AD-FOB-D

TYPE _____

FEATURES

The AD FOB D is the suspended mounted variation of this complete family of luminaires. A smooth laser cut welded end finishes the graceful elliptical contour of the extruded aluminum profile. The AD FOB D can be provided with a radial aluminum baffle or acrylic ribbed lens for a variety of functions and appearances. The computer designed optical system creates a wide symmetric glare-free direct distribution. These fixtures can be mounted individually, in continuous runs or patterns.

SPECIFICATIONS

Housing: One-piece heavy gauge extruded aluminum 6063T5 alloy-welded construction forming an 8" by 4 1/2" ellipse profile. Finished end caps are welded to the housing with no exposed hardware or knockouts.

Reflector: Die formed 20-gauge cold rolled steel minimum 90% reflectivity finished in high gloss baked white enamel.

Shielding: Standard lens is extruded acrylic with linear ribs (ARL) for efficient light distribution. Optional radial aluminum baffle (RAB) is available.

Electrical: Ballast is electronic, high power factor, thermally protected class P, sound rated A, with less than 20% total harmonic distortion. The minimum number of ballasts will be used unless otherwise specified.

Mounting: Standard Installation is an adjustable self-locking aircraft cable assembly 48" x 3/32" in diameter with 5" canopy. One 16/4 SJT straight 54" cord is provided per power feed. Standard pendants are available in 24" lengths. See Accessories for additional mounting.

Finish: Fixture housing and steel components are finished in baked white enamel applied over a five-stage pretreatment process.

Lamps: Fixtures are provided for use with one, two or three 32 watt T8 lamps or 54 watt T5 HO lamps. (Supplied by Others)

Certification: Luminaires are U. L. Listed, C. S. A. certified and are Union Made in the United States of America I.B.E.W.
