

Wood Seating Specification Guide

What's New?

Spec News is available on in2.steelcase.com. Go to *Specification Guides-AdStock*, under *Sales Resources/Sales Marketing Materials*, and download the current release's Spec News.

Availability

Electronic price list updated with release 174.E (U.S.) and 143.E (Canada), dated February 20, 2012.

Transitional products in this specification guide are **maintained for existing customers only** and are likely to be phased out over time. These products are indicated with a . Products that are scheduled to be culled are indicated with an , followed by the last order entry date.

► For a list of all trademarks, refer to the last page of this specification guide.

For Canadian Pricing

Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by 1.03.
- Round each to the nearest dollar.
- Add base and options for total list price.

Guidelines for Selecting Appropriate Ergonomic Seating

General-Use	High Interaction Low General-Use Seating Group Communicating Group Collaborating High-Performance Seating Individual Processing (task intensive) Individual Analyzing/Creating (multi-task) Low Autonomy High	• Short periods of sitting • Moderate computer use • In some cases, a general-use chair can be used for short-term, individual analyzing/creating.
High-Performance		• Long periods of sitting • Heavy computer use • The more repetitive the task (individual processing work), the more critical it is to have a high-performance chair with full adjustability.
Executive	Executive Seating Today's executive is an active participant, not just a delegator. Image is very important in the executive suite, but time at the computer must also be a consideration. Whether image or ergonomics drive the choice, this range of seating is diverse to provide the perfect chair for any executive work setting.	• Design that acknowledges image • Aesthetics and detailing that suit the setting • Ergonomic features matched to the kinds of work
Guest	Guest Seating Guest seating must be adaptable to many roles: as side chairs, pulled up to the conference table, in the learning center, in the private office, or in high-traffic areas where long use-life is essential. Guest seating is not intended for long periods of seated work, but must provide short-term comfort and have a welcoming, comfortable look.	• A style in harmony with the other furniture • A scale that suits the environment • A durability that fits the intended use
Stackable	Stackable Seating Stackable seating is used when occasional, trans-portable, easy-to-store seating is needed. Whether used as side chairs, meeting chairs, in classrooms, or cafeterias, the challenge is to maintain an excellent aesthetic combined with great strength even though the chairs are light in scale for portability.	• Durability for high-volume, high-traffic use • Light weight for easy stacking and moving • Extra features if needed, such as tablet arms, bookracks, glides, transport and storage dollies, and ganging or alignment devices.
Lounge	Lounge Seating Lounge seating is often multiple and is found through-out the organization from reception areas to executive offices. Lounge seating is the "first impression seating," critical to an organization's image.	• Durability related to level of use • A design that looks right in multiples • Size, scale, and appearance that suits the environment

Basics of Ergonomic Seating

Basics of Ergonomic
Seating

Proper ergonomic seating can help workers perform more efficiently and avoid muscle and eye strain.

Neck is straight or slightly forward.

Shoulders are relaxed so arms hang naturally.

Back has full contact with the backrest (sit all the way back in your chair).

Elbows and forearms can rest comfortably on the arms of your chair, or on work surfaces that are used for writing, paperwork, and other tasks.

Lower back fits into curved lumbar support.

Tension is adjusted so backrest tilts easily, yet provides smooth, even support.

If worksurfaces and keyboard support are not height-adjustable, raise your chair's seat height to achieve the appropriate relationship to your tasks. If this leaves your feet dangling above the floor, use a Details footrest.

Call Details, 1.800.833.0411, or your Steelcase dealer, for additional information or price list.

Top of monitor should be at eye level.

Screen is 20 to 30 inches from the eyes.

Screen is at eye level or slightly lower and directly in front of worker so head is not turned.

Keyboard is at elbow height.

Wrists should be straight when keying or mousing, not bent up or down.

When keying or mousing, forearms are parallel to the floor.

Thighs are parallel to the floor.

Feet are flat on the floor or on a footrest.

Keep frequently viewed objects, such as a VDT or source document, at or below the horizontal line of sight. Arrange display screen and documents to be equidistant from your eyes.

ANSI/HFES is the American National Standards Institute/Human Factors & Ergonomics Society. This organization's 1988 guidelines cover the ergonomic needs of task workers. There guidelines are currently under revision.

