

## DESCRIPTION

The idea of a wooden arm surrounding the seat and giving shape to the entire structure has given rise to a collection of armchairs created to be adaptable in various settings, and in among other pieces, thanks to its reduced dimensions. This small armchair offers three options: fully upholstered; with wooden arms and seat base just above the floor; and with wooden arms and the seat suspended –25cm above the floor.

## TECHNICAL DATA

Solid wooden structure made with HR foams of different densities.

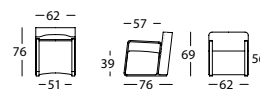

Seat structure fitted with NEA webbing.

Solid ash feet and arms.

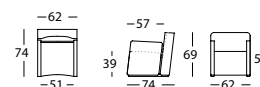

Low density polyethylene glide.

Upholstered fixed structure.
