

CATANIA G 3

CATANIA G
Pendant Luminaire

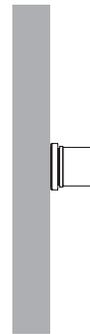

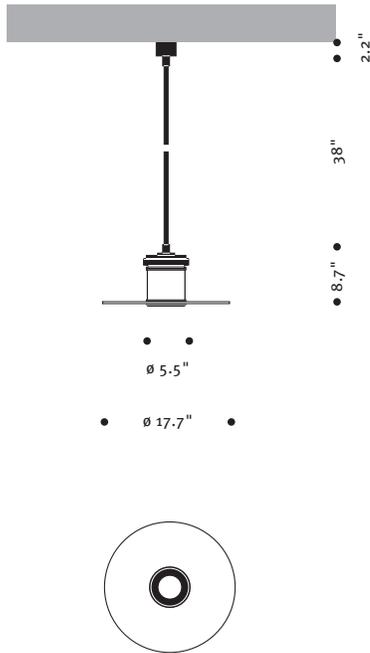

CATANIA's housing elements are precision-machined from billet aluminum, then satin anodized for a clean understated look. Stem and canopy are satin anodized for a coordinated appearance. The translucent acrylic cylindrical lens creates a soft

ambiance, while the acrylic disk produces a subtle glow. Prismatic end lens adds an illuminated focal point. Optional flashed opal end lens totally conceals the lamp image. All hardware is stainless steel. A 24" disk is optional. Custom pendant lengths are

available. See technical data sheet for details.

 Listed for Damp Locations

| Model | Mounting | Lamp |
|--------|----------|---------------|
| CT160P | Pendant | 18 CF / 13 CF |
