## TECHNICAL DATA

META by Simon Pengelly

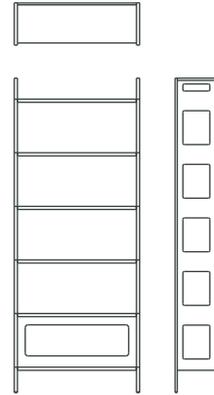

A versatile modular shelving system produced from folded and punched sheet steel and finished with a powder coat. Available in three heights, the width can be extended as far as required by adding additional bays (add 864 mm per bay). Assembly is quick and easy, the components use an innovative Dutch fold which enables the shelves to be clicked together without the need for fixings. The system can be wall mounted or free standing with aluminium legs and adjustable feet.
