 1 mm.

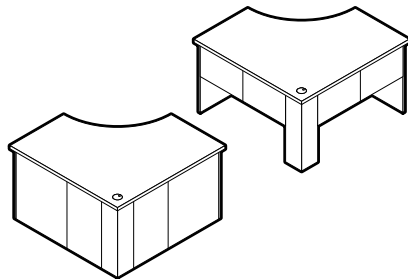

Two full end panels, standard, allow corner desk to be freestanding.

18"D corners must be attached to a desk, return, or bridge. They cannot be freestanding.

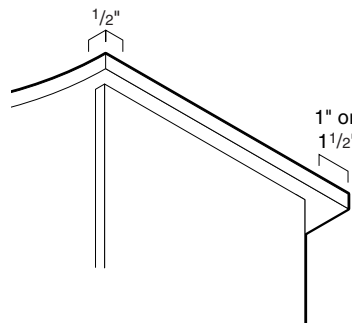

Leveling glides adjust to allow installation on uneven floors.

Modesty panels are available partial- or full-height on corner desks. Partial-height modesty panels are 12"H. Full-height modesty panels extend to the floor. Corner desks can also be specified without a modesty panel.

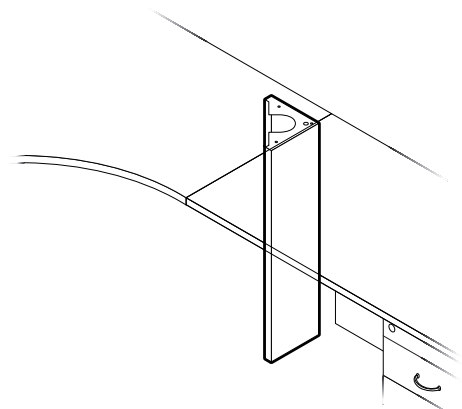

Kick worksurface overhang:
1/2" on front and sides
1 1/2" on back side

Universal laminate and wood worksurface overhang:
1/2" on sides
1" on back side

Clear-access supports, available as an option on 24"D corners, create kneespace when corner desk is attached to a desk, return, or bridge.

Return Facts

Returns attach to a desk to form an L-shaped configuration or a bridge to form a U-shaped configuration. Returns are available with or without a pedestal. Returns are shipped knocked down (ready to assemble).

 Specifying, pages 148–151

Worksurface has a wood core with Turnstone Performance Laminate (TPL). Universal laminate worksurface and Universal wood worksurfaces without scallops are available as options.

Leveling glides adjust to allow installation on uneven floors.

Handle pulls

Pedestal is standard with two file drawers. Box, box, file drawers are available as an option. Single-pedestal return is non-handed. Returns ship with 22"D Turnstone under-worksurface pedestals.

Transition returns are 18"D on the connection side and 24"D on the opposite side. Transition returns are designed to be used with 18"D corner units to create space efficient, user-centered workstations.

User's edge profile is PVC with a 3 mm radius. Back and side edge is 1 mm.

Worksurface overhang is 1½" on back side and ½" on front and sides of Kick worksurface. Worksurface overhang is 1" on back side and ½" on front and sides of Universal laminate and wood worksurfaces.

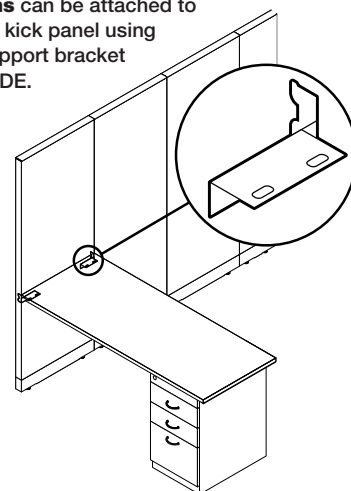

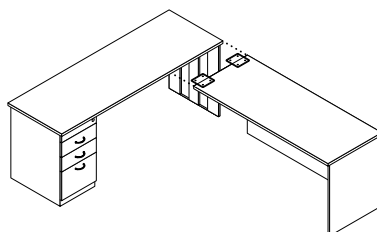

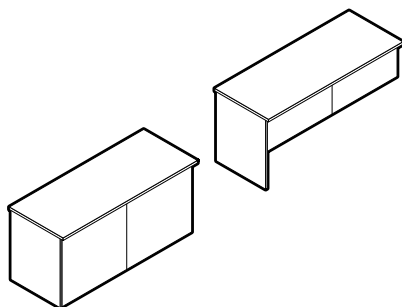

Lock, standard on returns with pedestals, controls all of the drawers. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site. Lock cylinders must be specified separately.

► **Lock and Keying Options**, page 588

Modesty panels are available partial- or full-height on returns. Partial-height modesty panels are 12"H. Full-height modesty panels extend to the floor. Returns can also be specified without a modesty panel.

Attachment hardware, standard, connects return to a desk or corner unit.

Returns can be attached to a 24"W kick panel using side support bracket TSATSIDE.

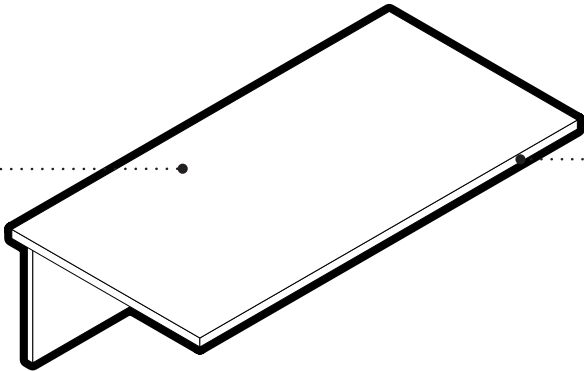

Bridge Facts

Bridges attach to desks to form a U-shaped configuration.

 Specifying, page 152

Worksurface has a wood core with Turnstone Performance Laminate (TPL). Universal laminate worksurface and Universal wood worksurfaces without scallops are available as options.

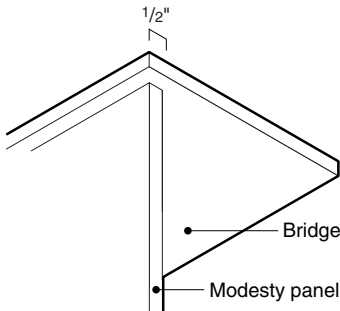

User's edge profile is PVC with a 3 mm radius. Back and side edge is 1 mm.

Modesty panels are available partial- or full-height on bridges. Partial-height modesty panels are 12"H. Full-height modesty panels extend to the floor. Bridges can also be specified without a modesty panel.

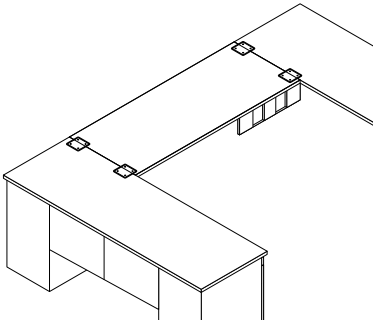

Kick worksurface overhang: 1/2" on back side

Universal laminate and wood worksurface overhang: 1/2" on back side

Attachment hardware, standard, connects bridge to a desk.

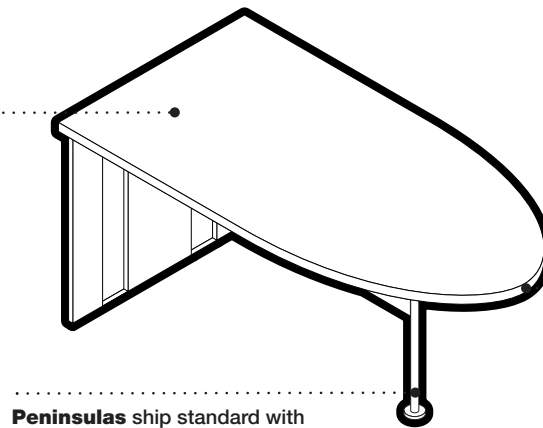

Peninsula Worksurface Facts

Peninsula worksurfaces are ideal for conferencing and can serve as primary worksurface. Peninsulas must be connected to a bridge or return to form an L- or U- shaped configuration and to provide proper stability.

 Specifying, page 154

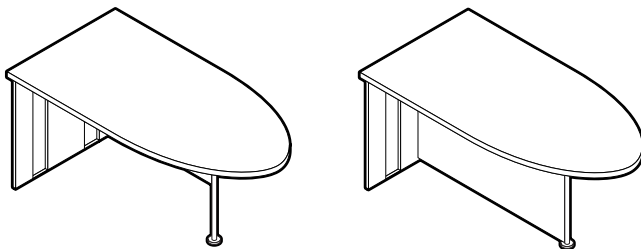

Worksurface has a wood core with Turnstone Performance Laminate (TPL). Universal laminate worksurfaces and Universal wood worksurfaces are available as options.

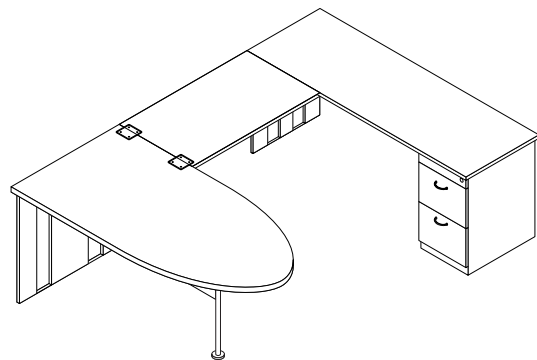

Peninsulas ship standard with a post leg.

User's edge profile is PVC with a 3 mm radius. Back and side edge is 1 mm.

Modesty panels are available partial- or full-height on peninsula worksurfaces. Partial-height modesty panels are 12"H. Full-height modesty panels extend to the floor. Peninsulas can also be specified without a modesty panel.

Attachment hardware, standard, connects peninsula to a desk and bridge or return.

Overhead Storage Cabinet Facts

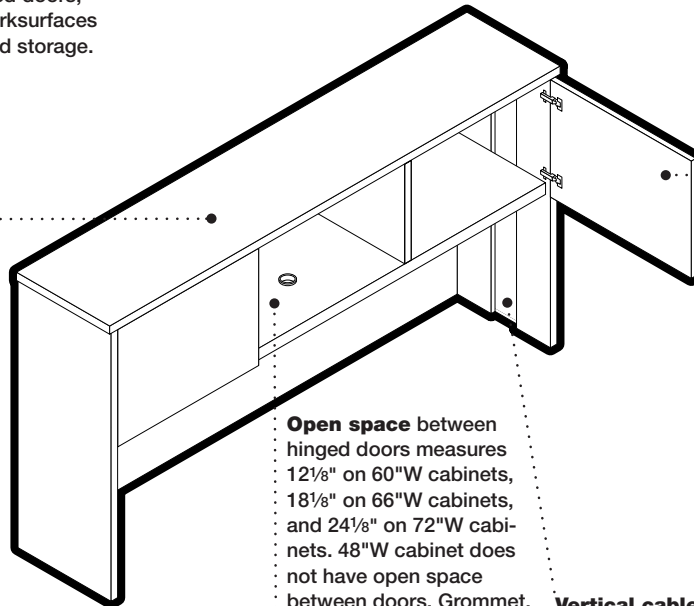

Overhead Storage Cabinet Facts

Overhead storage cabinets are steel and ship ready to assemble. Available with open shelves or with hinged doors, storage cabinet attaches to worksurfaces to provide privacy and overhead storage.

Specifying, page 155

Overhead storage cabinets are standard with steel back panel. Back panel removed, available as an option, is used for open communication.

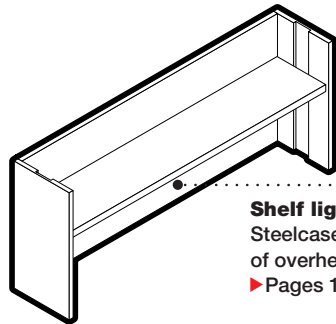

Doors are 22"W.

Lock(s) is standard on cabinets to secure the door(s). Lock is hidden underneath the door. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site. Lock cylinders must be specified separately.
 ▶ *Lock and Keying Options*, page 588

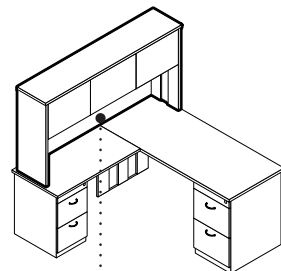

Open space between hinged doors measures 12 $\frac{1}{8}$ " on 60"W cabinets, 18 $\frac{1}{8}$ " on 66"W cabinets, and 24 $\frac{1}{8}$ " on 72"W cabinets. 48"W cabinet does not have open space between doors. Grommet, located in the center of the open space, is used for routing cables.

Vertical cable manager covers, available as an option, conceal cords that are routed from cabinets to worksurface.

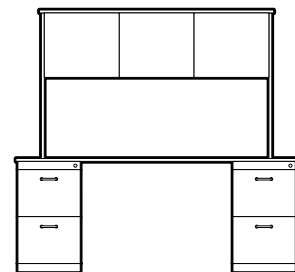

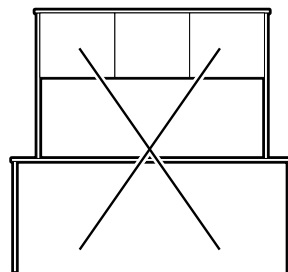

Shelf lights are available from Steelcase to recess into the bottom of overhead storage cabinets.
 ▶ Pages 122–127

Middle door is available as an option on 72"W cabinets. Middle door does not lock.

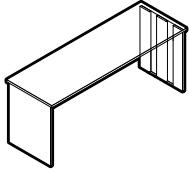

Tackboard is available for field installation. Back panel is required for tackboard.

When using overhead cabinets, the overhead cabinet end panel must be within 2" of a worksurface floor support.

Desk Shells

Tip: To determine the default edge of Universal laminate worksurfaces, see Edgebanding Color Defaults.

DesignTex Graded-In Program

All DesignTex Graded-In fabrics are now supported just like standard fabrics when ordered on Steelcase furniture. The DesignTex Graded-In Program also includes the Environmental Impact Collection, which offers sustainable textiles in affordable price groups. For additional information and fabric samples, contact your local DesignTex sales representative at 1.800.221.1540.

DesignTex fabrics are graded into Steelcase Price Groups 1 through 3.

Turnstone Value Pedestal Facts

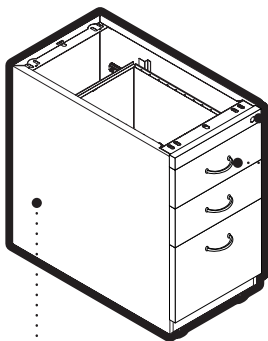

Top of Turnstone Value Pedestal is open to attach beneath the worksurface.

File/File and Box/Box/File drawer configurations are available.

Base is 2"H and aligns with Turnstone Tower Too, Turnstone Under-Worksurface Lateral Files, and Under-Worksurface Pedestals.

Leveling glides on Turnstone Value Pedestals adjust to install furniture on uneven floors. Leveling glide range is 1".

Finished back and sides are standard.

Turnstone Value Pedestals have handle pulls.

Lock is standard keyed random and controls all of the drawers. Lock cylinders must be specified separately. Consecutive and specific keying options are available. Master-keyed locks are also available. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site.

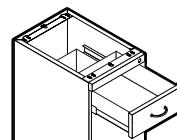

► *Lock and Keying Options*, page 588

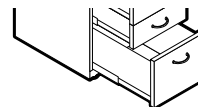

Drawer accessories are available from the Universal Pedestal collection.

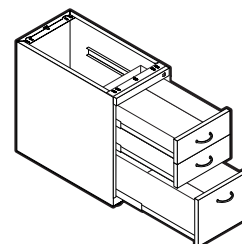

Specifying, page 169

Box drawers for 22"D pedestals are 13½"D and open to 85 percent extension. For 28"D pedestals, box drawers are 18¾"D and open to 85 percent extension. Box drawer bodies are made of a welded steel construction with nylon roller sides.

File drawers for 22"D pedestals are 13½"D and have full extension steel ball bearing suspensions. Drawer body sides are full height and accommodate front-to-back filing of hanging letter-size folders. Side-to-side letter filing can be accommodated using Universal Storage filing rails. Legal-size filing is not accommodated at this depth.

File drawers for 28"D pedestals are 18¾"D and have full extension steel ball bearing suspensions. Drawer body sides are full height and accommodate front-to-back filing of hanging letter-size folders. Side-to-side letter and legal filing can be accommodated using Universal Storage filing rails.

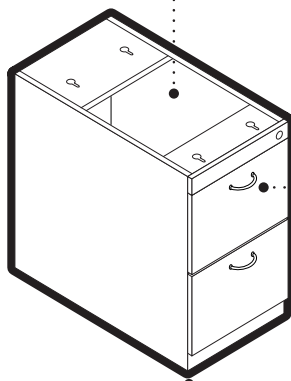

Turnstone Value Pedestal Facts

Pedestal, Under-Worksurface Lateral, and Mobile File Unit Facts

Specifying, pages 170–173

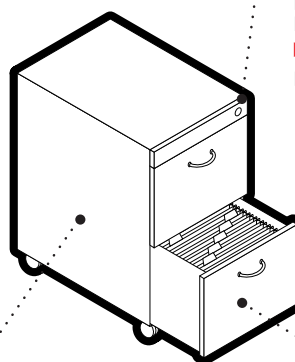

Top of pedestal and lateral file is open to attach beneath the worksurface.

Under-worksurface pedestal

Pedestals, laterals, and mobile file units have handle pulls.

Leveling glides on pedestals and lateral files adjust to install furniture on uneven floors. Leveling glide range is 1".

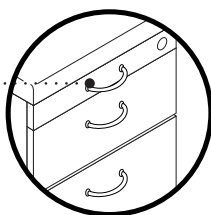

Mobile pedestal with steel top

Pedestal box drawer and mobile file unit box drawer are made of steel and have steel roller slides. They open $\frac{3}{4}$ of their depth.

Lock is standard on all pedestals, laterals, and file units, and controls all of the drawers. Lock cylinders must be specified separately. Lock is standard keyed random. Consecutive and specific keying options are available. Master-keyed locks are also available. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site. **► Lock and Keying Options**, page 588

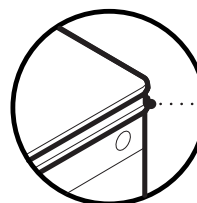

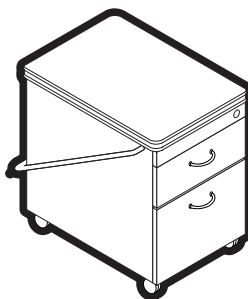

Pedestal file drawer, lateral file drawer, and mobile file unit are made of steel with steel ball bearing suspensions and open their full depth for total access to the contents. File drawer accommodates letter- and legal-size filing.

Extra handle pull, available as an option on mobile pedestals, allows pedestals to be moved easily within the workstation.

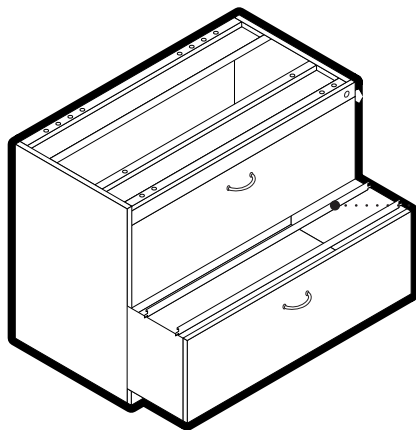

To file legal-size filing in a pedestal file drawer, specify a file drawer divider (TS2PFDD).

Handle on mobile pedestal can be positioned in front or at rear to access contents of drawer. Also available without handle.

Cushions are upholstered with piping along the top and bottom edges.

Specifying, pages
170–173

Under-worksurface lateral file

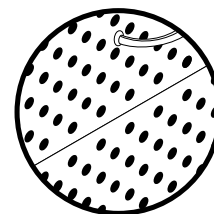

Lateral file drawers in under-worksurface lateral files are standard with two side-to-side hanging file frames to file letter or legal size papers.

Mobile pedestal fits under 24"D and 30"D worksurfaces or can be moved wherever storage is needed.

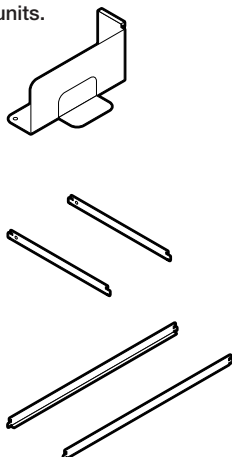

► For interior dimensions, see *Storage Capacities*, page 590.

Large ($\frac{3}{16}$ " diameter) perforation is available as an option on pedestals, 31"W under-worksurface lateral files, and mobile file units.

Large
perforation

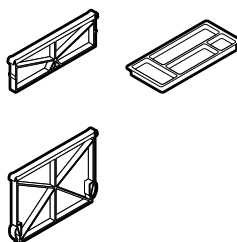

Under-worksurface lateral file drawer dividers, front-to-back file rails, and side-to-side hanging file frames, ordered separately, are available for use with under-worksurface lateral files and mobile file units.

► Page 174

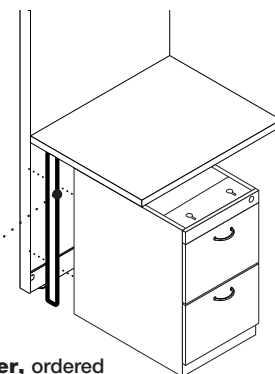

Dividers and pencil tray must be ordered separately for use with pedestals.

► Page 174

Box, box, file and file, file pedestals attach beneath 24"D and 30"D worksurfaces. Attachment hardware is provided.

Pedestal filler, ordered separately, adds structure and fills the gap between the pedestal and panel.

► Page 175

Tower Too Facts

Turnstone Tower Too accommodates paper filing, miscellaneous storage, and wardrobe storage.

 Specifying, page 178

Shelves are fixed and can accommodate binders or other storage needs.

Safety interlock system allows only one drawer to be opened at a time.

Leveling glides adjust $\frac{3}{4}$ " to allow installation on uneven floors.

Finished top, sides, and back allow storage cabinet to be positioned anywhere.

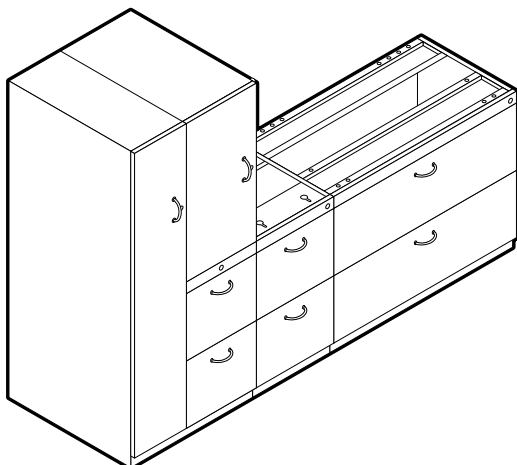

Doors open 98° for access to contents.

Drawers open their full depth for total access to the contents. Drawers have full-height sides; hanging file folder frames are not needed for front-to-back letter-size filing. Legal or side-to-side filing is accommodated using Universal filing rails. Tower Too file drawers and optional box drawers are made of steel with steel ball-bearing suspensions.

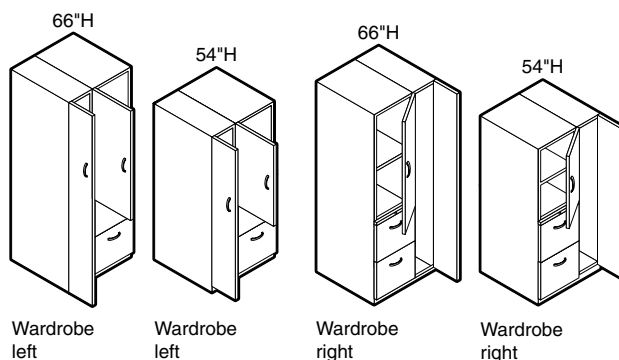

► For interior dimensions, see *Storage Capacities*, page 590.

