Host Collection

Host Collection is a suite of elegant furnishings for the multimedia, interactive conference room. Host Collection's fully resolved design details speak to the need for refinement in aesthetic appeal, while every functional aspect of the table was designed to accommodate a breadth of user needs.

Round base is conical shaped plywood with wood veneer surface.

Top is 1/4" thick particle board with laminate or wood veneer top.

TAP trays, if selected, provide access to power, data, voice, audio, video, or any type of outlet required. Storage trays provide access to house equipment, such as, speaker phones.

Bases are available with either a flared or a slim base.

Quarter Cut Anigre and Quarter Cut Walnut are two veneers exclusively for Host Collection.

Product Details

Table height is standard at 28 1/2" H.

Adjustable leveling glides have a range of 1/2" to accommodate uneven floors.

Round

Rectangular

Soft Radiused

Racetrack

Boat Shaped

Trapezoid

Table shapes include round, rectangular, soft radiused, racetrack, boat shaped, and trapezoid. A wide range of sizes up to 20'L is available to fit any room size.

In addition to all standard Grade 1 veneers, two new veneers are available exclusively on the Host Collection: Quarter Cut Anigre 3035, a Grade 1 veneer, and Quarter Cut Walnut 3315, a Grade 2 veneer.

Tip: Tops with Quarter Cut Anigre 3035 veneer will have maple solid wood edge stained to match the natural anigre.

Coalesse's standard veneers are plain sliced and book matched, except for 3035 and 3315 which are quarter cut and slip matched.

Seating Capacity Guidelines
▶ See page 332

Host Collection

Plain sliced veneer has the traditional cathedral appearance. Book matching produces a mirror image of pairs of veneer leaves.

Quarter cut veneer has a straighter grain that produces a more contemporary appearance. These veneer leaves are slip-matched to produce a subtle repetition.

Self-edge table tops have flat edges that are surfaced with the same material and color that is applied to the top of the table. Self edges are available on tops that are 1/4" thick.

Vinyl edge profiles are available in the following shapes and colors on table tops that are 1/4" thick.

- Flat 1/4" edge available in 6000 Black

Solid wood edges are available in five profiles—flat, bullnose, beveled, horizon, or tapered. Not every edge is available on every top shape. ▶Refer to the matrix on page 326 for availability.

Tops with flat, bullnose and beveled wood edges will have square corners.

Tops with tapered and horizon wood edges have 4" radius corners.

Sectioned tops

Large tops are shipped in sections with hardware for field assembly. Tops 8'L ship in one piece. Tops 10'L and 12'L can ship in one or two pieces. Tops 14'L, 16'L, 18'L and 20'L can ship in two or three pieces.

Tip: The style number indicates top sections.

▶Refer to style number explanation, page 343.

Large tops can be difficult to move through some buildings.

Tip: Inspect the building where the table will be installed to confirm that elevators, loading docks, hallways, doorways, windows, etc. can accommodate large table tops.

Removable access door on each base allows for easy installation of utility infeeds. A toe hole allows infeeds from a floor monument outside the base.

Leveling glides on all bases adjust 1/2".

Wood veneer bases are available in three styles—round, slim, and flared.

Round base is conical shaped plywood with a wood veneer surface, 26 1/2"-diameter bottom and 21 1/2"-diameter top. Underneath the round base is a 25"-diameter black painted wood inset, 3/4"H, with an opening. The 13 1/2"-diameter opening is surrounded by a 50 lb concrete weight for stability. The removable access door, 8 1/2"W at the bottom and 6.9"W at the top x 25 3/4"H, is secured with a ball catch fastener on each corner.

Tip: Round base only available on round tables.

Slim base has a wood veneer surface on molded MDF with aluminum universal bracket. The removable access door, 7"W x 23 1/2"H, is secured with a ball catch fastener on each corner. Slim bases are available in one size, 4" x 27".

Flared base has a wood veneer surface on molded MDF with aluminum universal bracket. The removable access door, 9"W x 23 1/2"H, is secured with a ball catch fastener on each corner. Flared bases are available in one size, 13" x 27".

