The Mobile.

«In case of a highly versatile table program, the mobility of the individual piece is of prime importance.»

The Brilliant.

Mobile.

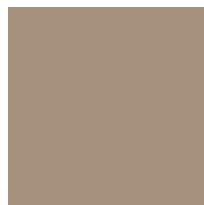

The tables are light so that they can be quickly put together in other combinations. And, of course, the different sizes match perfectly.

Stackable.

There is hardly any table system that is so easy to stack. Up to five tables.

D 96-60 Shadow
NCS S 5005 Y50R

D 475-60 Baltic Sea
NCS S 4030 R90B

D 456-60 Café Crème
NCS S 1010 Y20R

Brightly coloured.

The table top is available, as standard, in three fashionable basic colours matching perfectly the colours of the Dietiker chair collection. Also available in Dietiker standard colours.

Link.
The Stackable.

It is so light that it allows stacking up to five tables. Its table top with a honeycomb core is so solid that it resists almost everything. The simple combination of the table top and the table legs in steel tube conveys an eye-catching elegance. With its different, matching sizes and the refined coupling, Link offers, table by table, a unique combination variety.

It is brilliantly simple or simply brilliant.

Link.

The Coupling One.

Aluminium consoles asymmetrically arranged attach the table top to the legs. A unique combination by Dietiker guaranteeing highest quality.

Solid.

The table edges are covered with black ABS resin.

Make two out of one.

Individual tables are put together by lifting them slightly.

Accurate.

The integrated coupling units ensure an accurate and smooth linking.

Light as air.

The table top is made of a 30 mm thick, airy honeycomb core panel, covered on both sides by MDF and by synthetic resin on the top.

Combination variety.

The different sizes allow combinations in various shapes.

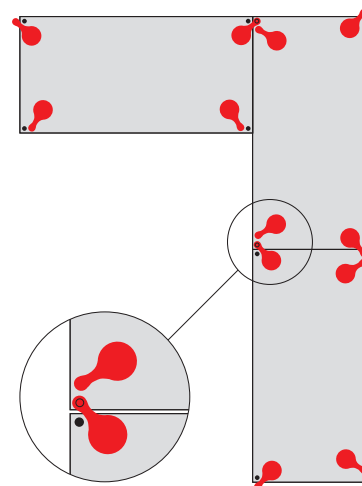

Table 5400 Link

Single leg table construction with especially arranged legs,