Handle pulls on storage towers are available in 0835 Black and 9211 Nickel.

Kick plate (2"H) and lock bar align with under-worksurface pedestals and under-worksurface lateral files.

Tower Too is available 54"H or 66"H. Wardrobe storage can be left or right.

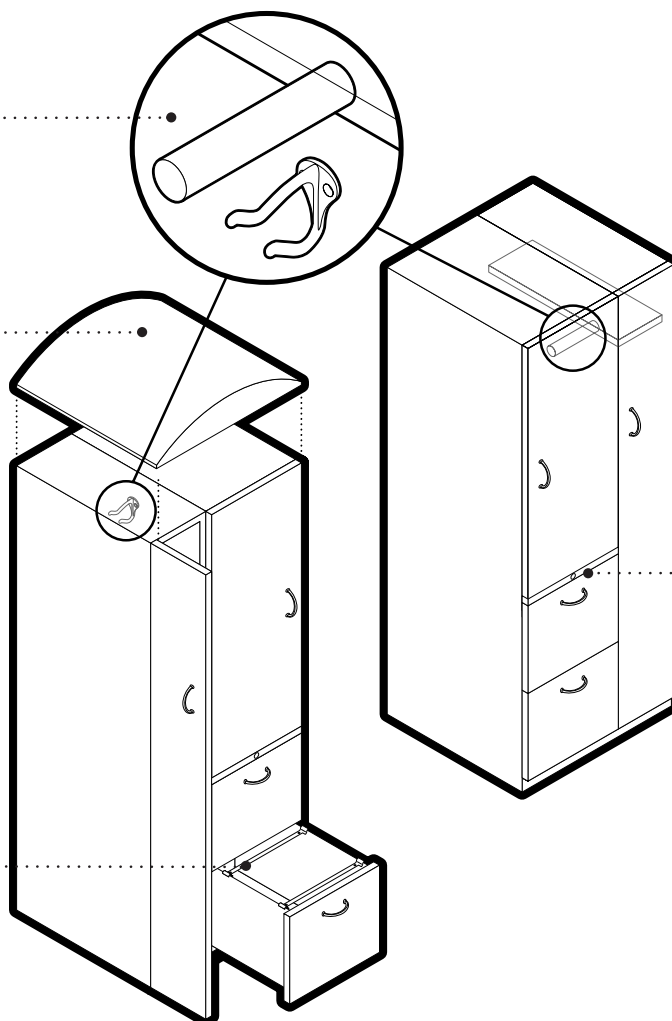

Wardrobe interior can be specified with wardrobe hook or wardrobe rod with shelf.

Dome, field-installed only, can be added to Tower Too for a unique aesthetic.

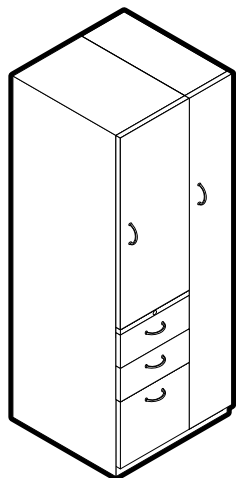

Drawer accessories, filing rails, and drawer dividers are available from the Universal Storage Pedestal Collection.

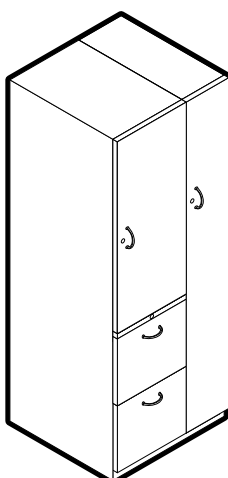

Lock, standard, is located on the lock bar and secures file drawers below. Lock is standard keyed random, and lock cylinders must be specified separately. Consecutive and specific keying options are available. Master-keyed locks are also available. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site.

► **Lock and Keying Options**, page 588

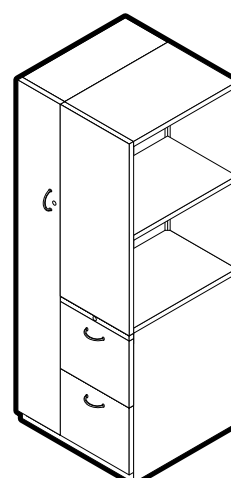

Two box drawers in place of top file drawer is available as an option on 54"H and 66"H towers. Box drawers have $\frac{3}{4}$ " extension.

All locking (one lock for wardrobe, second lock for drawer, third lock for cabinet), is available as an option on 54"H and 66"H towers.

Towers are available with open side shelving in place of the upper cabinet. Fixed shelves provide two openings (with clearance of 12"H on 54"H units and 18"H on 66"H units).

2100 Series Lateral File Facts

 Specifying, page 180

Turnstone 2100 Series lateral files accommodate basic paper filing needs for all office applications.

Label holder can be applied anywhere.

Pull is recessed and full width to provide a neutral look that is compatible with many other furniture products.

Leveling glides adjust up to $\frac{5}{8}$ " to install files on uneven floors.

Lock, standard on all files, secures all the drawers in the file. Lock cylinders must be specified separately. Lock is standard keyed random. Consecutive and specific keying options are available. Master-keyed locks are also available. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site.

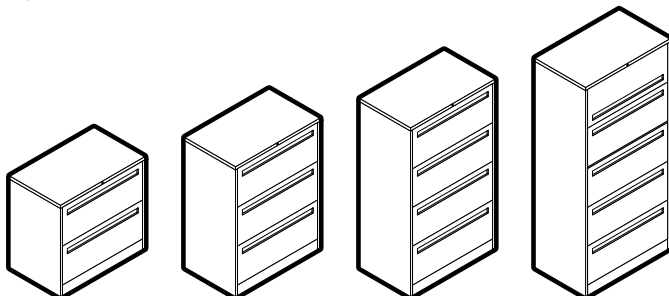

► *Lock and Keying Options*, page 588

Two hanging file folder frames per drawer are included. Dividers are available for side-to-side filing, and rails can be added to accommodate front-to-back filing.

Drawers open their full depth to allow access to the contents.

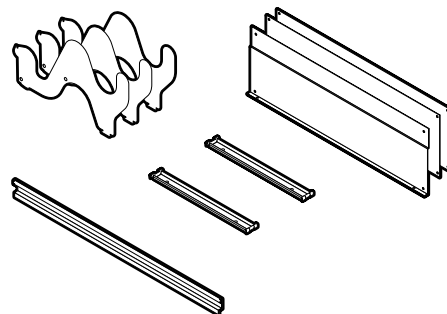

► For interior dimensions, see *Storage Capacities*, page 590.

Lateral files are available 2-, 3-, 4-, and 5-high. 5-high lateral files have four drawers and one roll-out shelf with recessing door.

Hanging file folder frames, dividers, adjustable rails, and counterweight packages, ordered separately, are available for use with 2100 Series lateral files.

Safety Tips for 2100 Series Lateral Files

Safety Tips for 2100
Series Lateral Files

Stability of files is assured if they are properly installed and loaded. To avoid personal injury, each file is standard with an inter-lock system that allows only one drawer or roll-out shelf to be opened at a time. In addition, there are steps that must be followed to prevent the tipping of a file.

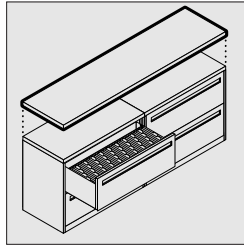

Gang file with adjacent files, either side by side or back to back, or bolt file to the floor or wall for stability. Ganging hardware is included with each file.

To ensure cabinet stability, field install counterweight packages for lateral files that are not ganged to another case, attached to a worksurface, or bolted to the floor. Counterweight packages are ordered separately.

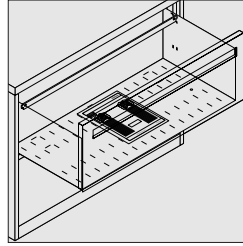

Counterweight packages prevent accidental tipping when an upper drawer or shelf is opened. They are ordered separately and field installed.

Load files starting with the bottom drawers or shelves. The upper drawers or shelves should be loaded last. Load files with the heaviest contents at the bottom.

Common tops connect side-by-side files to add stability and to help prevent accidental tipping.

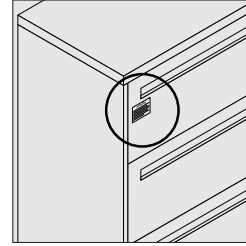

► See *Steelcase Storage Products Specification Guide* for common tops.

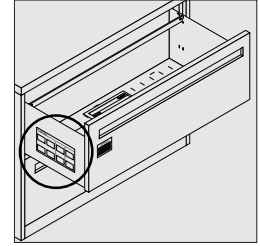

Follow the instructions that are shipped with the files to ensure that they are properly installed to provide safe performance.

Complete instructions for the safe installation and use of lateral files are taped to the inside of the file. Instructions include information about:

- Leveling files
- Ganging files together
- Counter-balancing files
- Removing and reinstalling drawers and shelves
- Loading drawers and shelves in the correct sequence
- Moving files

A temporary, peel-off caution label is affixed to the front of the top drawer or door exterior.

A permanent caution label is affixed to the left side of the top drawer or shelf body and is visible when the drawer or shelf is opened.

Surface Materials

Designtex Graded-In Program

All Designtex Graded-In fabrics are now supported just like standard fabrics when ordered on Steelcase furniture. The Designtex Graded-In Program also includes the Environmental Impact Collection, which offers sustainable textiles in affordable price groups. For additional information and fabric samples, contact your local Designtex sales representative at 1.800.221.1540.

Designtex fabrics are graded into Steelcase Price Groups 2 through 10.

Seating Mechanisms and Adjustability Features Defined

Seating Mechanisms

Knee-Tilt Mechanism

Chair swivels 360°, and seat and back recline in unison. The pivot point is forward allowing the user's feet to remain flat on the floor.

Posture-Tilt Mechanism

Chair swivels 360°. Back reclines while seat remains in a fixed position.

Swivel Mechanism

Chair swivels 360°. Seat and back stay in a fixed position (no recline).

Swivel-Tilt Mechanism

Chair swivels 360°. Back and seat recline in unison.

Synchro-Tilt Mechanism

Chair swivels 360°. Back and seat move together but at different angles. For every 2 degrees of back recline, the seat angle tilts 1 degree.

Adjustability Features

Adjustable Back Height

Allows the user to position the back up or down.

Adjustable Foot Ring

Allows the user to position the stool foot ring up or down.

Adjustable Seat Depth

Allows the user to change the distance between the front edge of the seat and the chair back.

Adjustable Seat Depth via the Back

Allows the user to change the distance between the front edge of the seat and the chair back via the maintenance back adjustment.

Lumbar Height Adjustment

Allows the user to raise or lower the lumbar support.

Pneumatic Height Adjustment

Allows the user to raise or lower the chair with one lever from a seated position.

Seat Angle Adjustment

Allows the user to position and lock the seat angle in a variety of positions.

Tilt Tension

Allows the user to vary the amount of recline resistance.

Upright Back Lock

Allows the user to lock the back in the upright position.

Variable Back Stop

Allows the user to stop the back recline at various points.

Variable Back Lock

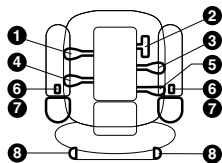

Allows the user to locate and lock the back in a variety of positions.

Adjustability Overview

Tip: Your chair may not include all the adjustments shown.

à la carte	Options: 9, 10

1 Springboard

1 Seat angle adjustment

Pull lever back and hold, shift seat to desired angle, and release lever to lock.

2 Tilt tension

To decrease tension, turn counterclockwise. To increase tension, turn clockwise.

3 Pneumatic height adjustment

To raise chair, lift body weight up and pull lever up. To lower chair, remain seated and pull lever up.

4 Adjustable seat depth

Pull lever forward and hold, shift seat forward or back, and release lever to lock.

5 Upright back lock

To release, lean forward and pull toward back. To lock, lean forward and push toward front.

6 Arm height

Pull trigger up and hold, pull arm up or push down, and release trigger to lock.

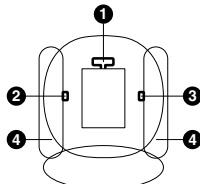

7 Arm width

Grasp arm caps and flip over.

8 Lumbar height adjustment

Lean forward, turn wheels up to lower, and turn wheels down to raise.

2 Sonata

1 Tilt tension

To decrease tension, turn counterclockwise. To increase tension, turn clockwise.

2 Variable back stop

To release stop, push lever forward. To stop recline at various angles, lean back to desired angle and push lever back. To lock in upright position, remove weight from back and push lever back.

3 Pneumatic height adjustment

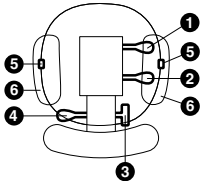

To raise chair, lift body weight up and pull lever out. To lower chair, remain seated and pull lever out.

4 Height-adjustable arms

Pull trigger up and hold; pull arm or push down and release trigger to lock.

3 Surprise!

Articulating

1 Pneumatic height adjustment

To raise chair, lift body weight up and pull lever up. To lower chair, remain seated and pull lever up.

2 Seat angle adjustment

To adjust seat angle, pull lever up and shift seat to desired angle. Push lever down to lock into position.

3 Adjustable back height

Loosen knob, raise or lower back to desired position, and retighten knob completely.

4 Variable back lock

To adjust back angle, pull lever up and lean back to desired angle. Push lever down to lock into position.

5 Height-adjustable arms

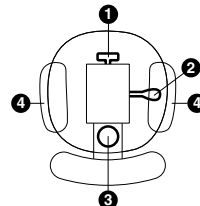

To adjust height, turn knob on side of arm to desired height.

6 Maintenance width-adjustable arms

Loosen screws under arm bracket, adjust arm in or out and tighten screws.

4 Surprise!

Swivel Tilt

1 Tilt tension

To decrease tension, turn counterclockwise. To increase tension, turn clockwise.

2 Pneumatic height adjustment

To raise chair, lift body weight up and pull lever up. To lower chair, remain seated and pull lever up.

3 Adjustable seat depth via the back

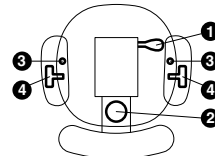

Loosen knob, adjust back in or out to desired position, and retighten knob completely.

4 Maintenance width-adjustable arms

Loosen screws under arm bracket, adjust arm in or out and tighten screws.

5 Surprise!

Swivel

1 Pneumatic height adjustment

To raise chair, lift body weight up and pull lever up. To lower chair, remain seated and pull lever up.

2 Adjustable seat depth via the back

Loosen knob, adjust back in or out to desired position, and retighten knob completely.

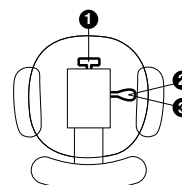

3 Maintenance width-adjustable arms

Loosen screws under arm bracket, adjust arm in or out and tighten screws.

4 Height-adjustable arms

To adjust height, turn knob on side of arm to desired height.

6 Executive 318

1 Tilt tension

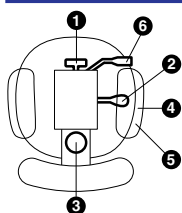

To decrease tension, turn counterclockwise. To increase tension, turn clockwise.

2 Pneumatic height adjustment

To raise chair, lift body weight up and pull lever up. To lower chair, remain seated and pull lever up.

3 Upright back lock

To lock back in upright position, lean forward and push lever in. To release for tilt, lean forward and pull lever out.

7 Jacket**1 Tilt tension**

To decrease tension, turn counterclockwise. To increase tension, turn clockwise.

2 Pneumatic height adjustment

To raise chair, lift body weight up and pull lever up. To lower chair, remain seated and pull lever up.

3 Adjustable seat depth via the back

Loosen bolt, adjust back in or out to desired position, and retighten knob.

4 Height-adjustable arms

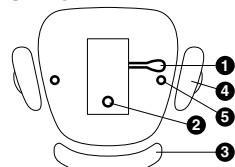

To raise arm, lift arm to desired height. To lower arm, lift arm to its highest position and then lower to bottom.

5 Maintenance width-adjustable arms

Loosen screws under arm bracket, adjust arm in or out, tighten screws.

6 Upright back lock

To lock back in upright position, lean forward and push lever back. To release back lock, lean forward and push lever forward.

8 à la carte**Swivel****1 Pneumatic height adjustment via the back**

To raise chair, lift body weight up and pull lever up. To lower chair, remain seated and pull lever up.

2 Seat depth adjustment via the back

Loosen bolt and adjust back in or out to desired position. Retighten bolt.

3 Adjustable back height

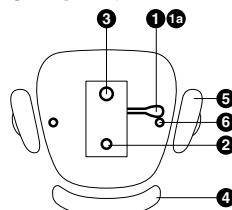

Grab chair back with both hands and slowly pull up to desired height. To lower back, pull up to highest position, and back will drop to lowest position. Reset mechanism by pushing down firmly, then adjust upward.

4 Height-adjustable arms

Squeeze trigger under arm cap and raise or lower arm to desired height. Release trigger.

5 Maintenance width-adjustable arms

Loosen screws under arm bracket, adjust arm in or out, tighten screws.

9 à la carte**Swivel Tilt****1 Pneumatic height adjustment**

To raise chair, lift body weight up and twist lever clockwise. To lower chair, remain seated and twist lever clockwise.

1 Upright back lock

While in the upright position, push the lever in and the chair will not tilt; pull it out and the chair can tilt.

2 Seat depth adjustment via the back

Loosen bolt and adjust back in or out to desired position. Retighten bolt.

3 Tilt tension

To decrease tension, turn counterclockwise. To increase tension, turn clockwise.

4 Adjustable back height

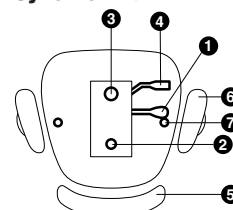

Grab chair back with both hands and slowly pull up to desired height. To lower back, pull up to highest position, and back will drop to lowest position. Reset mechanism by pushing down firmly, then adjust upward.

5 Height-adjustable arms

Squeeze trigger under arm cap and raise or lower arm to desired height. Release trigger.

6 Maintenance width-adjustable arms

Loosen screws under arm bracket, adjust arm in or out, tighten screws.

10 à la carte**Synchro Tilt****1 Pneumatic height adjustment**

To raise chair, lift body weight up and pull lever up. To lower chair, remain seated and pull lever up.

2 Seat depth adjustment via the back

Loosen bolt and adjust back in or out to desired position. Retighten bolt.

3 Tilt tension

To decrease tension, turn counterclockwise. To increase tension, turn clockwise.

4 Upright back lock

To lock back in upright position, lean forward and push lever back. To release back lock, lean forward and push lever forward.

5 Adjustable back height

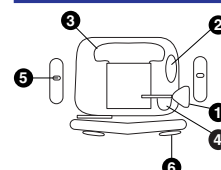

Grab chair back with both hands and slowly pull up to desired height. To lower back, pull up to highest position, and back will drop to lowest position. Reset mechanism by pushing down firmly, then adjust upward.

6 Height-adjustable arms

Squeeze trigger under arm cap and raise or lower arm to desired height. Release trigger.

7 Maintenance width-adjustable arms

Loosen screws under arm bracket, adjust arm in or out, tighten screws.

11 Let's B**1 Tilt tension**

To decrease tension, turn counterclockwise. To increase tension, turn clockwise.

2 Pneumatic height adjustment

To raise chair, lift body weight up and pull lever up. To lower chair, remain seated and pull lever up.

3 Adjustable seat depth

Lift lever up and hold, shift seat forward or back, and release lever to lock. Available on models TS30602 and TS30604 only.

4 Upright back lock

To release, lean forward and flip lever up. To lock, lean forward and flip lever down.

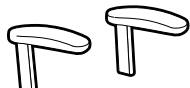

5 Arm height

Pull trigger up and hold, pull arm up or push down, and release trigger to lock.

6 Back height

Depress and hold buttons. Raise or lower back into desired position, release buttons.

Arm Options

A schematic diagram of a two-link mechanism. It consists of two links, each represented by a horizontal bar with a rounded end. The left link is connected to a fixed vertical support (ground) by a revolute joint, indicated by a double-headed vertical arrow. The right link is connected to the end of the left link by a revolute joint, indicated by a double-headed horizontal arrow. The right link is also connected to another fixed vertical support (ground) by a revolute joint, indicated by a double-headed vertical arrow.

Designtex Graded-In Program

All Designtex Graded-In fabrics are now supported just like standard fabrics when ordered on Steelcase furniture. The Designtex Graded-In Program also includes the Environmental Impact Collection, which offers sustainable textiles in affordable price groups. For additional information and fabric samples, contact your local Designtex sales representative at 1.800.221.1540.

Designtex fabrics are graded into Steelcase Price Groups 2 through 10.

Desk Facts

Classic Payback furniture

features a contemporary design. Desk shells and D-, P-, and rectilinear-shape worksurfaces are shipped knocked down for assembly in field using quick-connect assembly hardware. Worksurfaces are 1" thick with a square edge profile.

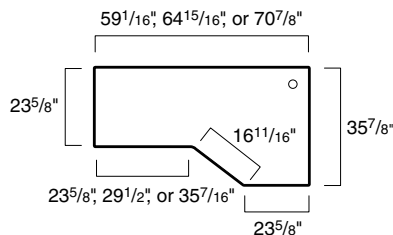

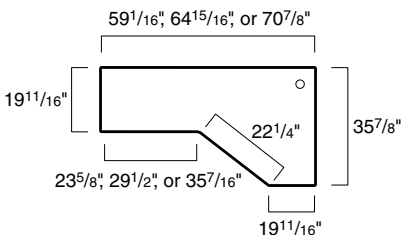

Tackboard is available for field installation and is not interchangeable with value tackboards.

► Pages 313–314

Desk shells are freestanding and accommodate suspended or mobile pedestals. Shells are standard with full-height back panels. ¾-height (20"W) back panels are optional for access to baseboard outlets.

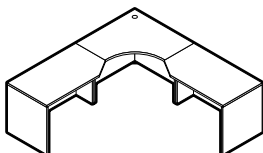

Extended corner desk shell

accommodates one pedestal under extended portion. Kneespace under extended worksurface is shown below.

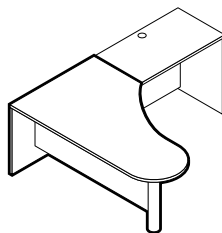

Corner desk shells have a predrilled worksurface that accommodates keyboard shelves. It comes with two clear-access end panels, which are 12 5/8"D, actual dimension. ► Page 280

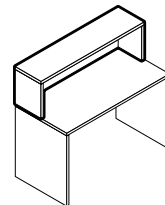

Notched shells are used with corner desk shells with straight front or optional curvilinear front to create a keyboard cutout. ► Page 282

Jetty desk shells can be used as an alternative to P- and D-shape worksurfaces to provide additional worksurface space for conferencing. Curvilinear-front option is also available.

Reception galleries connect to desk shells or assembled desks to create a reception desk alternative. Tackboards are also available.

Specifying, pages 271–301, 313–314, 324

Factory-installed grommet is standard on bridges and returns; rectangular, notched, and corner desk shells; and D-, P-, and rectilinear-shape worksurfaces.

Bridge must attach to a worksurface on each side. Bridge attaches at 29"H using attachment brackets, included with the bridge. ► Page 287

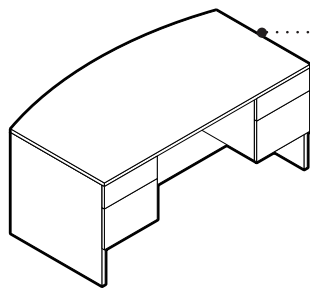

D-, P-, and rectilinear-shape worksurfaces must be attached to a bridge, return, or adjoining worksurface to form a flush-height, L- or U-shaped configuration and to provide stability. Post leg diameter is 6". ► Pages 288–293

Center drawers, equipped with a convenience tray, are available for field installation under worksurfaces that have at least 18 1/2"D x 21 1/2"W clear kneespace. Center drawer does not lock.

Quick connect assembly hardware is used to assemble furniture in the field. Rotating connector captures metal pins to lock components in place.