ANSI/BIFMA is the American National Standards Institute/Business and Institutional Furniture Manufacturer's Association. All Steelcase furniture meets or exceeds ANSI/ BIFMA standards for structural quality.

Basics of Adjustability

Steelcase chairs offer varying levels of adjustability to meet the needs of many types of users. Adjustable chairs may offer one or more of these features:

Mechanisms

Swivel feature allows the user to rotate the seat 360 degrees in either direction. (All)

Seat Adjustments

Synchro-tilt feature means the chair back and seat are synchronized to move in a 2:1 ratio. When the user leans back, the seat rises only half as much, allowing the user's feet to remain flat on the floor. (Siento, Theorem)

Pneumatic-height adjustment allows the user to remain seated while adjusting the seat height by way of a control button or lever. (All)

Manual-height adjustment allows the user to raise and lower seat height by spinning the seat while keeping the base stationary. Cannot be done from seated position. (Gentry)

Knee-tilt (low front rise) minimizes the rise of the front of the seat when the chair is in a reclined position, allowing the user's feet to remain on the floor. This feature reduces pressure under the thighs, allowing for continuous blood circulation. (Mansfield)

Passive seat edge angle allows front edge of seat to drop down while seat angle remains unchanged. (Siento)

Back Adjustments

Back-tension adjustment allows the user to control the amount of resistance felt when leaning back in the chair. (All)

Variable back stop allows the user to lock the back upright and to preset their range of recline. (Theorem)

Upright back lock allows the user to lock the backrest in a full upright position or release it for full tilt motion. (Mansfield, Siento)

Arm Adjustments

Arm height adjustment allows the user to move the arms up or down independently. (Siento)

Arm width adjustment allows the user to move the arms in or out independently. (Siento)

Arm pivot adjustments allows the user to position arm rests as appropriate for the task being performed. (Siento)

Arm depth adjustment allows users to get closer to their work by chair arms moving out of the way. (Siento)

Wood seating products are supported with an array of informational materials, tools, and software to help you plan an installation efficiently.

Product brochures and planning tools can be ordered through your Steelcase area office by calling 1.800.784.0358 or through the Steelcase Marketing Communications Web site at in2.steelcase.com.

Quick Ship and Delivery Guide

This handbook describes all Steelcase, Turnstone, Details, and Coalesse products that are available for Rapid2 (ships in 2 days), Rapid5 (ships in 5-7 days), Express12 (12-day delivery), or Coalesse Rapid10 (ships in 10 days).

Caseloads and Seating Delivered in 12 Days

A comprehensive collection of "wood" caseloads and seating products available for 12-day delivery.
Form number S3461

Computer Tools

Electronic Catalog

Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools—Steelcase's design and specification software (for more information on SmartTools, please email SmartTools@steelcase.com), the ProjectMatrix ProjectSystem libraries, as well as 20-20 CAP Studio.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

For more information about these and other software tools to help you plan effective work environments, please email fsl@steelcase.com.

Support

Steelcase Capabilities

Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For assistance, please call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality or warranty concerns or service parts questions.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

For information about Steelcase, the name of your nearest Steelcase dealer, or for product literature, call 1.800.333.9939 or visit our Web site: www.steelcase.com.

Executive Seating

Siento	12
Mansfield	18
Theorem	22

Siento

Siento desk chairs, designed in collaboration with Jorge Pensi, merge remarkable ergonomic comfort with a slim and sophisticated executive form.

Outer back is fully upholstered.

Patented LiveBack technology (found in Steelcase Leap chair) is embedded in the back to change shape and mimic the user's spine.

Arms are available as either T-arms or enclosed. T-arms are available fixed or adjustable (height, width, pivot and depth).

Arm uprights are available in polished aluminum, platinum, or black.

Five-arm base is available in polished aluminum, platinum, or black.

Headrest option provides additional head and neck support.

Seat height adjusts from 16" to 21" and is standard with pneumatic adjustment mechanism. Fixed-height option is also available.

Front seat edge flexes naturally to relieve pressure under the user's thighs.

