

ANDERSEN BED DESIGN RODOLFO DORDONI

Struttura: testata e giroletto perimetrale realizzati in legno multistrati assemblati tra loro mediante angolari in metallo che permettono un facile montaggio del letto.

Preparazione della struttura: testata e giroletto imbottiti in poliuretano espanso ad alta resilienza a quote differenziate (waterlily esente da CFC). La struttura del giroletto è rivestita con fibra termolegata ed accoppiata con tela di cotone bianca che conferisce morbidezza e soffici   alla struttura isolandola dal tessuto. L'interno della testata del letto   rivestita da una trapunta imbottita con fibra anallergica canalizzata, che conferisce soffici   e comfort all'appoggio della testa, quasi fosse il cuscino di un divano.

Base: realizzata con telaio in metallo a sezione rettangolare mm 30x15 con finitura color Peltro (tonalit   ideata da Minotti Studio). Appoggio a terra tramite piedini (disegnati e progettati da Minotti Studio) stampati in metallo pressofuso colore Peltro con finitura extra-lucida anti-touch. Questi piedini sono in grado di resistere a circa 300 ore di nebbia salina (salsedine marina) e sono resistenti a graffi, sostanze chimiche, urti (data la loro notevole plasticit  ) e ai raggi ultravioletti. Scivolante protettivo in Hytre   (gomma morbida antigraffio).

Sfoderabilit  : il rivestimento   completamente sfoderabile nella versione in tessuto.

N.B.: caratteristica del letto   la possibilit   di regolazione dell'altezza di inserimento della rete, infatti il supporto reggirete pu  essere agganciato al giroletto in diverse posizioni per accogliere qualsiasi tipo di rete. Tre posizionamenti della rete a tre altezze differenti rispetto al bordo letto: cm 8, cm 10,5 e cm 13.

Frame: one-piece headboard, multi-ply wood footboard and frame, assembled by means of user-friendly metal corner joints.

Frame preparation: headboard and frame padded with high resilience polyurethane foam of various densities (CFC-free Waterlily). The frame is covered with fibre thermally bound to white canvas, which results in soft upholstery, while separating it from the fabric. The headboard is lined with a quilt padded with antiallergenic fibre divided into sections, which results in enhanced softness and comfort for the head, almost like a sofa cushion.

Base: with metal frame, rectangular section, 30x15 mm; Pewter-coloured finish (shade devised by Minotti Studio). Feet (designed by Minotti Studio), die-cast metal pressed, pewter-coloured; ultra-glossy, anti-touch finish. These feet can withstand saline mist (sea salt) for approximately 300 hours and are resistant to scratches, chemical substances, shocks (due to their plasticity) and UV rays. Protective glides made of Hytre   (soft, scratch-proof rubber).

Covers: fully removable in the fabric version.

ATT.: the bed is peculiar in that it is provided with a vertically adjustable spring: the spring support can be fitted into the frame in several positions, to accomodate various spring types. Three distances between the spring and the bed edge: cm 8, cm 10,5 and cm 13.

Rahmen: Kopfteil und Bettrahmen aus Multiplex-Platten. Bettteile  ber Metallwinkel miteinander verbunden, die ein einfaches Zusammenbauen des Bettes erm glichen.

Herstellung des Rahmens: das Kopfteil und die Betteinfassung sind mit extrem widerstandsf higem Polyurethan unterschiedlicher Dichte gepolstert (Waterlily, frei von Chlor, Fluor und Karbid). Der Bettrahmen ist mit gebundener Thermofaser bezogen und mit einem wei en Baumwolltuch kombiniert, durch das die F llung weich und locker wirkt und das vom Stoff distanziert.

Das Innere des Kopfteils ist mit einer mit kanalisierter, anallergischer Faser gef ttertten Steppdecke bezogen, durch die die Kopfst tze weich und bequem wirkt, fast wie das Kissen eines Sofas.

Gestell: aus einem Metallrahmen mit rechteckigem Schnitt 30x15 mm und zinnfarbenem Finish (von Minotti Studio erfundener Farbton). Bodenaufgabe durch (von Minotti Studio entworfene und entwickelte) F  e, die im Metalldruckgussverfahren gegossen und mit einem zinnfarbenen Extraglanzack endgefertigt werden. Diese F  e sind ungef hr 300 Stunden gegen Salznebel (Meeressalz) best ndig und sind kratzsch  e, chemikalienbest ndig, sto fest (aufgrund ihrer herausragenden Formbarkeit) und UV-strahlenbest ndig. Gleitschutz aus Hytre   (weicher, kratzsicherer Gummi).

Abnehmbare Bez ge: Stoffbezug komplett abnehmbar.

ANMK: Bett mit h h enverstellbarem Lattenrost, der am Bettrahmen in verschiedenen Positionen eingeh ngt werden kann, um sich an alle Arten von Lattenrosten anzupassen. Drei Positionen mit Distanz vom Bettrand: 8 cm, 10,5 cm und 13 cm.

Structure: t  te de lit monobloc, pied de lit et cadre en bois multicouches assembl  s entre eux   l'aide d'  l  ments d'angle en m  tal qui procurent une grande simplicit   de montage du lit.

Pr  paration de la structure: t  te du lit et cadre rembourr  s en polyur  thane expans     haute r  silience   cotes diff  renci  es (Waterlily sans CFC). La structure du tour de lit est rev  tue de fibre thermoli  e doubl  e d'une toile de coton blanc qui procure douceur et souplesse   la structure tout en l'isolant du tissu. L'int  rieur de la t  te de lit est rev  tue d'une matelassure rembourr  e de fibre anallergique   secteurs, qui apporte douceur et confort pour l'appui de la t  te comme s'il s'agissait du coussin d'un divan.

Base: r  alis  e avec ch  assis en m  tal de section rectangulaire 30x15 mm avec finition couleur   tain (tonalit   con  ue par Minotti Studio). Pi  tement (con  u et r  alis   par Minotti Studio) en acier moul   sous pression, couleur   tain avec finition ultra brillante anti-touch. Pi  tement r  sistant   environ 300 heures de brouillard salin (salinit   marine), aux   raflures, aux substances chimiques, aux chocs (en raison de leur incroyable plasticit  ) et aux rayons ultraviolets. Patin de protection en Hytre   (caoutchouc souple anti  raflure).

Possibilit   d'enlever la housse: le rev  tement en tissu est enti  rement d  houssable.

RMQ: le lit permet un r  glage en hauteur de la position du sommier; le porte-sommier peut   tre fix     la structure du lit en diff  rentes positions, ce qui permet d'installer n'importe quel type de sommier. Trois positions avec d  tachement du bord du lit: cm 8, cm 10,5 et cm 13.