Classic Payback furniture features a contemporary design. Desks, returns, credenzas, and storage components are shipped fully assembled. Worksurfaces are 1" thick with a square edge profile.

Bow-front desks come with a 6" bow.

Box drawers open their full depth using a ball-bearing suspension. Box drawer is standard with pencil tray.

► For interior dimensions, see *Storage Capacities*, page 590.

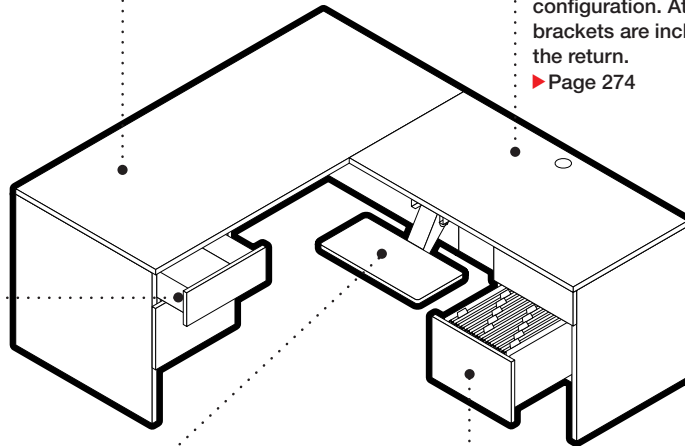

Single-pedestal desks and returns are available with a suspended $\frac{3}{4}$ "-height pedestal located left or right as standard. Optional full-height pedestals are available. Double-pedestal desks also are available. Desks and returns include a full-height back panel. 30"D desks have a 2½" overhang. 36"D desks have a 8⅞" overhang.

Specifying, pages 271–301, 313–314, 324

Return attaches to a single-pedestal desk or credenza to form a flush-height, L-shape configuration. Attachment brackets are included with the return.

► Page 274

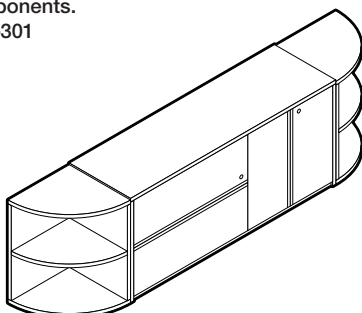

Adjustable-height retractable keyboard shelf can be field installed to support a computer keyboard beneath worksurface level. It attaches under a worksurface with a 18¾"D x 21½"W clear dimension. Mouse support and wrist rest can be added. Retractable keyboard shelves also are available.

File drawers open their full depth for total access to the contents. They have a hanging file folder frame and are equipped with heavy-duty ball-bearing suspensions. They accommodate letter-size filing front to back or legal-size filing side to side.

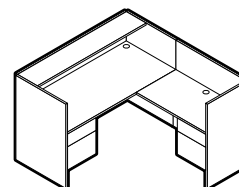

► For interior dimensions, see *Storage Capacities*, page 590.

Credenzas come in various configurations—single and double pedestal, double pedestal with storage, single and double lateral file, lateral file and storage, and double storage. Credenzas can be used in conjunction with other storage components.

► Pages 294–301

Reception desk can be freestanding or specified with a return. Optional bow-front transaction top is available.

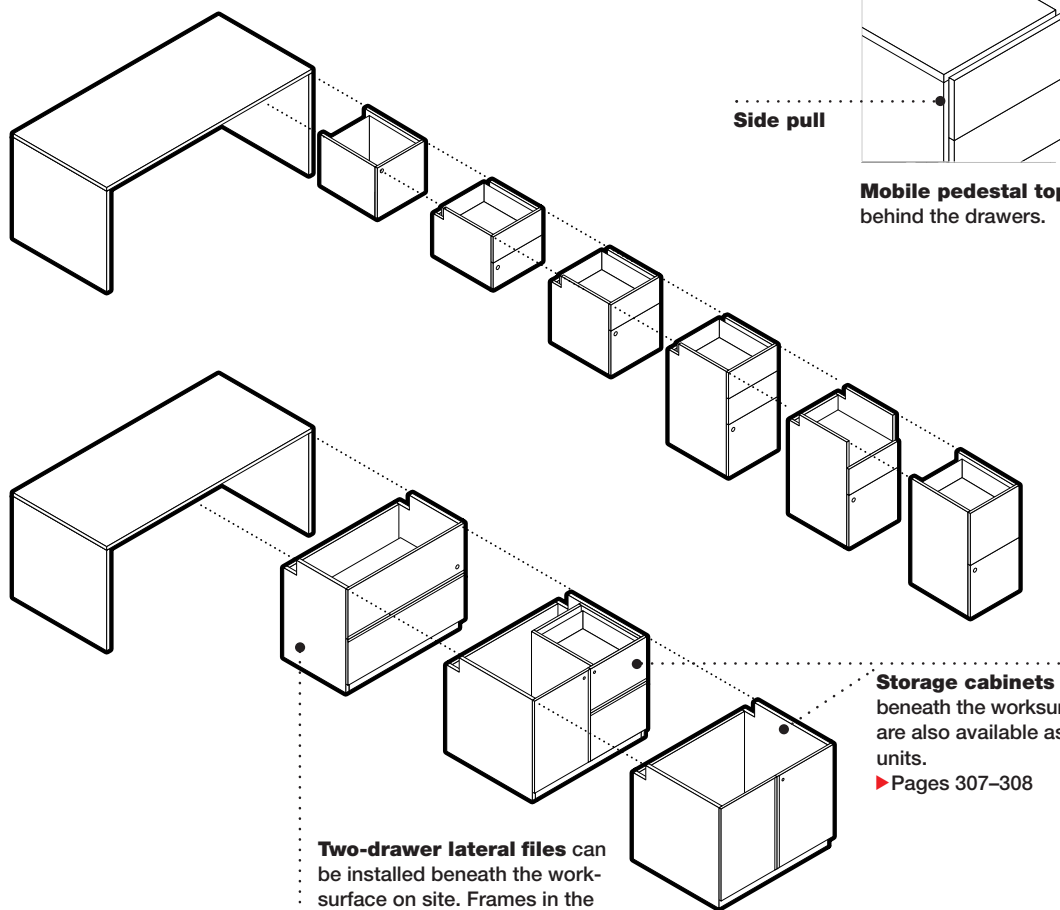

Storage Facts

Classic pedestals may be installed beneath the worksurface on site and come in a variety of box drawer and file drawer selections. Mobile pedestals are also available in a variety of drawer configurations.

► Pages 302–303

Specifying, pages 302–308, 318–322, 326–331

Side pull

Mobile pedestal top is recessed behind the drawers.

Storage cabinets can be installed beneath the worksurface on site and are also available as freestanding units.

► Pages 307–308

Two-drawer lateral files can be installed beneath the worksurface on site. Frames in the steel drawers accommodate side-to-side filing of letter-size or legal-size hanging file folders. Front-to-back filing rail accessory is also available. Lateral files are available freestanding with two, three, or four drawers.

► Pages 304–306

Integral pulls are blocked when two pedestals are field-installed side by side underneath a worksurface. Handle or bar pulls must be specified.

Lock on all Payback pedestals, files and cabinets is keyed randomly.

Integral pull is standard. Handle or bar pull is available as an option on drawers and doors.

Pull Choices

Classic Payback storage components,

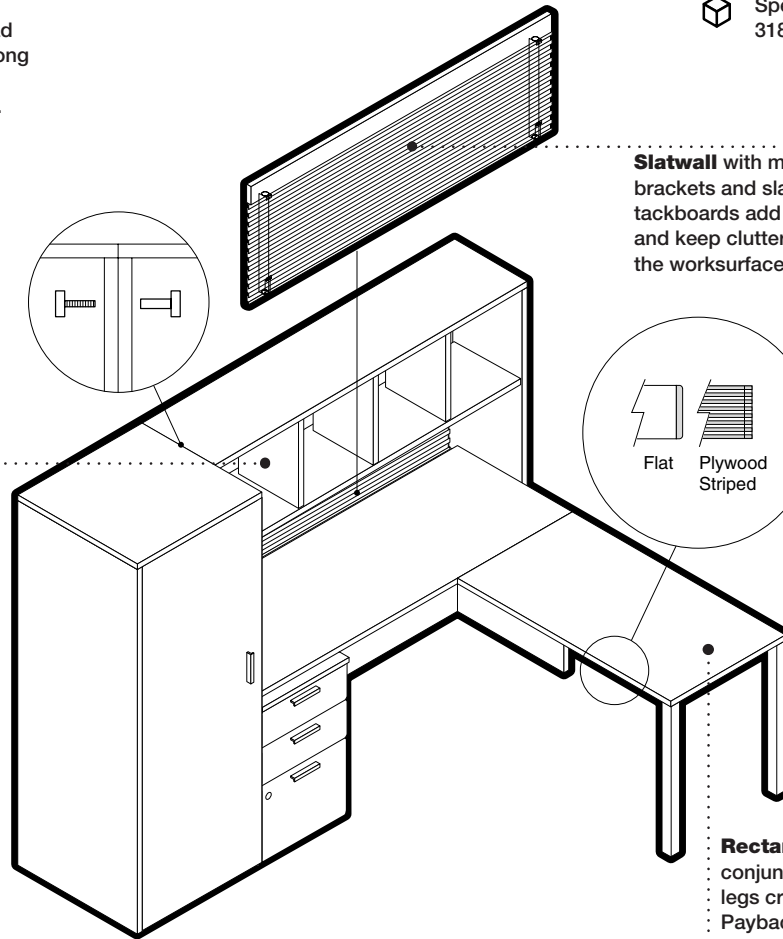

such as overhead storage cubbies and towers, along with 20"D desking components create space-saving foot prints.

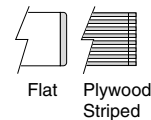

Specifying, pages 302–308, 318–322, 326–331

Overhead storage cubby

can be attached to other storage components and/or to the worksurface. Overhead storage cubbies do not have a back panel. Cubbies can be left open for collaboration or can have slatwall with slatwall tackboards added for privacy and additional storage. They are standard with two full end panels for desk-mounted application. One or two side-attachment end panels can be specified as an option for connections to other storage components such as towers or storage and wardrobe cabinets.

Slatwall with mounting brackets and slatwall tackboards add privacy and keep clutter from the worksurface.

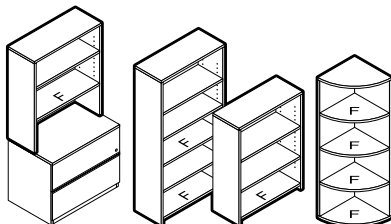

Edge Detail

Flat square edge detail is standard. Plywood striping edge detail (light, medium, dark) is optional.

Rectangular tops used in conjunction with square post legs create a return, giving Payback another design element.

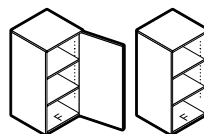

Bookcases, shipped fully assembled, are available with either two or three adjustable shelves (adjustment every 2 1/2"). The three-adjustable shelf bookcase comes in two heights. Stacking bookcases are also available for attachment to worksurface-height storage or worksurfaces.

► Page 330

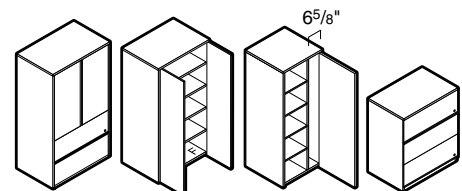

Quarter-round bookcases are available only with fixed shelves.

Small scale towers are used for smaller open plan offices and comes with door or open.

Storage and wardrobe cabinets and lateral files are available in a variety of configurations, including wardrobes with open shelves, file drawers, and a combination of file drawers and shelves. They provide storage, define boundaries, and increase privacy. Lock option is available.

Overhead Storage Facts

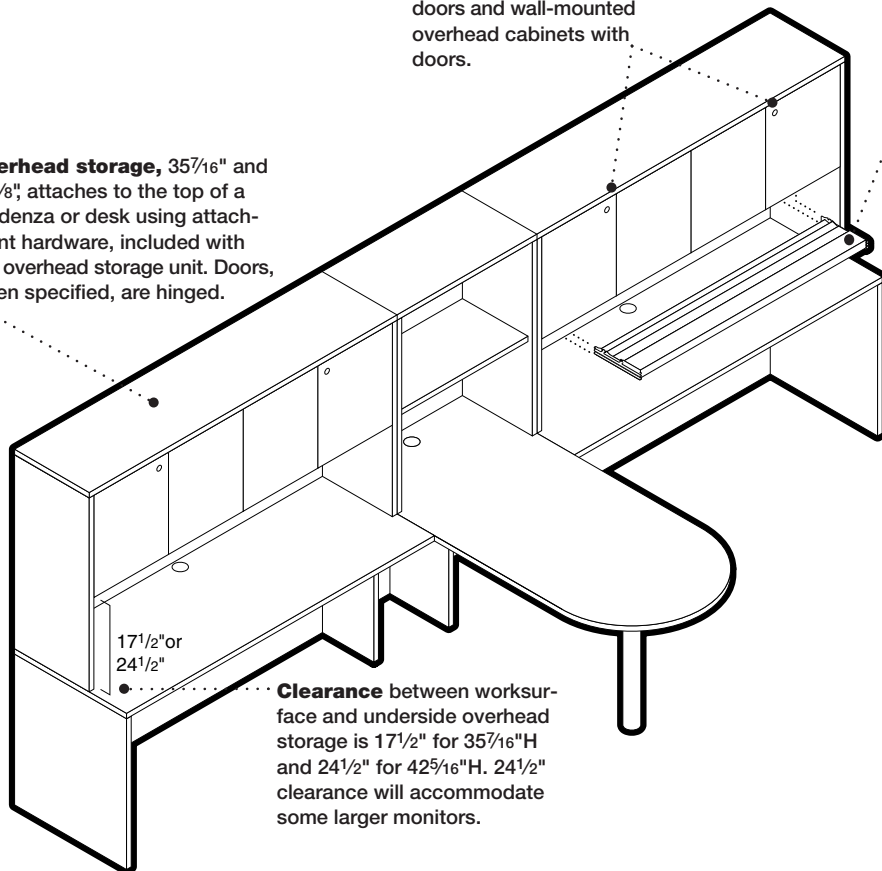

Overhead storage cabinets are available with or without doors. Cable access space is standard on all overhead storage cabinets.

Optional locks are available on overhead storage cabinets with doors and wall-mounted overhead cabinets with doors.

 Specifying, pages 309–312, 315–316

Overhead storage, 35⁷/₁₆" and 42³/₈", attaches to the top of a credenza or desk using attachment hardware, included with the overhead storage unit. Doors, when specified, are hinged.

Overhead storage cabinets accommodate field-installed shelf lights in the recessed area beneath overhead storage. Clearance is 1⁷/₈"H to 12⁵/₁₆"D and include a cable access space at the bottom of back panels.
► Pages 309–310

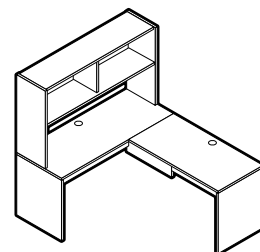

Clearance between work surface and underside overhead storage is 17¹/₂" for 35⁷/₁₆"H and 24¹/₂" for 42⁵/₁₆"H. 24¹/₂" clearance will accommodate some larger monitors.

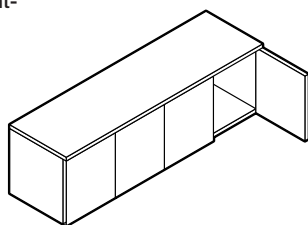

No pull option is offered on overhead and wall-mounted overhead storage cabinets with doors.

When attaching overhead storage to desk shells, attach a pedestal, return, bridge, or another shell for stability.

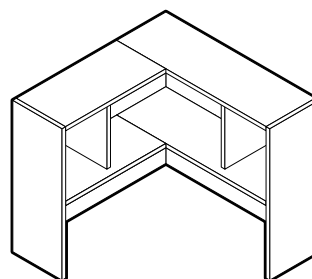

Wall-mounted overhead storage comes with mounting cleats and attachment hardware.

Must anchor wall-mounted overhead storage to as many studs as possible. See below for requirements:
30" to 42"W = 1 stud required
48" to 72"W = 2 studs required
78"W = 3 studs required

Corner overhead storage is available and can be used with corner desk shells, extended corner shells, and L-configurations.

Small Office and Home Office Facts

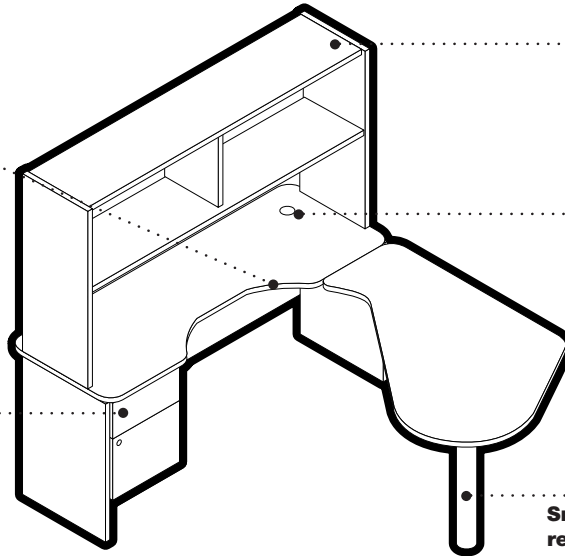

Small Office and Home
Office Facts

Small Office and Home Office components create space-saving workstations that can be used with Classic Payback pedestals, Value overhead storage cabinets, and Value tackboards.

 Specifying, pages 332–333

Front and back edges are rounded on Small Office and Home Office desks and returns.

Classic Payback 19"D pedestals can be attached underneath a Small Office and Home Office desk on either end. Only mobile pedestals can be used with Small Office and Home Office returns.

Value Overhead storage cabinets can be attached to Small Office and Home Office desks for additional storage space.

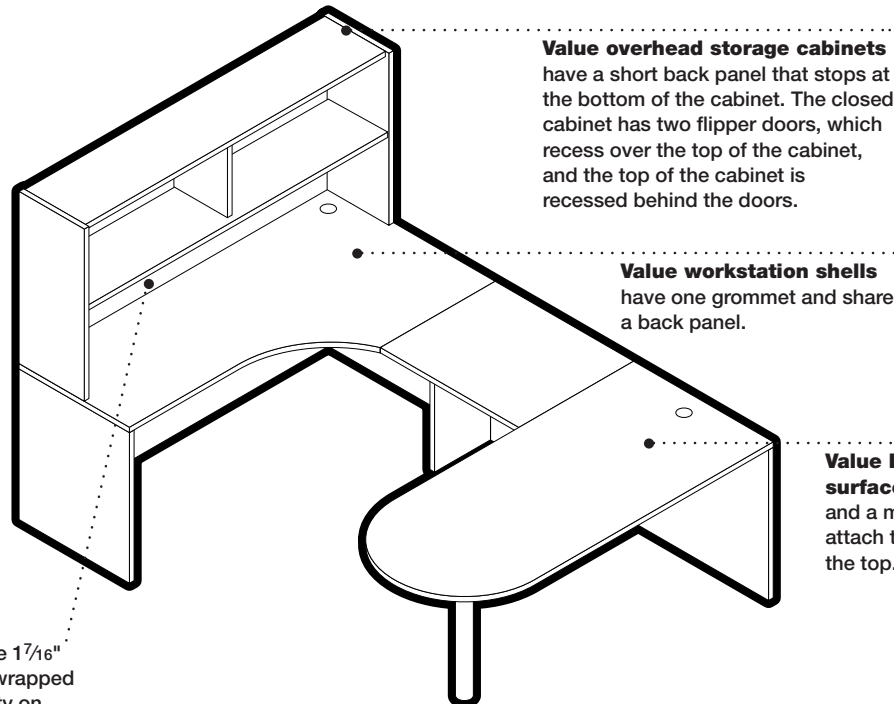

Small Office and Home Office desks have grommets in the back corners of the top.

Small Office and Home Office returns are available with a 3" column leg or supported with laminate panel.

Value Workstation Facts

Payback Value components create cost-saving workstations that are available in a limited number of sizes and configurations.

 Specifying, pages 334–337

Value overhead storage cabinets have a short back panel that stops at the bottom of the cabinet. The closed cabinet has two flipper doors, which recess over the top of the cabinet, and the top of the cabinet is recessed behind the doors.

Value workstation shells have one grommet and share a back panel.

Value D-shaped work-surface has a 3" column and a metal gusset to attach the back panel to the top.

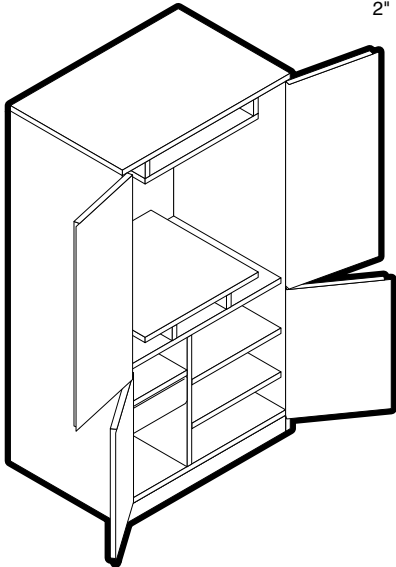

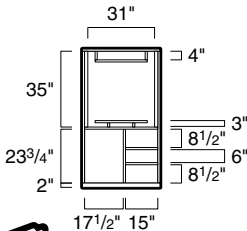

Value tackboards are $1\frac{7}{16}$ " thick and completely wrapped in fabric with tackability on one side. Tackboard is constructed to be a filler panel for the Value overhead cabinet and is not interchangeable with the Classic Payback tackboard.

Conference Room Furniture Facts

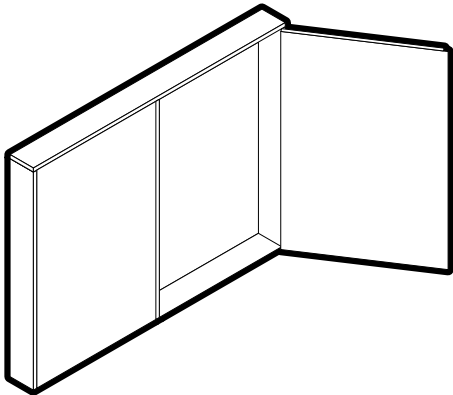

Conference Room
Furniture Facts

 Specifying, page 338

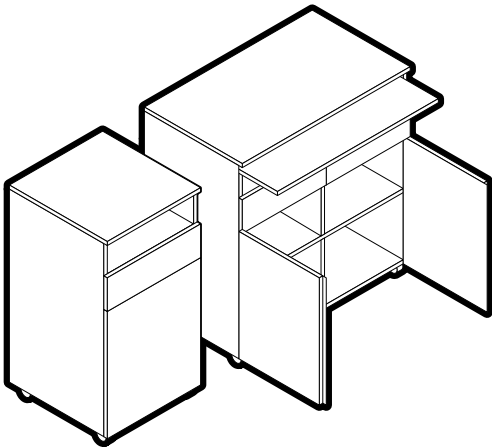

Video cabinet provides ample space for a 29" video monitor, and VCR. Cabinet also includes a drawer for storing video cassettes and two adjustable-height shelves. The cabinet comes fully assembled.

Wall markerboard cabinet contains a large writing surface that can be concealed with two cabinet doors. Door interiors are tackable cork. The cabinet comes fully assembled.

Meeting room service carts come in two widths to provide storage for conference supplies. The carts are on casters to provide easy mobility and are shipped fully assembled. Storage drawers are half depth.

Lectern is on casters to provide easy mobility and includes a 6"H fixed note and a fixed bottom shelf.