Style and number of bases required are determined by top shape and length. Round table tops have a single round base. Table tops 8'L through 12'L have two bases: two slim, two flared or slim and flared. Table tops 14'L through 20'L have three bases: three slim, three flared or combination of slim and flared.

Floor monuments can fit inside round and flared bases. Slim bases can be placed over some flush floor monuments.

▶For dimensions to aid in locating floor monuments, see page 336.

Host Collection *continued*

Connectrac, a floor monument kit, should be specified when a floor monument is not positioned under a base. Connectrac is a U.L. listed, ADA compliant raceway that can be installed underneath carpet tiles or broadloom to conceal wires and cables running from a floor monument to the Host base.

► See page 463

Tip: For detailed information about Connectrac, go to www.connectrac.com.

Raceway interior, 3¹/₄"W x 7⁷/₈"H, provides ample room for wires and cable.

Raceway overall is 3³/₄"W x 7⁷/₈"H.

Ramps, 5⁵/₈"H at the raceway connection, transition down to 1¹/₈"H.

Raceway and ramps overall is 18³/₄"W.

Dome interior, 5⁷/₈" diameter x 3"H, covers the floor monument. Dome opens allowing easy access to floor monument.

Solid core tops with 1¹/₄" edge thickness have a core of 45 lb median-density particle board with laminate or wood veneer on the top and a backer applied to the opposite side for balance. Laminate and wood veneer surfaces are bonded to the core with a PVA adhesive in a cold press.

Large tops are shipped in sections with Tite-Joint fasteners for assembly on site. Table tops that are longer than 12' and table tops that are larger than 72" in diameter are always shipped in two pieces.

Large tops can be difficult to move through some buildings. *Tip: Inspect the building where the table will be installed to confirm that elevators, loading docks, hallways, doorways, windows, etc., can accommodate large table tops. You can request any one-piece top to be fabricated and shipped in two pieces to accommodate these small spaces. The following upcharges apply: 24" through 36" list upcharge for cut is \$250 U.S., 37" through 48" list upcharge for cut is \$285 U.S., 49" through 60" list upcharge for cut is \$317 U.S.*

To specify sectioned tops, designate with sectioned top.

A two-piece top may be fabricated and shipped in three pieces, please contact Customer Service for a quotation, 1.800.627.6770.

Custom shapes and sizes
Special table sizes and shapes are possible. To confirm practicality and obtain a quotation, contact Customer Service at 1.800.627.6770.

Cut-down tops, which are standard table tops with smaller dimensions, are available. Use the product number of the next larger size and specify the exact dimensions you want. Some restrictions apply, including minimum quantities. This option is not available for folding tables. Additional lead times may be required. Contact Customer Service at 1.800.627.6770. The following upcharge applies to cut-down tops, +\$373 U.S. *Tip: Upcharge for a cut-down top is applied one time only per size/style number. Tip: Fee is at list and contract discounts apply.*

Woodgrain laminates are always oriented with the grain direction running parallel with the length of the table top.

Woodgrain laminate sectioned tops cannot be guaranteed to have a perfect match of the grain pattern along the seam that joins the sections. Large tops that are more than 12' in length require two or more separate sheets of laminate. Coalesse will create the best match that is possible between two sheets of laminate, but depending on the woodgrain laminate pattern that you choose, a perfect match between sections cannot be guaranteed.

Wood edges are not recommended on tables with wood-grain laminates because matching of woodgrain laminate and natural, solid wood is not guaranteed. For tables with wood edge profiles, always specify either laminates in solid colors or patterns or wood veneer surfaces.

Tip: Because of natural variations, you should know that finished solid wood edges may vary slightly in tone or character from each other or from the samples Coalesse produces. No guarantee can be made of an absolutely exact match.

Standard veneer grain directions—grain directions are determined by the size and shape of the table top. Refer to the following guidelines for standard grain directions.

Grain runs parallel to the width on rectangular and boat tops that are more than 96"L.

Grain runs across the width on racetrack tops that are 60"W or larger or more than 96"L.

Wedge lay-up veneers radiate from the center on round tops.

