

EXT-TABLE

(Designer B. Fattorini)

Extendable tables in two versions:

- with an aluminium frame
- monochromatic.

The extension tops, in standard size 60cm, are housed into rails (undertop), and, when used, rest on these by means of automatic fastening devices. (fig.A).

You can have just one extension at one end (fig.B) in the size 140cm (+60) and 180 (+60), or extensions at both ends (fig.C) in the size 200cm (+60+60).

Height 72cm.

Section of legs: 45x45 mm.

To extend the frame you need to pull out the bridge laterally, two levers on the undertop rails allow to lock the push-in and pull-out operations.

VERSION WITH AN ALUMINIUM FRAME

Frame and legs in anodized or polished aluminium.

9 mm thick tops in white HPL or LG HI-MACS, solid surface in white. Both the top and the extensions come in the same material. For LG HI-MACS technical specs please see on page 4.50.

LACQUERED VERSION (MONOCHROMATIC)

Frame and legs in goffered matt lacquered aluminium in white, medium grey, anthracite or red.

Tops in plastic laminate in the same colour of the frame.

Both the top and the extensions come in the same material.

top dims cm	extension
90 x 140	90 x 200
90 x 180	90 x 240
90 x 200	90 x 260/320

MATERIALS

CRISTALPLANT® for Flow Low Table • S Table with white stand

TECHNICAL SPECIFICATIONS

CRISTALPLANT® is a unique highly-advanced composite material made up of a high percentage of natural minerals (ATH derived from bauxite) and a small percentage of extremely pure polyester and acrylic polymers; thus it is an inert hypoallergenic and non-toxic material.

CRISTALPLANT® is a 100% made-in-Italy solid surface.

CRISTALPLANT® is 100% recyclable, fireproof (class 1), with a high UV resistance; it is compact and non-porous, hygienic and with a soft texture thanks to its velvet finish similar to natural stone.

CRISTALPLANT® is 100% restorable, ie it can be brought back to its original condition simply with a detergent and an abrasive sponge (also cigarette burns can be removed). Its characteristics of durability and restorability make it eco-compatible.

CERAMILUX® for Flow Low Table • S Table with black stand

TECHNICAL SPECIFICATIONS

CERAMILUX® is a material composed of natural minerals (calcium carbonates and aluminium trihydrates) and polyester resin. The gelcoat film coating the surface of the material is made of a highly-resistant acrylate polyester.

CERAMILUX® shows a good resistance to shocks and stress, to bending stress, tractions and compression: this allows it to obtain certain thicknesses without the support of other materials, thus creating self-supporting products.

CERAMILUX® is a high-quality material with an excellent resistance to shocks,

sudden changes of temperature and to wear, typical of the home environment. Good resistance to chemical agents and sun rays. In the event of serious damages, such as persistent stains or deep scratches, its former finish is restored simply by using fine abrasive paper and polish.

KERAMIK for tables and coffee tables: Keramik • Lim 04 • Desk • Edgar II • Ra 07 • T Table

TECHNICAL SPECIFICATIONS

Laminated ceramic features uniquely peculiar technical characteristics thanks to the innovative methods of ceramic treatment and production (laminated-porcelainized thin gres).

- Extreme surface hardness (comparable to topaz) and high bending strength.
- Resistant to stains, water, detergents and acids.
- Not inflammable, reaction to fire: class 0.
- Inalterability of the chromatic characteristics.
- It doesn't release toxic substances and there is no warping if heated with open flame

CATAS TESTS PERFORMED ON CERAMIC

- fastness to light UNI 9427/89
- resistance to cold liquids EN 12720/97
- tendency to hold dirt UNI 9300/88 and FA276/89
- scratch resistance UNI9428/89
- reaction of surfaces to detergents PTP53/95

Other tests related to technical characteristics:

- fire resistance, wearproof, hardness resistance, abrasion resistance and water absorption resistance

MATERIALS

LG HI-MACS for tables and coffee tables: Desk • Lim 04/Lim 04 Extra • Lim 04 Extension T • Colors/Colors Extra • Colors Extension T • T Table • Ext-Table

TECHNICAL SPECIFICATIONS

75% of LG HI-Macs is composed of natural minerals and very fine acrylic, mass-pigmented in Alpine White. The most advanced production process ensures the highest quality of the surface and high technical performance.

Technical specs:

- It does not absorb: it is non-porous and extremely resistant to stains
- Its colour does not change over years
- It is ecological and hygienic thanks to the acrylic resin
- Easy to clean: no special care is required.

For everyday cleaning, simply use a damp cloth and a soft cleanser.

Tougher stains can be removed using bleaching agent (apply just for 5 minutes and then rinse with a domestic all-purpose cleanser and water); stubborn stains, scratches and small cigarette burns can be removed with an abrasive creamy detergent.

LG HI-Macs is manufactured under the best environmental and quality certifications (ISO 9001 and 14001).

PaperStone® for Yale Low Table

TECHNICAL SPECIFICATIONS

PaperStone® is a composite made from 100% recycled paper and petroleum-free, water and vegetal oil-based resins. It has no-detectable formaldehyde.

Paper and natural resin composites have a high resistance to tensile stress, compression, impacts and bending stress, abrasion, acids, and fire. In addition, they do not absorb water.

PaperStone® is stain-resistant and easy to clean with a standard household cleaner.

It also has a natural look and a warm touch, comparable to stone.
