HIGH
POWERED

Train

The sole advantage of power is that you can do more good.

_Baltasar Gracian

The trend of integrating training spaces into corporate environments and the requirement for high-tech computer labs in higher education led to the development of the high-powered Train.

**FLIP, NEST,
ROLL, LINK.**

Train tables offer the ultimate high-powered solution for training, computer lab, seminar, and multipurpose rooms. The raceway option provides distribution of both power and data plus ample wire management.

The modesty panel option provides basic wire management. All train tables nest and link easily using our patented coupling device.

DETAILS

The edge detail on Train is unique to this collection. It's designed with soft-rolled black vinyl over the edge to facilitate smooth and seamless ganging from table to table.

Train folds easily by utilizing a two-handed trigger to release the table top and lock the arms in place to allow for nesting. When the top is flipped, the table depth is a mere 24".

Product Features

- A RACEWAY OPEN
- B RACEWAY CLOSED
- C OUTLET RAIL
- D 3 TABLES NEST IN 44' SPACE
- E CONNECTING CORNER UNIT
- F PATENTED COUPLER DEVICE
- G HOMERUN WIRE MANAGEMENT
- H POWER AND DATA WIRE MANAGEMENT
- I POD FOR TABLETOP POWER AND DATA

PRODUCT FEATURES

Surface Materials

TOPS:
ALL COALESSE LAMINATES.

BASE:
ALL COALESSE PAINTS.
