

Teknion dna

Teknion

Teknion dna overview

Teknion dna™ is a collection of modular lounge seating and tables designed to expand the functional repertoire of lounge seating. Traditionally, the office lounge was located adjacent to the reception desk and intended to serve as a waiting area for visitors. Employees rarely used the space. In the contemporary

office, the lounge often functions as a space for collaborative work and requires furniture that provides greater flexibility and easy access to power and communications. dna is designed to support collaborative work wherever it occurs throughout the office.

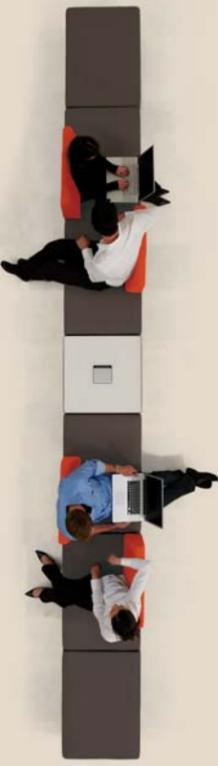

TEKNION dna ATTRIBUTES:

- Modular design allows units to align on all sides
- Versatile components can be reconfigured by users as needs change
- Ideal for multi-use applications in a mixed plan, including open spaces and enclosed rooms

DESIGNED FOR THE ENVIRONMENT

- GREENGUARD® Certified for Indoor Air Quality
- Level E3 Certified
- Modular design allows reconfiguration and reupholstery of the seat, bolster and table sides, extending the life cycle of the furniture
- Sustainable upholstery options are available

multiple clusters

Linear configurations divide the floor plate and offer multiple seating for side-to-side collaboration. Integrated tables offer technology support.

Open plan clusters illustrate the benefits of movable bolsters. Back-to-back positioning defines individual territory or shared space, while integrated and freestanding tables support laptops and other work tools.

Low-profile clusters permit multi-directional access with benches connecting on all sides of the table.

More traditional configurations function as reception or casual meeting spaces by combining dna seating with coffee tables, which provide a surface for working and displaying materials.

For applications that require a central focus — such as group presentations or media-based meetings — dna seats multiple participants while accommodating technology and laptop support.

Repeating clusters provide 360-degree access to seating and interaction with central technology support.

Modularity

dna maximizes planning options with minimal inventory. Its unique modular design allows units to be aligned to each other on all sides.

- dna can be arranged in multiple directions, connections and configurations
- Units are easily reconfigured to accommodate large or small groups and changing activities
- Integrated and freestanding tables provide support for work and laptop use
- Integrated tables provide access to power/data
- All components (except the side table) function as standalone furniture

TABLES: Surfaces – Compact Laminate, Storm White

Versatility

Simple in concept, dna offers extensive versatility that enables tailoring a space for required functions and desired aesthetics. dna also supports technology requirements with optional power/data access.

SEATING FEATURES

- Optional bolster repositions left, right or center, enabling user reconfiguration
- Bench and bolster can be upholstered in different fabrics, allowing unique and customized upholstery treatments
- Units feature a beveled edge on all sides of the seat surface
- Cut-outs in base facilitate power and cable distribution
- Optional linking capability keeps seating stationary when routing cables
- Seating units can be fastened to the floor if required
- Non-linked units can be repositioned without tools
- Glides adjust up to 1 inch, providing leveling capabilities across longer spans

TABLE FEATURES

- Integrated tables include Square Table and Side Table
 - Optional power/data module is available
 - Cut-outs in base facilitate access to power and cable distribution
 - Surfaces are available in Compact Laminate, Flintwood or Natural Veneer
 - Sides are fully upholstered
 - Glides adjust up to 1 inch
- Freestanding tables include Laptop Tables and Square/Round Coffee Table
 - Laptop Tables flip and nest for compact storage
 - Surfaces are available in Compact Laminate, Flintwood or Natural Veneer
 - Table bases are available in Polished Aluminum or painted

Mixed planning

dna re-imagines the form and function of traditional lounge seating to address the emergence of new collaborative work styles. Today, meetings happen anywhere. Collaboration occurs spontaneously, requiring fluid spaces that allow people

to meet and share information easily. dna is ideal for mixed plans that include open, informal collaborative settings and multi-use lounges among a variety of spaces designed to foster interaction and collective creativity.

Flintwood, Blonde Maple

^
Users can position the optional bolster center, left or right. The bolster also secures in place with a lock option.

^
Seating units upholstered in leather feature seam stitching applied to the top of the seat.

^
Laptop Tables provide a casual worksurface to accommodate the use of a laptop and mouse. Table tops flip and nest for space-saving storage. A handle permits easy mobility.

^
Veneer table surfaces are offered in Teknion's Flintwood and Natural Veneer stains, applied on a laminated Birch ply substrate with an exposed straight edge.

