MAINTENANCE INSTRUCTIONS FOR: BIO-MASS WALLCOVERING

Cleaning Code W: Clean only with water-based cleaner. Do not over wet surface

This Bio-mass wallcovering contains a stain-preventative film coating produced from corn.

- All stains should be blotted out as soon as possible with clean water, and a soft absorbent cloth (white) or clean sponge.
- A mild detergent solution with warm water can be used for ordinary dirt and smudges. Be careful not to flood the surface.
- A sponge or soft bristle brush if necessary to remove dirt from this product.
- Most stains and marks can be eliminated with water-based household cleaners.
- Consult with a professional cleaning service for more difficult stains or when overall cleaning is needed.

Do not use solvents based cleaners, and never use abrasive cleansers, sharp objects, or steel wool as they can permanently ruin the surface.
