

## DESCRIPTION

Lineal has a horizontal concept: starting with a straight and shallow base, Rafa García superimposes the rest of the elements. The arms are dense and are internally joined to the base. The seat comprises just one cushion along the entire structure. The back is integrated with the back cushion in just one piece. The lumbar cushion increases the comfort of a design with low back. Moreover, Lineal offers the option of adding extra back cushions.

The upholstered tables can be used separately, but also serve both as a separation between modules and as a corner piece. The collection also includes a distinctive two-seater pouf.

## TECHNICAL DATA

Solid wooden structure covered with foam and fibre shell.

Seat structure fitted with NEA webbing.

The inner arms are made with foam of different densities.

The inner back cushion is filled with silicon microfibre in compartments.

The inner seat cushion is made with HR Ultracel foam of different densities.

The lumbar cushions are made with thermofused polyester fibre.

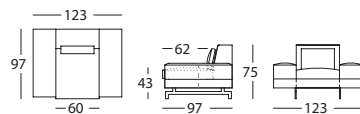

The inner covers are 100% cotton.

The table has a solid wooden structure covered with foam and an MDF lacquered top.

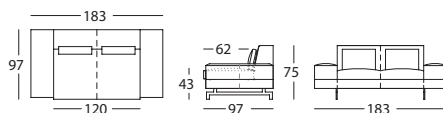

It has F-1 steel feet in grey.

Lineal is suitable for upholstery in fabric, leather or synthetic leather. The fabric version has fully removable covers; in leather or synthetic leather, only the cushion covers can be removed.
