		TECHNICAL SHEET AVAILABLE FOR DOWNLOAD AT www.pscbath.com		

FIRECLAY VS. VITREOUS CHINA

FIRECLAY:

FIRECLAY IS HEAVIER, DENSER AND THICKER THAN REGULAR CLAY.

THE CLAY MATERIAL HOLDS A GREATER AMOUNT OF QUARTZ AND FELDSPAR BENEATH THE VITREOUS SURFACE.

THESE PROPERTIES INSURE SMOOTH, FLAT SURFACES ON LARGE FIXTURES WHICH IS NOT ACHIEVABLE WITH STANDARD VITREOUS CHINA.

VITREOUS CHINA:

CERAMIC MATERIALS MADE FROM INORGANIC, NON METALLIC MATERIALS WITH A CRYSTALLINE STRUCTURE FIRED AT HIGH TEMPERATURE TO FORM A NON-PORUS BODY, HAVING EXPOSED SURFACE COATED WITH CERAMIC GLAZE FUSED TO THE BODY.

THE PRICES DO NOT INCLUDE GRID DRAIN, P-TRAPS OR FAUCETS.

THE PRICES ARE F.O.B. MIAMI, FL. CRATING, PACKING & SHIPPING ARE ADDITIONAL CHARGES.

THE PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE.