Same flitch veneer is also available for tables that require similar graining and color, but will not be ganged. For example, specify same flitch veneer for two tables used in the same room, but spaced apart.

Host Collection

Same flitch matching is specified in cases where you want the veneer grain and pattern on two or more tops to come from the same flitch of veneer. This ensures a consistent grain pattern and coloration and should be specified when tops will be used near each other but not ganged.

Grain directions are designated in relation to the dominant direction of the veneer—often referred to as the cathedral of the veneer. End-matched veneer refers to two pieces of veneer that match at the end of the cathedral. Side matched veneer refers to two pieces of veneer that match along the side of the cathedrals.

Surface Materials

Laminates are available in two standard grades. Additional laminates from any manufacturer may also be practical—see *Other laminates* below.

Grade 1 laminates include:

- Coalesse standard laminates
- ▶ See *Surface Materials Listing*, page 600.
- Steelcase standard laminates (code 290A)
- ▶ See *Steelcase Surface Materials Reference Manual*.
- Any standard-grade Wilsonart laminate in solid color, woodgrain, or pattern finish (code 290A)

Grade 2 laminates (code 290B) include any standard-grade, solid color, woodgrain, or patterned laminate from Nevamar (includes Matrix), Formica, or Pionite. Grade 2 laminates may have extended lead times. For details, contact Customer Service at 1.800.627.6770.

Other laminates that are not included in the Grade 1 or Grade 2 offerings may also be available, such as Abet Laminati and Laminart. To determine availability and pricing, contact Customer Service at 1.800.627.6770, with the laminate manufacturer's name and the name and number of the laminate you want.

Laminate swatches are reproduced in the Surface Materials Color Palettes in the back of the book.

Swatch cards and actual samples of Coalesse standard laminates are available from your Coalesse customer service representative. For samples of laminates from other manufacturers, contact them directly:

- Wilsonart
1.800.433.3222
- Nevamar
1.800.638.4380
- Formica
1.800.FORMICA
- Pionite
1.800.285.5161

Tip: Laminate manufacturers change their offerings frequently. Always check availability before ordering.

Wood veneer table tops are fabricated with Architectural Grade AA hand-selected hardwood veneer, plain sliced, book matched, and bonded to the core with a backing sheet for balance. Coalesse's primary wood finish, Clarity, is a waterborne UV topcoat, which protects the environment while providing exceptional durability and resistance to water and chemical stains. Due to natural variations in wood, finished products may vary from samples in color, texture, and grain.

Wood is a natural material; slight variations occur in veneer texture, color, grain configuration, and stain acceptance. Coalesse stains are all applied with an exacting regard for consistency and are well within traditional tolerances for wood products.

Tip: You should know that finished tops may vary slightly in tone or character from each other or from the samples Coalesse produces. No guarantee can be made of an absolutely exact match.

Additional wood veneer species are available. To confirm availability and to determine pricing, contact Customer Service at 1.800.627.6770.

Stains applied to Coalesse wood veneer table tops are standard with the same stain color applied to both the top and the solid hardwood edge profile. Coalesse strives to produce a consistently high quality product and some natural variation in color is to be expected. This is especially apparent on natural woods which have no stain applied, for example 3525 Natural Maple. This color variation is normal and reflects the unique and natural properties of wood. This should not be considered a defect.

Stain swatches are reproduced in the Surface Materials Color Palettes in the back of the book.

Swatch cards and actual samples of standard wood veneers are available from your Customer Service representative.

Additional wood veneer stains are possible. Coalesse offers two programs to accommodate customers who need special stains—Stain-to-Match and Stain and Finish to Match.

Stain-to-Match option is a special Coalesse program that will match a wood stain sample that you provide. There is no additional charge for this service. You must supply a sample of reasonable size (3" x 3" or larger is usually adequate). Coalesse will formulate a stain, produce a matching sample, and send it to you for approval. When we receive your written approval, we'll schedule production of your order.

Tip: Stain-to-Match will achieve a color match to the sample only. Graining of the wood veneer and final surface finish may differ from your original sample. See Stain and Finish to Match below.

