# Ballet

**Ballet tables** form a versatile series that provides solutions in a variety of applications—conference, training, workplace, dining, and utility. Base configurations are available in folding and fixed versions.

Top is 1" thick laminate or straight grain wood veneer.

Modesty panel has a horizontal wire management trough for a clean look.

Cast aluminum legs are available in folding or non-folding, X- and K-bases.

Adjustable leveling glides are included for uneven floors.

Dual wheel casters are 2" diameter and lock.

Seating Capacity Guidelines  
▶ See page 157

# Ballet

## Product Details

**Solid core tops** with  $\frac{3}{4}$ " and 1" edge thickness have a core of 45 lb median-density particle board with laminate or straight-grain wood veneer on the top and a backer applied to the opposite side for balance. Laminate and wood veneer surfaces are bonded to the core with a PVA adhesive in a cold press.

**Flip-top option** is available on pedestal base tables only.

**Flip-top mechanism** is available on pedestal base tables 36"D or less. The flip-top mechanism allows tops to tilt for more compact storage of tables that are not in use. Safety latch secures the top in flat position and must be released to flip top up. *Tip: Flip-top tables are not meant to be used in configurations. Tops may not align.*

**Special table heights** may be practical. To confirm practicality and obtain a quotation, contact Customer Service at 1.800.627.6770.

**Folding** is possible for select X-base and K-base tables to allow compact storage of tables that are not in use. Both X-base and K-base are 4" thick when folded. Folded height is 35".

**Cart** is available in two sizes to store and transport five folded Ballet tables.

**Bases** are available in three configurations—X-base, K-base, and pedestal base. Base assemblies are constructed of die-cast and extruded aluminum. X-base and K-base assemblies are joined by 1" x 3" extruded aluminum stretcher bar for stability. Base finish can be any powder coat color.

**Base inset on Ballet K-base tables** is 3 1/2".

**Base inset on Ballet X-base tables** is 10" on tables 60"L and 13" on tables longer than 60"L.

**Table height** is standard at 28 1/2"H.

**Adjustable leveling glides** are non-marring, black plastic.

**Casters** can replace glides on many Ballet tables factory installed. Casters are 2"-diameter, locking dual-wheel casters in black plastic and do not alter the table height.

**Edges** are black ribbed vinyl with matching plastic corner inserts or Ballet wood edge.

**Custom shapes and sizes** Special table sizes and shapes are possible. To confirm practicality and obtain a quotation, contact Customer Service at 1.800.627.6770.

**Cut-down tops**, which are standard table tops with smaller dimensions, are available. Use the product number of the next larger size and specify the exact dimensions you want. Some restrictions apply, including minimum quantities. This option is not available for folding tables. Additional lead times may be required. Contact Coalesse customer service at 972.641.2860. The following upcharge applies to cut-down tops, +\$373 U.S. *Tip: Upcharge for a cut-down top is applied one time only per size/style number.* *Tip: Fee is at list and contract discounts apply.*

**Woodgrain laminates** are always oriented with the grain direction running parallel with the length of the table top. You cannot specify woodgrain laminates with end- or side-matched grain directions.

**Wood edges** are not recommended on tables with wood-grain laminates because matching of woodgrain laminate and natural, solid wood is not guaranteed. For tables with wood edge profiles, always specify either laminates in solid colors or patterns or wood veneer surfaces.

*Tip: Because of natural variations finished solid wood edges may vary slightly in tone or character from each other or from the samples Coalesse produces. No guarantee can be made of an absolutely exact match.*

**Standard veneer grain directions—grain directions** are determined by the size and shape of the table top. Refer to the following guidelines for standard grain directions.

**Woodgrain** runs parallel to the length on rectangular and boat tops that are 96"L or less.

**Grain-matched veneer** is available at an upcharge in cases where you want the grain direction and pattern to continue from one top to an adjacent ganged top. Coalesse can accommodate the continuation of veneer grain from one ganged top to the next in almost all arrangements, using one of three types of matching—end-matched, side-matched, and end-and-side matched.