3" hard dual-wheel casters are provided for use on carpet. Soft dual-wheel casters are available for use on hard floors or chair mats.

Product Details

High-back and mid-back desk chairs are available.

Arms are available as T-arms or enclosed. T-arms are available as fixed or adjustable. Fixed T-arms are available in urethane or fully upholstered. Adjustable T-arms are available in urethane only. Enclosed arms are always fully upholstered.

All Siento chairs comply with ANSI/HFS and BIFMA standards.

Adjustment Features

Seat height adjusts pneumatically. To lower, hold handle up while seated. To raise, hold handle up and keep your weight off the chair. Standard range of adjustability is 5" from 16"H to 21"H.

Actual Dimensions

	High-Back Desk Chairs with Headrest	High-Back Desk Chairs without Headrest	Mid-Back Desk Chairs
Overall depth	26"	26"	26"
Overall width—outside of T-arms	27½"	27½"	27½"
Overall width—outside of enclosed arms	29½"	29½"	29½"
Overall height	46¾"—51¾"	46"—51"	40"—45"
Seat depth	17½"	17½"	17½"
Seat width	21"	21"	21"
Back height from seat	31½"	30"	24"
Width between arms	20½"	20½"	20½"
Arm height from seat	8"	8"	8"

Adjustability Features

- Pneumatic seat-height
- Upright back lock
- Back tension control
- Synchro-tilt mechanism

Seat edge flexes, relieving pressure under the user's thighs.

Upright back lock. Flick switch forward to lock; flick switch back to tilt.

Back tension control adjusts by turning knob. Turn knob forward to increase rate of tension, backward to decrease.

Synchro-tilt mechanism provides synchronized back movement while feet remain flat on the floor.

Height-, width-, pivot-, and depth-adjustable arms are available on select models of chairs.

Arm height adjusts independently within a range of 4" (7"–11" from the seat). Push button on outside and under arm cap in while moving arms up or down. Releasing buttons locks arms in position.

Arm depth adjusts by sliding arm caps back 3". Friction-fit mechanism keeps arms in position.

Arms pivot independently, 30° inward and outward.

Arm width can be adjusted 2 1/4" each, 4 1/2" overall. Grasp arm cap and move in or out.

All Steelcase seating with standard upholstery fabrics complies with requirements of the State of California Technical Bulletin 117. All standard seating is labeled to be in compliance with California 117.

Programs & Services

► See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM & COL) Program

offers the opportunity for customers to select fabrics and leather that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Avoid pattern fabrics and heavily grained leathers. Through the COM & COL program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM & COL fabric and leather directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM & COL fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the upcharge.)

- Jacks
- Link
- Spyder

For information on soil retardant fabrics on Select Surfaces, please refer to the *Surface Materials Reference Manual*.

Soil-retardant treatment is available on all other seating fabrics at an additional upcharge per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Solutions Fulfillment Team Representative at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Fire Codes

► See pages 108–110 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

Mansfield

Desk Chairs

Mansfield desk seating is a cost-effective, traditional collection with Chippendale aesthetics. Mansfield desk chairs complement Norfolk wood casegoods. ▶ See Mansfield guest chair, page 60.

Brass tack accenting is optional.

Seat height adjusts from 18½"H to 21½"H. Pneumatic adjustment mechanism is standard.

Five-arm base with maple base caps is standard.

Antique brass-hooded ball casters are standard.

Welting on back is standard.

Camel back enhances traditional styling.

Arms are solid maple with upholstered arm rests.

Knee-tilt/low front rise mechanism with upright back lock is standard.

Product Details

Mid- and high-back desk chairs are available.

Five-arm base provides optimum balance. It is standard with maple base caps that are stained in the selected wood color.

Actual Dimensions

	High-Back Desk Chairs	Mid-Back Desk Chairs
Overall depth	30½"	28½"
Overall width	24½"	24½"
Overall height	43⅞"–46⅜"	38¾"–41¼"
Seat depth	19½"	19½"
Seat width	19"	19"
Back width	21"	21"
Back height from seat	27½"	22½"
Width between arms	19"	19"
Seat to floor height	18½"–21½"	18½"–21½"
Arm height from floor	25⅜"–27⅞"	25⅜"–27⅞"

Adjustability Features

- Pneumatic height
- Knee-tilt mechanism
- Upright back lock
- Back tension

Adjustment Features

Pneumatic-height adjustment, standard on all desk chair models, allows seat height adjustment from 18½"H to 21½"H with fingertip pneumatic lever. To lower, hold handle up while seated. To raise, hold handle up and lift your weight off the chair.

