

SYNC by Nurture

We all know, fewer caregivers, more demands and today's faster-paced environment means the same people must accomplish more than ever before. Caregivers work in groups of varied professionals. Technology isn't the future, its reality.

So we teamed up with HDR and created an innovative caregiver solution.

research + experience = SYNC

An integrated solution, supporting the way healthcare works today and tomorrow.

SYNC by Nurture

Collaboration

SYNC supports peer to peer interactions with curved surface shapes that support natural gathering on all sides. Adjustable monitor arms make it easy to share information, such as electronic medical records.

Efficient Space

SYNC has created spaces for technology and power to be contained within the structure for an integrated, uncluttered workspace. Work tools and accessories can be stored on slat walls, freeing up space in the immediate area and supporting an ergonomically friendly work process.

Ergonomic Comfort

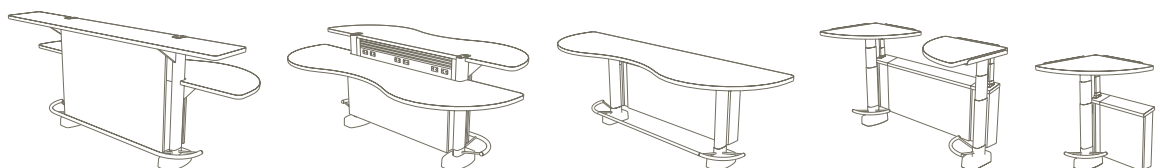

Ergonomics in a fast-paced environment are provided by surfaces that are available at 3 different fixed heights, to support various work postures and tasks. Adjustable height units are also available to accommodate various height users. Comfort and support details such as, LED lighting, free leg space, and foot rings have been included.

Adaptability in Space

SYNC has a minimal footprint, but its' surface shapes supports multiple workers. This allows you to configure unique spaces to better suit your workflow. SYNC will adapt to on site dimensions and variations through telescoping and slip fit. Adaptable configurations and replaceable components create the flexibility to respond to the changing needs of the present and future.