**Same flitch veneer** is also available for tables that require similar graining and color, but will not be ganged. For example, specify same flitch veneer for two tables used in the same room, but spaced apart.

**Additional lead time** may be needed for grain-matched veneers. Contact Customer Service at 1.800.627.6770 to discuss availability.

**Always** include a drawing or sketch along with your specification showing the arrangement of tables you plan so that we can ensure proper grain matching.

**Specifying** grain-matched veneers requires an upcharge. Same flitch, end-matched, side-match are 10% of the total list price. End-and-side matched are 20% of the total list price.

**Same flitch matching** is specified in cases where you want the veneer grain and pattern on two or more tops to come from the same flitch of veneer. This ensures a consistent grain pattern and coloration and should be specified when tops will be used near each other but not ganged.

**Swatch cards and actual samples of Coalesse standard wood veneers** are available from your Coalesse customer service representative.

**Additional wood veneer species** are available. To confirm availability and to determine pricing, contact Customer Service at 1.800.627.6770.

# Ballet *continued*

**Grain directions** are designated in relation to the dominate direction of the veneer—often referred to as the cathedral of the veneer. End-matched veneer refers to two pieces of veneer that match at the end of the cathedral. Side matched veneer refers to two pieces of veneer that match along the side of the cathedrals.

**End-matched veneer** is specified on tops that will be ganged with the edges that are perpendicular to the grain direction butted against each other.

On most tables that are 72"L x 30"W, the veneer grain direction will be parallel to the 72" side. If you specify end-matched, the veneer grain on one 30" side of one table will continue on one 30" side of the adjacent table.

**Side matched veneer** is specified on tops that will be ganged with the edges that are parallel to the grain direction butted against each other.

On most tables that are 72"L x 30"W, the veneer grain direction will be parallel to the 72" side. If you specify side-matched, the veneer grain on one 72" side of one table will continue on one 72" side of the adjacent table.

End-and-side matched veneer is specified when several tops will be ganged along two or more edges.

# Ballet

## Connections

**Connecting tops** can link perpendicular Ballet tables at 45°, 60°, or 90° and expand the useable area in many different configurations.

► See page 178

**Modesty panel** is available on many Ballet tables. Panel is ribbed extruded aluminum with powder coat color and includes a non-exposed horizontal wire management trough.

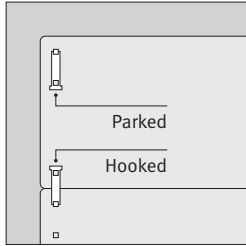

► See individual product specification pages for availability.

**Gangers** are available in two types—flex and bar. Use flex gangers in situations when tables will frequently be reconfigured and re-ganged. Use bar gangers in applications where tables need to be rigidly linked for long periods of time. Flex gangers may be installed in the factory or on site. Threaded inserts for bar gangers are always factory installed. Bar gangers are field installed.

**Flex gangers** can be used to easily link adjacent rectangular, trapezoid, and D-shaped tables in multiple configurations. Flex gangers use a flexible loop that engages a hook to hold two adjacent table tops in place. No tools are required to stretch the loop across the seam between two table edges and to connect it to the hook on the adjacent table. Loops that are not in use can be secured to a parking hook.

*Tip: Modesty panels would prevent gangers from being used on that side of the table.*

**Flex gangers** use a flexible loop that engages a hook to hold two adjacent table tops in place. No tools are required to stretch the loop across the seam between two table edges and to connect it to the hook on the adjacent table. Loops that are not in use can be secured to a parking hook.

End-to-end

**Gangers and hooks** are installed on the sides of the tables that are going to be joined. You can specify end-to-end, side-to-side, or end-and-side arrangements.