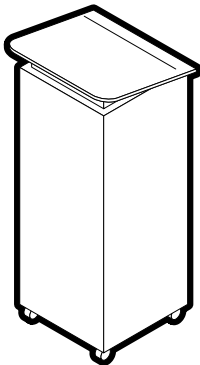

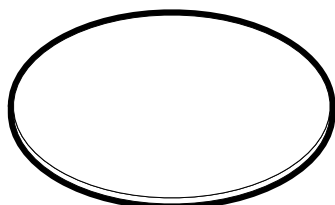

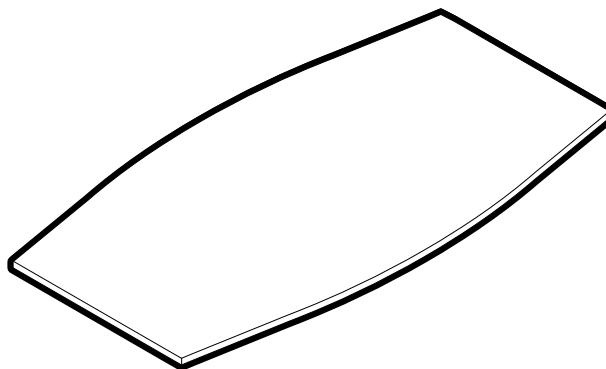

Table Facts

Table tops and bases are available in a variety of shapes and combinations and provide areas for conferences and extended workspace. Table tops and bases are sold separately.

1 = Number of base units to order.
Blank spaces in matrix designate top and base combinations that are not valid.

Directional Laminate and Edge Profile Detail

The appearance of laminate may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on work-surfaces installed at a 90° angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.

Extended Corner Desk Shells

Tip: Grain direction of back panels runs horizontally. Grain direction of end panels runs vertically.

► Need help?
Product details,
page 260

Standard Includes

- Desk with full-height back panel: worksurface laminate and vertical surfaces laminate
- Worksurface edges with square edge profile: high-impact vinyl (PVC) to match worksurface
- One full end panel and one clear-access panel on desk shells without bow front, one full end panel on desk shells with bow front
- Corner leg on desk shells without bow front: paint price group 1
- Two grommets in back corners of worksurfaces without bow front, one grommet in worksurfaces with bow front: black plastic only
- Adjustable leveling glides
- Shipped ready to assemble

Required to Specify

- 1 Style number
 - 2 Laminate color number for worksurface
 - 3 Vertical laminate color number for shell
 - 4 Paint color number for corner leg
 - 5 Options, if selected (see below)
- See *Surface Materials*, page 359.

	Options	U.S. Price	Required to Specify
Surface Materials	Corner leg on desks without bow front		
	• Paint price group 1 • Paint price group 2	No cost +\$15	Specify paint color number. Specify paint color number.
Worksurface Edge Band Detail	• Light plywood striping square edge detail	No cost	Specify <i>with light plywood striping</i> .
	• Medium plywood striping square edge detail	No cost	Specify <i>with medium plywood striping</i> .
	• Dark plywood striping square edge detail	No cost	Specify <i>with dark plywood striping</i> .
Back Panel	• 3/4-height back panel (20"H)	No cost	Specify <i>with 3/4-height back panel</i> .
End Panels	Desks without bow front		
	• Two clear-access end panels • Two full end panels	No cost No cost	Specify <i>with two clear-access end panels</i> . Specify <i>with two full end panels</i> .
Related Products	• Retractable keyboard shelf		► Page 355
	• Adjustable-height retractable keyboard shelf		► Page 356

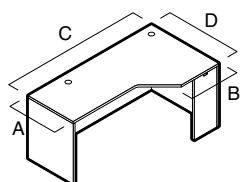

Tip: When two clear-access end panels are used, the shell unit must be attached to adjoining worksurfaces.

Jetty Desk Shells

► Need help?
Product details,
page 260

Standard Includes

- Jetty top with full-height end panel and ¾-height back panel and straight front: worksurface laminate and vertical surfaces laminate
- Worksurface edges with square edge profile: high-impact vinyl (PVC) to match worksurface
- Column leg (6" diameter): paint price group 1
- Grommet: black plastic only
- Adjustable leveling glides
- Shipped ready to assemble

Required to Specify

- 1 Style number
 - 2 Laminate color number for worksurface
 - 3 Vertical laminate color number for shell
 - 4 Paint color number for column leg
 - 5 Options, if selected (see below)
- See *Surface Materials*, page 359.

Options		U.S. Price	Required to Specify
Surface Materials	Column leg		
	• Paint price group 1 • Paint price group 2	No cost +\$15	Specify paint color number. Specify paint color number.
Worksurface Front	• Curvilinear front	No cost	Specify <i>with curvilinear front</i> .

Standard Shelf Lights

Tip: Daisy chaining is not allowed in New York City or Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

Tip: Because shelf lights are usually recessed, black is the standard paint color. Paint colors other than black have an upcharge.

Tip: If an optional paint color is selected for the housing, the electrical switches and end caps will remain black plastic.

Products on this page are Steelcase, not Turnstone. They are included here to simplify your planning. Remember that Steelcase has different pricing terms than Kick products.

Standard Includes		Required to Specify

Desk Facts

Executive Payback furniture

features a contemporary design.

Desk shells and D-, P-, and rectilinear-shape worksurfaces are shipped knocked down for assembly in field using quick-connect assembly hardware. Worksurfaces are 1½" thick with a ribbed edge profile.

Specifying, pages
374–405, 419–420, 430

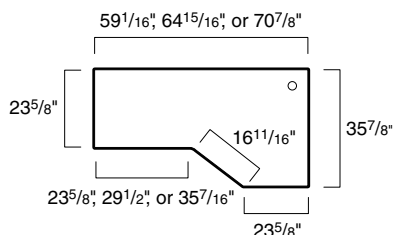

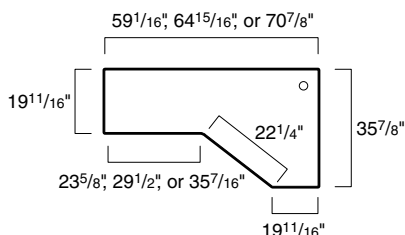

Tackboard is available for field installation and is not interchangeable with value tackboards.

► Pages 419–420

Desk shells are freestanding and accommodate suspended or mobile pedestals. Shells are standard with full-height back panels. ¾-height (20"W) back panels are optional for access to baseboard outlets.

Extended corner desk shell

accommodates one pedestal under extended portion. Kneespace under extended worksurface is shown below.

Center drawers, equipped with a convenience tray, are available for field installation under worksurfaces that have at least 18½"D x 21½"W clear kneespace. Center drawer does not lock.

Factory-installed grommet is standard on bridges and returns; rectangular, notched, and corner desk shells; and D-, P-, and rectilinear-shape worksurfaces.

Bridge must attach to a worksurface on each side. Bridge attaches at 29"H using attachment brackets, included with the bridge.

► Page 391

D-, P-, and rectilinear-shape worksurfaces must be attached to a bridge, return, or adjoining worksurface to form a flush-height, L- or U-shaped configuration and to provide stability. Post leg diameter is 6".

► Pages 392–397

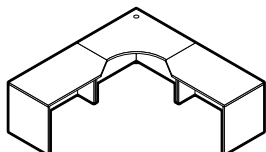

Quick connect assembly hardware is used to assemble furniture in the field. Rotating connector captures metal pins to lock components in place.

Corner desk shells have a predrilled worksurface that accommodates keyboard shelves. It comes with two clear-access end panels, which are 12½"D, actual dimension.

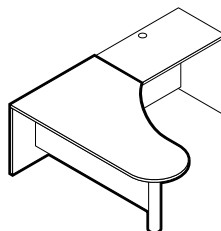

► Page 384

Notched shells are used with corner desk shells with straight front or optional curvilinear front to create a keyboard cutout.

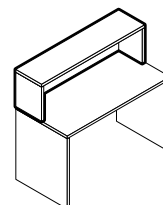

► Page 386

Jetty desk shells can be used as an alternative to P- and D-shape worksurfaces to provide additional worksurface space for conferencing. Curvilinear-front option is also available.

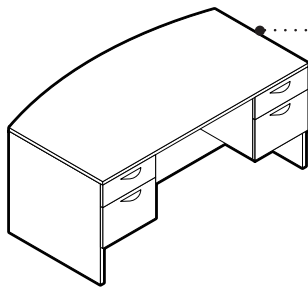

Reception galleries connect to desk shells or assembled desks to create a reception desk alternative. Tackboards are also available.

Executive payback furniture

features a contemporary design. Desks, returns, credenzas, and storage components are shipped fully assembled. Worksurfaces are 1½" thick with a ribbed edge profile.

Bow-front desks come with a 6" bow.

Single-pedestal desks and returns

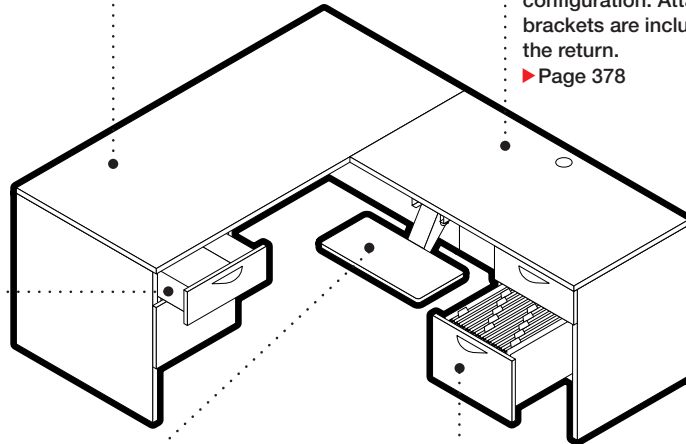

are available with a suspended ¾-height pedestal located left or right as standard. Optional full-height pedestals are available. Double-pedestal desks also are available. Desks and returns include a full-height back panel. 30"D desks have a 2½" overhang. 36"D desks have a 8⅞" overhang.

Specifying, pages 374–405, 419–420, 430

Return attaches to a single-pedestal desk or credenza to form a flush-height, L-shape configuration. Attachment brackets are included with the return.

► Page 378

Box drawers open their full depth using a ball-bearing suspension. Box drawer is standard with pencil tray.

► For interior dimensions, see *Storage Capacities*, page 590.

Adjustable-height retractable keyboard shelf

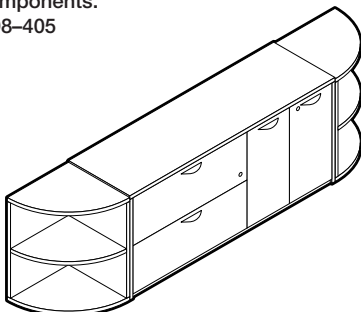

can be field installed to support a computer keyboard beneath worksurface level. It attaches under a worksurface with a 18¾"D x 21½"W clear dimension. Mouse support and wrist rest can be added. Retractable keyboard shelves also are available.

File drawers open their full depth for total access to the contents. They have a hanging file folder frame and are equipped with heavy-duty ball-bearing suspensions. They accommodate letter-size filing front to back or legal-size filing side to side.

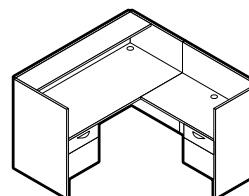

► For interior dimensions, see *Storage Capacities*, page 590.

Credenzas come in various configurations—single and double pedestal, double pedestal with storage, single and double lateral file, lateral file and storage, and double storage. Credenzas can be used in conjunction with other storage components.

► Pages 398–405

Reception desk can be freestanding or specified with a return. Optional bow-front transaction top is available.

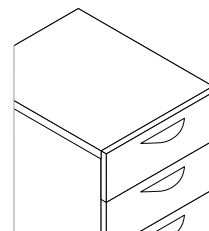

Storage Facts

Executive pedestals may be installed beneath the worksurface on site and come in a variety of box drawer and file drawer selections. Mobile pedestals are also available in a variety of drawer configurations.

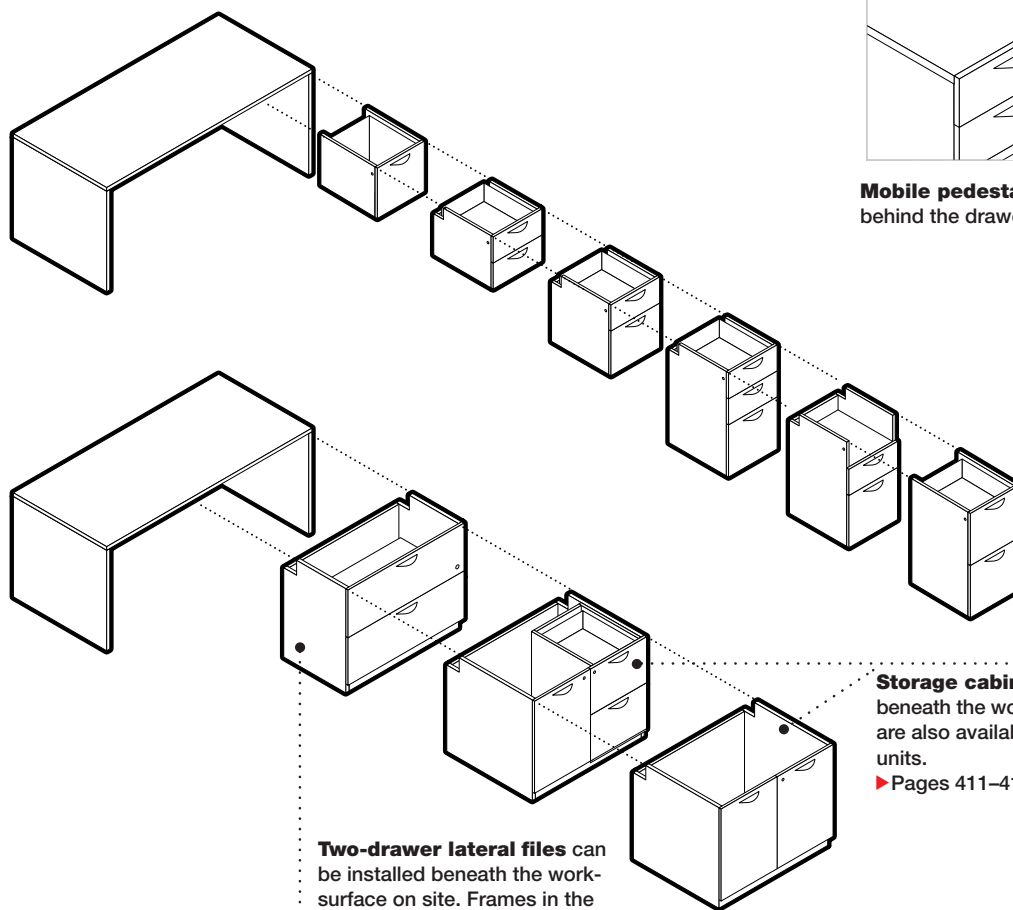

► Pages 406–407

Specifying, pages 406–412, 424–428, 432–437

Mobile pedestal top is recessed behind the drawers.

Storage cabinets can be installed beneath the worksurface on site and are also available as freestanding units.

► Pages 411–412

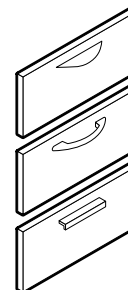

Two-drawer lateral files can be installed beneath the worksurface on site. Frames in the steel drawers accommodate side-to-side filing of letter-size or legal-size hanging file folders. Front-to-back filing rail accessory is also available. Lateral files are available freestanding with two, three, or four drawers.

► Pages 408–410

Waterfall pull is standard. Handle or bar pull is available as an option on drawers and doors.

Pull Choices

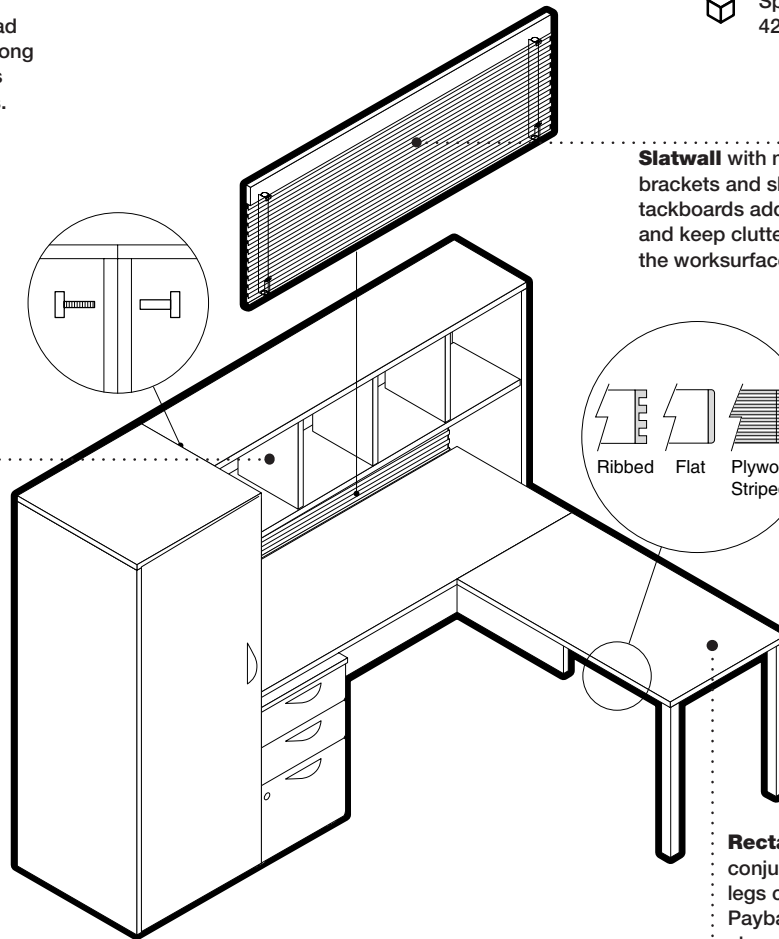

Lock on all Payback pedestals, files and cabinets is keyed randomly.

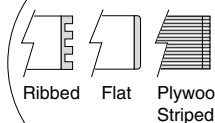

Executive Payback storage components, such as overhead storage cubbies and towers, along with 20"D desking components create space-saving foot prints.

 Specifying, pages 406–412, 424–428, 432–437

Overhead storage cubby can be attached to other storage components and/or to the worksurface. Overhead storage cubbies do not have a back panel. Cubbies can be left open for collaboration or can have slatwall with slatwall tackboards added for privacy and additional storage. They are standard with two full end panels for desk-mounted application. One or two side-attachment end panels can be specified as an option for connections to other storage components such as towers or storage and wardrobe cabinets.

Slatwall with mounting brackets and slatwall tackboards add privacy and keep clutter from the worksurface.

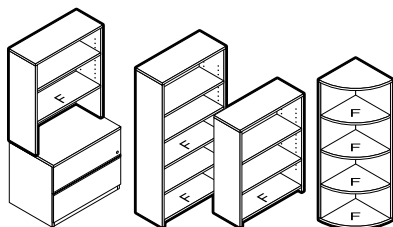

Edge Detail
Ribbed edge detail is standard. Flat square edge detail and plywood striping edge detail (light, medium, dark) are optional.

Rectangular tops used in conjunction with square post legs create a return, giving Payback another design element.

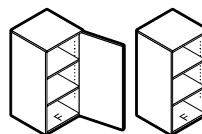

Bookcases, shipped fully assembled, are available with either two or three adjustable shelves (adjustment every 2 1/2"). The three-adjustable shelf bookcase comes in two heights. Stacking bookcases are also available for attachment to worksurface-height storage or worksurfaces.

► Page 436

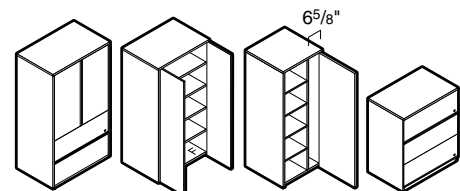

Quarter-round bookcases are available only with fixed shelves.

Small scale towers are used for smaller open plan offices and comes with door or open.

Storage and wardrobe cabinets and lateral files are available in a variety of configurations, including wardrobes with open shelves, file drawers, and a combination of file drawers and shelves. They provide storage, define boundaries, and increase privacy. Lock option is available.

Overhead Storage Facts

Overhead storage cabinets are available with or without doors. Cable access space is standard on all overhead storage cabinets.

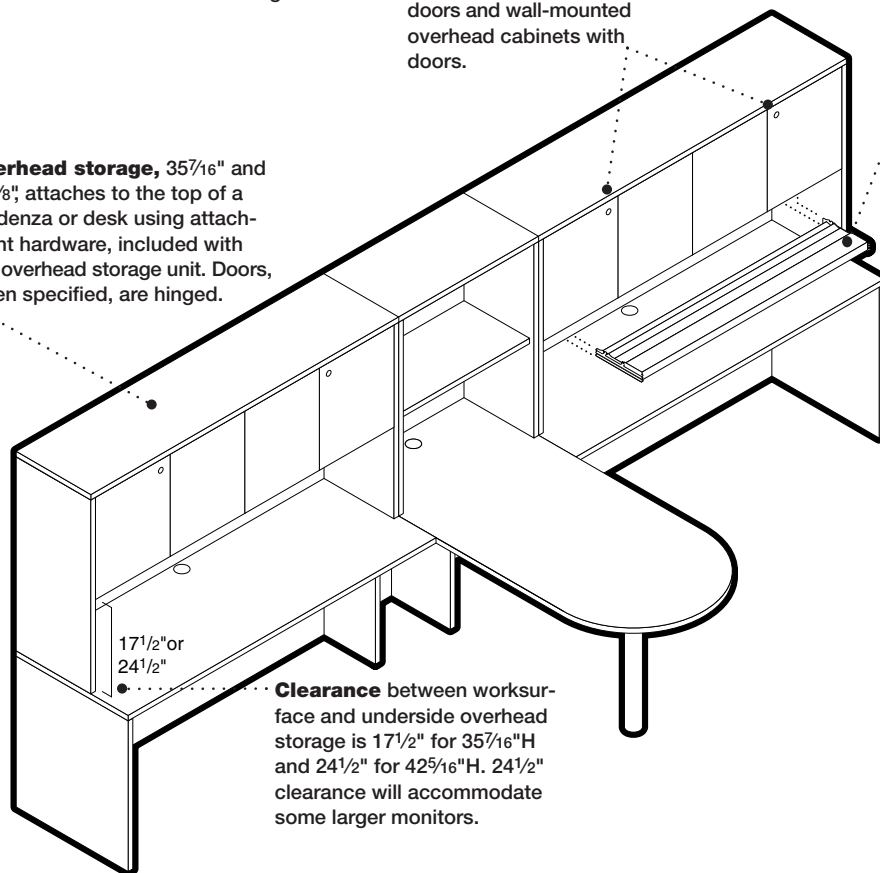

Optional locks are available on overhead storage cabinets with doors and wall-mounted overhead cabinets with doors.

 Specifying, pages 414–418, 421–422

Overhead storage, 35⁷/₁₆" and 42³/₈", attaches to the top of a credenza or desk using attachment hardware, included with the overhead storage unit. Doors, when specified, are hinged.

Overhead storage cabinets accommodate field-installed shelf lights in the recessed area beneath overhead storage. Clearance is 1⁷/₈"H to 12⁵/₁₆"D and include a cable access space at the bottom of back panels.

► Pages 414–418

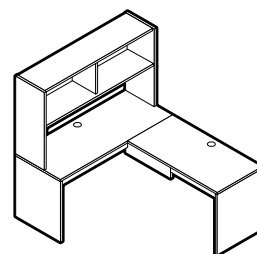

Clearance between work surface and underside overhead storage is 17¹/₂" for 35⁷/₁₆"H and 24¹/₂" for 42³/₈"H. 24¹/₂" clearance will accommodate some larger monitors.

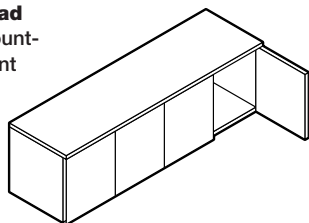

No pull option is offered on overhead and wall-mounted overhead storage cabinets with doors.

When attaching overhead storage to desk shells, attach a pedestal, return, bridge, or another shell for stability.