Knee-tilt (low front rise) minimizes the rise of the front of the seat when the chair is in a reclined position, allowing the user's feet to remain on the floor. This feature reduces pressure under the thighs, allowing for continuous blood circulation.

Back tension control varies reclining back support from light to firm and adjusts by turning knob. Turn knob clockwise to decrease tension, counterclockwise to increase.

Tip: Be sure to unlock (release) the variable back stop before adjusting the back tension.

Upright back lock. To lock back upright, push lever down while sitting upright. To release back lock, pull lever up while sitting upright.

All Steelcase seating with standard upholstery fabrics complies with requirements of the State of California Technical Bulletin 117. All standard seating is labeled to be in compliance with California 117.

Programs & Services

► See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM & COL)

Program offers the opportunity for customers to select fabrics and leather that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Avoid pattern fabrics and heavily grained leathers. Through the COM & COL program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM & COL fabric and leather directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM & COL fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the upcharge.)

- Jacks
 - Link
 - Spyder
- For information on soil retardant fabrics on Select Surfaces, please refer to the *Surface Materials Reference Manual*.

Soil-retardant treatment is available on all other seating fabrics at an additional upcharge per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Solutions Fulfillment Team Representative at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Fire Codes

► See pages 108–110 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Fire code approval:

Mansfield high-back model 140 and all variations of this model are available in the following fabrics only:

- Leather
- Vinyl

Local codes may have special requirements for upholstery.

Theorem

Theorem desk chairs, a Lisa Smith design, have a neutral, rectilinear design that is appropriate in contemporary or transitional settings. This chair line offers numerous ergonomic support features.

Double stitching accents the back and seat.

Seat height adjusts from 16"H to 21"H and is available with pneumatic adjustment mechanism.

Five-arm base is standard in black aluminum. Solid maple base caps are optional.

Hard dual-wheel casters are provided for use on carpet. Soft dual-wheel casters are available for use on hard floors or chair mats.

Lumbar contours provide lower back support.

Waterfall front edge eases pressure under user's legs and enhances circulation.

Synchro-tilt mechanism

Product Details

High- and mid-back desk chairs are available.

Enclosed arms are upholstered.

Extended-depth seat option, at 17½", adds 1½" to accommodate longer legs.

All Theorem desk chairs comply with ANSI/HFS and BIFMA standards.
Exception: The extended seat option exceeds ANSI/HFS seat depth restrictions.

Actual Dimensions

	High-Back Desk Chairs	Mid-Back Desk Chairs
Overall depth	25"	25"
Overall width	28"	28"
Overall height	46"–51"	41"–46"
Seat depth	16"	16"
Seat width	20½"	20½"
Back width	20½"	20½"
Back height	30"	25"
Width between arms	20½"	20½"
Seat to floor height	16"–21"	16"–21"
Arm height from floor	24¾"–30¼"	24¾"–30¼"

Adjustability Features

- Pneumatic height
- Variable back stop
- Back tension control
- Synchro-tilt mechanism

Adjustment Features

Pneumatic-height adjustment is available to allow push-button control from 16"H to 21"H. To lower, pull lever on right side while seated. To raise, pull lever and lift your weight off the chair.

Variable back stop allows the back to stop at various tilt angles, including fully upright. Flick switch forward for full range of back angles. To limit back angle, recline to the desired position and flick switch back. *Tip: To lock in upright position, remove weight from back and flick switch back.*

Back tension control varies reclining back support from light to firm and adjusts by turning knob. Turn knob clockwise to decrease tension, counterclockwise to increase. *Tip: Be sure to unlock (release) the variable back stop before adjusting the back tension.*

Synchro-tilt mechanism provides synchro-nized back movement while feet remain flat on floor.

- Back tension control

Product Details

Wood and thermoplastic models are available with high and low backs.