*Tip: Not recommended for ganging table tops with wood self edges.*

**Field-installed flex ganger packages** are available to add on site to tables with vinyl edges or self-edged tables with tops that are 1" - to 1¼"-thick. Specify one package for each seam.

Flex Ganger Package	Style Number	List Price	
		U.S.	Canada
Flex ganger for Ballet tables only (not for side-to-side ganging)	793365L	\$66	\$69

*Tip: Not recommended for ganging table tops with wood edges.*

**Bar gangers** use steel bars to join adjacent tables. One end of the bar is captured by the host table and allows the bar to pivot beneath adjacent table where it is captured by a threaded post with knob. Factory-installed threaded insert in underside of table top accepts the threaded knob. No tools are required to link tables with bar gangers.

End-to-end

Side-to-side (Not available on tables with modesty panels.)

End-and-side (Not available on tables with modesty panels.)

**Factory-installed bar ganger** inserts are standard on all rectangular Ballet tables to allow tables to be joined end-to-end and/or side-to-side. Threaded inserts are available as an option on Ballet tables with vinyl or self edges. Specify universal ganging when you order your tables. You must also order the appropriate number of ganger packages separately. Order one package for each pair of table edges that are going to be joined.

*Tip: Please send a drawing of your arrangement along with your order to ensure that gangers are properly installed.*

*Tip: Not recommended for ganging table tops with wood edges.*

**Bar ganger packages** are available.

Bar Ganger Package	Style Number	List Price	
		U.S.	Canada
Bar ganger for 1¼"-thick tops	793335	\$42	\$44

*Tip: Not recommended for ganging table tops with wood edges.*

**If your tables** are going to be used in a configuration that requires ganging, please send us a drawing or sketch so that we can give you exactly what you want.

**Wiring & Cabling**

**Vertical wire manager** is available to clip on to Ballet table leg to conceal power cords and voice/data cables routed vertically from the floor to the worksurface. Vertical wire manager is black plastic. ▶ See page 179

**Technology spider** is a cable-management version of the traditional spider that is used to attach a table top to a column. The spider provides clearance for power cords and voice/data cables to pass through the table top so that Interport modules, grommets, and spheres can be positioned directly above a table base.

**Grommets** are available factory installed. Locations are listed in the table below (left, right, center).

**Field installation** available. To specify, order the grommet and the table as separate items.

**Grommet** has 2"-diameter opening. Dimensions given are from the center of opening and are accurate within 1/4". Left, right, and center are from the user's perspective.

**Ballet K-Base**

(Grommets)	A	B	C
20"W	48"	3 1/2"	8 1/2"
	60"	3 1/2"	30"
	72"	3 1/2"	36"
	84"	3 1/2"	42"
24"W	48"	3 1/2"	8 1/2"
	60"	3 1/2"	30"
	72"	3 1/2"	36"
	84"	3 1/2"	42"
30"W	48"	6 4/25"	8 1/2"
	60"	6 4/25"	30"
	72"	6 4/25"	36"

**Ballet X-base grommets** are available for field installation. To specify, order the grommet and the table as separate items. Custom locations are possible.

**Spheres** are available factory installed (left, right, center). Locations are listed in the table to the right.

Four simplex power outlets

Two simplex power outlets and two data jack locations

Four data jack locations

**Field-installed sphere** is practical on many table tops. Order unit separately and cut the required hole in the table top on site. Installation instructions will be shipped with the sphere.

**Sphere** has 3"-diameter opening. Dimensions given are from center of opening and are accurate within 1/4" left, right, and center are from the user's perspective. Additional locations are possible. Contact Customer Service at 1.800.627.6770.

