LIGHT FINISHES

Light finishes do not hide or mask the natural characteristics of wood. Thus, the inherent natural variations and characteristics of the wood will vary from piece to piece when using light finish colors. Natural characteristics will include tree growth markings, discolorations and grain pattern inconsistencies. DECCA is not responsible for natural variations.

FINISHES

The DECCA finishing process is a unique procedure that has been specifically designed for DECCA. Each product goes through a 27-step process that is designed to provide an elegant aesthetic appearance and a high level of durability. The multiple sanding and oven drying procedures create a rich color and patina while the modified polyurethane topcoat protects the worksurfaces from daily wear and tear.

WOOD CARE AND MAINTENANCE

The finishing process used by DECCA ensures a durable finish on all our products. Dust only with a clean, dry cloth, going with the grain. Clean any marks with a damp cloth, using a small quantity of mild soap or detergent. Do not use any waxbased polish, petroleum based sprays or silicone. Do not place your furniture in a position of permanent exposure to direct sunlight.

Wood is a natural product with inherent color variations, the finishing process will never fully mitigate those variations. Please anticipate variation in colors within a single unit, or from piece to piece. DECCA wood finish samples will also exhibit variations. If a strict color match is required, a sample must be supplied with the order and an upcharge may apply. Exact color matches will not be possible.