Guest chair is available with a maple frame only.
▶ Page 56

Arms on wood desk models are either enclosed upholstered or open maple with upholstered arm caps.

Arms on thermoplastic models are open and are black plastic colored.

Adjustment Features

Manual-height adjustment is standard on swivel-tilt base models. Rotating the unoccupied chair raises or lowers the seat. Occupant's weight disengages the adjustment mechanism, so height won't change while chair is in use.

Pneumatic-height adjustment, available on swivel-tilt base models, allows seat height adjustment from 16"H to 20 1/2"H with fingertip pneumatic lever. To lower, hold handle up while seated. To raise, hold handle up and lift your weight off the chair.

Back tension varies reclining back support from light to firm and adjusts by turning knob. Turn knob clockwise to decrease tension, counterclockwise to increase.

Tip: Be sure to unlock (release) the variable back stop before adjusting the back tension.

Fire Codes

► See pages 108–110 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

All Steelcase seating with standard upholstery fabrics complies with requirements of the State of California Technical Bulletin 117. All standard seating is labeled to be in compliance with California 117.

Programs & Services

- See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM & COL)

Program offers the opportunity for customers to select fabrics and leather that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Avoid pattern fabrics and heavily grained leathers. Through the COM & COL program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM & COL fabric and leather directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM & COL fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the upcharge.)

- Jacks
- Link
- Spyder

For information on soil retardant fabrics on Select Surfaces, please refer to the *Surface Materials Reference Manual*.

Soil-retardant treatment is available on all other seating fabrics at an additional upcharge per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Solutions Fulfillment Team Representative at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Fire Codes

► See pages 108–110 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

Collaboration

Collaboration guest chairs, designed by Dennie Pimental and John Duffy, have a classic design that is ideal for conference room, reception area, and dining room seating, or as guest seating in a workstation. Several arm inserts are available to create different visual details.

Inserts can match or contrast with frame color.

Back and seat are fully upholstered.

Upholstered seat features a webbed panel construction.

Arms may be enclosed with upholstery or European Beech inserts, or left open.

Frame is European Beech.

Glides are 1/2" diameter.

Arm height from floor	24½"

Programs & Services

► See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM & COL) Program

offers the opportunity for customers to select fabrics and leather that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Avoid pattern fabrics and heavily grained leathers. Through the COM & COL program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM & COL fabric and leather directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM & COL fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the upcharge.)

- Jacks
- Link
- Spyder

For information on soil retardant fabrics on Select Surfaces, please refer to the *Surface Materials Reference Manual*.

Soil-retardant treatment is available on all other seating fabrics at an additional upcharge per seating unit.

To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Solutions Fulfillment Team Representative at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Fire Codes

► See pages 108–110 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

Mingle

Mingle guest chairs, designed by Bill Schacht and Lynda Chesser, have a tailored appearance that is sophisticated and pure in design, yet simple in scale. Mingle's design addresses a broad set of applications from an open plan systems environment to a closed office setting.

Exposed maple plywood back panel provides enhanced lumbar support to achieve a high level of comfort.

Upholstered seat features a webbed-panel construction.

Back legs and seat frame are metal for additional strength and durability. Legs are standard in black. Nickel powdercoat is available as an option.

Foot cap is standard with nickel finish.

Arms taper to flow into front legs.

Glides are 1/2" diameter on front legs and 1" diameter on back legs.

Rear view of back panel

Metal button fasteners located at bottom of back panel secure seat and back attachment while providing an additional element of design.

The Customer's Own Material (COM & COL) Program

offers the opportunity for customers to select fabrics and leather that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Avoid pattern fabrics and heavily grained leathers. Through the COM and COL program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM and COL fabric and leather directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM and COL fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com

Soil retardants are treatments that provide longterm soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles are available pre-treated with soil retardant. (You do not need to select the soil retardant option for these fabrics and incur the upcharge.)

- Jacks
- Link
- Spyder

For information on soil retardant fabrics on Select Surfaces, please refer to the *Surface Materials Reference Manual*.

