Re: Potential LEED credits for projects using Combination (*based on LEED-NC, version 3*)

To whom it may concern:

**Indoor Environmental Quality Credit 4.3 (1 point): Low-Emitting Materials - Flooring Systems**  
Combination meets the requirements of the Resilient Floor Covering Institute's FloorScore program. Combination is FloorScore certified. Combination may contribute to LEED IEQ Credit 4.3.

**Materials & Resources Credit 4 (1 - 2 points): Recycled Content**  
Combination is manufactured from both pre-consumer and post-consumer materials. Combination may contribute to LEED MR Credit 4.

- 100% Black tiles have 90.1% post-consumer recycled content.
- Tiles with 20% intensity have 87.4% post-consumer and 0.5% pre-consumer recycled content.
- Tiles with 50% intensity have 82.9% post-consumer and 1.4% pre-consumer recycled content.
- Tiles with 90% intensity have 74.9% post-consumer and 3% pre-consumer recycled content.

**Materials & Resources Credit 5 (1 - 2 points): Regional Materials**  
The manufacturing facilities are located in British Columbia, Canada. Depending upon the project location, using these products may qualify for LEED MR Credit 5.

If you require any further information, please do not hesitate to contact us.

Sincerely,

Scott Robichaud  
President
