Orta

The Multifaceted Marvel.

Seat.

The Orta series is available with comfortable seats in a choice of materials: black nylon, plywood or upholstered. The seat made from injection-molded polyamide does not show wear-and-tear with use and age. It is also less subject to ultraviolet rays.

The finely detailed contoured wood seat is available in beech and maple.

Comfort is enhanced with fixed upholstery or removable fabric covers. Fixed upholstery is offered with stacking protector to assure convenient stacking.

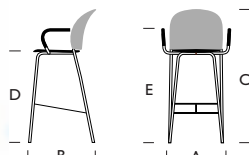

The perfect complement.

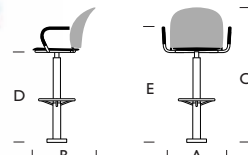

The stool (2350/2352) and the floor mounted model (2340/2342) may be combined with other Orta models for design continuity. The floor mounted base with 360 degree swivel automatically returns to the forward position when vacated.

With optional adjustable foot-rising available.

Both models are offered in arm or armless versions.

Backrest.

The flexible, breathable backrest creates comfort, support and a visual stimulus with its use of a unique mesh material made of Trevira. The pliable strength of this material and its capabilities to withstand cleaning make it a natural for high traffic areas. Removable fabric covers for the backrest increase adaptability.

Ganging.

Ganging devices are available for arm-to-arm, arm-to-armless, and armless-to-armless connections. The final touch for effective guidance at events: removable, magnet based seat numbering.

Practical.

The tablet arms enhance the chair's versatility.

Convenient stacking.

Orta chair (2310) stacks ten high, with arms (2312) seven high. Chairs may be stacked 16 high on the trolley for ease of transport and storage. The cantilever chair can be stacked four high.

Outdoors.

Thanks to high quality weather-proof materials, Orta is attractive also in the outdoors. For outdoor applications following options are available:
The weather-resistant polyamide seat, nonfading mesh back in 7 colours, steel frame galvanized, powder coated in dark or light aluminium.