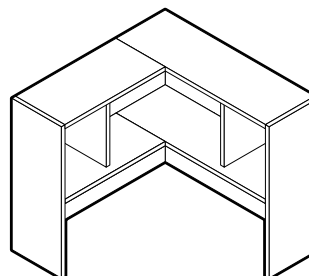

Wall-mounted overhead storage comes with mounting cleats and attachment hardware.

Must anchor wall-mounted overhead storage to as many studs as possible. See below for requirements:
30" to 42"W = 1 stud required
48" to 72"W = 2 studs required
78"W = 3 studs required

Corner overhead storage is available and can be used with corner desk shells, extended corner shells, and L-configurations.

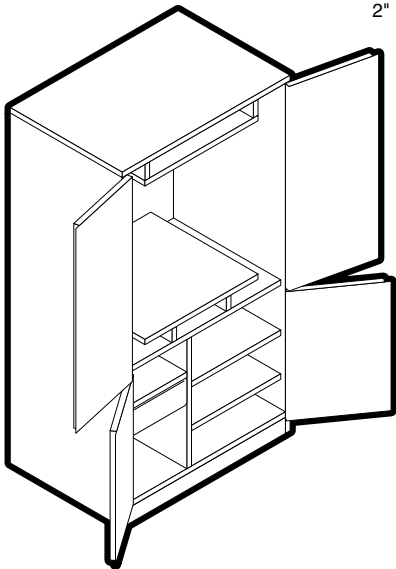

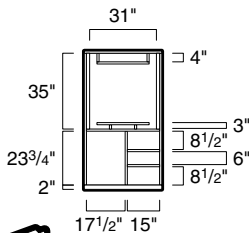

Conference Room Furniture Facts

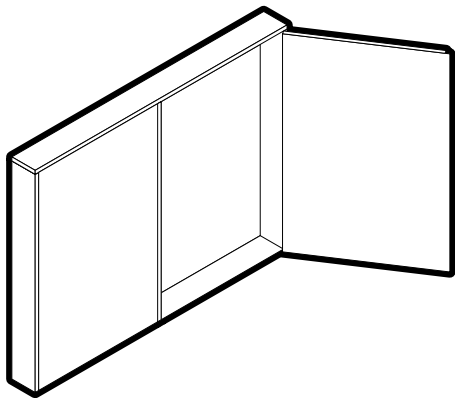

Conference Room
Furniture Facts

 Specifying, page 438

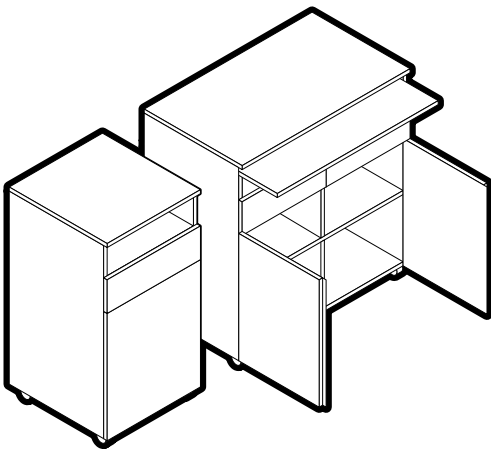

Video cabinet provides ample space for a 29" video monitor, and VCR. Cabinet also includes a drawer for storing video cassettes and two adjustable-height shelves. The cabinet comes fully assembled.

Wall markerboard cabinet contains a large writing surface that can be concealed with two cabinet doors. Door interiors are tackable cork. The cabinet comes fully assembled.

Meeting room service carts come in two widths to provide storage for conference supplies. The carts are on casters to provide easy mobility and are shipped fully assembled. Storage drawers are half depth.

Lectern is on casters to provide easy mobility and includes a 6"H fixed note and a fixed bottom shelf.

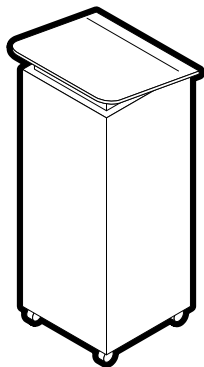

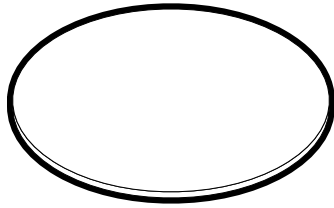

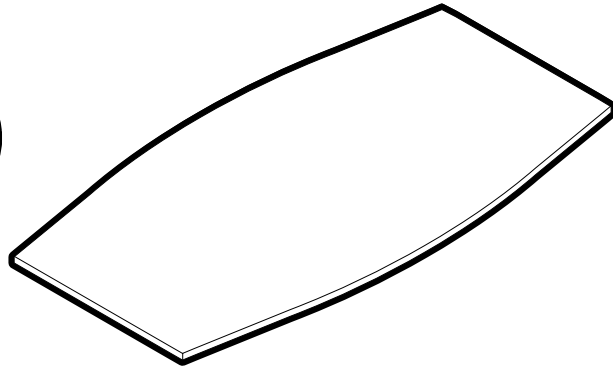

Table Facts

Table tops and bases are available in a variety of shapes and combinations and provide areas for conferences and extended workspace. Table tops and bases are sold separately.

1 = Number of base units to order.
Blank spaces in matrix designate top and base combinations that are not valid.

Directional Laminate and Edge Profile Detail

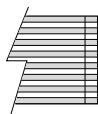

The appearance of **laminates** may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on work-surfaces installed at a 90° angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.

Product details,
page 365

Standard Includes

- Desk with full-height back panel: worksurface laminate and vertical surfaces laminate
- Worksurface edges with ribbed edge profile: high-impact vinyl (PVC) to match worksurface
- Waterfall pull on drawers: Black Texture
- Drawer interiors: black laminate only
- Full-extension, heavy-duty ball-bearing drawer suspensions
- One box drawer and one file drawer in pedestal
- One pencil tray in each box drawer: black plastic only
- File drawers to accommodate front-to-back or side-to-side filing of letter-size hanging file folders or side-to-side filing of legal-size hanging file folders
- Locks on pedestals, keyed randomly: 9250 Ember Chrome only
- Adjustable leveling glides
- Shipped fully assembled

Required to Specify

- 1 Style number
 - 2 Laminate color number for worksurface
 - 3 Vertical laminate color number for desk
 - 4 Options, if selected (see below)
- See *Surface Materials*, page 455.

Extended Corner Desk Shells

Tip: Grain direction of back panels runs horizontally. Grain direction of end panels runs vertically.

► Need help?
Product details,
page 364

Standard Includes

- Desk with full-height back panel: worksurface laminate and vertical surfaces laminate
- Worksurface edges with ribbed edge profile: high-impact vinyl (PVC) to match worksurface
- One full end panel and one clear-access panel on desk shells without bow front, one full end panel on desk shells with bow front
- Corner leg on desk shells without bow front: paint price group 1
- Two grommets in back corners of worksurfaces without bow front, one grommet in worksurfaces with bow front: black plastic only
- Adjustable leveling glides
- Shipped ready to assemble

Required to Specify

- 1 Style number
 - 2 Laminate color number for worksurface
 - 3 Vertical laminate color number for shell
 - 4 Paint color number for corner leg
 - 5 Options, if selected (see below)
- See *Surface Materials*, page 455.

	Options	U.S. Price	Required to Specify
Surface Materials	Corner leg on desks without bow front • Paint price group 1 • Paint price group 2	No cost +\$15	Specify paint color number. Specify paint color number.
Worksurface Edge Band Detail	• Flat square edge profile • Light plywood striping square edge detail • Medium plywood striping square edge detail • Dark plywood striping square edge detail	No cost No cost No cost No cost	Specify <i>with flat square edge profile</i> . Specify <i>with light plywood striping</i> . Specify <i>with medium plywood striping</i> . Specify <i>with dark plywood striping</i> .
Back Panel	• 3/4-height back panel (20"H)	No cost	Specify <i>with 3/4-height back panel</i> .
End Panels	Desks without bow front • Two clear-access end panels • Two full end panels	No cost No cost	Specify <i>with two clear-access end panels</i> . Specify <i>with two full end panels</i> .
Related Products	• Retractable keyboard shelf • Adjustable-height retractable keyboard shelf		► Page 355 ► Page 356

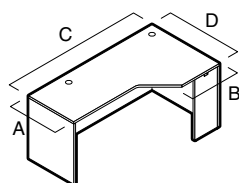

Tip: When two clear-access end panels are used, the shell unit must be attached to adjoining worksurfaces.

Credenzas with Pedestals

Tip: Pedestal locks on full storage credenzas are located on the side of the pedestal and accessed by opening the center doors.

Tip: Grain direction of back panel runs horizontally. Grain direction of end panels runs vertically.

► Need help?
Product details,
page 365

Standard Includes

- Credenza with full-height back panel: worksurface laminate and vertical surfaces laminate
- Worksurface edges with ribbed edge profile: high-impact vinyl (PVC) to match worksurface
- One box drawer and one file drawer in each pedestal
- Waterfall pull on doors and drawers: Black Texture
- Half-depth fixed shelf in double-door cabinet
- Drawer interiors: black laminate only
- Full-extension, heavy-duty ball-bearing drawer suspensions
- One pencil tray in box drawers: black plastic only
- File drawers to accommodate front-to-back or side-to-side filing of letter-size hanging file folders or side-to-side filing of legal-size hanging file folders
- Locks on pedestals and door, keyed randomly: 9250 Ember Chrome only
- Adjustable leveling glides
- Shipped fully assembled

Required to Specify

- 1 Style number
 - 2 Laminate color number for worksurface
 - 3 Vertical laminate color number for credenza
 - 4 Options, if selected (see below)
- See *Surface Materials*, page 455.

Overview Facts

Reply is a freestanding furniture system designed to complement the Answer panel-based system and to provide a high degree of flexibility to create practical workspaces.

Utility module provides power and data access in the corners above or below the worksurface.

Overhead storage cabinet installs on top of the workwell corners.

► Page 491

Privacy panel fits on top of the worksurface between two workwell corners. Panels are available in translucent, laminate, or corkboard. Two H-channels are included for support.

► Pages 488–490

Worksurface attaches to the kneewell corners and modesty panels (if selected). Worksurfaces ship with grommets, unless otherwise specified.

Workwell corners attach to top of a worksurface for privacy or overhead storage support.

► Page 487

Kneewell modesty panel spans the space between two kneewell corners to enclose the kneewell space. Two tie plates and two glides are included.

► Page 485

Storage towers with wardrobe are available with the door hinged on the right- or left-hand side. Two files drawers and two adjustable shelves are included.

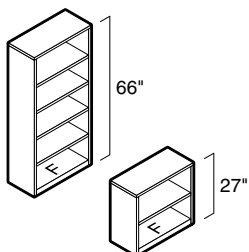

► Page 501

Kneewell corners provide the structural support for the workstation. The space between two kneewell corners can be left open. Three glides and two small cleats are included with each kneewell corner.

► Page 484

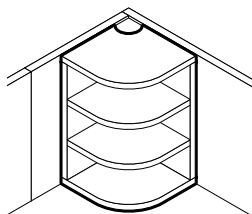

Bookcases are available 27"H and 66"H. Only bottom shelf is fixed. 27"H bookcase can fit under a worksurface. 66"H bookcase top aligns with overhead storage cabinets or tower.

► Page 502

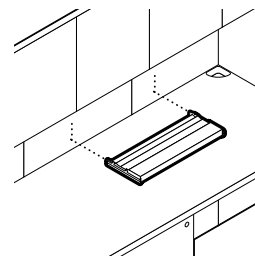

Corner shelf unit is for use above the worksurface in workwell corners. Utility module and workwell wire manager can be used behind the corner shelf.

► Page 503

Shelf lights can be field installed in the recessed area beneath overhead storage cabinets.

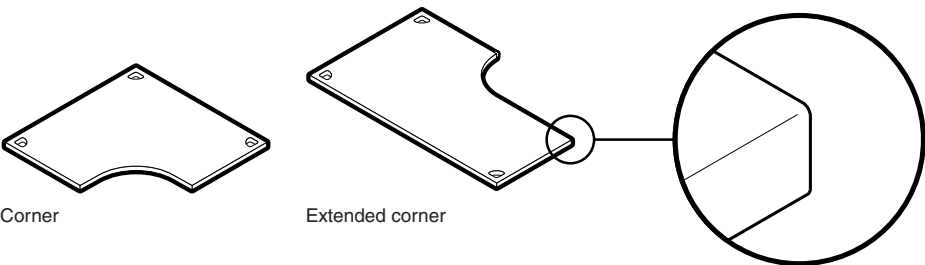

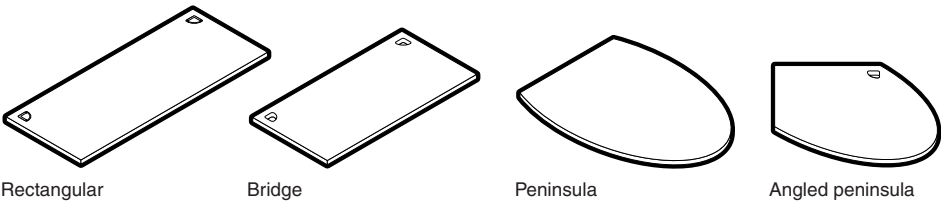

► Page 507

Worksurface Facts

Reply worksurfaces are available in a variety of shapes. Worksurfaces have a wood core with a laminate surface.

 Specifying, pages 479-483

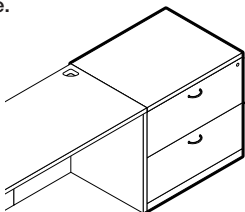

Edge profile is 3 mm radius PVC. PVC edge color is a default determined by the color specified for the worksurface. Same edge detail is available on freestanding lateral file, mobile pedestal, table tops, and oval top for carts.

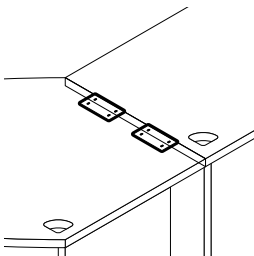

18" x 18" kneewell must be used to support rear corner of corner worksurface.

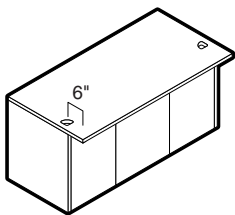

Freestanding lateral file can be used adjacent to a 24"D worksurface to provide additional worksurface. Height of lateral file and worksurface is the same.

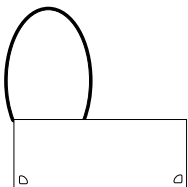

Flat steel brackets are included with all worksurfaces to link adjacent worksurfaces.

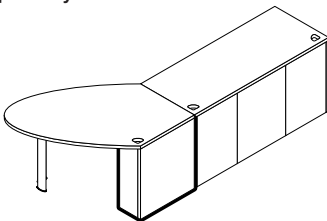

36"D worksurfaces are supported by 30"D kneewell corners.

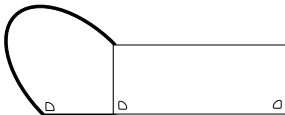

Peninsula worksurfaces can be used to create an L-shaped configuration. Double post legs must be used and are specified separately.

Angled peninsula kneewell corner is available for support beneath angled peninsula worksurfaces. Double post legs must be used and are specified separately.

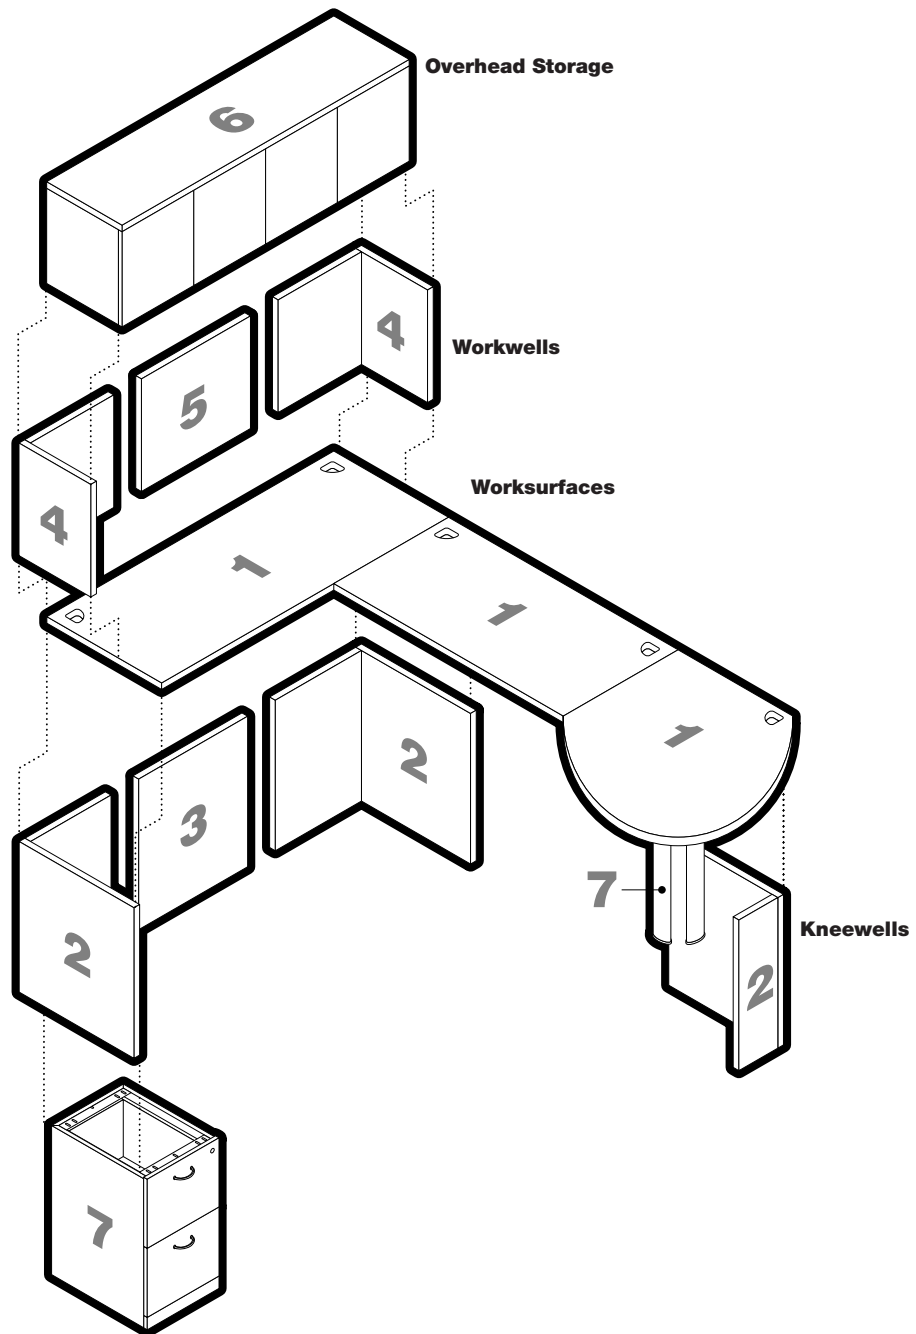

Angled peninsula worksurfaces are designed to be used at right angles to a rectangular worksurface. Order peninsula worksurface with left- or right-hand grommets to be used with workwell corners.

Build-Up Facts

Reply is modular to make specification easy. Follow these steps:

- 1 Specify worksurfaces.
- 2 Specify kneewells to support worksurfaces.
- 3 Add modesty panels if desired.
- 4 Specify workwells for privacy and to support overhead storage.
- 5 Add privacy panels if desired.
- 6 Specify overhead storage cabinets.
- 7 Specify lower storage, accessories, and legs.

Kit Facts

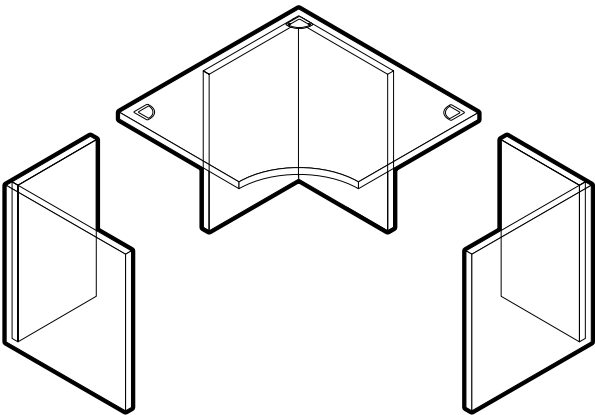

To simplify the ordering process with Reply kits, order the following:

- Rectangular desk shell kits
- Extended corner and corner desk shell kits
- Return shell kits
- Overhead storage cabinet kits

 Specifying, pages 476-478, 486

Corner Desk Shell Kits

Kit Facts

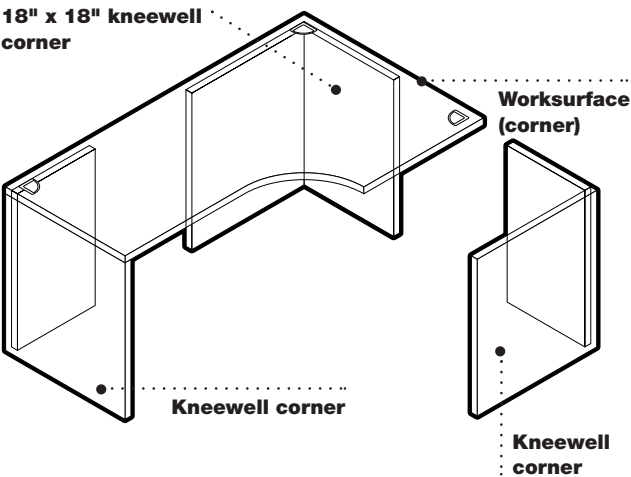

Rectangular Desk Shell Kits

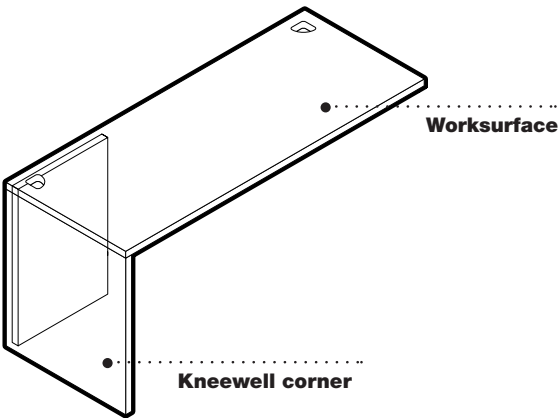

Note: Where applicable, no modesty panel is needed.

Extended Corner Desk Shell Kits

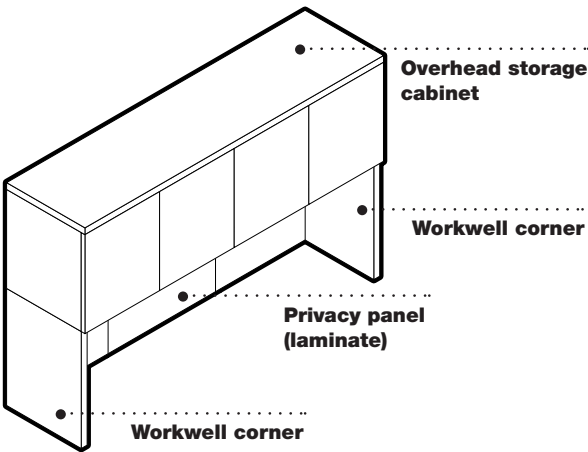

Note: Where applicable, no modesty panel is needed.

