Infinite Furniture System

Designer:
Davide Tonizzo

A public and modular seating system that can be easily arranged and rearranged to respond to the changing needs of any environment.

- Molecule's two components consist of a cylindrical upholstered seat and freestanding, contoured backrest finished in wood veneer with an upholstered top or Corian pad.
- Unique soft linking system can be easily connected to create dynamic seating layouts.
- The simple elements of Molecule can support sitting, working and relaxing.
- An optional plywood tablet is available to accommodate work and play applications.
- Molecule is ideal for public spaces such as hotel lobbies, libraries, schools - work/study areas, bars/lounges, transportation lounges, pediatric wards and retail environments.
- Work applications include office training, breakout sessions and casual work areas.
- Upholstery options include: vinyl, faux leather, leather and woven textiles.
