Rift

designed by David Allan Pessa

Modern, linear, and minimalist signature casegood platform with architecture that emphasizes the honest and rational expression of materials and functionality.

- Complete private office solution with open plan benching and collaborative solutions.
- Sophisticated table desk has integrated sit/stand mechanism.
- Materials: tech-grain veneer, steel, aluminum, glass, paint, and textiles.
- Special details such as box file and file drawer behind single drawer face.
- Proprietary hardware.

RIFT was designed using DfE (Design for the Environment) protocol to minimize the environmental impact.

- Integrated power/data connections.
- CPU, printers, and parallel support equipment.
- Overheads and towers available in single and double heights.
- Sliding glass and painted door options available.

- Open collaborative spaces available with floating appearance.
- Benching units with cushion and storage.
- Mobile ottomans store in benching units.
- Integrated TV units retract into case with power-lift mechanism.

Area

designed by John Stafford/Chris Carter Design, LLC

Modularity, flexibility, and functionality...all describe the design concept of AREA.

- Circular units with table tops.
- Benches with a variety of cube tables.
- Tablet, caster, and handle options allow for collaborative mobility.
- Coordinating freestanding wooden cubes include flower vases, magazine holders, and storage units with glass doors.

Posh

designed by John Stafford/Chris Carter Design, LLC

A design for any decor...POSH offers exquisite clean lines and crisp detailing.

- Optional channel back stitching detail creates a signature design.
- Variety of arm options available: armless, adjustable t-arm, urethane, and upholstered.
- Mid-back version for mid-management or conference applications.
- Bases are available in aluminum or black powdercoated finish.