Return Shell Kits

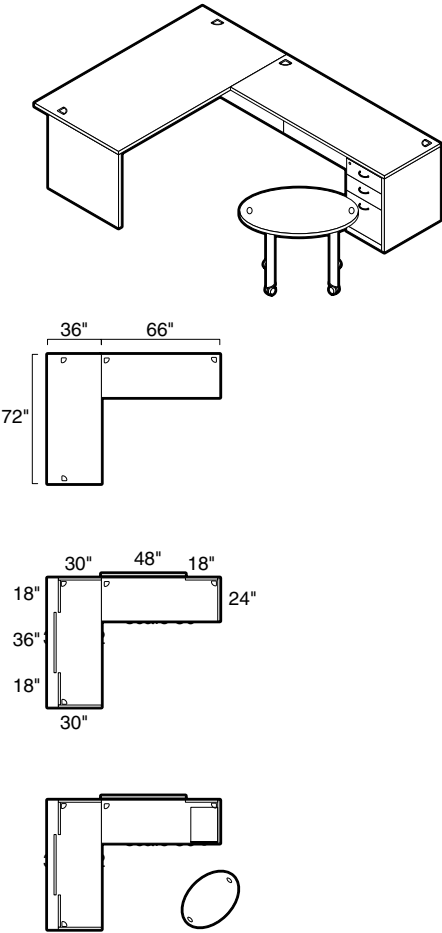

Note: No modesty panel is needed.

Privacy Screen and Mobile Corner Unit Facts

Translucent privacy screens must be supported by two bases, ordered separately. Screen is available in two heights—42"H and 54"H—and two widths—48"W and 72"W.

 Specifying, page 495

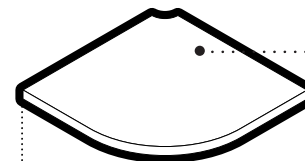

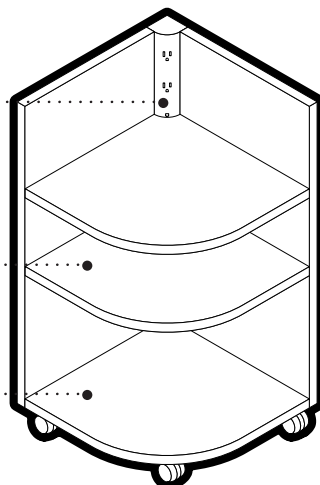

Mobile corner units are available with and without power. Mobile file carts can house a computer monitor and CPU unit to free up primary desk work area, or it can be used to supply vertical storage space.

 Specifying, page 492

Utility module is standard in unit with power.

Middle shelf is adjustable.

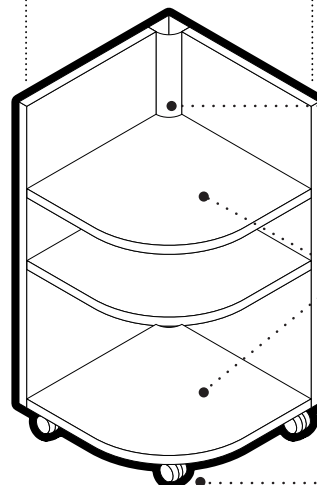

Low-pressure laminate body and shelves.

High-pressure laminate top, ordered separately, is available.

Wire manager is standard in unit without power.

Top and bottom shelves are fixed.

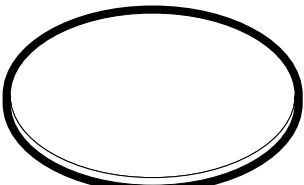

Four casters for easy reconfiguration when unit is empty.

Table Top, Leg, and Base Facts

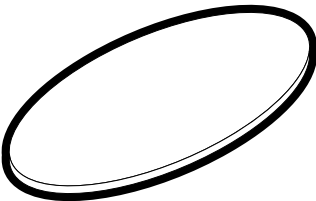

Table Top, Leg, and Base Facts

Table tops are available in square, round, oval, kidney corner, and heart corner shapes with several dimensions to choose from.

 Specifying, pages 493-494

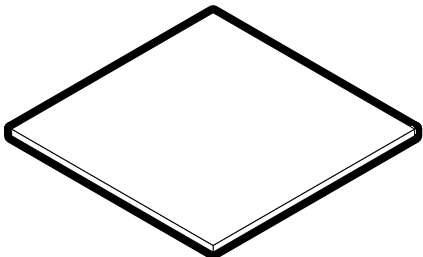

Round

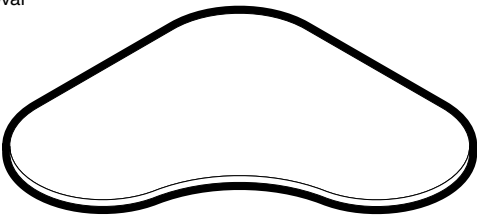

Oval

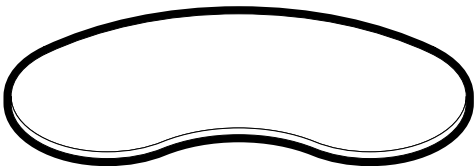

Oval with handles

Square

Heart corner

Kidney corner

Oval top used on mobile carts can also be used with legs to create a table. Use nesting legs to create an easily movable side table.

Table legs match the Answer Furniture System aesthetic.

Heart and kidney corner table dimensions are detailed below.

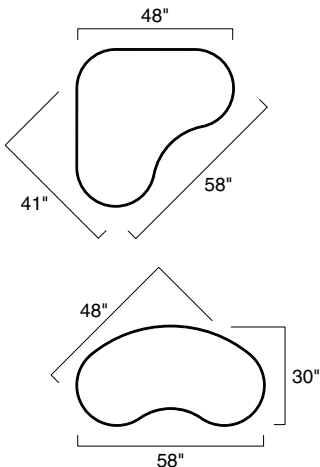

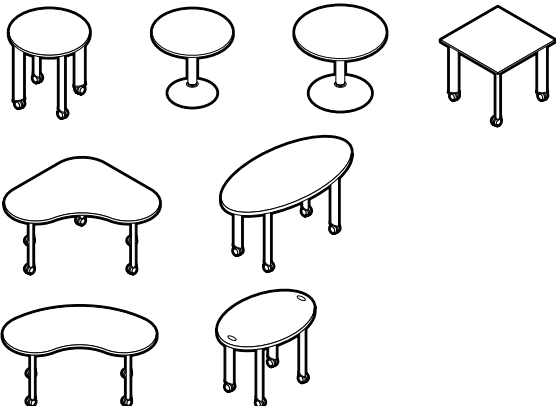

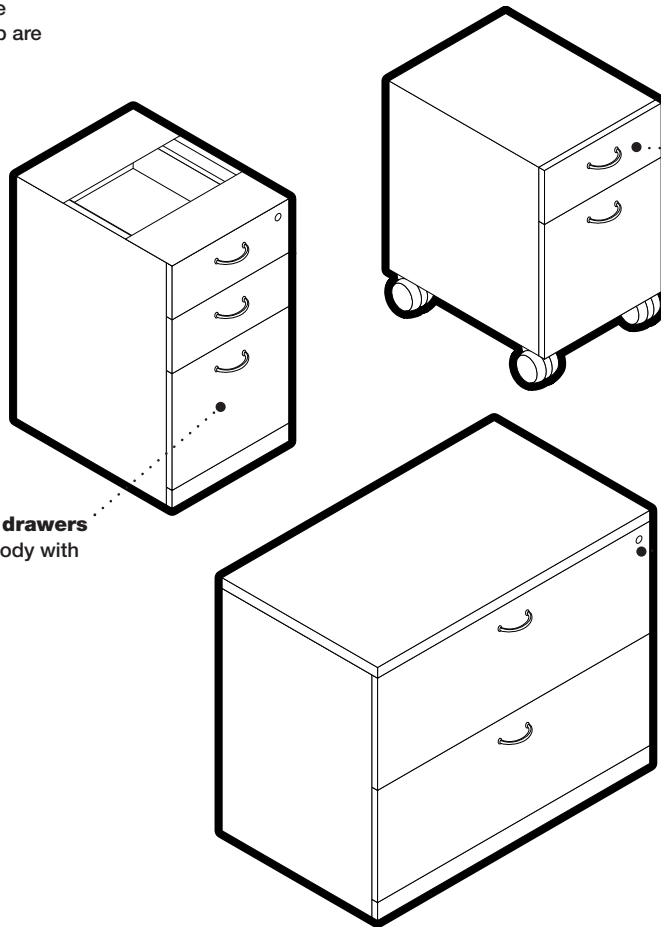

Table tops and bases should be combined as shown. Legs with casters are pictured. Legs with glides can also be used. Use 22"-diameter round base only with 36"-diameter top, and use 28"-diameter round base only with 42" and 46½"-diameter top. Order bases separately.

Pedestal and Lateral File Facts

Fixed pedestals are designed to be installed beneath the worksurface desks. Mobile pedestals with finished top are also available.

 Specifying, pages 496–497

Pulls are solid cast aluminum in black finish.

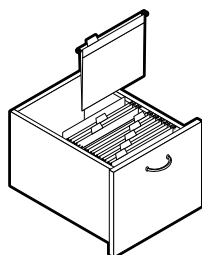

Box drawers and file drawers have a black laminate body with laminate front.

Lock, standard on fixed pedestals and lateral files, secures all the drawers. Mobile pedestals are not available with a lock. Lock is standard keyed random. Consecutive and specific keying options are available. Master keyed locks are also available. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site. Lock cylinders must be specified separately.

► **Lock and Keying Options**, page 588

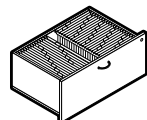

► For interior dimensions, see *Storage Capacities*, page 590.

File drawers in pedestals have full-height sides to accommodate letter-size hanging file folder frames front to back or legal-size hanging file folder frames side to side.

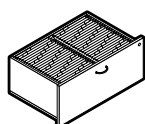

Front to back

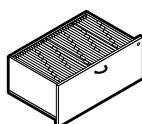

Lateral file drawers accommodate front-to-back filing of letter-size hanging file folder frames and side-to-side filing of legal-size hanging file folder frames.

Side to side and front to back

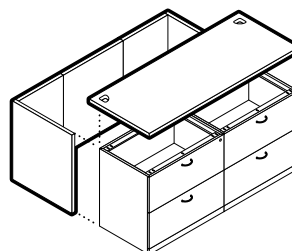

Front to back

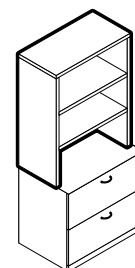

Side to side

Two lateral files can be covered by a rectangular worksurface and wrapped by two kneewell corners and a modesty panel to form a full-storage credenza.

Stacking storage shelf must be used with either a freestanding lateral file or worksurface. Shelf cannot be freestanding.

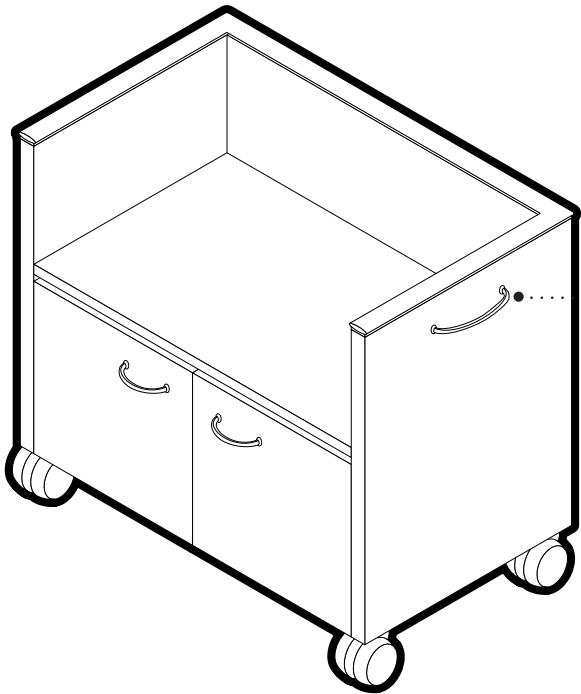

► Page 498

Mobile Cart Facts

Mobile carts provide storage and access to equipment in a component that is easy to move from place to place.

 Specifying, page 499

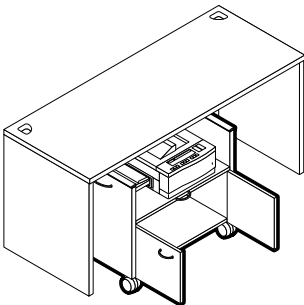

Pulls are solid cast aluminum in black finish.

Mobile cart without doors has an adjustable shelf. Oval or rectangular table top can be added to cart to accommodate a monitor or to provide an auxiliary worksurface. Cart with top can nest under worksurface.

► Page 499

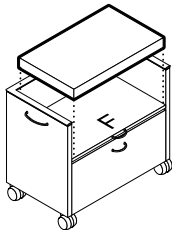

Mobile cart with doors has a fixed shelf and storage for paper and supplies below. Cart can be stored beneath a worksurface.

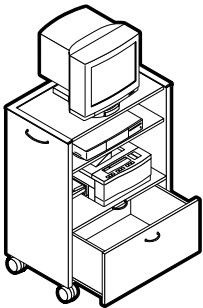

25"H mobile cart with lateral file drawer has a fixed shelf and a drawer for filing and storage. Mobile cart seat cushion can be placed on top of shelf of mobile cart with doors and 25"H mobile cart with drawer.

► Page 500

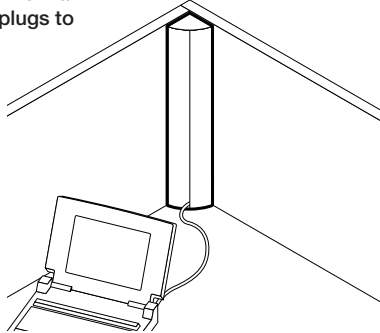

41"H mobile cart with lateral file drawer has one adjustable shelf. Top is 40"H to offer a standing-height worksurface.

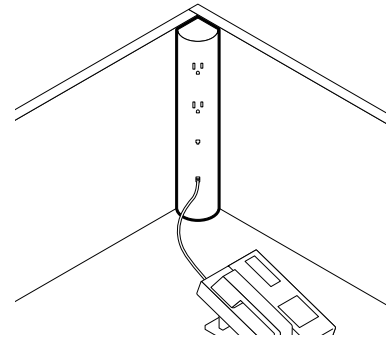

Wiring and Cabling Facts

 Specifying, page 504

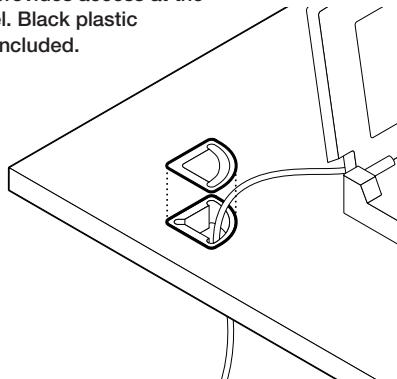

Wire manager is included with workwell corner and can be ordered separately for use with kneewell corner to conceal wires and cables routed vertically. Vertical slot in face of wire manager allows wires and plugs to pass through.

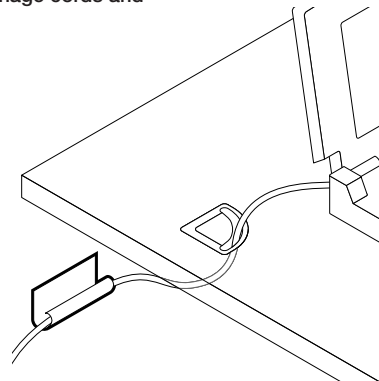

Utility module installs in place of the workwell wire manager to give the user convenient access to power and communication outlets.

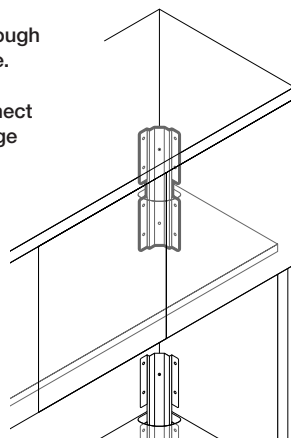

Grommet in corners of worksurfaces accommodates wire and cable routing from the kneewell corner to the workwell corner and provides access at the worksurface level. Black plastic grommet cap is included.

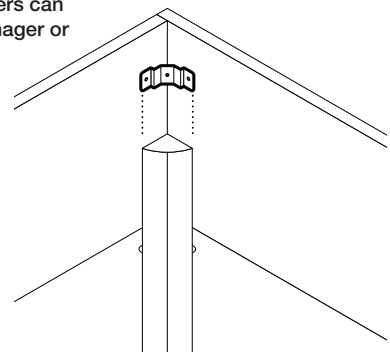

Worksurface wire clips attach to the underside of a worksurface to route and manage cords and wires.

Large cleat must be used to connect a workwell corner to a kneewell corner by passing through the grommet in the worksurface. Two large cleats, included with overhead storage cabinet, connect cabinet to workwell corner. Large cleat supports wire manager or utility module.

Small cleat, included with workwell corners, is used to connect a wire manager or utility module to a workwell corner when an overhead cabinet is not specified. Cleats in kneewell corners can also support a wire manager or utility module.

Desk and Desk Shell Facts

Desks are available as shells (without storage) and in single- and double-pedestal models. Desks are shipped knocked down (ready to assemble).

Worksurface has a wood core with Turnstone Performance Laminate (TPL). Universal laminate worksurfaces and Universal wood worksurfaces without scallops are available as options.

 Specifying, pages 515–517

User's edge profile is PVC with a 3 mm radius. Back and side edge is 1 mm.

Single-pedestal desks are non-handed.

Lock, standard on desks with pedestals, controls all of the drawers. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site. Lock cylinders must be specified separately.
► *Lock and Keying Options*, page 588

Leveling glides adjust to allow installation on uneven floors.

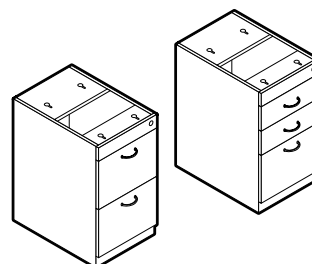

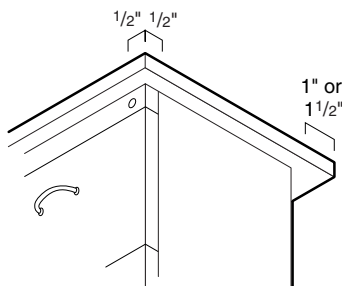

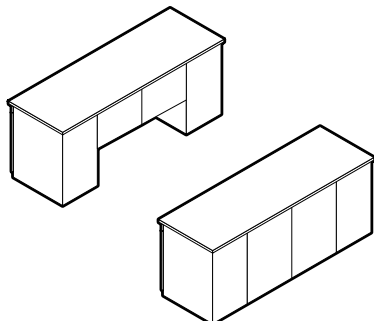

Handle pulls

Modesty panels are available partial- or full-height on desks and desk shells. Partial-height modesty panels are 12"H. Full-height modesty panels extend to the floor. Desks and desks shells can also be specified without a modesty panel.

Worksurface overhang:
1/2" on front and sides
1 1/2" on back side

Universal laminate and wood worksurface overhang:
1/2" on front and sides
1" on back side

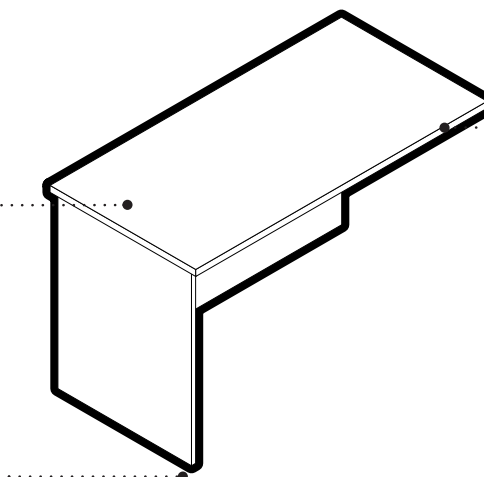

Pedestals are standard with two file drawers. Box, box, file drawers are available as an option. 22"D Turnstone under-worksurface pedestals are located beneath 24"D worksurfaces. 28"D Turnstone under-worksurface pedestals are located beneath 30"D worksurfaces.

Return Facts

Returns attach to a desk to form an L-shaped configuration or bridge to form a U-shaped configuration. Returns are available with or without a pedestal. Returns are shipped knocked down (ready to assemble).

Worksurface has a wood core with Turnstone Performance Laminate (TPL). Universal laminate worksurface and Universal wood worksurfaces without scallops are available as options.

Leveling glides adjust to allow installation on uneven floors.

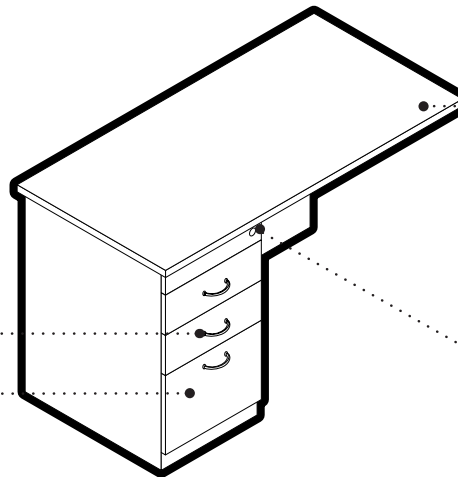

User's edge profile is PVC with a 3 mm radius. Back and side edge is 1 mm.

Specifying, pages 518–519

Handle pulls

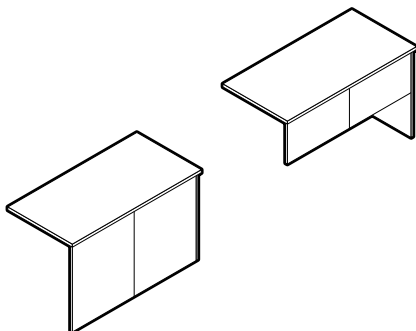

Pedestal is standard with two file drawers. Box, box, file drawers are available as an option. Single-pedestal return is non-handed. Returns ship with 22"D Turnstone under-worksurface pedestals.

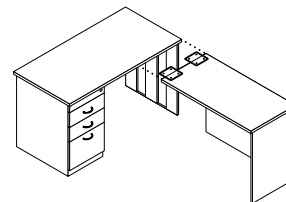

Worksurface overhang is 1½" on back side and ½" on front and sides of worksurface. Worksurface overhang is 1" on back side and ½" on front and sides of Universal laminate and wood worksurfaces.

Lock, standard on returns with pedestals, controls all of the drawers. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site. Lock cylinders must be specified separately.
► *Lock and Keying Options*, page 588

Modesty panels are available partial- or full-height on returns. Partial-height modesty panels are 12"H. Full-height modesty panels extend to the floor. Returns can also be specified without a modesty panel.

Attachment hardware, standard, connects return to a desk.

Overhead Storage Cabinet Facts

Overhead storage cabinet is steel and ships ready to assemble. Available with hinged doors, storage cabinet attaches to worksurfaces to provide privacy and overhead storage.

 Specifying, pages 520–521

Open space between hinged doors measures 12 $\frac{1}{8}$ ". Grommet, located in the center of the open space, is used for routing cables.

Overhead storage cabinets are standard with steel back panel. Back panel removed, available as an option, is used for open communication.

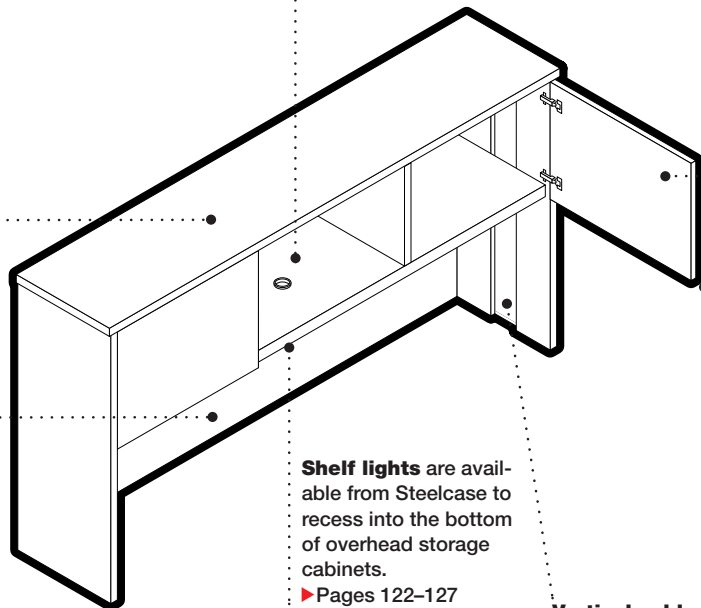

Tackboard is available for field installation. Back panel is required for tackboard.

