TANGENT

The age of mobility has arrived. Freedom of movement has grown from a benefit to a fundamental aspect of modern lifestyles. With that mobility, the demand for versatility has risen. Loewenstein introduces Tangent, a modular lounge that promises to change the way we view seating. Conceived as a versatile solution, Tangent is a new breed of modular seating, which allows for limitless variations and supports collaborative work whenever it occurs.

CONTEMPORARY AND QUIET

Tangent gives designers a tool to customize spaces, large or small. Straight lines and simple design permit Tangent to become the signature element within a design or to remain a quiet complement to other accents.

Clean and contemporary by all appearances, there is great attention to detail in Tangent's proportions. Ideal for multi-use applications, Tangent offers varying levels of privacy, and allows you to customize the appropriate amount of interaction.

FLEXIBLE AND FUNCTIONAL

Whether perched on the back of the lounge, relaxed with feet outstretched, or engaged in conversation on the edge of one's seat, Tangent fits. Likewise, the width of the back and corner pieces are configured to maintain a sense of personal space from side to side, but aren't so wide as to discourage interaction.

For designers of hospitality, education, medical, or commercial use, Tangent is a solution to multiple challenges. With the ability to function as a chaise, loveseat, end table, and ottoman, it offers a wide variety of seating within a limited square footage. Configured as one unit, Tangent can accommodate

more individuals within that same square footage than using traditional pieced seating. Designed for high-traffic spaces, Tangent is simple in concept and offers extensive versatility.

A simple composition of ottomans and backs, Tangent operates like a refined system, snapping easily together or apart through a series of plugs disguised as upholstery buttons. Two wall height options available for varying levels of privacy.

Multiple electrical port options positioned to power up with ease.

Overlay tables provide hard surfaces for beverages or writing without taking up additional floor space.

22" and 33" cushion options allow for additional comfort or just to add a pop of color.