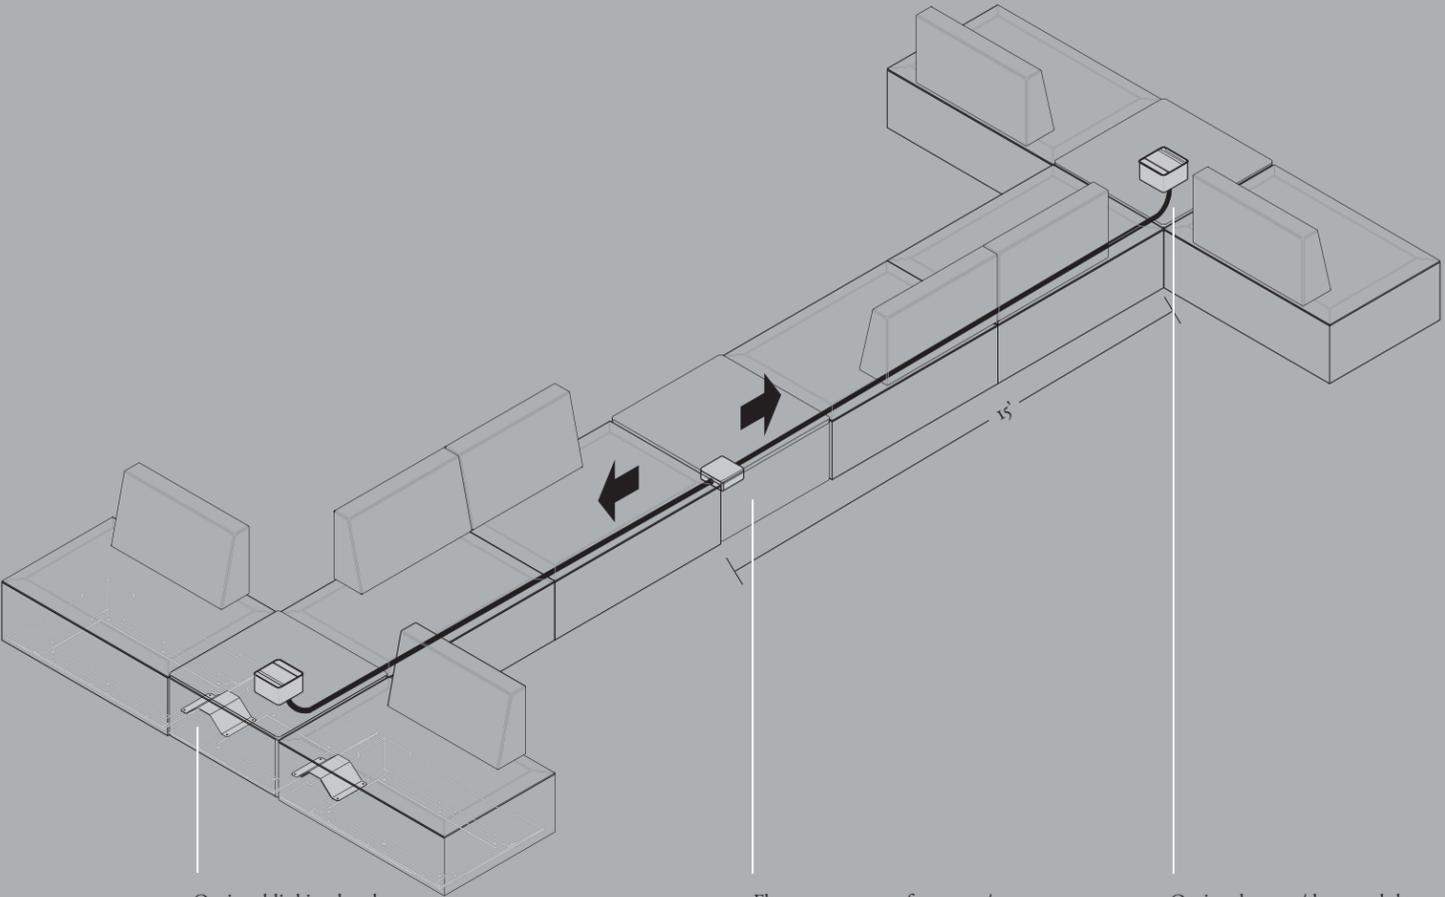

^
Laminate table surfaces are available in Compact Laminate with a distinct black edge. Compact Laminate offers the performance characteristics of high-pressure laminates with a thinner profile.

^
A flush-fitting Data/Electrical Module is optional on Square and Side Tables. The retractable door allows outlets to be used with the door opened or closed.

Power/data management

At a glance

Optional linking brackets prevent components from moving when routing cables

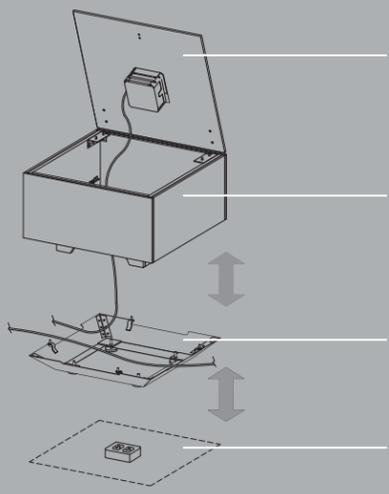

Option to fasten units to the floor is also available

Floor monuments for power/data access can be located under any unit

Cords are routed to the tables through the seating and table base frames

Power can be routed in any direction

Optional power/data modules include a 15-foot cord length

Square/Side Tables feature a lockable hinged top for routing power/data cords

Seating and table units detach from the base to allow easy routing of cords through the base

Multiple cords can run through each base up to a span of 15 feet

Seating and table bases are open, allowing units to sit over floor monuments