Soil-retardant treatment is available on all other seating fabrics at an additional upcharge per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Solutions Fulfillment Team Representative at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Fire Codes

► See pages 108–110 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

Sawyer Wood Guest Chairs

**Additional wood color choices are being added Spring 2012.
Please consult your customer service representative for specific dates.**

Tip: Due to natural variations in wood, finished products may vary in color texture and grain.

Tip: Wood color 3522 Clear is a clear coat. Therefore, the natural variations in European beech will be visible.

Tip: 3522 Clear coordinates with Marbled Maple laminate.

Width between arms	20"
Seat-to-floor height	18¼"
Arm height from floor	25¼"
Arm height from seat	7"
Seat pan angle	5°
Angle between seat and back	103°

Programs & Services

► See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM & COL) Program

offers the opportunity for customers to select fabrics and leather that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Avoid pattern fabrics and heavily grained leathers. Through the COM & COL program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM & COL fabric and leather directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM & COL fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the upcharge.)

- Jacks
- Link
- Spyder

For information on soil retardant fabrics on Select Surfaces, please refer to the *Surface Materials Reference Manual*.

Soil-retardant treatment is available on all other seating fabrics at an additional upcharge per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Solutions Fulfillment Team Representative at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Fire Codes

► See pages 108–110 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

Terrazzo

Terrazzo guest chairs, designed by Brian Kane, have a classic and simple styling appropriate for a broad range of applications. A family of factory-installed back designs are available to create a variety of visual statements.

Lattice inserts are available in three designs. Slats are bowed to provide enhanced lumbar support.

Frame is European Beech.

Arms are arched to correspond with the curvature of the chair's back and are gently raised at the front to assist in entering and rising from the chair.

Seat is fully upholstered and features a webbed-panel construction.

Glides are 1/2" diameter.

Actual Dimensions

Overall depth	21¾"
Overall width	21¼"
Overall height	32¼"
Seat depth	17⅞"
Seat width	20"
Back width	21¼"
Back height	14"
Width between arms	18¾"
Seat to floor height	18¼"
Arm height from floor	25¼"

Product Details

Square lattice back creates a strong grid-like pattern.

Macintosh lattice back introduces a distinctive vertical space.

Horizontal lattice back divides the space with horizontal elements.

Topaz

Topaz offers two chair styles to complement traditional and transitional office environments.

Frame is European Beech.

Back is upholstered and framed in wood. It is available either open or closed.

Arms are open. They are available with either a rectilinear or curvilinear design. Finger joint is used in construction.

Upholstered seat features a webbed panel construction.

Legs are solid wood. Front legs on open back model are carved for traditional detail.

Glides are 1/2" in diameter.

Stretcher rails on open back model provide added support.

Product Details

Two models are available—open back or closed back.

Open-back models have rectilinear arms, carved detail on the front legs, and stretcher rails.

Closed-back models have curvilinear arms that flow into the front legs.

Wood base with or without grommets.

Product Details

Groove lounge seating is available in two back styles—block back and sail back. Ottoman is also available. Chair and ottoman components are shipped separately and assembled in the field. Chairs can also be reconfigured in the field. For reconfigurations, order components through Service Parts.

Actual Dimensions

	Sail Back Chair	Block Back Chair	Ottoman
Overall depth	25 ¹ / ₄ "	25 ¹ / ₄ "	25 ¹ / ₄ "
Overall width	32 ¹ / ₄ "	32 ¹ / ₄ "	32 ¹ / ₄ "
Overall height	33 ¹ / ₄ "	28 ⁵ / ₈ "	15 ³ / ₄ "
Seat depth	18"	18 ¹ / ₄ "	23"
Seat width	28 ³ / ₄ "	28 ³ / ₄ "	28 ³ / ₄ "
Back width	30"	26"	N.A.
Back height from seat	17 ¹ / ₂ "	12 ⁷ / ₈ "	N.A.
Seat to floor height	15 ³ / ₄ "	15 ³ / ₄ "	15 ³ / ₄ "

Sail back with tablet arm

Sail back with round arm

Block back with tablet arm

Block back with round arm

Round or tablet arm, ordered separately and field-installed, can be attached to left- or right-side of chairs.

Table without grommets

Table with grommets

Table with acrylic top

Table with acrylic top and shelf

Groove tables are available in a variety of configurations. Table components are shipped separately and assembled in the field. Tables can also be reconfigured in the field. For reconfigurations, order components through Service Parts.

