# host

ELEGANCE MEETS FUNCTION for the multimedia enabled, interactive conference room. The Host Collection is a complete suite of furnishings with fully resolved design details, thoughtfully responding to the need for refinement in aesthetics while accommodating a wide range of user specified audio-visual requirements.

HOST ROUND TOP WITH FLAT EDGE AND BASE IN QUARTERCUT WALNUT WITH PERMISO CHAIRS IN LEATHER.

slim base

The sleek slim base showcases the table's refined design aesthetic. With the ability to support tops up to twelve feet in length with only a pair of bases, the slim design illustrates Host's simple and clean approach.

HOST RACETRACK TABLE WITH BULLNOSE EDGE AND SLIM BASE IN QUARTERCUT ANIGRE WITH MODIUS CHAIRS IN LEATHER.

HOST RECTANGULAR TABLE WITH HORIZON EDGE AND SLIM BASE IN QUARTERCUT ANIGRE WITH MODUS CHAIRS IN LEATHER AND HOST CREDENZA.

## flared base

The unique and stylish flared base captures and follows the eye throughout the room. It's elegant styling and shape also supports the ability to position the table over floor mounted power and data monuments.

HOST RECTANGULAR TABLE WITH TAPERED EDGE AND FLARED BASE IN QUARTERCUT ANIGRE, PERMISO CHAIRS IN LEATHER AND HOST BUFFET HEIGHT CRENZAS WITH WOOD DOORS, AND STANDARD HEIGHT CRENZA WITH GLASS DOORS

## credenzas

With a tapered solid wood edge with compound-mitered corners, Host credenzas are styled to coordinate with the Host tables. Standard and buffet height allow for the support of service trays, documents, and accessory items. An optional pull out media rack is available to support electronic componentry.

technology integration

Host accommodates technology integration with the unique Tech Corridor which is hidden underneath the table and encloses and conceals the cabling, while its snap-open doors provide instant access for IT and AV personnel. An optional equipment shelf and universal management clip make it easy to cleanly support equipment, cabling and wires.

Host's fully customizable table top technology access point (TAPS) open to reveal a solid wood table lining adding to the user experience. With a hidden storage space for cables and Extron Architectural Adaptor Plates (AAP) as standard, Host makes it easy to integrate the latest technological equipment.

Design: FP Design

Slim base

Round base

Flared base

**HOST TABLE SHAPES:**

Rectangle, Racetrack, Soft Radius, Boat, Trapezoid, and Round (Round base only, all other tables flared and slim only)

Widths: 48" and 60"

Diameters for round tops: 48" and 60"

Lengths: from 8' to 20'

For special sizes and custom configurations contact customer service.

**HOST TABLE BASES:**

Slim base, veneer

Flared base, veneer

Round base (for round tables), veneer

**Table tops** all Vecta plain sliced veneers, signature veneers, quartercut walnut and quartercut anigre, laminate. Note laminate tops will have wood edges.

**Table edges** in five solid wood edge profiles: Bullnose, Beveled, Horizon, Tapered, and Flat. Note: tapered and horizon edge only available on rectangular tops

**Technology Access Points** in matte silver or matte black anodized with solid wood edge trim.

- Allow easy access for up to four users.
- Table top cut outs for TAPs trimmed with solid wood for a completely finished aesthetic.
- Concealed storage for users' cords and transformers.
- TAPs will be available in three versions: power and data; power, audio and video; and power, AAP.

- TAPs will be available with a 10' cord and 15 amp plug, hardwire, or with a two-circuit modular power delivery system.
- TAPs are completely customizable and upgradeable using Extron AAP plates.

**Technology Corridor** (underneath the table top)

Carries all the technology, both concealing it but also keeping it easily accessible.

- Satin anodized aluminum doors hinge from these beams and clip shut.
- An optional shelf can be installed to hang between the beams, and can provide support for routers, hubs, line drivers, scalars, and other technical equipment.
- Universal clips snap onto the beams providing controlled wire management. The same clip holds the optional power distribution system that provides power outlets for TAPs and other hardware installed within the raceway.

**HOST CREDENZAS:**

Length: 50" (2 door), 74" (3 door), 98" (4 door)

Depth: 27"

Height: 29" (standard), 36" (buffet)

- Any Vecta veneer
- Tapered solid wood edge
- Wood or frosted glass touch latch doors
- Steel base in silver paint with adjustable glides
- Optional equipment rack holds 11 rack units of equipment. Space and ventilation provided.
