

SECA DS

Seca produces a signal-like effect created by its geometric aperture. The round brushed stainless steel faceplate is offset from the wall to create a corona around the illuminated fixture for additional effect. Matte acrylic lens is flush with the face for a clean look. Faceplate may be oriented horizontally or vertically for a choice of appearances. Spun aluminum housing mounts into spun aluminum backbox, suitable for through wiring. Hardware is stainless steel.

Model	Mounting	Lamp
SC235DS	Recessed Wall	18 CF
