# TENSE
(Designer P. and M. Cazzaniga)

*XXII Compasso d'Oro ADI
special mention*

A table with a mono-material finish, featuring exceptional dims thanks to its tension capability.

Thanks to a considerable technological innovation the top can reach large sizes, while levelling and lightness are guaranteed.

In 23 size options, they are available also in the equipped version with one or two openings for cable management provided with undertop cable trays.
The opening for cable management comes in white lacquered aluminium.
Dims: 350 or 420 mm.
The undertop tray comes in bent sheet in the same colour of the top.

Tops
The tabletop, 35mm in thickness, is a board of composite material made up of an inner frame in aluminium sections, a filling in polystyrene, two aluminium sheets: all clad with a 3 mm thick plate of acrylic resin and white rock minerals, both on the edges and on the top.
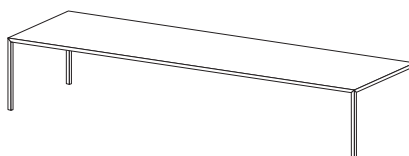

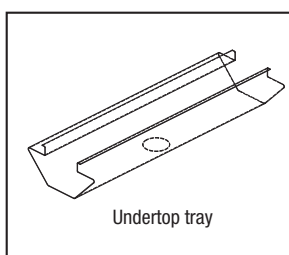

Legs
Also the legs, made of steel (section 35x35mm) with a structural tensioner, are clad with a plate of white acrilyc resin resulting in a stunning monochromatic and, above all, mono-material finish.

All tables come in height 73cm.
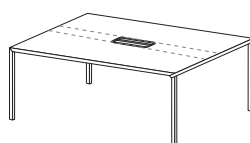

No special sizes available.

Accessories
Steel spring to be fitted into the corresponding holes every 50 cm in the lower part of the undertop tray for wire connection from floor to top.
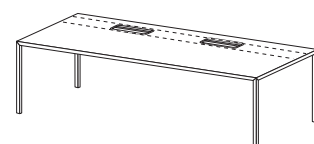

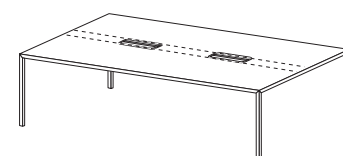

Undertop tray

standard version

with one or two lateral openings for cable management in size 350 mm

with one central opening for cable management in size 420 mm

with two front openings for cable management in size 420 mm

with two central openings for cable management in size 420 mm