**Ballet K-Base**

(Spheres)	A	B	C
20"W	48"	3 1/2"	8 1/2"
	60"	3 1/2"	30"
	72"	3 1/2"	36"
	84"	3 1/2"	42"
24"W	48"	3 1/2"	8 1/2"
	60"	3 1/2"	30"
	72"	3 1/2"	36"
	84"	3 1/2"	42"
30"W	48"	6 4/25"	8 1/2"
	60"	6 4/25"	30"
	72"	6 4/25"	36"

**Ballet X-base spheres** are available for field installation. To specify, order the sphere and the table as separate items. Custom locations are possible.

*Tip: Custom locations are possible. Custom locations require an engineering review to confirm practicality. Please send a drawing to your customer service representative to show the locations you want, confirm practicality, and obtain a quotation.*

**Please** send a drawing of your arrangement along with your order to ensure that grommets and spheres are properly installed.

**Interport and Mini-Port** are available factory cut in custom locations. This process requires engineering review and additional lead time may be required.

*Tip: Send us a drawing indicating desired location(s). An additional charge may apply if the standard table design requires modification.*

Interport and Mini-Port are also available for field installation. To specify, order the Interport or Mini-Port and the table as separate items.

► See page 53 for additional information on Interport or Mini-Port.

**Interact** is available factory cut in custom locations. This process requires engineering review and additional lead time may be required.

*Tip: Send us a drawing indicating desired location(s). An additional charge may apply if the standard table design requires modification.*

► See page 60 for additional information on Interact.

**Power strips** are available as an accessory, ordered separately.

**Juice** requires engineering review and additional lead time may be required. Juice is field installed and ordered separately.

► See page 44 for additional information on Juice.

## Surface Materials

**Laminates** are available in two standard grades. Additional laminates from any manufacturer may also be practical—see below.

**Grade 1 laminates** include:

- Coalesse standard laminates
- See *Surface Materials Listing*, page 350.
- Steelcase standard laminates (code 290A)
- See *Steelcase Surface Materials Reference Manual*.
- Any standard-grade Wilsonart laminate in solid color, woodgrain, or pattern finish (code 290A)

**Grade 2 laminates** (code 290B) include any standard-grade, solid color, woodgrain, or patterned laminate from Nevamar (includes Matrix), Formica, or Pionite. Grade 2 laminates may have extended lead times. For details, contact Customer Service at 1.800.627.6770.

**Other laminates that** are not included in the Grade 1 or Grade 2 offerings may also be available, such as Abet Laminati and Laminart. To determine availability and pricing, contact Customer Service at 1.800.627.6770, with the laminate manufacturer's name and the name and number of the laminate you want.

**Laminate swatches** are reproduced in the Surface Materials Color Palettes in the back of the book.

**Swatch cards and actual samples of Coalesse standard laminates** are available from your Coalesse customer service representative. For samples of laminates from other manufacturers, contact them directly:

- Wilsonart  
1.800.433.3222
- Nevamar  
1.800.638.4380
- Formica  
1.800.FORMICA
- Pionite  
1.800.285.5161

*Tip: Laminate manufacturers change their offerings frequently. Always check availability before ordering.*

**Wood veneer table tops** are fabricated with Architectural Grade AA hand-selected hardwood veneer, plain sliced, book matched, and bonded to the core with a backing sheet for balance. Coalesse's primary wood finish, Clarity, is a waterborne UV topcoat, which protects the environment while providing exceptional durability and resistance to water and chemical stains. Due to natural variations in wood, finished products may vary from samples in color, texture, and grain.

**Wood** is a natural material; slight variations occur in veneer texture, color, grain configuration, and stain acceptance. Coalesse stains are all applied with an exacting regard for consistency and are well within traditional tolerances for wood products.

*Tip: Finished tops may vary slightly in tone or character from each other or from the samples Coalesse produces. No guarantee can be made of an absolutely exact match.*

**Wood veneer swatches** are reproduced in the Surface Materials Color Palettes in the back of the book.

► See *Surface Materials Listing*, page 350, for a list.

