EASY TABLE

NEW FLEXIBLE TABLE SERIES FROM FREDERICIA FURNITURE

The Easy table is the ultimate multi-purpose table, which can meet all requirements for canteens, conference rooms, meeting rooms, etc. The table's design is light so that the tabletop "hovers" above the legs, thanks to a specially-developed plastic fitting that acts as a hinge while stabilising the construction. The legs are self-supporting, so that the Easy table can be customised to precisely the needs of any given project.

The Easy table is simple to fold by just pressing a catch that is constructed to be easy to use with both hands and feet.

The Easy table is the product of a thorough programme of development and close cooperation between production, the sales department and the architects, in order to create the ideal table for the contract market. The result has become a functional and stable table, whose quality includes both its durability and its design.

FUNCTIONAL DETAILS

- One-man assembly and disassembly.
- The steel construction includes a chair hanger.
- Compact stacking - only 9 cm stacking height.
- Wheels can be fitted to two of the legs, making it possible for one person to move the table.
- Hand and foot operated release catch.
- Good working height.
- The stacking trolleys can even pass through narrow door openings.
- Easy to fit connector fittings to all table sizes.

ABOUT SUSANNE GRØNLUND

In her plain, easily comprehensible design style Susanne Grønlund is continuing in the Scandinavian design tradition. As a designer, Susanne Grønlund is acknowledged for her strong sense of design and sensibility for materials, that has been reflected in her many flawless designs. In her work, she always challenges the materials, pushing the limits for what is physically possible. Susanne Grønlund can be best described as a practical designer, working with design as an aesthetic craft. In her opinion, it is decisive that the design is not just to make the product beautiful. Her design must live up to a function. And she is only satisfied when the design and function melt together into a single unique whole.
