

DESCRIPTION

City is an urban and dynamic project that allows us to personalize each composition from only one design for the structure but with different proposals for backs, seats and legs. These variations create three collections: Soft, Casual and Compacto.

City Soft: the seat cushions have a medium density and each module incorporates some soft back cushions. The result is a pre-defined modular and, mainly, it is conceived for the home.

City Casual: the seat cushions also have a medium density, but, in contrast to the Soft collection, the back cushions are not pre-defined. The idea is to deconstruct the back concept and to lighten it with a free-style. The backs of this Casual collection can be customized, that is, as many cushions as desired can be chosen.

City Compacto: this is a perfect option for contract projects and for any space. Its seat and back cushions have a high density in order to maximize its durability and minimize the need for maintenance of cushions.

Any of these three models can have stainless steel or wooden legs. The wooden legs are 3.5cm high and bring the seating down to 38cm from the floor. The stainless steel legs are 9.5cm high and make the seat 44cm from the floor.

TECHNICAL DATA

Solid wooden structure covered with foam and fibre with felt.

The seat and back structure are fitted with NEA webbing.

The inner seat cushions are made with HR Ultracel foam with different densities.

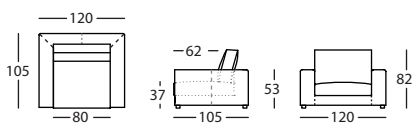

The inner back cushions are made of silicon polyester microfibre.

The covers are 100% cotton.

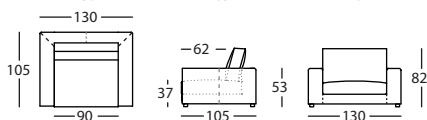

It has satin stainless steel or beech feet stained wengue.

All versions can be upholstered in fabric, leather or synthetic leather. Fabric combinations have fully removable covers, and with leather or synthetic leather, only the cushion covers can be removed.