**Stains** applied to Coalesse wood veneer table tops are standard with the same stain color applied to both the top and the solid hardwood edge profile. Coalesse strives to produce a consistently high quality product and some natural variation in color is to be expected. This is especially apparent on natural woods which have no stain applied, for example 3525 Natural Maple. This color variation is normal and reflects the unique and natural properties of wood. This should not be considered a defect.

**Stain swatches** are reproduced in the Surface Materials Color Palettes in the back of the book.

**Swatch cards and actual samples of standard wood veneers** are available from your Customer Service representative.

**Additional wood veneer stains** are possible. Coalesse offers two programs to accommodate customers who need special stains—Stain-to-Match and Stain and Finish to Match.

**Stain-to-Match option** is a special Coalesse program that will match a wood stain sample that you provide. There is no additional charge for this service. You must supply a sample of reasonable size (3" x 3" or larger is usually adequate). Coalesse will formulate a stain, produce a matching sample, and send it to you for approval. When we receive your written approval, we'll schedule production of your order.

*Tip: Stain-to-Match will achieve a color match to the sample only. Graining of the wood veneer and final surface finish may differ from your original sample.*

**Stain and Finish to Match** is a special Coalesse program that can achieve both a color and a surface finish match for most customer-supplied samples. To determine feasibility and pricing, send us a sample of reasonable size (3" x 3" or larger is usually adequate) before you send us your order. If feasible, Coalesse will produce a sample showing the best possible match and send it to you for approval. When we receive your written approval, we'll schedule production of your order.

**Stain formulas for special stain color** matches are all retained in Coalesse's archives so that you can refer to them in future orders and skip the approval steps required for the initial order.

**Table bases** are available with textured powder coat colors. Refer to the individual product specifying pages for availability. Powder coat colors are shown in the *Surface Materials Listing*, page 350.

## Care & Maintenance

**Laminate and solid phenolic** should be cleaned with soap and water. For stubborn stains, use a non-abrasive household cleaner.

**Veneers** should be cleaned regularly with mild soap and water and dried with a soft cloth. To polish, use silicone-free household polishers. Use sparingly.

*Tip: Never use ammonia-based cleaners or wax on wood surfaces.*

**Powder coat finishes on table bases** should be cleaned with a liquid detergent and water. Remove stubborn stains with liquid cleanser, such as Formula 409.

**Polished aluminum finishes on table bases** should be cleaned with a commercial powder, liquid, or paste metal cleaner and polish. Follow the manufacturer's directions.

**Tables** should be inspected and maintained regularly by tightening screws and bolts, inspecting casters and glides for damage, and inspecting all moving parts for damage and wear.

# Ballet Rectangular Folding K-Base Tables

Tip: Shipped assembled.

Tip: When three grommets are specified, grommets will be located left, right, and center.

Tip: For sphere location availability see page 154.

Tip: If RJ11 or RJ45 data jack couplers are needed on PCS or CSP they must be ordered separately.

Tip: When specifying casters, height of table does not change.

Tip: For installation of Interport, Mini-Port, or Interact, submit a drawing indicating the desired location for a factory installed cutout. Field-installtion is also available for Interport and Mini-Port. All require the Interport, Mini-Port or Interact to be ordered as a separate item.

## Rectangular Non-Folding K-Base Tables

Tip: Shipped knocked down.

Tip: You must send a sample of reasonable size for Stain-to-Match.

Tip: If you specify a wood edge on a top with woodgrain laminate, the edge and top may not match.

Tip: When three grommets are specified, grommets will be located left, right, and center.

Tip: For sphere location availability see page 154.

Tip: If RJ11 or RJ45 data jack couplers are needed on PCS or CSP they must be ordered separately.

Tip: When specifying casters, height of table does not change.

Tip: For installation of Interport, Mini-Port, or Interact, submit a drawing indicating the desired location for a factory installed cutout. Field-installtion is also available for Interport and Mini-Port. All require the Interport, Mini-Port, or Interact to be ordered as a separate item.
