

FULLY UPHOLSTERED ARM
Combination upholstery (more than one upholstery cover within the same unit) is an option on all Jordan upholstered products. Pricing for this option is the grade price for the highest grade upholstery selected. If the upholstery covers are the same grade, or are COM, a 10% upcharge is applied to the graded price.

WOOD ARM WITH URETHANE CAP
The optional arm cap provides enhanced durability and protection for the arms. It is field replaceable if it becomes damaged or degraded.

WOOD LEG
The attractive and durable wood leg is made from solid hardwood, and like other wood components on Jordan products, is finished with an antimicrobial formulation that helps to prevent the formation of fungal growth and bacteria.

WOOD ARM
The arms of Jordan seating have been carefully designed for ingress and egress, with a rounded, easy-to-grip size and shape, and a forward height incline that supports the sitter's movement and body weight as they move into and out of the chair.

WALL SAVER
The angle of the back and the rear legs are designed to keep the back away from the wall, to prevent wear and damage to both the chairs and to the walls of the facility.

CASTERS
3" casters are available Jordan Sleeper and feature four soft wheels, which lock and include an easy access foot activation and release lever.

Jordan is an extensive collection for healthcare and other intensive use environments - please reference the other Jordan brochures to see Guest and Bariatric Seating, Lounge Seating, Multiple Seating and Tables, Patient Seating, Recliners, and Gliders.

	1 Seat	2 Seat	
W	35.5"	55"	Width
D	34.5"	34.5"	Depth
H	36.5"	36.5"	Height
SH	18"	18"	Seat Height from floor
WA	29"	48.5"	Width between Arms
SD	20.5"	20.5"	Seat Depth

NOTE: For both 1 Seat and 2 Seat Sleeper.
Chaise position depth (D) is 60.5". Bed position depth (D) is 79.5".

Krug Healthcare Solutions is dedicated to the design and manufacture of innovative, highly functional, durable and exceptionally attractive furnishings for healthcare and other intensive-use environments. We are focused on evidence based-design, through research and collaboration with healthcare interior designers, facility managers and caregiving professionals. We take intense pride in the quality of every piece we make, building on a legacy of customer satisfaction that began in 1880. We have committed the company to achieving environmental sustainability, with the extensive use of recycled and recyclable materials, certified woods, a recycling program throughout the company, and GREENGUARD™ certification of our products. A complete summary of our environmental program can be obtained from your local Krug representative.

JOR6-SL1WOD1

Jordan seating and tables have become an industry benchmark for healthcare environments -and now with the Jordan Sleepers, we are taking sleep seating products to a new level. It was only after several years of in-depth research and learning from healthcare professionals and specifiers, and after studying the competition closely, that we began the design of the Jordan Sleepers - and we were determined to create a truly exceptional product that provides real solutions to the challenges faced every day in care-giving environments.

FEATURES:
High Durability Mechanism
Field-Replaceable Upholstery
Field-Replaceable Components
Antimicrobial Finish
Multiple Arm Options
Life Time Warranty
GREENGUARD™ Certified
Wall Saver Design

It was quickly apparent that the greatest challenge facing healthcare facilities with sleep furniture is the degradation of the furniture due to its constant, often around-the-clock, intensive use. So we have built Jordan with heavy-duty components, construction and mechanisms. But even furniture built this way will inevitably break down over time, or be damaged, when it is in an intensive-use environment. Our unique solution to this: Jordan Sleepers (as with all other Jordan products) are constructed to allow virtually every component to be replaced on-site, when it becomes damaged or degraded. There is no limit to the life cycle of Jordan products, because they are designed to be cost-effectively kept in service far beyond the life cycle of other healthcare furniture. Jordan Sleepers provide an unparalleled return on investment, and the ability to extend their life cycle makes them an investment in environmental sustainability, as well.

Our research showed us the importance of space constraints in caregiving environments - so we designed Jordan with proportions that provide a very comfortable sleeping and sitting experience, yet minimize the floorspace used. Unlike some other sleep seating, Jordan Sleepers can be extended into the chaise and sleep positions without having to pull them away from the wall, and infringe on the rest of the room. And the Jordan Sleepers' wall saver design helps to prevent damage to walls and to the chairs themselves.

JOR6-SL2UPH2

Another important feature that came from our research: a safety locking mechanism that prevents accidental release of the seat and back while seated. Dual-density foam is used in the Jordan Sleepers to provide comfort and support in each of the three positions the Sleepers provide: sleeping or resting in a lay-flat position, sleeping or resting in a chaise lounge position, and sitting in an upright seated position.

The Jordan Sleepers are GREENGUARD™ certified, like all Krug seating and tables. We have used materials and construction that complies with this leading standard for indoor air emissions, to ensure that our products contribute to a healthy and healing environment for both patients and staff.