Table with acrylic top comes standard with larger acrylic piece.

Table with acrylic top and shelf comes standard with smaller acrylic piece. Smaller acrylic top must be specified when ordering shelf kit. To create a buildup, you must order a smaller acrylic top with shelf kit.

Acrylic top sits on clear glides for tabletop applications. For shelf applications, acrylic is permanently affixed with clear screws.

Acrylic can be installed glossy side up or matte side up.

Table with grommets must be ordered to create buildups using table top, shelf, chair backs, and arm kits.

Tip: Grommets cannot be used to route cords or cables.

Grommet sleeves provide stability for components and must be in place to properly install components.

Caps, standard with table with grommets, are used to cover the grommet holes when not in use. Underside of table has storage place to hold caps when not in use.

Ganging bracket is available to link chairs in the field for permanent connection.

Power/data boxes are available to provide additional electrical outlets and voice and data receptacles where needed. Power/power, power/data, and data/data versions are available. Boxes are field-installed and can be mounted to the underside of base anywhere access to power and data is needed.

Programs & Services

▶ See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM & COL)

Program offers the opportunity for customers to select fabrics and leather that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Avoid pattern fabrics and heavily grained leathers. Through the COM & COL program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM & COL fabric and leather directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM & COL fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the upcharge.)

- Jacks
- Link
- Spyder

For information on soil retardant fabrics on Select Surfaces, please refer to the *Surface Materials Reference Manual*.

Soil-retardant treatment is available on all other seating fabrics at an additional upcharge per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Solutions Fulfillment Team Representative at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Fire Codes

▶ See pages 108–110 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishing Technical Bulletin 133 (Cal TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

Wood

► See *Wood Color Availability Matrix* on page 107 for color availability by product line and wood species.

Tip: The wood used in the construction of chairs is either maple or European beech. Wood finishes applied to maple or beech will match the color of stains applied to oak, walnut, or cherry, but will not have the same natural grain.

Exception: Groove is a wood-veneered product.

Tip: The wood used in the construction of chairs is either maple or European beech. Wood finishes applied to maple or beech will match the color of stains applied to oak, walnut, or cherry, but will not have the same natural grain.

**Groove tables are wood-veneered product lines.*

***To ensure an understanding of the color ranges and characteristic variations of natural veneer, a sign-off sheet is required prior to orders being accepted for this clear-coat finish. The sign-off sheet is available through Steelcase advertising stock. Form number 05-0001370*

Note: Wood color 3522 is a clear coat. Therefore, the natural variations in wood (maple or European beech) will be visible.

Note: Due to natural variations in wood, finish products may vary in color, texture and grain.

Note: Additional wood color choices are being added Spring 2012. Please consult your customer service representative for specific dates.

Fire Code Seating Exceptions for Wood Seating

Fire Code Seating
Exceptions for Wood
Seating

The Fire Code Seating (FCS) modification is available on nearly all Wood seating. There are some chair and fabric combinations that will not pass the test criteria for Fire Code Seating. This is often due to the chair configuration, large surface areas that support combustion, and the fiber content of some fabrics. For your convenience, we have listed the chair line exception models and the fabric combinations that **are available**. If a fabric is not listed, it is not available with the FCS option on the exception chair models.

England

England enclosed-arm model 0113 **is available** with FCS in the following fabrics only:

- Leather
- Seating Vinyl

Gentry

Gentry enclosed-arm models 0644W, 0634W, 0644B, 0634B, and all variations of these models **are available** with FCS modification in the following fabrics only:

- Leather
- Seating Vinyl

Mansfield

Mansfield high-back model 140 and all variations of this model **are available** with FCS modification in the following fabrics only:

- Leather
- Seating Vinyl

Theorem

Theorem High Back model 711NSX is available with FCS in the following fabrics only:

- Leather

Fire Code Seating with COM

The Fire Code Seating option is available on certain chairs with COM. Fire code approval is based on chair model and specific textile combinations.