Stain and Finish to Match is a special Coalesse program that can achieve both a color and a surface finish match for most customer-supplied samples. To determine feasibility and pricing, send us a sample of reasonable size (3" x 3" or larger is usually adequate) before you send us your order. If feasible, Coalesse will produce a sample showing the best possible match and send it to you for approval. When we receive your written approval, we'll schedule production of your order.

Stain formulas for special stain color matches are all retained in Coalesse's archives so that you can refer to them in future orders and skip the approval steps required for the initial order.

Care & Maintenance

Laminate and solid phenolic should be cleaned with soap and water. For stubborn stains, use a non-abrasive household cleaner.

Veneers should be cleaned regularly with mild soap and water and dried with a soft cloth. To polish, use silicone-free household polishers. Use sparingly.
Tip: Never use ammonia-based cleaners or wax on wood surfaces.

Tables should be inspected and maintained regularly by tightening screws and bolts, inspecting casters and glides for damage, and inspecting all moving parts for damage and wear.

Host Collection

Host Collection *continued*

Tech Corridor

All Host tables except round shapes are equipped with a Tech Corridor.

Tech corridor runs under the length of the table between the table top and the universal base brackets. Tech corridor creates a space approximately 20^{15/16}" x 3" for cables, TAP tray(s), and optional equipment shelf(s).

Tech corridor assembly consists of satin anodized aluminum twin beams and ribbed satin anodized aluminum hinged tech doors that clip shut.

Beams, 1^{5/8}"W x 2^{3/8}"H, with black plastic end caps provide support to the table top. Beams have a rail feature that accommodates cable clips.

Tip: One cable clip is provided for each foot of table length.

Tech doors hinge from the beams and clip shut with door clips to conceal and support wires and cables. Tech doors are approximately 5^{3/4}"W.

Corridor shelf is available to hold routers, hubs, line drivers, scalars and other technical equipment. Corridor shelf hangs between the beams and provides 1.5 rack units of space, 2^{3/4}"H.

► See page 463

Two Beam Tables:

96"L, 10'L, 12'L

Place the two bases in their approximate final locations.

Tip: End bases will be centered 24" from the end of the table top.

Tip: In most cases base access doors should face inward.

Tip: Bases can be the same style or a combination of slim and flared. Bases are located in the same position for any given table shape, regardless of table shape.

Tech Corridor Assembly:

- Remove beam end caps.
- Slide long tech doors on to hinge of each beam.
- Slide short tech doors on to each end in the same hinge.

Place beam/tech doors assemblies facing each other on to the bases with the long doors between the bases and short doors outside the bases.

Push beam end caps in to the ends of the beams. Align the second predrilled hole from each end of the two beams with the holes in the bracket castings.

Start the Pan Head screws into each bracket casting. **DO NOT** tighten.

Tip: Pan Head screws remain above the beam to aid in table top alignment.

Level bases. Check the square alignment of the beams. Tighten Pan Head screws.

Four Beam Tables:

14'L, 16'L, 18'L, 20'L

Place and center the three bases where they should be in the room and assemble the Tech Corridor (See Tech Corridor Assembly in Two Beam Tables).

Tip: End bases will be centered 24" from the end of the table top.

Middle base is positioned in the center of the table top.

Rail Clamp splices the two beams together at the center base.

Host Collection

Align black rail clamps with predrilled holes in center base bracket casting. Position each clamp with the tab pointing downward, and the short side of the clamp facing inward.

Place beam/tech doors assemblies facing each on to the bases with the long doors between the bases and the short doors outside the end bases.

Slide a pair of beams on to each rail clamp. Push both beams against the tab at the bottom of the clamp, forming a 1/2" gap between the beams.

Tighten each black screw on each clamp to ensure the gap remains unchanged.

Check the square alignment of the beams. The clamped beams can pivot as needed to square the frame.

Align the second predrilled hole from each end of the two beams with the holes in the bracket castings.

Start the pan head screws into each bracket casting. **DO NOT** tighten.

Tip: Pan head screws remain above the beam to aid in table top alignment.

Level bases. Check the square alignment of the beams. Tighten pan head screws.

