

STEEL

(Designer P. and M. Cazzaniga)

all dims

A table with a monomaterial finish, completely clad with a powder-coated plate, available in the following colour options: manganese black, white, dark sand, grey, beige, red, green and orange.

A patent from MDF Italia (Patent pending).

Tabletops

The 43 mm thick tabletop is a composite board made up of an inner steel frame, and a filling in polystyrene. All clad, both on the edges and on the top, with a powder-coated plate with a goffered finish.

Legs

Also the legs, made of steel (section 40x40 mm) with a structural tensioner, are clad with a powder-coated plate in the same colours of the top resulting in a stunning monochromatic and, above all, monomaterial finish.

Adjustable feet.

Height 75 cm.

Outdoor use

Tables, when properly treated, are suitable for outdoor.

Any material left outside, even if properly treated, can have superficial molecular and colour changes during its lifetime. Of course, the amount of alterations is directly related to the amount of exposure to weather and to the geographical area (for ex., high humidity and/or salinity). Regular maintenance, for instance periodic cleaning with water, increase resistance to corrosion.
