100% Wool Design Felt

June 2011

FilzFelt carries German-milled 100% wool design felt in 54 Pantone-Matching System (PMS) colors and five thicknesses. Wool felt is the ideal choice for wall panels due its inherent texture, sound absorption as well as thickness and density that allow the panels to hang freely without backing or additional support. We are pleased to offer perforated panels in two standard sizes as well as custom panel options to fit each project's needs. Custom panels are limited only by your imagination - add color and pattern (even your company logo) to brighten up a space while improving its acoustics.

Custom Patterns and Sizes

FilzFelt can work with your company to produce custom panel sizes and designs. The maximum width of each panel is 68.9" for 2mm, 3mm and 5mm felt and 60" for 8mm and 10mm thick felt. The maximum length for 2mm, 3mm and 5mm felt is 71-80 lin feet and 8mm and 10mm is 51 – 56 lin feet. The minimum allowable size of perforation is 1/8" of an inch in diameter and maximum size of perforation is 3 inches in diameter. For structural purposes, spacing between perforations should not be smaller than the size of the perforation.

Characteristics of Wool Felt

- Non-directional
- Highly saturated, lightfast and saliva-resistant colors
- Naturally hydrophilic and water resistant
- Can be cut with an unfinished, raw edge
- Self-extinguishing and inherently flame-resistant
- Thermal and acoustic insulation
- Sustainable, biodegradable, renewable

Flammability

FilzFelt panels are made from 100% wool and are naturally self-extinguishing. FilzFelt felts have undergone ASTM E84 Surface Burning Characteristics of Building Materials testing for architectural finish applications. Unadhered undyed wool felts (natural) carry a Class B rating and dyed wool felts (uni-colored and melange) a Class A rating. Complete test results are available upon request and for additional test results, please refer to our Summary of Test Results document.

Custom Colors

Many of our felt colors have been dyed to match the Pantone Matching System (PMS). However, not all colors in the Pantone system, or the universe, are available. There is an 82 linear yard minimum required for custom colors and there will be a 6-8 week lead time from time of sample approval. Expedited shipping is available at additional cost.

Minimums

FilzFelt requires a minimum of 2 small panels per color or 2 large panels per color.

Lead Times

Each panel is made to order in Germany and ships from our Boston, USA location. Depending on availability and production schedules, orders have an 3-5 week lead time.

Prices are stated in U.S. dollars and exclude shipping and handling. Please note that prices are current as of June 1, 2011 and are subject to change. For more information on us and our wool felt, visit filzfelt.com or call 617.391.6230.