Table top opening for TAP is 12" x 10", trimmed with a flat solid wood profile. Two doors conceal dual access to a black powder coated steel tray that houses power and data outlets.

Tip: Wood trim will match the color of the wood edge.

Up to six TAPs can be specified depending on the table length. TAPs are available as an option on all Host Collection tables.

► See individual product specifying pages for TAP locations.

Tip: A storage tray may replace one TAP.

► See page 335

TAP doors are made of brushed anodized aluminum. Each TAP door has an opening that allows cables to pass when the doors are closed. TAP doors are friction hinged, opening to 77°. TAP doors are fully adjustable to maintain an even appearance with the table top when closed.

TAP doors can be silver or black anodized or with optional wood veneer. The veneer doors will always match the finish of the table top. Veneer doors will be available on veneer tops only.

All doors must be the same finish—silver, black or veneer.

TAP Door Adjustments

CAUTION: TAP DOORS CAN BE EASILY SCRATCHED WITH HEX KEYS. MAKE SURE BOTH DOORS ARE FULLY OPEN BEFORE MAKING ADJUSTMENTS.

Host Collection *continued*

Adjust the pitch first, then adjust the height.

Adjust the pitch of each door to be level with the table surface by adjusting the Allen screw found under each door.

Adjust the height of the left and right sides of the TAP door assembly to be flush with the table surface by adjusting the Allen screws on top between the doors. There is an adjustment screw at each end of the TAP assembly. Doors must be fully open to adjust screws.

TAP trays provide access to power, data, voice, audio, video, or any type of outlet required. Each TAP tray includes a storage area for laptop computer transformers, excess wires, or other accessories. A 1/2"-diameter rubber grommet located in each half of the TAP tray allows cables to enter directly into the tray from the tech corridor (such as a PolyVision Multipurpose Cable). The bottom cover of the TAP tray is easily removable without tools for technician's access.

Host Collection

TAP Tray Electrical Systems

Four choices:

Tip: All TAP trays (except field-wired) have four 15-amp power outlets.

Tip: All TAP trays are U.L. and C.U.L. listed.

Cord and plug tray will have a 10' cord and 15-amp plug. Each TAP tray must be plugged into a floor outlet. This TAP tray cannot be daisy-chained.

Hardwired tray will have a 6' conduit and a three-wire hardwire connection.

Tip: Hardwired TAP tray must be connected to the building power supply by a licensed electrician.

Field-wired tray will have two single-gang faceplate openings for customer's own power outlets and wiring.

Modular tray will have a modular harness that "daisy-chains" from one TAP to the next. A two-circuit, four-wire hardwire base power infeed is included.

Tip: Modular TAP tray is a two-circuit system. Modular TAPs will alternate circuits within a table.

Tip: Lengths of the modular hardwire base power infeed will vary by table size and configuration but will be able to always reach floor monuments located anywhere underneath the table.

Tip: Power infeeds can be routed down any table base.

Corridor power kit, modular can be added only to modular trays.

This kit adds two electrical outlets inside the tech corridor for plugging in speaker phones or other equipment that does not require frequent access.

► See page 464

Tip: A six outlet plug strip with 15' cord and plug can also be installed in the tech corridor.

► See page 464

Host Collection *continued*

TAP Tray Faceplates

Architectural Adapter Plate (AAP) choices:

Tip: TAP trays utilize Extron Electronics' Architectural Adapter Plates (AAPs).

Tip: Each TAP tray can accommodate up to eight single-space AAPs.

AAPs provide access to data, audio, video, telephone, microphone, room control systems and other technologies inside TAPs. Data AAPs and Video/Audio AAPs are available with Host TAPs. Many other AAPs are available from Extron Electronics. For information on other styles of AAPs and to find an Extron Electronics dealer, call Extron at 800.633.9876 or online at www.extron.com.

Data Architectural Adapter Plate has two CAT 6 RJ45 barrel (pass-through) outlets.

Video/Audio Architectural Adapter Plate has one VGA outlet (HD15 female to female gender changer) and one audio outlet (3 1/2 mm stereo mini jack to solder tabs).

