

Airtouch®

details

Height-adjustable tables are like gym memberships. They're only healthy if we use them.

Countless studies show people are happier, healthier and more productive when they are able to change positions within their workspace.

The innovative Airtouch mechanism gives workers the ability to quickly, effortlessly and quietly adjust their worksurface height with a light touch, promoting frequent work-style transitions. In doing so, the body's muscles are activated, improving cognitive and physical well-being.

By incorporating standing into daily work life, individuals can reduce the risk of chronic disease and obesity.

3X

*"Simply by standing, you burn three times as many calories as you do sitting."
Dr. James Levine, M.D., Ph.D.*

Designed to work in almost any workspace, [Airtouch](#) is ideal for providing workers the flexibility to adapt worksurface height to their needs at a moment's notice. Whether it's in a freestanding or panel-based work environment, Airtouch can be used seated one minute, then raised to create a standing meeting place or to simply change posture the next.

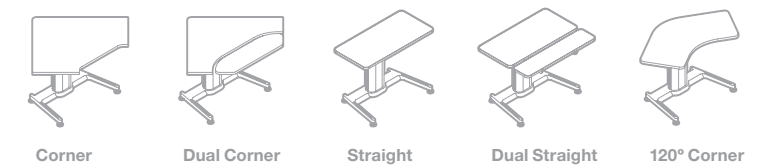

Airtouch can be adjusted single-handedly to any height on the fly, easily going from seated to standing, and back again. Simply set the adjustment gauge to meet typical worksurface weight load, then use the adjustment lever to raise and lower the worksurface. And because Airtouch doesn't have any electrical components, it can be used anywhere.

Airtouch worksurfaces can be individualized with a variety of products ranging from modesty panels to SOTO™ worktools and cableways to Eyesite™ monitor arms.

Like all Details products, Airtouch was designed with the well-being of the individual in mind by supporting their physical, cognitive and social needs. So in addition to height-adjustability, Airtouch can be personalized with an assortment of Details and Steelcase products that make work (and life) easier and more comfortable—benefiting the individual and leading to a happier, healthier and of course, more productive workplace.

Height range: 26" - 43" with infinite increments
 Adjustment speed: seated height to standing height in 1.2 seconds
 Recommended load capacity*: up to 150 lbs.
 *Includes weight of worksurface

For a better day at work.®