Shelf lights are available from Steelcase to recess into the bottom of overhead storage cabinets.
► Pages 122–127

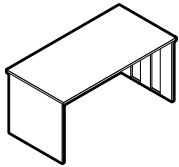

Doors are 22"W.

Lock(s) is standard on cabinets to secure the door(s). Lock is hidden underneath the door. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site. Lock cylinders must be specified separately.
► *Lock and Keying Options*, page 588

Vertical cable manager covers, available as an option, conceal cords that are routed from cabinets to worksurface.

Table Facts

Flexibility doesn't always mean complexity. Smoke is designed to mobilize your workforce while actually simplifying your workspace. It gives you the adaptability and speed of freestanding furniture—and a sleek design that's anything but fleeting.

 Specifying, pages 536–539

Rectangular table can dock to left- and right-hand mobile table desk to provide additional workspace.

Mobile table desks and stationary table desks are available in left-, right-, and non-handed versions.

Nesting oval table provides a moveable conferencing area or additional workspace. Table stores underneath worksurface when not in use. Nesting table is 26"H.

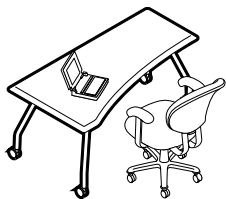

Smoke worksurfaces are crafted from translucent vinyl wrapped over an exposed mdf (medium density fiberboard) core, giving worksurfaces a unique and natural appearance. Inner core varies in color and pattern, including a light streaking on large worksurfaces. Like other natural materials, color may change over time. These tops are similar in hardness and durability to veneer.

Angled legs are standard with a fixed height. Optional adjustable-height legs are available.

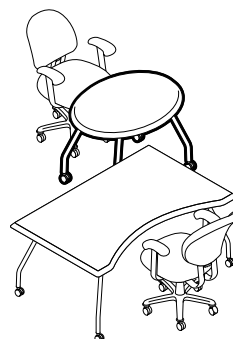

Front-locking casters are standard on mobile table desks. Levelers are standard on stationary table desks and adjust to install furniture on uneven floors.

Handed table desks transition from 36"D to 24"D to accommodate a computer and provide chair swing space.

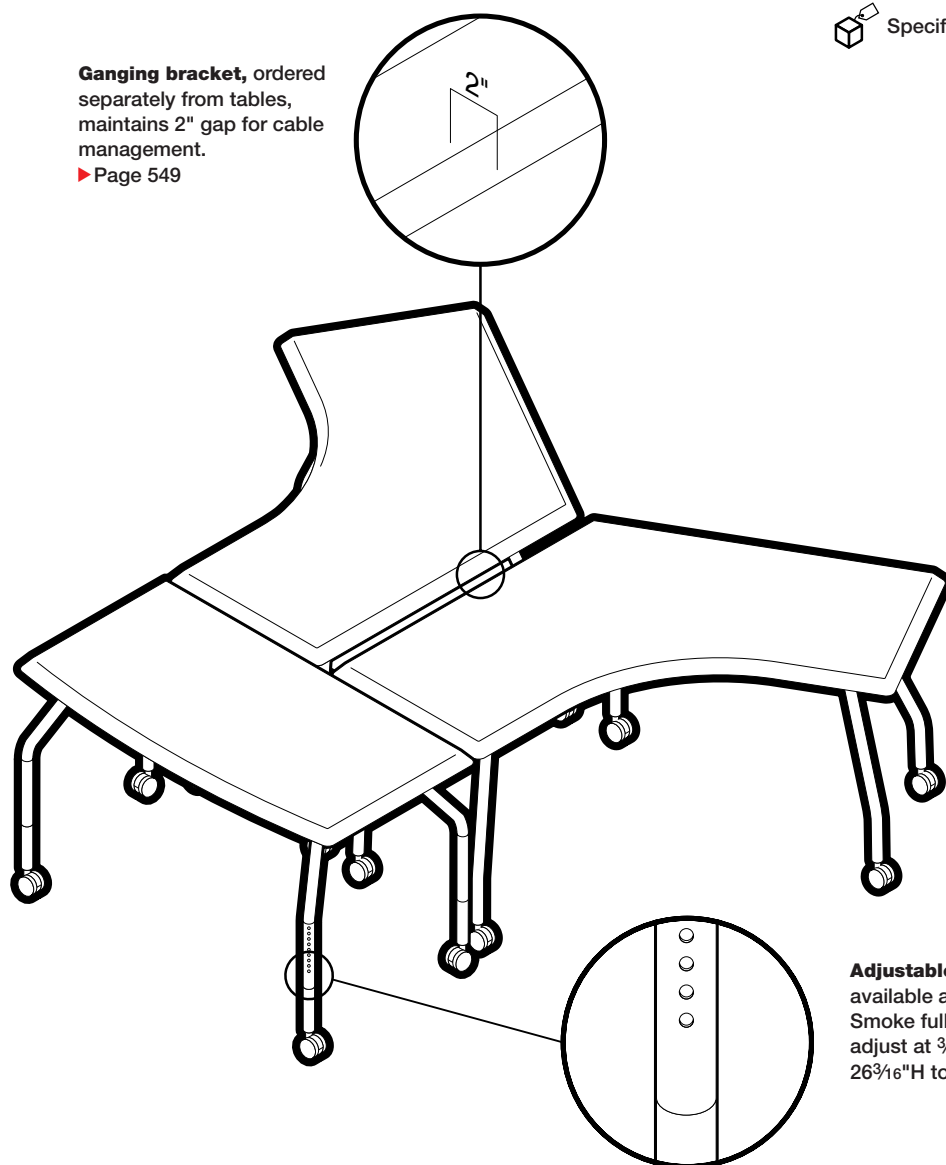

Oval table that is 42"W can be used for additional workspace or for a face-to-face meeting.

 Specifying, pages 536–539

Ganging bracket, ordered separately from tables, maintains 2" gap for cable management.
 ▶ Page 549

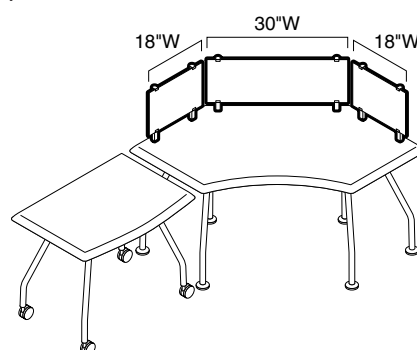

Adjustable-height legs are available as an option on all Smoke full-height legs. Legs adjust at $\frac{3}{4}$ " increments from $26\frac{3}{16}$ "H to $32\frac{3}{16}$ "H.

120° corner table encourages a unique, open environment. Three 120° corner tables with screens can be juxtaposed to form separate work areas.

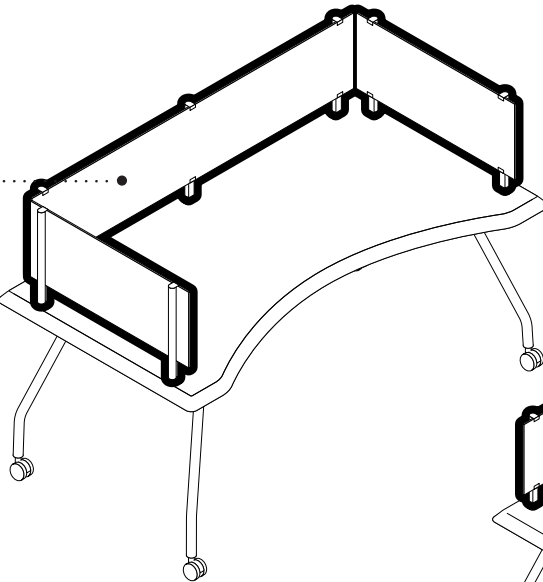

Corner table can dock to the rectangular table for additional workspace. Corner table accepts three screens.

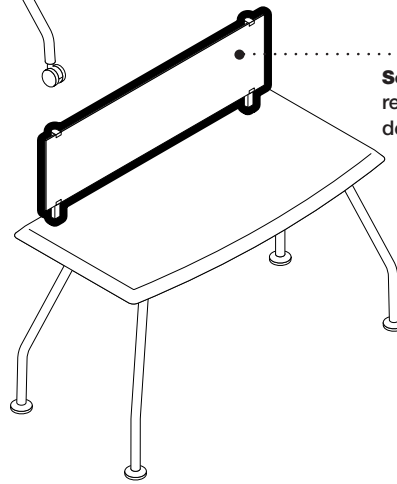

Desk-Mounted Screen Facts

 Specifying, page 540

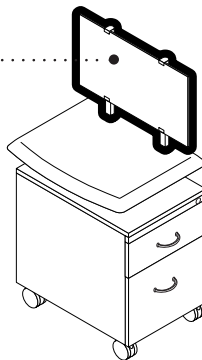

Screens can be attached above the worksurface to the left, right, and rear sides of table desks.

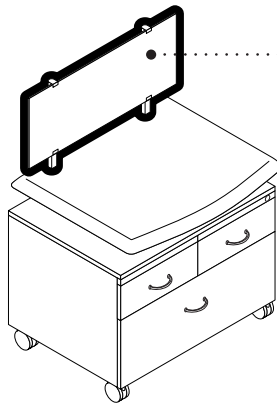

Screen attaches to the rear of rectangular table desk.

Screen attaches to the right side of pedestals with floating top. 18"W screens are available for use on pedestals with floating top.

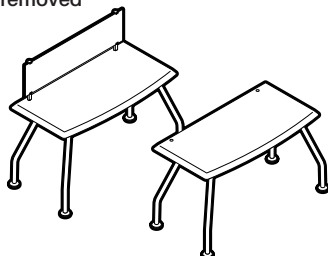

Screen attaches to the rear of mobile file units with floating top. 27"W screens are available only for use on mobile file units with floating top.

Screens, 6" smaller than table desks, do not extend full width or full depth of worksurface.

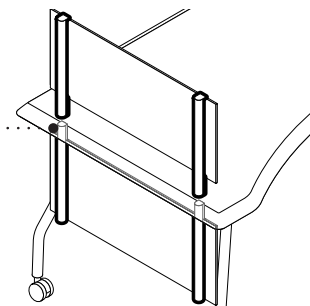

Table and storage tops are shipped without screen holes. To attach screens, holes must be drilled on site using the supplied template. Plugs are available through Customer Service Parts (TS5YGMTSR) when screens are not in use and have been removed from the top.

Screen attaches above the worksurface for use as a privacy panel or below the worksurface for use as a modesty panel.

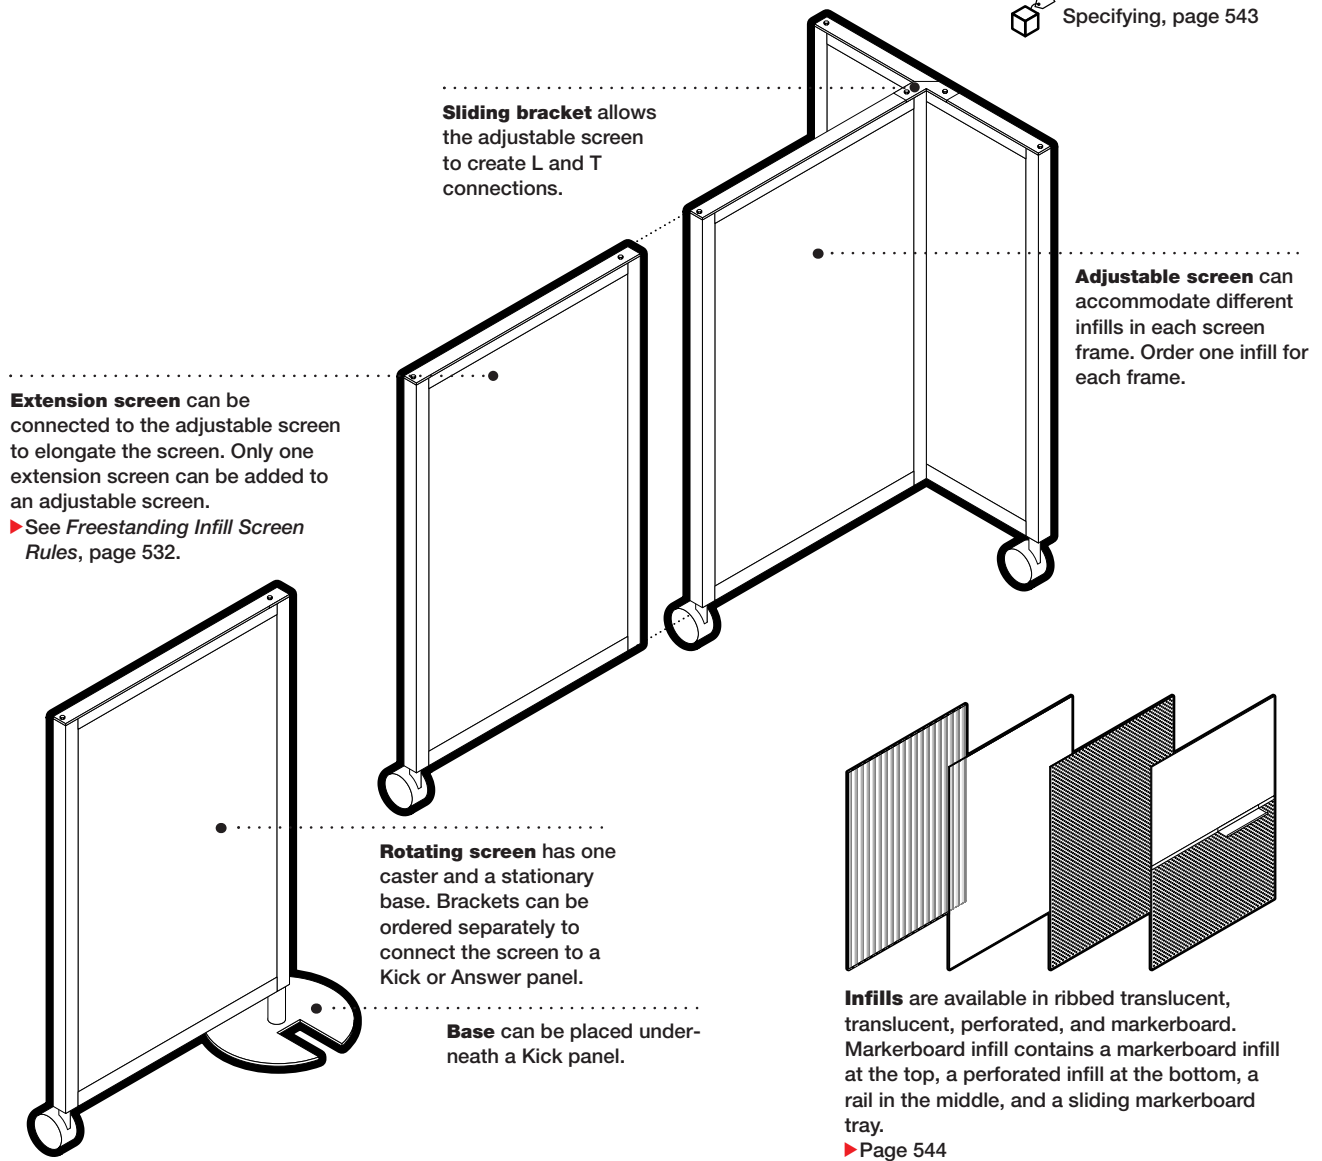

Mounting brackets, ordered separately, must be used when attaching screens above and below a worksurface.

► Page 542

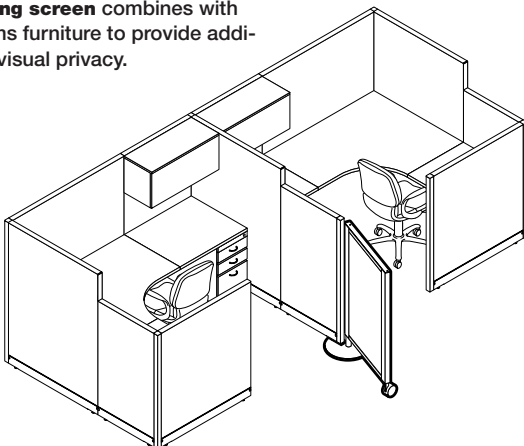

Freestanding Screen Facts

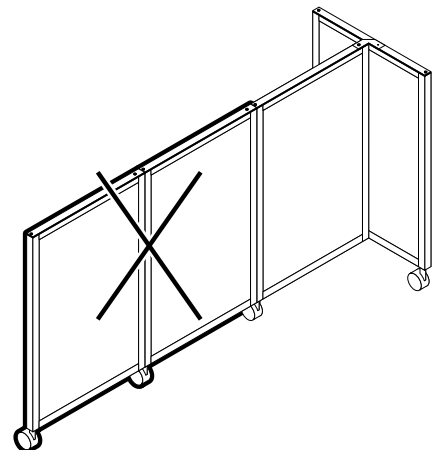

Freestanding Screen Facts

 Specifying, page 543

Rotating screen combines with systems furniture to provide additional visual privacy.

Extension panels cannot connect to each other due to stability concerns. Extension panel can attach to an adjustable screen only.

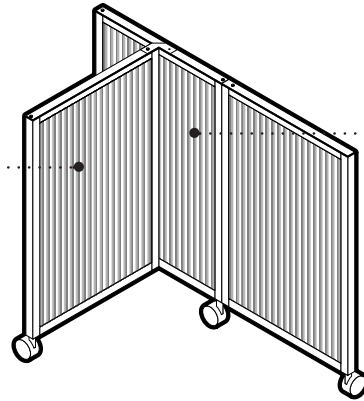

Freestanding Infill Screen Rules

When connecting extension screens to adjustable screens, for stability use only the following combinations of infills.

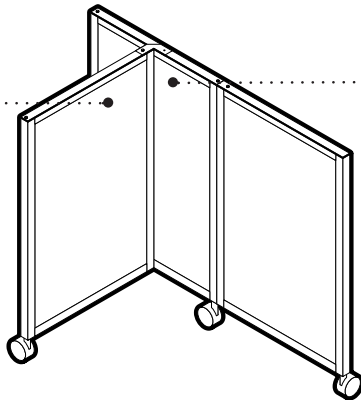

The extension screen infill must be the same material as the screen frame it is connected to. You cannot combine three different infill types.

If you want a ribbed infill here ...

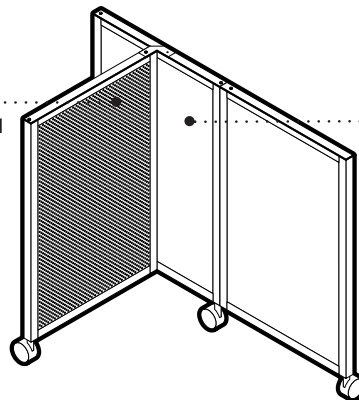

... Then also order a ribbed infill here.

If you want a translucent infill here ...

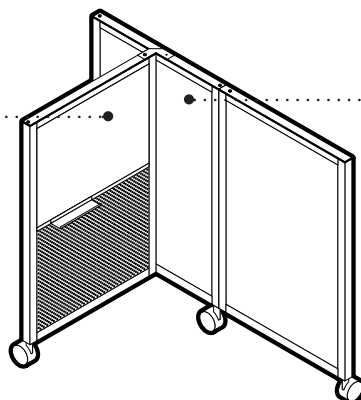

... Then also order a ribbed or a translucent infill here.

If you want a perforated infill here ...

... Then also order a ribbed, translucent, or perforated infill here.

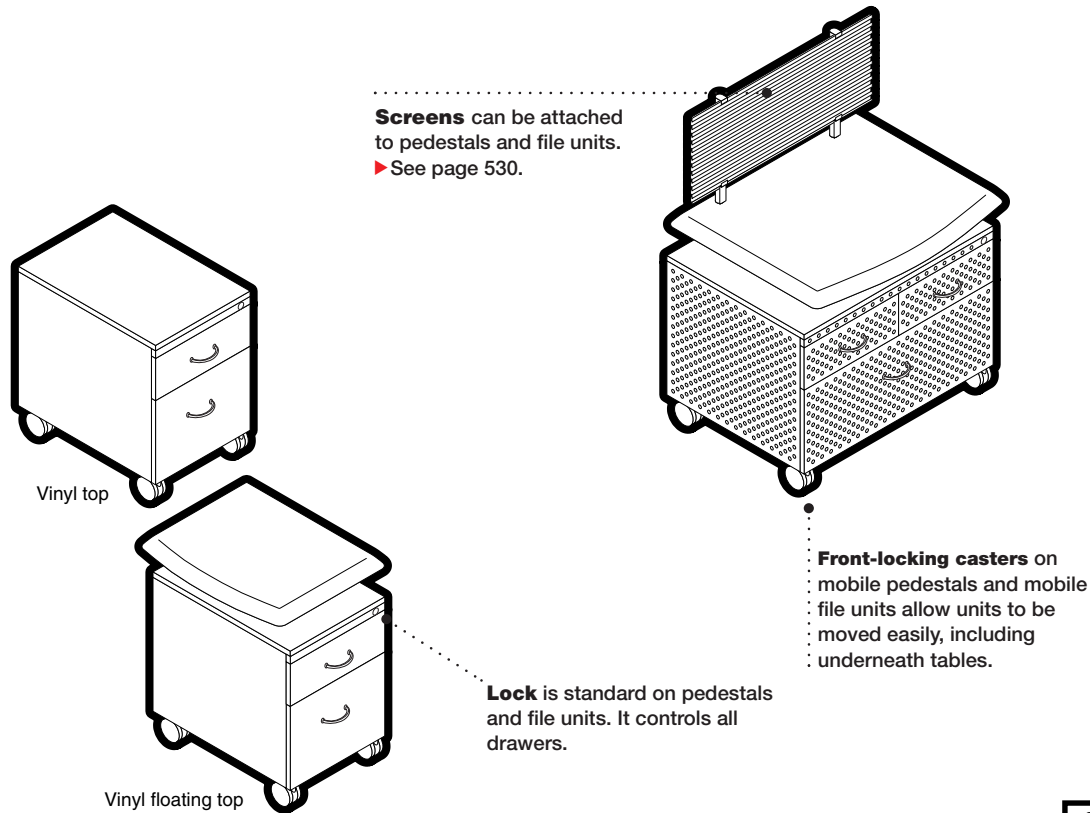

If you want a markerboard infill here ...

... Then also order a ribbed, translucent, or markerboard infill here.

Storage Facts

 Specifying, pages 545–546

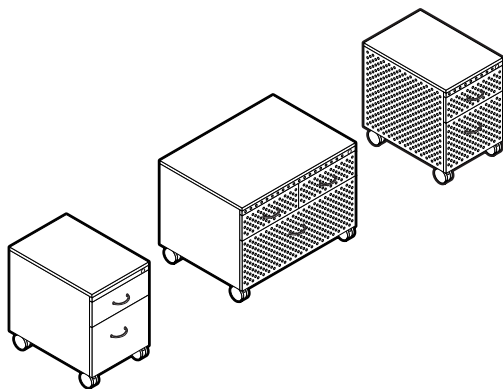

Pedestals and file units are standard with a vinyl top or additional vinyl floating top. Space under floating top can be used for storage.

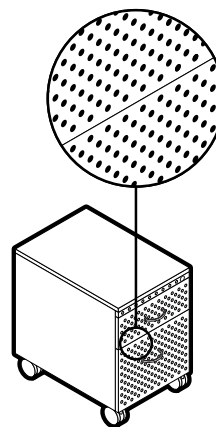

Smoke furniture complements Kick.
▶ See page 5.

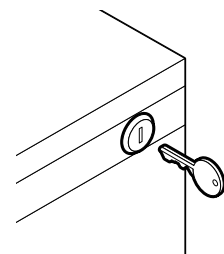

Mobile pedestals and file units are available without perforation, with perforated fronts, and with perforated front and sides.