Optional Modular Installation

If optional modular electrical system is specified, bring wiring up through base from floor monument or base access door into Tech Corridor. A hardwire infeed is used for the modular electrical systems. For single TAP styles, the modular infeed is not needed. Specify the hardwired tray option. Connect electrical cables and secure with cable clips. Run data wires along opposite beam and secure with cable clips as required.

Note: A licensed electrician must connect the power infeed(s) to the building power source in accordance with all national and local electrical codes. These electrical assemblies are intended for installation in accessible, dry locations in accordance with Article 604 of the National Electric Code NFPA70. If you have any concerns about a specific application, please consult the local authority having jurisdiction. This system is rated for a maximum of 20 amps, 125/250 V, 1-Phase, 60Hz or 120/208 V, 3-Phase, 60Hz.

Storage Tray

Call Customer Service for availability,
1.800.627.6770

Table top opening for storage tray is 12" x 10", trimmed with a flat solid wood profile. Two doors conceal access to a black powder coated steel tray that can house equipment, such as most common speaker phones. The inside dimensions for the storage tray are 15⁷/₈" x 13³/₄" x 2¹³/₁₆".
Tip: Wood trim will match the color of the wood edge.

Only one storage tray can be specified for each table. Storage tray, if chosen, will replace one TAP on the table. If the specified table has multiple TAPs, any one of the TAPs can be replaced with a storage tray. The location of the storage tray can be determined in the field.
▶ See individual product specifying pages for TAP locations.

Storage tray doors are made of brushed anodized aluminum. storage tray doors are friction hinged, opening to 90°. Storage tray doors are fully adjustable to maintain an even appearance with the table top when closed.

Storage tray doors can be silver or black anodized or with optional wood veneer. The veneer doors will always match the finish of the table top. Veneer doors will be available on veneer tops only. Veneer doors will always be cross grain.

If storage tray is specified with TAP(s), the finish on the doors will match —silver, black or veneer.

Sectioned Tops Pilot Holes

C Alignment index holes D Beam mounting holes E Base bracket mounting holes F Tech door clip mounting holes

Bases are located in the same position for any given table top, regardless of table shape. Bases can be the same style or a combination of slim and flared.

Insert tightening nuts in to alternating holes in table top sections with threaded ends towards the joint. Fig. A

Insert the draw bolts and thread each into the nut leaving 1/8" of bolt to fit into joining section. Fig. A

Insert locking sleeves into remaining holes to engage the head of the draw bolt. Fig. B
Tighten nut with tightening tool thus drawing joints together. Fig. C

Joining Sectioned Tops

Tip: For grain matching, top sections are in numbered sequence on the underside.

Align end top section with pan head screws on end base.

Insert Tite-Joint fasteners. Locate alignment bullets to aid in joining sectioned tops.

Alternate tightening tite-joint fasteners to join one section with another section. Begin with the center fastener and alternating left and right toward the outside of the top. As top sections come together, adjust tite-joints for a leveled, even seam between sections.

Level the bases.

Check alignment of the joined top on the bases.

Attach beams and bases to top.

Attach TAP doors and trays, if any, to top.

Host Collection Round Tables

DESIGN F/P DESIGN AND VECTA DESIGN TEAM

Tip: Shipped knocked down and top ships in one piece.

Tip: The wood edge on a table top with woodgrain laminate may not match the top.

Veneer direction

Tip: You must send a sample of reasonable size for Stain-to-Match.

TAP Location

Tip: Tables available with zero or one TAP.

Tip: In addition to the data and audio/video AAPs available from Coalesse, other styles of AAPs are available through Extron Electronics. For an Extron dealer, call 1.800.633.9876.

Tip: See TAP options for electrical systems and faceplate list.

Tip: Wood veneer doors for storage tray or TAP will always be cross grain.

Tip: Veneer doors not recommended for wedge lay-up veneer tables.

Tip: Connectrac must be the same wiring schematic as the table.

Host Collection Rectangular Tables with Three Bases

DESIGN F/P DESIGN AND VECTA DESIGN TEAM

Tip: Shipped knocked down and top ships in one piece.

