GLAZED THIN BRICK

FIRECLAY TILE

A Modern Take

Glazed Thin Brick available immediately in nine new and unique colors, with custom colors and sizes available on a per project basis. With both high recycled content and VOC-free glazes, Glazed Thin Brick qualifies for many LEED Credits and will complement any interior or exterior project, and is extremely well suited for commercial projects. Our Glazed Thin Brick can be used in all interior and exterior applications wherever tile or thin brick could be used, including wet areas. Glazed thin brick creates a hard, durable maintenance free surface, with colors and textures that can range from subtle to bold. Responsible, durable, high quality - just how glazed brick was always meant to be.

About Fireclay Tile

Founded in 1986, by our Chief Ceramicist, Paul Burns, Fireclay products have always been cherished for their stunning colors, limitless sizes and decorative shapes, and commitment to sustainable manufacturing. Today the company is a recognized leader in ceramic and glass tile with six different product lines suitable for almost every type of project. We are focused on being a triple-bottom line company, and we take our employees, our environment, and our long-term viability into every decision we make. We look forward to working with you!

- Rush orders are available.

CUSTOM OPTIONS

- Custom colors, sizes, and brick finishes are available. Please call or email with specific instructions so we can best evaluate the project.

CONSIDERATIONS

Please call to discuss specific application if you have questions.

MANUFACTURING INFORMATION

*McNear Brick & Block
Founded 1868*

- Glazed Thin Brick is manufactured by our expert team of ceramicists in Aromas, California 95004.
- The original brick production takes place by McNear Brick & Block in San Rafael, California, just 100 miles away. McNear's brick products contain 30-100% locally sourced post-consumer recycled materials from local excavation projects.

SUSTAINABLE DESIGN | LEED CREDITS

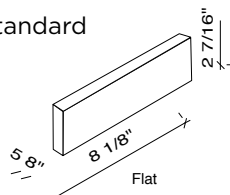

- McNear Thin Brick is made from 30-90% locally sourced, post-consumer, recycled materials from surrounding excavation projects. In addition, glaze materials are 100% lead free.
- Glazed Thin Brick may qualify for MR 4.1/4.2: Recycled Content (1 to 2 points), MR 5.1/5.2: Regional Materials (2 points), EQ 4.2: Low-Emitting Materials (1 point), MR Prerequisite 1: Storage & Collection of Recyclables Required (1 point).
- Fireclay ships products in recycled cardboard boxes and on recycled pallets or crates. We use recycled sawdust, biodegradable peanuts, or other recycled materials for protection.
- Glazed Thin Brick is substantially lighter than traditional glazed brick, resulting in potentially an 85% cost and emissions reduction when it comes to transporting glazed thin brick.

INSTALLATION | BRICKFAST & PRECAST PANELS

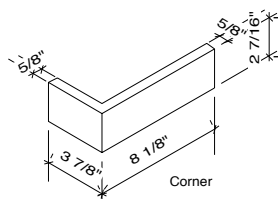

- Glazed Thin Brick should be applied with 3/8" mortar joints, with 5.9 pieces per sq ft for Standard size.
- Many glazed thin brick projects may require tighter joints or butt joints, so please measure and order accordingly.
- McNear's Brickfast panel system is an innovative new way to quickly install thin brick. All thin brick can be ordered to work with the Brickfast system.
- All of McNear's Thin Brick can also now be used in Precast Concrete Panels.