Perforation is $\frac{3}{16}$ " in diameter on pedestals and file units with perforation.

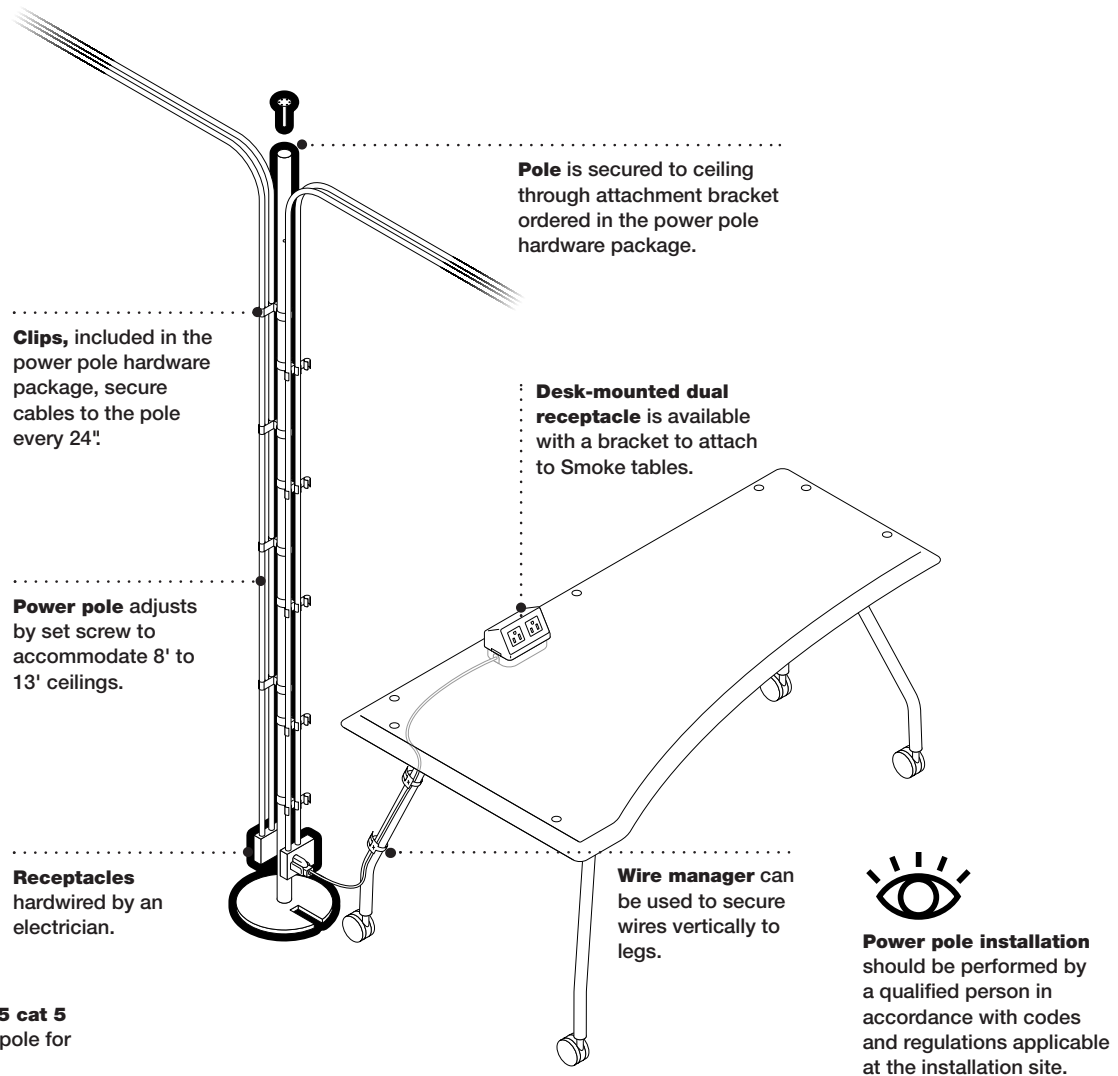

Lock is standard keyed random. Consecutive and specific keying options are available. Master-keyed locks are also available. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed onsite. Lock cylinders must be specified separately.
▶ *Lock and Keying Options*, page 588

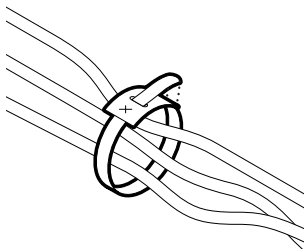

Power and Cable Management

 Specifying, page 547

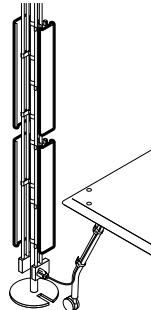

Cable capacity = 15 cat 5 on each side of the pole for a total of 60.

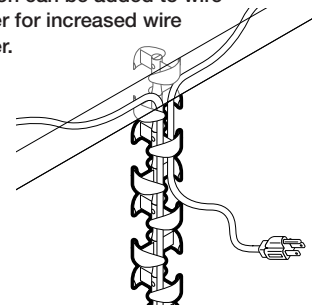

Wire manager, ordered separately, attaches with screw to underside of worksurface to bundle wires horizontally.

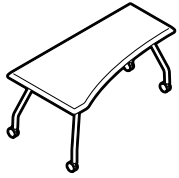

Two-piece, one-sided power pole cover is available as an option on the power pole, or cover can be ordered separately. Order four sets to completely conceal cables.

Skeleton bone wire manager, ordered separately, attaches to underside of worksurface to accommodate wires vertically. Extension can be added to wire manager for increased wire manager.

Mobile Table Desks

Tip: Cable keeper is available from Details to manage cords. Order TWSB.

Table Facts

Groupwork furniture supports team activities. It is appropriate in an open plan and enclosed work space.

 Specifying, pages 557–558

T-legs can be mounted in 3 positions:

 Specifying, pages 557–558

Groupwork tables can be attached together using tie plates (TSATTIE).

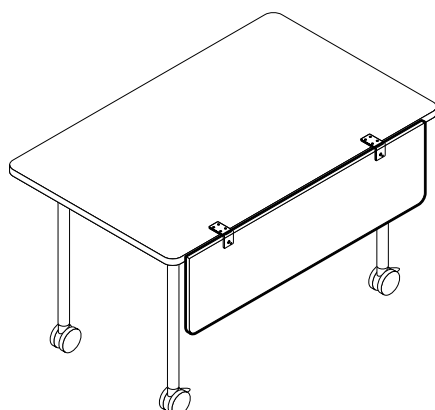

Personal table creates additional workspace.

Pin-height adjustable legs are available as an option on post legs. Legs adjust at $\frac{3}{4}$ " increments from $26\frac{3}{16}$ "– $32\frac{3}{16}$ "H. Pin-height adjustable legs can be used to support nesting applications.

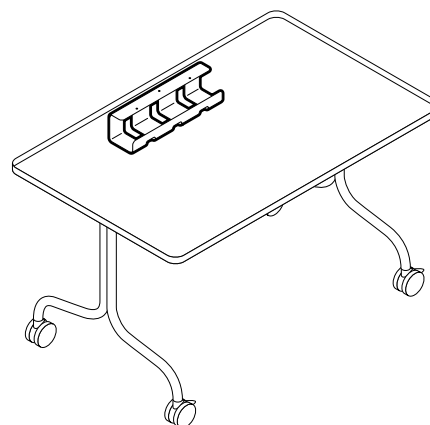

Levelers have $3\frac{1}{2}$ " of adjustment for installation on uneven floors.

Groupwork tables with post legs also blend with Kick Systems furniture.

Modesty panel attaches below worksurface to provide privacy. Modesty panels are 12"H and are $\frac{1}{2}$ " thick. Modesty panels are finished with Turnstone Performance Laminate on both sides and color matched edges.

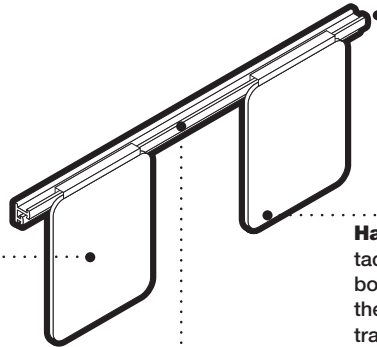

Wire management trough attaches to underside of worksurface to provide cable management and has capacity to support a powerstrip.

Hanging Display Component and Easel Facts

 Specifying, page 560

Hanging markerboard has a non-glare writing surface on both sides. It accepts all standard dry-erase markers. Markerboard can hang from the mobile easel or wall track. Tools are not required. Markerboard can be stored inside the mobile easel.

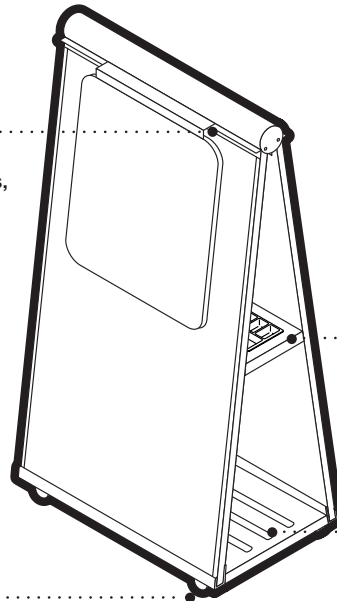

Wall track has a double hanging rail. It accommodates three hanging markerboards or tackboards, two rows deep. Wall track attaches to wall studs. It ships in eight-foot sections.

Hanging tackboard has tackable fabric surface on both sides. It can hang from the mobile easel or wall track. Tools are not required. Tackboard can be stored inside the mobile easel.

Press rollers hold single sheets of paper in place.

Mobile easels are available with a markerboard on one side and tackboard on the other side, tackboard on both sides, or markerboard on both sides.

Top rail acts as an easel to display posters, markerboards, and tackboards.

Pencil tray holds pens, erasers, and push pins.

Storage compartment provides an area for extra tackboards, easel pads, and audio-visual equipment.

Casters allow the easel to be moved easily.

2860 Granite Fiber	Black

Understanding Customer's Own Material (COM)

The Customer's Own Material (COM) program allows customers to select textiles that are not offered through the standard Surface Materials program for use on Turnstone products.

The COM process consists of seven steps: COM Web Site, Testing/Approval, Steelcase to Purchase Service, Pricing, Cutting Direction, Yardage Requirements, and the Purchase Orders.

COM Web Site

- COM Web site features application test results for all COM, Designtex Graded-In, Options Collection and Classics Collection fabrics. The Web site allows you to calculate yardage requirements for most Turnstone seating and systems products.
- Access the COM Web site at: www.steelcase.com:
 - Click on "Knowledge & Design"
 - Click on "Customer's Own Material" or call 1.888.783.3522 (1.888.STEELCASE)

Application Testing/Approval

- Confirm that the selected COM has been tested and approved for application on a specific product by checking the COM Web site at: www.steelcase.com.

COM Application Testing or "approved for application" means the COM fabric has been reviewed for manufacturability using the standard manufacturing techniques to achieve acceptable appearance per Steelcase quality standards.

COM fabric performance, including durability, pilling, color fastness, stretch, splitting, fraying, etc. is not tested by Steelcase. Therefore, COM's are not covered by the Steelcase Warranty. Each COM supplier is responsible for all warranty claims related to fabric performance.

Steelcase reserves the right to reject or reverse any COM approval that does not meet the manufacturing requirements in actual production. COM approval may be rejected or reversed because not all application testing is based on actual production conditions and because some materials vary in fabrication.

- If the COM is approved, you may continue the order process.
- If the COM has failed, you must reselect a fabric.
- If the COM is not listed, that means Steelcase has not tested that fabric on our products.
Helpful hint: Seating vinyl and leather do not require testing. Customer's own leather is available on Let's B and Jenny Lounge seating. Customer's own vinyl is available on all seating products that accept Steelcase standard vinyl.

- If your material has not been tested, then send yardage (4.5 yards for seating, 2 yards for vertical surfaces) and submit a completed COM Application Testing Request form to:
Steelcase Inc.
Attn: COM Testing
Door 305
4060 Eastern Avenue
Grand Rapids, MI 49508
- To ensure rapid processing, please use the electronic COM Application Testing Request form found on the COM Web site under the "How To Test" tab **or** fax a copy of the COM Testing Request form from the *Surface Materials Reference Manual* to 616.698.4700. **All information on the form is required in order to complete testing. COM tests cannot be performed if information is incomplete. Contact your requested fabric vendor for any missing information.**
- Test results will be returned (by fax or e-mail) in four working days from receipt of fabric and completed form.

COM materials that are approved for application to panel systems might require UL approval after application test approval. UL approval does involve fees and extended lead times.

All vertical surface COMs tested and approved with a content of 100% polyester meet a minimum of class C/UL1286. If class A or B fire rating is indicated, a burn test must be performed. All vertical surface COMs with a blended fabric construction require a UL burn test. For further UL information, contact a COM Consultant at 616.475.2426.

Tip: Jenny Lounge products have a relaxed appearance. With some COMs they may show soft comfort wrinkles upon use.

Steelcase to Purchase Service

The COM program also includes a service to purchase approved COM for our customers for use on Turnstone products. Steelcase will facilitate the ordering, scheduling and shipment of COM directly from the suppliers. There are no additional charges for this service.

Steelcase is the only party that may purchase COM for all Turnstone products.

In some instances, not all colors in a fabric family are approved. You will be informed of these instances before Steelcase purchases the fabric.

If for some reason the fabric must be ordered directly from the supplier, contact your Steelcase Service Representative for approval and instructions prior to purchase. The only time the customer can purchase fabric is for testing.

COM Pricing

- Confirm COM is tested and approved.
- Use the COM or COL (Customer's Own Leather) price group found under Surface Materials Options within each product spec guide.
- Calculate yardage required by using the COM Calculator found on the COM Web site at www.steelcase.com
 - Click on "Knowledge & Design"
 - Click on "Customer's Own Material" or call 1.888.783.3522 (1.888.STEELCASE)*Helpful tip: Fabric width, repeat and product quantity and style number are required in order to calculate yardage accurately.*
- Add the cost of the fabric to the COM or COL price group.
- The cost of the COM will be shown as a separate line on the acknowledgement.

COM suppliers require fabric purchases in half or full yard increments. Therefore, Steelcase will round all final yardage calculations to the half yard.

COL (Customer's Own Leather) is calculated by the square foot, but purchased in hide. The customer is responsible for purchasing the minimum hide requirement.

Base price of chair includes standard fabrics. Steelcase will not allow credit or deduct the cost of the standard fabric when a COM fabric is selected in its place.

Steelcase cannot be held responsible for costs incurred when a COM supplier ships a COM fabric that does not meet Steelcase application standards or for costs incurred for late deliveries when a COM supplier commits to shipping a COM fabric for manufacturing by a specific date and misses that date.

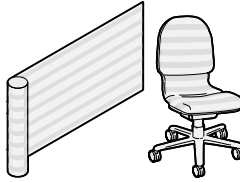

COM Warranty

Steelcase standard warranty does not apply to Designtex or any other COM vendor's fabric.

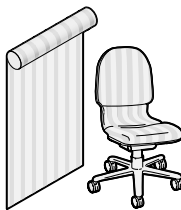

- Designtex and other COM suppliers are responsible for color consistency within commercial tolerances, abrasion resistance, UV stability, and resistance to soiling and perspiration. These fabrics or vinyls are subject to policies regarding appearance, behavior, and durability that have been established by the fabric supplier. The customer's remedy for a fabric defect is limited to the replacement of the fabric by the supplier. Durability, performance, and fabric defects of COM fabrics are not guaranteed by Steelcase.

Cutting Direction

SEATING:

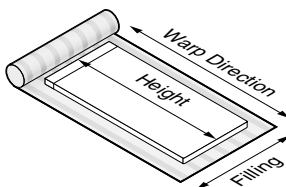

Warp horizontal

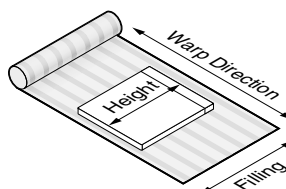

Warp vertical

- **Dealers must specify fabric application direction on all COM orders.**
- COMs for seating are most often applied in the warp vertical (downroll, woven way) direction. Some exceptions include patterns with stripes, fabrics that are sampled in the warp horizontal (railroad, across roll) direction, and solid vinyls.
- ▶ See Cutting Direction Guidelines in the *Surface Materials Reference Manual* for more information.

VERTICAL SURFACES:

Warp vertical

Warp horizontal

- **Dealers must specify fabric application direction on all COM orders.**

- The cutting direction of COMs on vertical surfaces varies by product and sometimes by style number. Please check the COM Web site for the approved cutting direction for your particular COM.

▶ See Cutting Direction Guidelines in the *Surface Materials Reference Manual* for more information.

Steelcase cannot guarantee pattern repeat match from product to product. Steelcase also cannot guarantee pattern repeat match within each product listed. (i.e., seat and back, arms to back, etc.)

COM Yardage Requirements

- For the most accurate yardage requirements, visit the Calculator found on the COM Web site or call 1.888.783.3522 (1.888.STEELCASE)
- The Calculator on the COM Web site provides the same yardage requirements used by Steelcase purchasing.

Yardage requirements will change depending on:

- width of fabric
- fabric repeat
- cutting direction
- product style number
- quantity of products being manufactured
- COM vinyl requires upholstery in the railroad cutting direction. Please visit our Web site or call 1.888.STEELCASE for yardage requirements.
- Certain fabric treatments and backings require additional yardage or yardage minimums. Please contact the supplier for specific information.
- COM fabric vendors require fabric purchases in half- or full-yard increments, and the Steelcase COM calculator will automatically round all final yardage calculations to the half yard.
- Steelcase is the only party who may purchase COMs.

Maintenance and Cleaning

Inspecting and cleaning. Have your chair's upholstery, finishes, controls, base, and other moving parts inspected and cleaned at least once a year.

Cleaning painted and plastic surfaces. Finishes should be cleaned with water and/or a non-abrasive cleaner (such as Formula 409® and Fantastik®).

Maintaining upholstery. Use a vacuum cleaner for regular cleaning. Periodic professional dry cleaning is recommended. Do not steam clean.

Removing excess stains or heavy soil. Soak up excess stain with a cloth. Do not dry the stain completely or it may set. For most water-soluble stains (coffee, fruit juice, washable ink), use an upholstery cleaning solution (such as Bissell® upholstery shampoo or Guardsman Fabri-Kleen® products) and follow directions on package. For oil-borne stains, use a dry cleaning solution at room temperature (never hot) and let solution work into the stain. Use quick, light strokes to brush the stain with a soft bristle brush. Work from outside toward the center to prevent rings. Soak up remaining dry cleaning solution, then sponge the fabric with cool water. Let fabric dry completely; then vacuum thoroughly. If stain is still visible, repeat procedure. Several light applications of cleaning solution are more effective and less damaging than one heavy application.

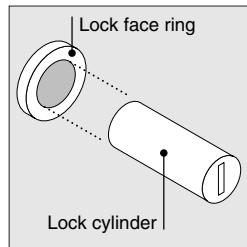

Formula 409 is a registered trademark of Clorox company. Fantastik is a registered trademark of Dow Consumer Products, Inc. Fabri-Kleen is a registered trademark of Guardsman Chemical. All other marks are marks of their respective owners.

Lock and Keying Options

Kick, Storage, Reply, and Smoke

Front-removable lock cylinders can be installed or removed in the field with a special tool. This feature allows you to field install lock cylinders after the furniture is installed.

All locks are designated with key numbers. You can specify a key number; however, if you don't specify a key number, the locks in your order will be keyed random.

Two types of locks are available—the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Standard Keying

All products are standard keyed random.

Step 1

Furniture will be shipped with a plastic shipping plug. Specify lock cylinder and keying options separately. Only products with factory-installed lock mechanisms can accept lock cylinders in the field.

Tip: Be sure to specify a lock color number (9201 Polished Chrome or 9250 Ember Chrome) for the lock face ring.

Step 2

Order enough lock cylinders to fill each lock location. You must also order a lock tool.

Tip: Lock tools are reusable. You don't need to order additional lock tools with every furniture order.

Lock cylinders and the installation tool will be shipped separately so that you can install the locks when you are ready.

To specify lock cylinders, list the total number of lock cylinders that you want with the appropriate style number. If you are specifying key numbers, list the breakdown of the quantity of each key number.

An example of how your order should look is shown below:

Example:

10 LOCK9201FR FR320
5 LOCK9201FR FR350
15 LOCK9201XF XF1100

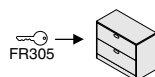

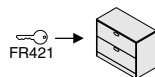

30 Total

1 877102003SR standard lock tool
1 877102002SR master lock tool

Keying Options

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454.

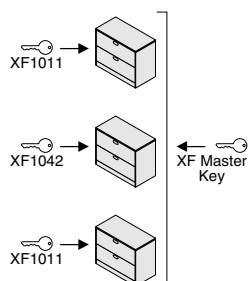

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key numbers for all locks.

Master key random

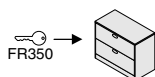

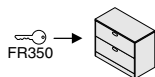

means that the locks will be assigned arbitrarily at the factory with key numbers ranging from XF1001 to XF1150. All XF locks can be opened with a master key.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key numbers for all locks.

Key specific means that you can specify any key number from FR305 to FR454. This option can be used to key all the furniture units in a workstation or department the same.

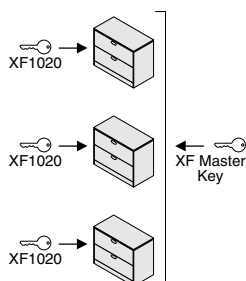

Tip: Designate the quantity per key number in your specification when ordering more than one product with the same style number.

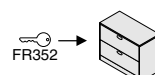

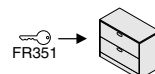

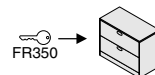

Master key specific

means that you can specify any key number from XF1001 to XF1150. All the locks in the XF series can be opened with a master key.

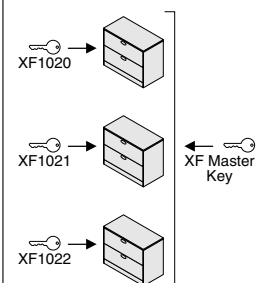

Tip: Designate the quantity per key number in your specification when ordering more than one product with the same style number.

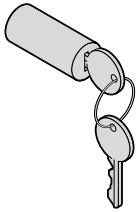

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454.

Master key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from XF1001 to XF1150. All the locks in the XF series can be opened with a master key.

Lock Cylinders

Tip: Lock price is included in price of furniture with locks.

Tip: For replacement lock cylinders, refer to Service Parts.

Standard Includes	Required to Specify

- Lock cylinder, keyed random: 9201 Polished Chrome or 9250 Ember Chrome - Two keys	1 Style number 2 Options, if selected (see below)

Options	U.S. Price	Required to Specify

Key specific	No cost	Select key number from FR305–FR454.
Key consecutive	No cost	Specify <i>key consecutive</i> and must select beginning key number from FR305–FR454.
Master key random	+\$20 each	Specify <i>master key random</i> .
Master key specific	+\$20 each	Specify key number from XF1001–XF1150.
Master key consecutive	+\$20 each	Specify <i>master key consecutive</i> and must select beginning key number from XF1001–XF1150.

Specification Information

Color	Style Number	U.S. Price

FR Series (Standard Keying System) – Lock Cylinder

Polished Chrome	LOCK9201FR	No cost
Ember Chrome	LOCK9250FR	No cost

Standard Lock Tool

	877102003SR	\$16

XF Series (Master Keying System) – Lock Cylinder

Polished Chrome	LOCK9201XF	No additional cost. Price included in price of furniture with master-keyed locks.
Ember Chrome	LOCK9250XF	No additional cost. Price included in price of furniture with master-keyed locks.

Master Lock Tool

	877102002SR	\$16

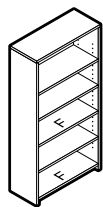

Tip: You can change lock cylinders in the field by using the appropriate lock tool.