Tip: Grain direction for wood-grain laminate runs the length of the table.

Tip: Clips are provided with table: One clip per foot of table length.

Tip: The wood edge on a table top with woodgrain laminate may not match the top.

Tip: You must send a sample of reasonable size for Stain-to-Match.

Tip: 14'L and 16'L tables available with zero, one, two, or four TAP(s). 18'L and 20'L tables available with zero, one, two, four, or six TAP(s).

Tip: In addition to the data and audio/video AAPs available from Coalesse, other styles of AAPs are available through Extron Electronics. For an Extron dealer, call 1.800.633.9876.

Tip: See TAP options for electrical systems and faceplate list.

Host Collection Soft Radiused Tables with Two Bases

DESIGN F/P DESIGN AND VECTA DESIGN TEAM

Tip: Shipped knocked down and top ships in one piece.

Tip: Grain direction for wood-grain laminate runs the length of the table.

Tip: Clips are provided with table. One clip per foot of table length.

Tip: The wood edge on a table top with woodgrain laminate may not match the top.

Tip: You must send a sample of reasonable size for Stain-to-Match.

Tip: 96"L tables available with zero, one, or two TAP(s). 10'L and 12'L tables available with zero, one, two, or three TAP(s).

Tip: In addition to the data and audio/video AAPs available from Coalesse, other styles of AAPs are available through Extron Electronics. For an Extron dealer, call 1-800-633-9876.

Tip: See TAP options for electrical systems and faceplate list.

Coalesse

Host Collection

Soft Radiused Tables with Two Bases

DESIGN F/P DESIGN AND VECTA DESIGN TEAM

Host Collection Soft Radiused Tables with Three Bases

DESIGN F/P DESIGN AND VECTA DESIGN TEAM

Tip: Shipped knocked down and top ships in one piece.

Tip: Grain direction for wood-grain laminate runs the length of the table.

Tip: Clips are provided with table: One clip per foot of table length.

Tip: The wood edge on a table top with woodgrain laminate may not match the top.

Tip: You must send a sample of reasonable size for Stain-to-Match.

Tip: 14'L and 16'L tables available with zero, one, two, or four TAP(s). 18'L and 20'L tables available with zero, one, two, four, or six TAP(s).

Tip: In addition to the data and audio/video AAPs available from Coalesse, other styles of AAPs are available through Extron Electronics. For an Extron dealer, call 1-800-633-9876.

Tip: See TAP options for electrical systems and faceplate list.

Host Collection Racetrack Tables with Three Bases

DESIGN F/P DESIGN AND VECTA DESIGN TEAM

Tip: Shipped knocked down.

Tip: Grain direction for wood-grain laminate runs the length of the table.

Tip: Clips are provided with table. One clip per foot of table length.

Tip: The wood edge on a table top with woodgrain laminate may not match the top.

Tip: You must send a sample of reasonable size for Stain-to-Match.

Tip: 14'L and 16'L tables available with zero, one, two, or four TAP(s). 18'L and 20'L tables available with zero, one, two, four, or six TAP(s).

Tip: In addition to the data and audio/video AAPs available from Coalesse, other styles of AAPs are available through Extron Electronics. For an Extron dealer, call 1.800.633.9876.

Tip: See TAP options for electrical systems and faceplate list.

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.

Host Collection Boat Shaped Tables with Two Bases

DESIGN F/P DESIGN AND VECTA DESIGN TEAM

Tip: Shipped knocked down.

Tip: Grain direction for wood-grain laminate runs the length of the table.

Tip: Clips are provided with table: One clip per foot of table length.

Tip: The wood edge on a table top with woodgrain laminate may not match the top.

Tip: You must send a sample of reasonable size for Stain-to-Match.

Tip: 96"L tables available with zero, one, or two TAP(s). 10'L and 12'L tables available with zero, one, two, or three TAP(s).

Tip: Last digit of style number indicates number of TAP(s).

Tip: In addition to the data and audio/video AAPs available from Coalesse, other styles of AAPs are available through Extron Electronics. For an Extron dealer, call 1-800-633-9876.

Tip: See TAP options for electrical systems and faceplate list.
