

Generation Series 1

G1-DI-5

TYPE _____

FEATURES

The G1-DI-5 is one variation of a complete family of suspended linear fluorescent luminaires. The G1-DI-5 is a direct/indirect version of the family of luminaires. The computer designed optical system creates a widespread indirect distribution while the variety of direct components provides contrast. The low profile and modern design provide excellent efficiency and styling where high performance and uniform lighting are required.

SPECIFICATIONS

Housing: One piece die formed 20-gauge cold rolled steel welded construction forming a 9.50" x 3.25" rounded profile. Continuous obround pattern is 3/16" x 1/2" staggered with white .020 translucent overlay. Finished end caps are laser cut 16-gauge cold rolled steel, with no exposed hardware or knockouts. Aligner brackets are provided to eliminate light leaks and for precision alignment of continuous rows.

Reflector: Die formed 20-gauge cold rolled steel minimum 90% reflectivity finished in high gloss baked white enamel with die formed .025 specular anodized aluminum side reflectors.

Electrical: Ballast is electronic, high power factor, thermally protected class P, sound rated A, with less than 20% total harmonic distortion. The minimum number of ballasts will be used unless otherwise specified.

Mounting: Standard Installation is an adjustable self-locking aircraft cable assembly 48" x 3/32" in diameter with 5" canopy. One 16/4 SJT straight 54" cord is supplied with each power feed. Standard pendants are available in 24" lengths. See Accessories for additional mounting.

Finish: Fixture housing and steel components are finished in baked white enamel applied over a five-stage pretreatment process.

Lamps: Fixtures are provided for use with one, two or three 32 watt T8 lamps or 54 watt T5 HO lamps. (Supplied by Others)

Certification: Luminaires are U. L. Listed, C. S. A. certified and are Union Made in the United States of America I.B.E.W.
