

915

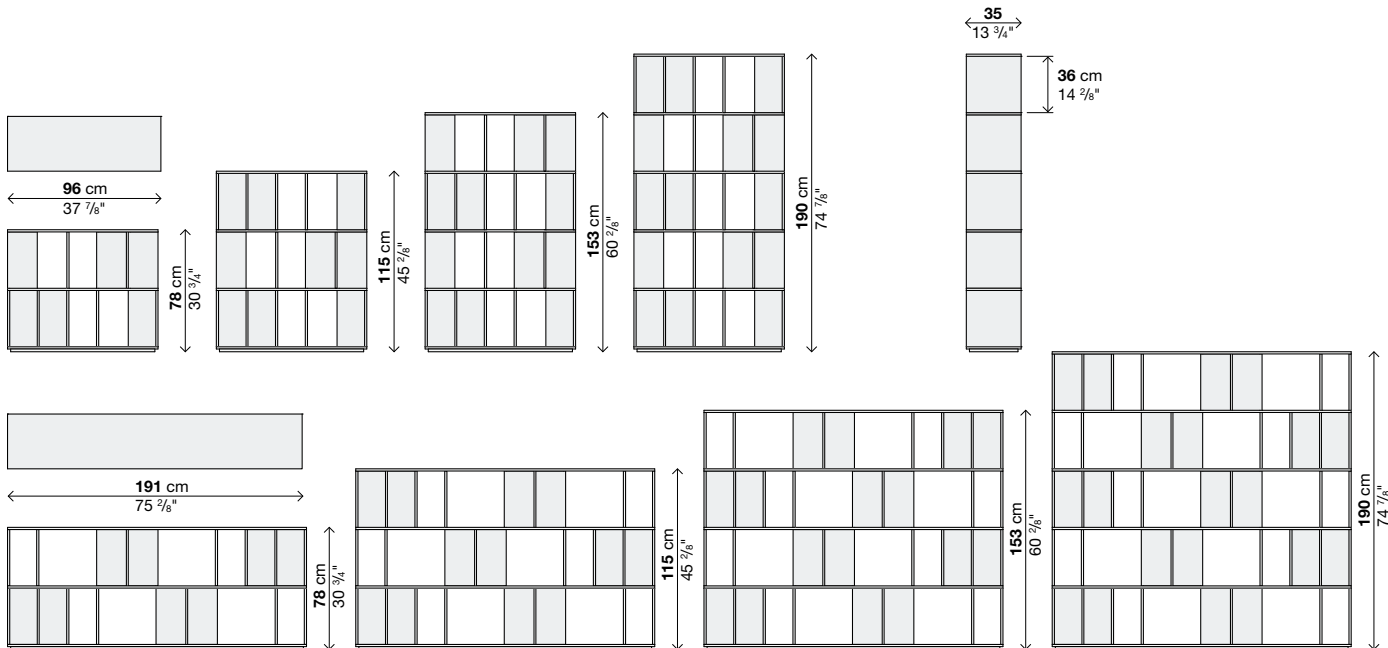

Designed by Bartoli Studio

This bookcase can evolve over the years, changing dimension, layout and space, for those who have a dynamic outlook on their home and interests. The system is based on horizontal shelves connected by simple vertical or L-shaped elements, which can be assembled as required with plastic dowels. The bookcase can be placed against a wall or in the middle of a room, depending on the position of its L-shaped elements. Everything can be easily dismantled, re-assembled and integrated, providing infinite solutions, even with increased load-bearing capacity.

- Finish:**
Satin-finish white lacquer (LG1)
Satin-finish black lacquer (LG2)
