

Developed by Vitra in Switzerland
Design: Antonio Citterio

Skape Highback and Skape Lowback are a family of ultra-comfortable chairs designed for managers. They can be used individually or in combination to fulfil a number of purposes, e.g. as a top-quality chair suitable for a CEO or – particularly in combination with the elegant four-star base – as a visitor's or conference chair. Skape combines the unbeatable comfort of an easy chair with the functionality of an office swivel chair – but the mechanics and functions remain hidden away. Skape is both elegant and unobtrusive in all kinds of office environments.

Dynamic seating

The synchronous mechanics with large opening angle and automatic weight adjustment of the backrest resistance ensure that the user's weight is supported in every sitting position.

Intricately processed leather

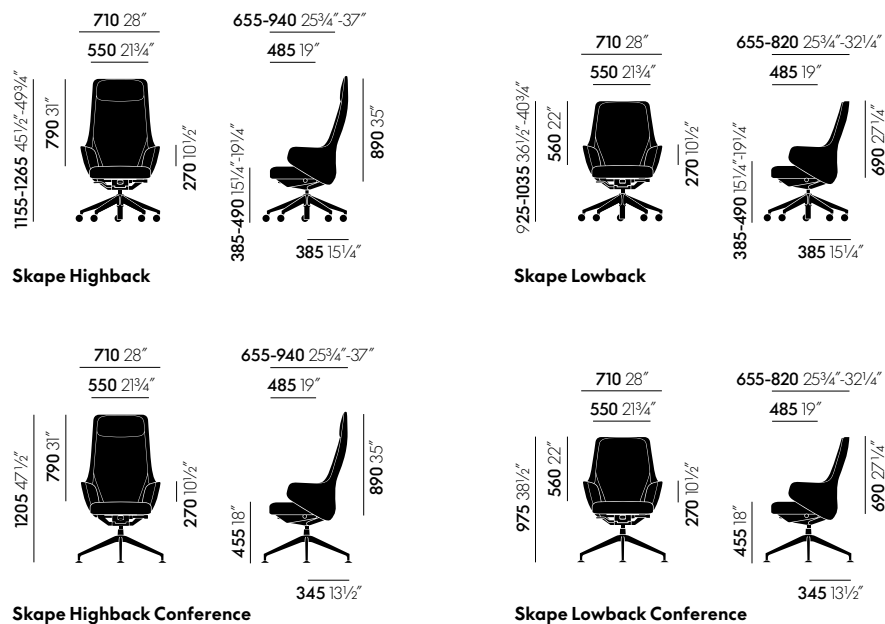

Skape's decorative seams allow individual pieces of leather to be smoothly and evenly sewn together, thus achieving a perfect fit on the luxurious, zoned padding of the seat and backrest. The decorative seams also highlight the details of the seat, thus creating an independent design.

The backrest of the Skape 'hugs' the person sitting in it and lends a feeling of security.

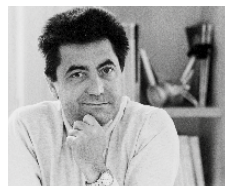

Dimensions

All measurements are in mm and inches, pursuant to EN 1335-1

Antonio Citterio

*1950, Italy

Antonio Citterio is an architect and designer who lives and works in Milan. He has been working with Vitra since 1988. During this time he has created a whole range of office chair and office systems as well as products for the Vitra Home Collection. The Citterio Collection is constantly being developed and expanded.