To find out if a specific COM is FCS approved on a Steelcase seating product, check the COM Web site at www.Steelcase.com

Due to the many different combinations of fabric contents and changes that could be made by Steelcase to seating models, fabrics that have been previously approved for fire code may need to be re-tested for qualification.

For complete information about specifying COM on FCS modified chairs, call your Steelcase COM consultant at 616.475.2426 or fax inquiries to: 616.698.4700. Please provide the following information about your COM when making an inquiry:

- Supplier and fabric name
- Flammability testing
- Topical treatments
- Fabric weight
- Fiber content of the fabric
- Seating model number intended for application

The price for the FCS modification with COM is \$60 U.S. on all non-wood seating units and \$60 U.S. on all wood seating units. Please add the price to Price Group COM column within each Steelcase price list.

FCS Testing

Please submit a COM Application Testing Request form for FCS evaluation prior to sending any fabric. A COM consultant will contact you with more information.

Yardage requirements will vary per chair test. If your material requires FCS testing, submit a completed COM application Testing Request form and material to: Steelcase Inc.

Attn: COM Testing
6100 East Paris Avenue
Caledonia, MI 49316

\$700 net testing fee is required for a full scale chair burn test. FCS testing lead time is 3-4 weeks.

Flame Retardance of COM Fabrics

Steelcase assumes no liability for COM fabrics with a flame-retardant finish and recommends that samples of the fabrics in question be submitted to the proper authority for certification.

If a flame-retardant finish is required, please advise your Steelcase Sales Services representative or regional office of the following information:

- Flammability code that must be passed
- Application of the fabric to be finished (i.e., upholstery, wall, panel, etc.)
- Weight of the fabric
- Need to apply other chemicals to the fabric (i.e., soil repellents)
- Type of backing
- Yardage requirements

With this information, Steelcase can contact the appropriate outside finisher and generate a quote. Treatment prices vary with quantity and fabric selection.

Guidelines for Directional Fabrics

Guidelines for
Directional Fabrics

What is the issue?

Some textiles are plain and look the same regardless of which direction the fabric is applied to the product. But many customers prefer fabrics that have patterns that give a clear direction to the textile. Because there are limits to how directional fabrics can be applied to panels and chairs, it is important to understand directional fabrics to avoid being disappointed.

Talking about direction

Fabrics come on rolls. The long threads that run parallel to the length of the roll are called the warp. The perpendicular threads that run parallel to the width of the roll are called the filling.

Railroaded means the height dimension of the product is perpendicular to the warp of the fabric; *warp horizontal* and *across roll* are other terms for running the fabric in this direction. All Steelcase standard fabrics are railroaded. The yardage requirements for railroaded cutting are calculated using the width of the fabric, quantity ordered, style of chair(s), and pattern repeat.

Woven way means the height dimension of the product is parallel to the warp of the fabric; *warp vertical* and *down roll* are other terms for running the fabric in this direction. The yardage requirements for woven way cutting are calculated using the width of the fabric, quantity ordered, and style of chair(s).

What determines fabric direction?

The width of the roll of fabric and the techniques that are used to apply it to the product can both determine the direction. Standard default direction for seating products with Steelcase standard fabrics is railroaded. No exceptions are possible. COM fabrics are standard woven way. You may specify a COM fabric to be cut in a specific direction if the product allows it to be applied. The purchase order must clearly state the cutting direction if it is other than standard.

Tip: If you are changing the cutting direction of fabric, yardage requirements may increase, resulting in an additional upcharge. This upcharge will be applied to the purchase order.

► See *Yardage Requirements* in the *Surface Materials Reference Manual* for specific information.

If you have any questions regarding cutting direction guidelines, please call the Steelcase Solutions Resource Team at 1.888.STEELCASE or 1.888.783.3522. You can also find this information on our Web site:

- Visit www.steelcase.com

COM pattern exceptions

Sometimes COM fabrics have patterns that look awkward or inappropriate if they are applied in the standard direction (woven way). Those cases are addressed with these two pattern exception rules.

Incorrect

Correct

Incorrect

Correct

1

Fabrics with stripes or flame stitch will be applied so that the patterns are vertical.

Incorrect

Correct

Incorrect

Correct

2

Fabrics with patterns of people, vines, or flower arrangements will be applied so that the pattern is vertical.
