ARTFUL NESTING

—

Kart

PERFORMANCE INNOVATION

Kart takes its name from the concept that drove the design — a shopping cart. Customers were asking for a chair with the comfort of a task chair that worked like a stacking chair.

A joint effort with 5D Studio and IDEO resulted in Kart, an incredibly innovative design that has won numerous awards and accolades. 5D Studio modeled Kart after the way shopping carts nest. Then, working with IDEO, it engineered the unique patented 4-star base which gives Kart its unique functionality. Kart is the only height adjustable, swiveling/nesting chair in the world.

*The greatness of art is not to find what is common
but what is unique.*
_Issac Bashevis Singer

Kart enjoys the comfort of an all-day office chair, yet provides the functionality never seen before in a stacking/nesting chair.

COMFORTABLE YET FUNCTIONAL

Kart addresses the need for a comfortable stacking/nesting chair. With a simple flip of the seat, eight Kart chairs can nest in the space of two and a half. This minimizes storage requirements and provides tremendous flexibility for arranging classrooms, meeting halls and corporate training rooms.

An alternative to a stacker, Kart is unique in its patented nesting design; it makes it easy to move and store. Using a dolly is a thing of the past. Just push the nested Kart chairs where they need to go.

We have flexibility to do many things.
_Phil Schiller

The Kart seating collection offers solutions for classrooms, cafeterias, training rooms and multipurpose rooms.

FLEX BACK STACKER

The Kart Stacker takes all of the design and comfort of the Kart chair and translates it into a flex-back stacker. It offers unlimited options in corporate and educational environments.

Kart Café continues the extension of the Kart Stacker by adding an elegant café height solution for corporate touchdown spaces and cafeteria settings.

DETAILS
