Re: Potential LEED credits for projects using Spectation (*based on LEED-NC, version 3*)

To whom it may concern:

Materials & Resources Credit 4 (1 - 2 points): Recycled Content

Spectation is manufactured from approximately 35% pre-consumer recycled content. Spectation may contribute to LEED MR Credit 4.

Materials & Resources Credit 6 (1 point): Rapidly Renewable Materials

Spectation reduces the use of and depletion of finite raw materials and long-cycle renewable materials by replacing them with rapidly renewable materials. 20% of Spectation is made of natural rubber. Natural rubber is considered a rapidly renewable material. Spectation may contribute to LEED MR Credit 6.

If you require any further information, please do not hesitate to contact us.

Sincerely,
